Lloyds Bank plc

Strategic report

Principal activities

Lloyds Bank plc (the Bank) and its subsidiary undertakings (the Group) provide a wide range of banking and financial services through branches and offices in the UK and in certain locations overseas.

The Group's revenue is earned through interest and fees on a broad range of financial services products including current accounts, savings, mortgages, credit cards, motor finance and unsecured loans to personal and business banking customers; and lending, transactional banking, working capital management, risk management and debt capital markets services to commercial customers.

Business review

Income statement

During the year ended 31 December 2021, the Lloyds Bank Group recorded a profit before tax of £5,785 million, an increase of £4,456 million compared with £1,329 million in 2020; the increase reflected, in particular, the improved economic outlook for the UK in 2021. The Lloyds Bank Group profit before tax for the year ended 31 December 2021 included a profit before tax of £5,024 million from its Retail division and a profit before tax of £1,536 million from its Commercial Banking division.

Total income increased by £88 million, or 1 per cent, to £14,673 million in 2021 compared with £14,585 million in 2020, reflecting an increase of £266 million in net interest income partly offset by a decrease of £178 million in other income.

Net interest income was £11,036 million in 2021, an increase of £266 million, or 2 per cent compared to £10,770 million in 2020. Average interest earning assets increased by £2,762 million to £576,276 million in 2021 compared to £573,514 million in 2020 as growth in new mortgage lending was offset by lower balances in the closed mortgage book, credit cards and motor finance, as well as the continued optimisation of the Corporate and Institutional book within Commercial Banking. The net interest margin increased as the benefit of lower funding costs more than offset the impact of a change in asset mix.

Other income was £178 million, or 5 per cent, lower at £3,637 million in 2021 compared to £3,815 million in 2020.

Net trading income was £365 million lower at £385 million in 2021 compared with £750 million in 2020, reflecting the change in fair value of interest rate derivatives and foreign exchange contracts in the banking book not mitigated through hedge accounting. Other operating income was £51 million, or 2 per cent, lower at £1,999 million in 2021 compared to £2,050 million in 2020, reflecting lower levels of operating lease rental income, as a result of a reduction in the Lex vehicle fleet size, and reduced gains on disposal of financial assets at fair value through other comprehensive income, partly offset by increases in the level of cost recharges to other Lloyds Banking Group entities. Fee and commission income was £271 million, or 14 per cent, higher at £2,195 million compared to £1,924 million in 2020 as a result of increases across most fee categories as customer activity increased and the economy improved. Fee and commission expense increased by £33 million, or 4 per cent, to £942 million compared with £909 million in 2020, as a consequence of increased customer activity.

Operating expenses increased by £1,010 million, or 11 per cent to £10,206 million in 2021 compared with £9,196 million in 2020 primarily reflecting higher charges for regulatory and legal provisions (see below). Staff costs were £77 million, or 2 per cent, higher at £3,692 million in 2021 compared with £3,615 million in 2020; as the impact of staff reductions and lower levels of redundancy costs has been offset by higher bonus accruals following the recovery in the Group's profitability. Premises and equipment costs were £210 million lower at £215 million in 2021 compared with £425 million in 2020, reflecting higher gains on disposal of operating lease assets at the end of the contract term and gains on disposal of Group premises. Other expenses were £1,040 million, or 42 per cent, higher at £3,522 million in 2021 compared with £2,482 million in 2020, driven by the increase in charges for regulatory and legal provisions and higher communications and data processing costs as the Group develops and maintains its information technology infrastructure. Depreciation and amortisation costs were £107 million, or 4 per cent, higher at £2,777 million in 2021 compared to £2,670 million in 2020, in part reflecting a software asset write-off as a result of investment in new technology and systems infrastructure.

The Group incurred a regulatory and legal provisions charge in operating expenses of £1,177 million in 2021 compared to £414 million in 2020. The charge in 2021 includes the costs in relation to HBOS Reading and litigation costs and redress and operational costs in respect of litigation and other ongoing legacy programmes. During 2021, £790 million has been recognised in relation to HBOS Reading estimated future awards and operational costs, of which £600 million was recognised in the fourth quarter. This reflects the Group's estimate of its full liability and includes the expected future cost in relation to the independent Foskett Panel re-review, operational costs in relation to Dame Linda Dobbs' review which is considering whether the issues relating to HBOS Reading were investigated and appropriately reported by the Group during the period January 2009 to January 2017 and other programme costs. The final outcome could be significantly different once the re-review is concluded.

Impairment improved by £5,378 million to a credit of £1,318 million in 2021 compared with a charge of £4,060 million in 2020, largely reflecting the improved UK macroeconomic outlook. Overall the Group's loan portfolio continues to be well-positioned, reflecting a prudent through-the-cycle approach to credit risk with high levels of security. The Group's ECL allowance reduced in the year by £2,132 million to £4,000 million, compared to £6,132 million at 31 December 2020, following the improvements to the UK economic outlook. Observed credit performance remained robust in the year, with the flow of assets into arrears, defaults and write-offs remaining at low levels.

The Group's base case economic scenario used to calculate the ECL allowance assumes that unemployment will remain close to the reduced level of c.4.3 per cent observed in the fourth quarter following the end of the coronavirus job retention scheme. The ECL allowance continues to reflect a probability-weighted view of future economic scenarios built out from the base case and its associated conditioning assumptions, with a 30 per cent weighting applied to base case, upside and downside scenarios and a 10 per cent weighting to the severe downside. All scenarios have improved since the start of the year, following the changes made to the base case outlook.

In 2021, the Lloyds Bank Group recorded a tax expense of £583 million compared to a tax credit of £137 million in 2020. The tax charge in 2021 includes a credit of £1,168 million arising on the remeasurement of deferred tax assets following the substantive enactment by the UK Government of an increase in the corporation tax rate from 19 per cent to 25 per cent, effective on 1 April 2023.

The Lloyds Bank Group's post-tax return on average total assets increased to 0.86 per cent compared to 0.24 per cent in the year ended 31 December 2020.

Lloyds Bank plc

Strategic report

Balance sheet

Total assets were £2,910 million higher at £602,849 million at 31 December 2021 compared to £599,939 million at 31 December 2020. Cash and balances at central banks were £4,391 million, or 9 per cent, higher at £54,279 million compared to £49,888 million at 31 December 2020 reflecting increased liquidity holdings as a result of the inflow of customer deposits; and retirement benefit assets were £2,817 million higher at £4,531 million compared to £1,714 million at 31 December 2020 as a result of actuarial gains and employer contributions. Financial assets at amortised cost decreased by £1,650 million to £490,316 million compared to £491,966 million at 31 December 2020. Loans and advances to customers increased in the year by £5,135 million to £430,829 million, compared to £425,694 million at 31 December 2020, however this was more than offset by a decrease in reverse repurchase agreements, held for liquidity purposes, of £6,365 million, or 11 per cent, from £56,073 million at 31 December 2020 to £49,708 million at 31 December 2021. The increase in loans and advances to customers reflected growth in the open mortgage book, partly offset by reductions in the closed mortgage book, other Retail balances and Commercial lending (in part due to optimisation activities). Derivative financial instruments were £2,830 million lower at £5,511 million compared to £8,341 million at 31 December 2020, driven by movements in the yield curve.

Total liabilities were £3,256 million, or 1 per cent, higher at £562,077 million compared to £558,821 million at 31 December 2020. Customer deposits were £24,221 million, or 6 per cent, higher at £449,373 million at 31 December 2021 compared to £425,152 million at 31 December 2020. There has been continued growth in retail current account and savings balances, reflecting reduced consumer spending during the coronavirus pandemic, which has only been partly offset by lower levels of commercial deposits. Repurchase agreement balances were £1,922 million, or 7 per cent, higher at £30,106 million compared to £28,184 million at 31 December 2020 however deposits from banks were £2,867 million lower at £3,363 million compared to £6,230 million at 31 December 2020 reflecting a reduced need for this source of funding. Debt securities in issue were £10,569 million lower at £48,724 million at 31 December 2021 compared to £59,293 million at 31 December 2020 as the availability of Government support and liquidity measures and increased levels of customer deposits have reduced the need for new funding issuance. Amounts due to fellow Lloyds Banking Group undertakings were £5,385 million lower at £1,490 million compared to £6,875 million at 31 December 2020 and derivative liabilities were £3,585 million lower at £4,643 million compared to £8,228 million at 31 December 2020, again driven by movements in the yield curve.

Total equity has decreased by £346 million, or 1 per cent, from £41,118 million at 31 December 2020 to £40,772 million at 31 December 2021 as retained profits for the year have been offset by dividends paid and a net redemption of other equity instruments; and a negative movement on the Group's cash flow hedging reserve has been offset by a positive remeasurement in respect of the Group's post-retirement defined benefit schemes.

Capital

The Group's common equity tier 1 (CET1) capital ratio has increased to 16.7 per cent (31 December 2020: 15.5 per cent) largely reflecting profits for the year and a reduction in risk-weighted assets, partially offset by dividends paid (net of the brought forward foreseeable dividend accrual), pension contributions made to the defined benefit pension schemes and a release of IFRS 9 transitional relief which largely offset the impairment credit through profits.

Risk-weighted assets reduced by £9,286 million, or 5 per cent, from £170,862 million at 31 December 2020 to £161,576 million at 31 December 2021. This was primarily as a result of optimisation activity undertaken in Commercial Banking, partially offset by balance sheet growth in the business. Credit migrations have had a limited impact on the risk-weighted asset position, in part due to the increase in house prices.

The transitional total capital ratio remained at 23.5 per cent, with the benefit of the increase in CET1 capital and reduction in risk-weighted assets broadly offset by reductions in Additional Tier 1 (AT1) and Tier 2 capital instruments. The latter largely reflected the reduction in transitional limits applied to legacy tier 1 and tier 2 capital instruments and calls made on both AT1 and tier 2 capital instruments, partially offset by new issuances.

The UK leverage ratio reduced to 5.3 per cent (31 December 2020: 5.5 per cent) as a result of the reduction in the fully loaded total tier 1 capital position which was partially offset by the reduction in the leverage exposure measure, the latter primarily reflecting movements in securities financing transactions and off-balance sheet items, net of increased balance sheet lending.

Future developments

Information about future developments is provided within the Principal risks and uncertainties section below.

Reflecting the needs of stakeholders in Board decisions

The Board is responsible for the long-term success of the Bank, setting and overseeing culture, purpose, values and strategy. The Board's understanding of stakeholders' interests is central to these responsibilities, and informs key aspects of Board decision-making.

Acknowledging the breadth of the Bank's stakeholders and the size of the organisation, stakeholder engagement takes place at a number of levels. In addition to direct engagement by members of the Board, the Board considers the stakeholder impacts of all proposals submitted to it from across the Bank. Stakeholder interests are central to the Board's delegation of the management of the business to the Executive.

In turn the Executive, including the Group Chief Executive and Chief Financial Officer, routinely provide the Board with details of non-Board stakeholder interaction and feedback through their regular business updates. Stakeholder interests are also identified by the Executive for consideration in all other proposals put to the Board.

Interaction has again mostly been undertaken virtually this year where necessary, in compliance with the government's COVID-19 requirements.

Section 172(1) Statement

In accordance with the Companies Act 2006 (the Act), the Directors provide this statement describing how they have had regard to the matters set out in section 172(1) of the Act, when performing their duty to promote the success of the Bank under section 172. Further details on key actions are also contained within the Corporate Governance Statement on pages 10 to 13.

The Directors remain mindful in all their deliberations of the long-term consequences of their decisions, as well as the importance of the Bank maintaining a reputation for high standards of business conduct and the Board engaging with, and taking account of the views of, key stakeholders.

Key Stakeholder Engagement

The Non-Executive Directors undertook an engagement programme which allowed them to hear directly from customers, clients and colleagues, to help understand what matters in their lives, the role the Bank plays in supporting them and how the Bank is performing in that regard. A range of activities took place, which will extend into 2022, including meeting with customers, attending client visits and sitting with colleagues to understand the Bank's culture and discuss future ways of working. The Non-Executive Directors found these sessions to be of great benefit, giving many valuable insights which they take account of, as appropriate, in their decision-making.

Lloyds Bank plc

Strategic report

Our Stakeholders

Customers

The Board remains committed to understanding and addressing our customers' needs, which is vital to setting and achieving the Bank's goals. Examples of Board engagement with customers included:

- Regular Board updates identifying key areas of customer concern, covering a range of internal and external measures including customer indices and market share updates
- These regular updates gave valuable insight into performance in delivering on customer-related objectives, on improving customer outcomes and in determining where further action was required
- The Group Chief Executive attended customer engagement events, an important opportunity for customers to raise any concerns directly

Shareholders

The Bank is a wholly owned subsidiary of Lloyds Banking Group. The Directors ensure that the strategy, priorities, processes and practices of the Bank are fully aligned where required to those of Lloyds Banking Group, ensuring that the interests of Lloyds Banking Group as the Bank's sole shareholder are duly acknowledged. Further information in respect of the relationship of Lloyds Banking Group with its shareholders is included within the Strategic Report within the Lloyds Banking Group Annual Report and Accounts for 2021, available on the Lloyds Banking Group website.

Colleagues

Colleagues are central to the delivery of strategy and ambitions and this is recognised by the Board in its engagement with colleagues throughout the year. In 2021, the Board reviewed how it engages with the workforce and decided that the Responsible Business Committee should be the designated body for the Board's engagement with the workforce, creating a dedicated resource of Non-Executive Directors, while retaining a commitment for the whole Board to continue to engage with colleagues. The Responsible Business Committee reports regularly to the Board on all of its activities, including colleague engagement.

The Board will continue to consider its arrangements in engagement with the workforce to ensure the arrangements remain effective and continue to give a meaningful understanding of the views of the workforce and to encourage dialogue between the Board and the workforce.

Examples of Board engagement included:

- Consideration by the Responsible Business Committee of regular workforce engagement updates, covering key themes raised by colleagues, trends on people matters and updates on colleague sentiment
- A further annual report summarising engagement activity, key themes and issues raised during the year
- Consideration of the outcomes of surveys completed by colleagues, including annual and adhoc surveys, and review of progress in addressing the matters colleagues raised
- Board member attendance at a range of business area leadership meetings, Community Calls and colleague network events
- Informal colleague dinners and breakfast meetings were held by the Group Chief Executive
- Town Hall sessions hosted by both the Chair and the Group Chief Executive with Board member attendance, complemented by engagement sessions led by other senior leaders, with feedback shared with the wider Board

During the year the Bank communicated directly with colleagues detailing performance, changes in the economic and regulatory environment and updates on key strategic initiatives. Meetings were held throughout the year between the Bank and our recognised unions.

Given improved Bank performance in 2021, the Remuneration Committee approved Group Performance Share awards for colleagues. Colleagues are eligible to participate in HMRC-approved share plans which promote share ownership by giving employees an opportunity to invest in Lloyds Banking Group shares.

Society and environment

The Board places great importance on engagement and action to help these communities prosper, and to help build a more sustainable and inclusive future. Engagement with communities, and as relevant to environmental considerations included:

- Dedicated updates on climate, environmental, social and governance related matters, covering all aspects of the Bank's business, and the Board reviews progress against any action it considers is required
- The Board is supported in environmental matters by its Responsible Business Committee, which considers stakeholder views on all matters relating to the Group's goals to be a trusted, sustainable, inclusive and responsible business.
- The Board continues to value the support of Lloyds Banking Group's regional colleague ambassadors, who help in establishing strong relationships with local politicians, councils and other community institutions across the UK

Regulators and government

The Board continues to maintain strong and open relationships with our regulators and government authorities, including key stakeholders such as HMRC and HM Treasury. Relevant engagement included:

- The Chair and individual Directors, in particular the Chairs of the Board's committees, held continuing discussions with the FCA and PRA on a number of aspects of the regulatory agenda
- The Board regularly reviewed updates on wider regulatory interaction, providing a view of key areas of regulatory focus, and also progress made in addressing key regulatory priorities
- A meeting was held between the Board and the PRA to discuss the outcome and progress of action relevant to the PRA's Periodic Summary Meeting letter

Lloyds Bank plc

Strategic report

Suppliers

The Group relies on a number of partners for important aspects of our operations and customer service provision. The Board recognises the importance of these relationships, and engagement with suppliers included:

- The Board continues to have zero tolerance towards modern slavery in the supply chain, and receives updates on ongoing enhancements to the Group's supplier practices, including measures to address the risk of human trafficking and modern slavery in our wider supply chain

Key Decisions

Climate change

Investors, customers, regulators & government and society & environment

The Board remains committed to the ambitious climate change goals set for Lloyds Banking Group in 2020, including reducing the emissions we finance by more than 50 per cent by 2030 and achieving net zero by 2050 or sooner, with a number of key steps already having been taken in this regard, under the Board's supervision. The Board has also given much consideration to progress against these objectives, and during the year oversaw a number of additional commitments to further drive progress.

These included three new pledges specifically relevant to operations, ranging from further reducing our own carbon footprint with targets for reduced emissions and energy use in respect of buildings and colleague travel, and related collaboration with key stakeholders including our suppliers. Progress against all of related initiatives and activities continues to be closely monitored by the Board. Climate ambitions and related stakeholder interests have also been a key consideration for the Board during the course of the year in the development of purpose and strategy.

Further information on our progress in meeting climate ambitions can be found in Lloyds Banking Group's supplementary 2021 Climate Report.

Ways of working and culture

Colleagues and suppliers

Transforming ways of working has been a key priority for the Board, as colleagues have continued to adjust to the changes necessitated by the COVID-19 pandemic, which have now resulted in fundamental changes in how people work. The Board recognised the importance of reacting to these changes as they evolved during the year, and oversaw a multiphase transition to new ways of working, acknowledging both external change and colleague sentiment.

The Board has overseen the development of an 'activity led' approach to hybrid working, recognising that the diverse nature of jobs within the Bank and the colleagues who fulfil them, means that a 'one size fits all' approach to hybrid working would not be appropriate. The Board has focused on ensuring the overarching vision for future ways of working remained grounded in evolving values and behaviours by adopting a 'test and learn' approach, prioritising colleague safety and wellbeing throughout.

The Board understands that both the physical and technological workplace need to change to align to colleague needs now and in the future. It has supported the acceleration of activity under the Future Workplace programme to transform office work spaces and deploy modern workplace technology enablers for new ways of working.

In addition, the Board has continued to oversee initiatives to implement cultural change through the Lloyds Banking Group culture plan. This plan covers areas including career progression, simplification of processes and ensuring colleagues are given the opportunity to continually develop their skills to meet the changing needs of our customers. It is continually developed based on both colleague feedback and in response to external events.

Strategy

Investors, colleagues, regulators & government and society & environment

As implementation of Strategic Review 2021 completed, and our new Group Chief Executive joined the organisation in August, the Board considered that this was the appropriate time to revisit the strategy for the coming years, ensuring that the focus remained on our central purpose of Helping Britain Prosper. To that end, under the Board's guidance, the Group Chief Executive led a process of reviewing the strategic priorities.

The development of the new strategy drew on the customer insights the Bank and Board gathers through regular surveys and interactions with our customers, feedback from bi-annual colleague surveys, and proactive regular engagement with our regulators and other stakeholders. The Bank also sought feedback on specific aspects of the strategy development, such as the new mission, through colleague surveys and interactive sessions, as well as targeted customer and client research. In addition to regular sessions, the Board held a number of dedicated sessions with senior management during the development of the strategy, allowing both reflection on stakeholder feedback and input from Board members on key aspects of the development of the strategy.

This included the requirement for the strategy to be driven by our purpose, ensuring focus on meeting customer needs in a conduct-friendly manner, and moving the business to more sustainable growth. The Board will continue to take the invaluable feedback and views of its stakeholders into consideration as the new strategy is implemented, ensuring we stay true to our commitments to meeting the needs of all our stakeholders.

Lloyds Bank plc Strategic report

RISK OVERVIEW

EFFECTIVE RISK MANAGEMENT AND CONTROL

Our approach to risk

Lloyds Bank Group adopts the Lloyds Banking Group enterprise risk management framework supplemented by additional management and control activities to address the Lloyds Bank Group's specific requirements.

Employing informed risk decision-making and robust risk management, supported by a consistent risk-focused culture; striving to protect the Group and its stakeholders.

A prudent approach to risk is fundamental to our business model and drives our participation choices.

The risk management section from pages 15 to 67 provides an in-depth picture of how risk is managed within the Group, including the approach to risk appetite, risk governance, stress testing and detailed analysis of the principal risk categories including the framework by which these risks are identified, managed, mitigated and monitored.

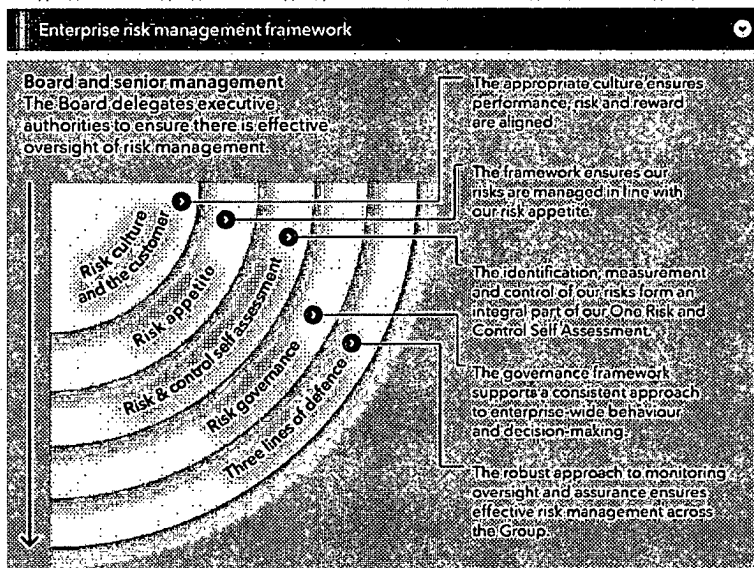

Our enterprise risk management framework

Lloyds Banking Group's comprehensive enterprise risk management framework, that applies to Lloyds Bank Group, is the foundation for the delivery of effective risk control. It enables proactive identification, active management and monitoring of the Group's risks, which is supported by our One Risk and Control Self-Assessment approach.

The Group's risk appetite, principles, policies, procedures, controls and reporting are regularly reviewed and updated to ensure they remain fully in line with regulation, law, corporate governance and industry good practice.

The Board is responsible for approving the Group's Board risk appetite statement annually. Board-level risk appetite metrics are augmented by further sub-Board level metrics and cascaded into more detailed business metrics and limits. Regular close monitoring and comprehensive reporting to all levels of management and the Board ensures appetite limits are maintained and subject to stress analysis at a risk type and portfolio level, as appropriate.

Governance is maintained through delegation of authority from the Board down to individuals. Senior executives are supported by a committee-based structure which is designed to ensure open challenge and enable effective Board engagement and decision-making. More information on our Risk committees is available on pages 19 to 20.

Risk culture and the customer

Following the successful transition between the previous, interim and new Lloyds Banking Group Chief Executives, a transparent risk culture continues to resonate across the organisation and is supported by the Board and its tone from the top.

Risk management requires all colleagues to play their part, with individuals taking responsibility for their actions. The Group aims to support this through ongoing investment in infrastructure and developing colleagues' capabilities.

Senior management articulate the core risk values to which the Group aspires, based on the Group's prudent business model and approach to risk management with the Board's guidance.

The Group is open, honest and transparent with colleagues working in collaboration with business areas to:

- Support effective risk management and provide constructive challenge
- Share lessons learned and understand root causes when things go wrong
- Consider horizon risks and opportunities

The Group aims to maintain a strong focus on building and sustaining long-term relationships with customers through the economic cycle.

Lloyds Bank plc

Strategic report

Connectivity of risks and our strategic risk management framework

COVID-19 has demonstrated how individual risks in aggregate, through their interconnectivity, can place significant pressure on the Group's strategy, business model and performance. In response to these unprecedented events, a new strategic risk management framework was approved.

Extensive work has been undertaken in 2021 to build a deeper analytical understanding of the Group's key strategic risk themes and risk connectivity. The Group is committed to advancing these capabilities in 2022, while further integrating strategic risk into Group-wide business planning, placing it at the heart of our strategic priorities and Group-wide risk management.

The risks can be defined as:

Principal: The Board-approved enterprise-wide risk categories, including strategic risk, used to monitor and report the risk exposures posing the greatest impact to the Group.

Strategic: A principal risk arising from:

- A failure to understand the potential impact of strategic responses on existing risk types
- Incorrect assumptions about internal or external operating environments
- Inappropriate strategic responses and business plans

Emerging: A future internal or external event or trend, which could have a material positive or adverse impact on the Group and our customers, but where the probability, timescale and/or materiality may be difficult to accurately assess.

PRINCIPAL RISKS

Despite a resilient recovery, 2021 has been another year of significant uncertainty, with COVID-19 accelerating broad structural changes, including ways of working and impacts to global and domestic economies.

COVID-19 has continued to have a significant impact on all risk types in 2021. Understanding and managing its impacts dynamically has remained a major area of focus. The Group has responded quickly to the challenges faced, putting in place risk mitigation strategies and refining its investment and strategic plans.

All of the Group's principal risks, which are outlined in this section, are reported regularly to the Board Risk Committee and the Board.

As part of a review of the Group's risk categories, governance risk is no longer a principal risk and is now classified as a secondary risk category. A detailed review of the Group's enterprise risk management framework is planned for 2022, which may result in further changes to our principal risks.

The risk management section from pages 15 to 67 provides a more in-depth picture of how each principal risk is managed within the Group.

Risk trends: → Stable risk ↑ Increased risk ↓ Decreased risk ⊖ New risk embedding

Market risk →

The Group's structural hedge has increased to £235 billion (2020: £181 billion) mostly due to a significant growth in customer deposits. Both customer behaviour and hedging of these balances are reviewed regularly to ensure near-term interest rate exposure is managed.

The Group's defined benefit pension schemes have seen an improvement in IAS 19 accounting surplus to £4.3 billion, (2020: £1.5 billion). This is due to strong asset returns, an increase in the discount rate and deficit reduction contributions, partially offset by higher gilt yields and inflation.

Key mitigating actions:

- Structural hedge programmes implemented to stabilise earnings
- Equity and credit spread risks are closely monitored and, where appropriate, asset and liability matching is undertaken
- The Group's defined benefit pension schemes continue to monitor their credit allocation and longevity hedge as well as the hedges in place against nominal rate and inflation movements

Credit risk ↓

The Group continued to actively support its customers throughout 2021, with a range of flexible options and payment holidays, as well as lending through the UK Government support schemes. This support, alongside the other public policy interventions, has contributed to the economic recovery in 2021 and helped keep credit defaults and business failures at low levels.

The improved economic outlook was a key driver of the 2021 impairment credit of £1,318 million, which compares to the full year impairment charge of £4,060 million taken in 2020 in light of anticipated losses resulting from the pandemic. Although reduced in 2021, the Group still holds appropriate customer related expected credit loss allowances of £3,998 million (2020: £6,127 million).

Key mitigating actions:

- Prudent, through-the-cycle risk appetite
- Robust risk assessment, models and credit sanctioning
- Sector and asset class concentrations closely monitored and controlled
- Group-wide Road to Recovery programme established to manage and support increases in businesses experiencing financial difficulties

Lloyds Bank plc

Strategic report

Funding and liquidity risk ↓

The Group maintained its robust funding and liquidity position throughout 2021.

Ahead of the closure of the Term Funding Scheme with additional incentives for SMEs (TFSME) in October 2021, the Group drew additional funds, taking the total amount outstanding to £30 billion as at 31 December 2021, facilitating a significant reduction in money market and wholesale funding.

Key mitigating actions:

- The Group manages and monitors liquidity risks and ensures that liquidity risk management systems and arrangements are adequate with regard to the internal risk appetite, Group strategy and regulatory requirements
- Significant customer deposit base, driven by inflows to trusted brands

Capital risk ↓

The Group's common equity tier 1 (CET1) capital ratio has increased to 16.7 per cent (31 December 2020: 15.5 per cent) largely reflecting profits for the year and a reduction in risk-weighted assets, partially offset by dividends paid (net of the brought forward foreseeable dividend accrual), pension contributions made to the defined benefit pension schemes and a release of IFRS 9 transitional relief which largely offset the impairment credit through profits.

The implementation of regulatory changes on 1 January 2022 reduced the CET1 capital ratio to 14.1 per cent which remains above internal risk appetite levels and minimum regulatory capital requirements.

Key mitigating actions:

- The Group has a capital management framework that includes the setting of capital risk appetite and capital planning and stress testing activities
- The Group monitors early warning indicators and maintains a Capital Contingency Framework as part of the Lloyds Banking Group Recovery Plan which are designed to identify emerging capital concerns at an early stage, so that mitigating actions can be taken, if needed

Change/execution risk →

The change/execution risk profile has remained stable with proactive reprioritisation and management of the Group's change portfolio continuing through 2021. Focus has remained on the ongoing evolution and strengthening of the control framework and change capability required to support the Group's business and technology transformation plans.

Key mitigating actions:

- Continued evolution and enhancement of the Group change policy, method and control environment
- Measurement and reporting of change/execution risk
- Providing sufficient skilled resources to safely deliver and embed the change portfolio and support future transformation plans

Conduct risk ↓

Overall improvement in conduct risk as a result of the Group's continued support to customers impacted by COVID-19, with focus on outcomes for customers with UK Government support schemes, treating customers in financial difficulty fairly and working through legacy issues.

Key mitigating actions:

- Robust conduct risk framework in place to support delivery of fair customer outcomes, market integrity and competition requirements
- Active engagement with regulatory bodies and key stakeholders to ensure that the Group's strategic conduct focus continues to meet evolving stakeholder expectations

Data risk →

Investment continues to be made to enhance the maturity of data risk management, data capabilities and focus on the end-to-end management of data risk, including our suppliers.

Key mitigating actions:

- Delivered a data strategy and enhanced capability in data management and privacy, assurance of suppliers and data controls and processes
- Embedded data by design and data ethics principles into the data science lifecycle

People risk →

In 2021, there has been continued pressure on colleague workloads and further significant changes to ways of working, as colleagues who worked from home during the pandemic transition into a workstyle based on their role. Colleague feedback has been provided via the annual colleague survey, and work is underway to address the key themes identified.

Key mitigating actions:

- Delivery of strategies to attract, retain and develop high calibre people with the required capabilities, together with implementation of rigorous succession planning for our senior leaders
- Continued focus on the Group's culture by developing and delivering initiatives that reinforce appropriate behaviours

Lloyds Bank plc

Strategic report

Operational resilience risk ↓

Despite ongoing heightened risks from COVID-19, business continuity plans have remained resilient. Policy statements published by the regulators in March 2021 have driven further activity to enhance the existing approach to operational resilience. Technology resilience remains a key area of focus.

Key mitigating actions:

- Refreshed operational resilience strategy to deliver against new regulation and improve the Group's ability to respond to incidents while delivering key services to customers
- Investment in technology improvements, including enhancements to the resilience of systems that support critical business processes

Operational risk →

Against the backdrop of COVID-19, economic uncertainty and changes in senior management throughout the year, the operational risk profile has remained broadly stable with operational losses in line with previous years. Cyber and security, technology and sourcing continue to be the most material operational risk areas.

Key mitigating actions:

- The Group continues to review and invest in its control environment to ensure it addresses the inherent risks faced
- The Group employs a range of risk management strategies, including: avoidance, mitigation, transfer (including insurance) and acceptance

Model risk ↑

Model risk remains above pre-pandemic levels. The effect of government-led customer support schemes weakened relationships between model inputs and outputs, and there remains a reliance on the use of judgement, particularly in the areas of forecasting and impairment. However, recent months have seen more stable patterns for model outputs, and model drivers are expected to remain valid in the longer term.

In common with the rest of the industry, changes required to capital models following new regulations will create a temporary increase in the risk relating to these models during the period of transition.

Key mitigating actions:

- The model risk management framework, established by and with continued oversight from an independent team in the Risk division, provides the foundation for managing and mitigating model risk within the Group

Regulatory and legal risk →

Regulatory engagement through 2021 has focused on the Group's response to COVID-19, strategic transformation and regulatory initiatives. Proactive engagement on emerging focus areas has helped the regulatory risk profile remain broadly stable, despite the previously announced regulatory fine relating to the past communication of historical home insurance renewals.

Legal risk continues to be impacted by the evolving UK legal and regulatory landscape due to the UK's exit from the EU and other changing regulatory standards as well as uncertainty arising from the current and future litigation landscape.

Key mitigating actions:

- Lloyds Banking Group policies and procedures set out the principles and key controls that should apply across the business which are aligned to Lloyds Banking Group risk appetite
- Business units identify, assess and implement policy and regulatory requirements and establish local controls, processes, procedures and resources to ensure appropriate governance and compliance

Strategic risk ⊖

Strategic risk is a significant source of risk for the Group, influencing the Group's strategy, business model, performance and risk profile.

Significant work has been undertaken during 2021 to understand the risk implications of the Group's strategy and the key drivers of strategic risk. These are outlined in more detail on the following pages.

Key mitigating actions:

- Considering the strategic implications of emerging trends and addressing them through our strategy
- Integration of strategic risk into business planning process and embedding into day-to-day risk management

Climate risk ⊖

The Group continued to embed climate risk into its activities, including undertaking detailed analysis of its portfolios and the pathways required to reduce the emissions that the Group finances. This included deep dives into sectors at increased risk from the impacts of climate change.

The Group has continued to develop scenario modelling capabilities and Lloyds Banking Group completed Part I of the Bank of England's 2021 Biennial Exploratory Scenario on the Financial Risks for Climate Change.

Key mitigating actions:

- Established Lloyds Banking Group climate risk policy in place
- Ongoing development of climate assessment tools and methodologies
- Climate risk is included as part of regular risk reporting to the Board
- Initial consideration of the Group's key climate risks undertaken as part of Lloyds Banking Group's financial planning process
- Continued progress against the Task Force on Climate-related Financial Disclosures (TCFD) recommendations, enhancing our climate related financial disclosures

Lloyds Bank plc

Strategic report

EMERGING RISKS

Horizon scanning and emerging risks are important considerations for the Group, enabling our business to identify the most pertinent risks and opportunities and respond through our strategic planning and long-term risk mitigation framework.

Internal working groups have been established to regularly scan the horizon and identify emerging risks. This is supplemented by consultation with external experts, to gain an external context, ensuring broad coverage.

Progress has been made this year on a data-driven approach, piloting a methodology for interrogating industry news and other external data sources, using available technology to further expand our insight. It is intended to develop this further in 2022, to incorporate more sophisticated technology and innovation practices.

In many cases, the Group's most notable emerging risks are aligned with the themes identified. These emerging risks themes raise questions in respect of our participation choices, HR policies, recruitment and retention strategies in response to the changing socio-economic, competitive and technological landscape.

The emerging risks that the Group has monitored during 2021 are outlined in more detail in pages 21 to 23 of the risk management section.

Financial risk management objectives and policies

Information regarding the financial risk management objectives and policies of the Group, in relation to the use of financial instruments, is given in notes 41 and 44 to the accounts. The Group's approach to risk management including risk policies, risk appetite, measurement bases and sensitivities, in particular for credit risk, market risk and liquidity risk, is aligned to those of Lloyds Banking Group plc, the Bank's ultimate parent. Further information can be found in the Lloyds Banking Group plc annual report.

The Group maintains risk management systems and internal controls relating to the financial reporting processes designed to:

- ensure that accounting policies are appropriately and consistently applied;
- enable the calculation, preparation and reporting of financial outcomes in line with applicable standards; and
- ensure that disclosures are made on a timely basis in accordance with statutory and regulatory requirements.

The 2021 Strategic Report has been approved by the Board of Directors.

On behalf of the Board

Robin Budenberg
Chair
Lloyds Bank plc
8 March 2022

Lloyds Bank plc

Directors' report

Results

The consolidated income statement on page 79 shows a statutory profit before tax for the year ended 31 December 2021 of £5,785 million (year ended 31 December 2020: £1,329 million).

Dividends

During the year the Bank paid interim dividends of £1,000 million and £1,900 million, a cumulative total of £2,900 million (2020: £nil). The Directors have not recommended a final dividend for the year ended 31 December 2021 (2020: £nil).

Post balance sheet events

There were no material post balance sheet events.

Going concern

The going concern of the Bank and the Group is dependent on successfully funding their respective balance sheets and maintaining adequate levels of capital. In order to satisfy themselves that the Bank and the Group have adequate resources to continue to operate for the foreseeable future, the Directors have reviewed the Bank and the Group's operating plan and its funding and capital positions, including consideration of the short-term implications of the COVID-19 pandemic and climate change. The Directors have also taken into account the impact of further stress scenarios.

Accordingly, the Directors conclude that the Group has adequate resources to continue in operational existence for a period of at least 12 months from the date of the approval of the financial statements and therefore it is appropriate to continue to adopt the going concern basis in preparing the accounts.

Corporate Governance Statement

In accordance with the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 (as amended by the Companies (Miscellaneous Reporting) Regulations 2018) (the 'Regulations'), for the year ended 31 December 2021, the Bank has in its corporate governance arrangements applied the Wates Corporate Governance Principles for Large Private Companies (the 'Principles'), which are available at www.frc.org.uk. The following section explains the Bank's approach to corporate governance, and its application of the Principles.

Fundamental to the Bank's strategy are high standards of corporate governance. A Corporate Governance Framework is in place for Lloyds Banking Group, the Bank, Bank of Scotland plc and HBOS plc, with all four companies sharing a common approach to governance. The framework is designed to meet the specific needs of each company, setting the wider approach and applicable standards in respect of the Bank's corporate governance practices, including addressing the matters set out in the Principles and the governance requirements of the operation of the Bank, as part of Lloyds Banking Group's Ring Fenced Bank.

This includes the matters reserved to the Board, and the matters the Board has chosen to delegate to management, including decision making on operational matters such as those relating to credit, liquidity, and the day-to-day management of risk. Governance arrangements, including the Corporate Governance Framework, are reviewed periodically to ensure they remain fit for purpose. The Board delegates further responsibilities to the Group Chief Executive, who is supported by the Group Executive Committee, the composition of which is detailed on pages 74 to 75 of the Lloyds Banking Group Annual Report and Accounts for 2021. The Corporate Governance Framework of the Bank further addresses the requirements of the Principles as discussed on pages 11 to 12.

Board and Committee composition and Board attendance in 2021¹²

Board Member	Board	Nomination Committee	Audit Committee	Board Risk Committee	Remuneration Committee
Robin Budenberg ¹	10/10 (C)	6/6 (C)		2/2	6/6

(C) Chair

1 The Board Risk Committee was reconstituted with effect from 29 March 2021 to streamline that Committee's membership. With effect from 29 March 2021, the Committee comprised Catherine Woods (Chair), Alan Dickinson, Sarah Legg and, until his retirement from the Board, Nick Prettejohn.

2 Charlie Nunn joined the Board on 16 August 2021.

3 Sir António Horta-Osório retired from the Board on 30 April 2021.

4 William Chalmers, Chief Financial Officer, was acting Group Chief Executive from when Sir António Horta-Osório retired on 30 April 2021 and until Charlie Nunn's appointment to the Board on 16 August 2021.

5 Alan Dickinson succeeded Stuart Sinclair as Chair of the Remuneration Committee on 24 November 2021.

6 Amanda Mackenzie joined the Nomination Committee on 23 June 2021.

7 Harmeen Mehta joined the Board on 1 November 2021.

8 Nick Prettejohn retired from the Board on 30 September 2021.

9 Stuart Sinclair plans to retire from the Board at the AGM in May 2022.

10 Sara Weller retired from the Board on 20 May 2021.

11 Unable to attend some meetings due to medical reasons.

12 Where a Director is unable to attend a meeting he/she receives papers in advance and has the opportunity to provide comments to the Chair of the Board or to the relevant Committee Chair.

Lloyds Bank plc

Directors' report

Principle One – Purpose and Leadership

The Board is collectively responsible for the long term success of the Bank. It achieves this by agreeing the Bank's strategy, within the wider strategy of Lloyds Banking Group, and overseeing delivery against it. The Bank's strategy is discussed further in the Strategic Report. The Board also assumes responsibility for the management of the culture, values and wider standards of the Bank, within the equivalent standards set by Lloyds Banking Group. The Board's understanding of stakeholders' interests is central to these responsibilities and informs key aspects of Board decision making.

Acknowledging the needs of all stakeholders is fundamental to the way the Bank operates, as is maintaining the highest standards of business conduct, which along with ensuring delivery for customers is a vital part of the corporate culture. The Bank's approach is further influenced by the need to build a culture in which everyone feels included, empowered and inspired to do the right thing for customers. To this end, the Board plays a lead role in establishing, promoting, and monitoring the Bank's corporate culture and values, with the Corporate Governance Framework ensuring such matters receive the level of prominence in Board and Executive decision making which they require. The Bank's corporate culture and values align to those of Lloyds Banking Group, which are discussed in more detail on page 80 of the Lloyds Banking Group Annual Report and Accounts for 2021.

Principle Two – Board Composition

The Bank is led by a Board comprising a Non-Executive Chair, independent Non-Executive Directors and Executive Directors, further details of the Directors can be found on page 14. The Board considers its composition regularly and is committed to ensuring it has the right balance of skills and experience. The Board considers its current size and composition is appropriate to the Bank's circumstances. The Board places great emphasis on ensuring its membership reflects diversity in its broadest sense. New appointments are made on merit, taking account of the specific skills and experience, independence and knowledge needed to ensure a rounded board and the diversity benefits each candidate can bring overall. There are a range of initiatives across Lloyds Banking Group to help ensure unbiased career progression opportunities. Progress on diversity objectives is monitored by the Board and built into its assessment of executive performance.

The Board is supported by its committees, the operation of which are discussed below, which make recommendations to the Board on matters delegated to them, in particular in relation to internal control, risk, financial reporting and remuneration matters. Each committee has written terms of reference setting out its delegated responsibilities. Each committee comprises Non-Executive Directors with appropriate skills and experience and is chaired by an experienced chairman. The committee Chairs report to the Board at the next Board meeting. The Board undertakes a periodic review of its effectiveness, which provides an opportunity to consider ways of identifying greater efficiencies, ways to maximise strengths and highlights areas of further development. Given the appointment of a new Group Chief Executive in August 2021 and the development of the Bank's ongoing strategy within the wider Lloyds Banking Group, the Board agreed that an evaluation of its effectiveness would be conducted in 2022 to allow the review to cover the Board's effectiveness in overseeing these developments.

Principle Three – Director Responsibilities

The Directors assume ultimate responsibility for all matters, and along with senior management are committed to maintaining a robust control framework as the foundation for the delivery of good governance, including the effective management of delegation through the Corporate Governance Framework. Policies are also in place in relation to potential conflicts of interest which may arise. All Directors have access to the services of the Company Secretary, and independent professional advice is available to the Directors at the expense of Lloyds Banking Group, where they judge it necessary to discharge their duties as directors.

The Board is supported by its committees which make recommendations on matters delegated to them under the Corporate Governance Framework. The management of all committees is in keeping with the basis on which meetings of the Board are managed, with open debate, and adequate time for members to consider proposals which are put forward. The Chair of the Board and each Board committee assumes responsibility with support from the Company Secretary for the provision to each meeting of accurate and timely information.

Principle Four – Opportunity and Risk

The Board oversees the development and implementation of the Bank's strategy, within the context of the wider strategy of Lloyds Banking Group, which includes consideration of all strategic opportunities. The Board is also responsible for the long term sustainable success of the Bank, generating value for its shareholders and ensuring a positive contribution to society. The Board agrees the Bank's culture, purpose, values and strategy, within that of Lloyds Banking Group, and agrees the related standards of the Bank, again within the relevant standards of Lloyds Banking Group. Further specific aims and objectives of the Board are formalised within the Corporate Governance Framework, which also sets out the matters reserved for the Board.

Strong risk management is central to the strategy of the Bank, which along with a robust risk control framework acts as the foundation for the delivery of effective management of risk. The Board agrees the Bank's risk appetite and ensures the Bank manages risk effectively, delegating related authorities to individuals through the Corporate Governance Framework and the further management hierarchy. Board level engagement coupled with the direct involvement of senior management in risk issues ensures that escalated issues are promptly addressed, and remediation plans are initiated where required. The Bank's risk appetite, principles, policies, procedures, controls and reporting are managed in conjunction with those of Lloyds Banking Group, and as such are regularly reviewed to ensure they remain fully in line with regulations, law, corporate governance and industry best practice. The Bank's principal risks are discussed further on pages 6 to 8.

Principle Five – Remuneration

The Remuneration Committee of the Board, in conjunction with the Remuneration Committee of Lloyds Banking Group (the 'Remuneration Committees'), assume responsibility for the Bank's approach to remuneration. This includes reviewing and making recommendations on remuneration policy as relevant to the Bank, ranging from the remuneration of Directors and members of the Executive to that of all other colleagues employed by the Bank. This includes colleagues where the regulators require the Bank to implement a specific approach to their remuneration, such as Senior Managers and other material risk takers. The activities of the Remuneration Committees extend to matters of remuneration relevant to subsidiaries of the Bank, where such subsidiary does not have its own remuneration committee. Certain members of the Lloyds Banking Group Executive, including the Group People and Property Director, are authorised to act upon the decisions made by the Remuneration Committees, and to undertake such other duties relevant to remuneration as delegated to them.

Principle Six – Stakeholders

The COVID-19 pandemic continued to have an effect on the way we live, including on the Bank's many stakeholders. The Board has monitored the impact of the pandemic on the Group's and Bank's business and its stakeholders, seeking to ensure that the challenges posed by the pandemic were addressed. The Board considered related updates from management as events unfolded, covering matters including the continued impact on customers, colleagues, suppliers and other stakeholders, approving suitable action as required.

Lloyds Bank plc

Directors' report

The Bank as part of Lloyds Banking Group operates under Lloyds Banking Group's wider Responsible Business approach, which acknowledges that the Bank has a responsibility to help address the economic, social and environmental challenges which the UK faces, and as part of this understand the needs of the Bank's external stakeholders, including in the development and implementation of strategy. Central to this is Lloyds Banking Group's Helping Britain Prosper plan, in which the Bank participates. During the year there was a focus on the response to COVID, and Helping Britain Recover. This involved bringing together many of the Board's key stakeholders, to determine how the Bank could best support the recovery from the pandemic, the outcomes of this initiative being set out on pages 26 to 29 of the Lloyds Banking Group Annual Report and Accounts for 2021.

In 2021 the Responsible Business Committee of Lloyds Banking Group provided further oversight and support of Lloyds Banking Group's and the Bank's plans for embedding responsible business in the Banks' core purpose. The approach of the Board in respect of its key stakeholders is described further in a separate statement made in compliance with the Regulations on pages 2 to 4.

Directors

The names of the current Directors are shown on page 14. Changes to the composition of the Board since 1 January 2021 up to the date of this report are shown in the table below.

	Joined the Board	Left the Board
Charlie Nunn	16 August 2021	
Harmeen Mehta	1 November 2021	
Lord Blackwell		1 January 2021
Sir António Horta-Osório		30 April 2021
Sara Weller		20 May 2021
Nick Prettejohn		30 September 2021

Stuart Sinclair will retire as a director of the Bank at the forthcoming Lloyds Banking Group AGM.

Directors' indemnities

The Directors of the Bank, including the former Directors who retired during the year, have entered into individual deeds of indemnity with Lloyds Banking Group plc which constitute 'qualifying third party indemnity provisions' for the purposes of the Companies Act 2006. The deeds indemnify the Directors to the maximum extent permitted by law and remain in force. The deeds were in force during the whole of the financial year or from the date of appointment in respect of the Directors appointed in 2021. In addition, Lloyds Banking Group plc had appropriate Directors' and Officers' liability insurance cover in place throughout 2021. Deeds for existing Directors are available for inspection at the Bank's registered office.

Lloyds Banking Group plc has also granted deeds of indemnity by deed poll and by way of entering into individual deeds, which constitute 'qualifying third party indemnity provisions' to the Directors of the Group's subsidiary companies, including former Directors who retired during the year, and to colleagues subject to the provisions of the Senior Managers and Certification Regime. Such deeds were in force during the financial year ended 31 December 2021 and remain in force as at the date of this report. Qualifying pension scheme indemnities have also been granted to the Trustees of Lloyds Banking Group's Pension Schemes, including those schemes relevant to the Bank, which were in force for the whole of the financial year and remain in force as at the date of this report.

Information required under DTR 7.2

Certain information is incorporated into this report by reference. Information about internal control and risk management systems relating to the financial reporting process can be found on page 9.

Information about share capital is shown in note 31 on page 152. The Bank is a wholly owned subsidiary of Lloyds Banking Group plc, which holds all of the Bank's issued ordinary share capital.

The Directors manage the business of the Bank under the powers set out in the Companies Act 2006 and the Bank's articles of association, these powers include those in relation to the issue or buy back of the Bank's shares.

The appointment and retirement of Directors is governed by the Bank's articles of association and the Companies Act 2006. The Bank's articles of association may only be amended by a special resolution of the shareholders in a general meeting.

Conflicts of interest

The Board has a comprehensive procedure for reviewing, and as permitted by the Companies Act 2006 and the Bank's articles of association, approving actual and potential conflicts of interest. Directors have a duty to notify the Chair and Company Secretary as soon as they become aware of actual or potential conflict situations. Changes to commitments of all Directors are reported to the Board and a register of directors' interests is regularly reviewed and authorised by the Board to ensure the authorisation status remains appropriate.

Lord Lupton is a senior adviser to Greenhill Europe, an investment bank focused on providing financial advice on significant mergers, acquisitions, restructurings, financings and capital raising to corporations, partnerships, institutions and governments. The Board has recognised that potential conflicts may arise as a result of these positions. The Board has authorised the potential conflicts and requires Lord Lupton to recuse himself from discussions, should the need arise.

Branches, future developments and financial risk management objectives and policies

The Bank provides a wide range of banking and financial services through branches and offices in the UK and overseas. Information regarding future developments and financial risk management objectives and policies of the Group in relation to the use of financial instruments that would otherwise be required to be disclosed in the Directors' report, and which is incorporated into this report by reference, can be found in the Strategic Report.

Share capital

Information about share capital is shown in note 31 on page 152. This information is incorporated into this report by reference. The Bank did not repurchase any of its shares during 2021 (2020: none). There are no restrictions on the transfer of shares in the Bank other than as set out in the articles of association and certain restrictions which may from time to time be imposed by law and regulations.

Lloyds Bank plc

Directors' report

Change of control

The Bank is not party to any significant agreements which take effect, alter or terminate upon a change of control of the Bank following a takeover bid. There are no agreements between the Bank and its Directors or employees providing compensation for loss of office or employment that occurs because of a takeover bid.

Research and development activities

During the ordinary course of business the Bank develops new products and services within the business units.

Supporting disability

As part of Lloyds Banking Group, the Bank has the ambition of supporting our colleagues with disabilities and long-term health conditions to be the best that they can be, and to be valued for who they are. Lloyds Banking Group holds the Business Disability Forum Gold Standard accreditation and has retained Disability Confident status from the Department for Work and Pensions. Bespoke training, career development and adjustments for colleagues and applicants with disabilities, including those who became disabled while employed.

Information incorporated by reference

The following additional information forms part of the Directors' Report, and is incorporated by reference.

Content		Pages
Disclosures required under the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008	Statement of employee engagement	3 to 4
	Statement of other stakeholder engagement	3 to 4

Significant contracts

Details of related party transactions are set out in note 38 on pages 158 to 160.

Streamlined Energy and Carbon Reporting

The Bank has taken advantage of the exemption from Streamlined Energy and Carbon Reporting (SECR) reporting requirements in its own Directors' report as it is covered by the Lloyds Banking Group SECR report given in the Lloyds Banking Group plc 2021 Annual Report and Accounts, available at www.lloydsbankinggroup.com/investors/financial-downloads.html

Statement of directors' responsibilities

The Directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations. Company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors are required to prepare the Bank's financial statements in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006. Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Bank and of the profit or loss of the Bank for that period. In preparing these financial statements, the Directors are required to properly select and apply accounting policies; present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information; provide additional disclosures when compliance with the specific requirements in international accounting standards in conformity with the requirements of the Companies Act 2006 are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance; and make an assessment of the Bank's ability to continue as a going concern.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Bank's transactions and disclose with reasonable accuracy at any time the financial position of the Bank and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Bank and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. A copy of the financial statements is placed on the website www.lloydsbankinggroup.com/investors/financial-downloads.html The Directors are responsible for the maintenance and integrity of all information relating to the Bank on that website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Each of the current Directors who are in office as at the date of this report, and whose names and functions are listed on page 14 of this annual report, confirm that, to the best of his or her knowledge:

- The Bank's financial statements, which have been prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006 give a true and fair view of the assets, liabilities, financial position and profit or loss of the Bank
- The management report contained in the Strategic Report and the Directors' report includes a fair review of the development and performance of the business and the position of the Bank together with a description of the principal risks and uncertainties they face
- The Annual Report and Accounts, taken as a whole, are fair, balanced and understandable and provides the information necessary for shareholders to assess the Bank's position, performance, business model and strategy. The Directors have also separately reviewed and approved the strategic report.

Independent auditor and audit information

Each person who is a Director at the date of approval of this report confirms that, so far as the Director is aware, there is no relevant audit information of which the Bank's auditor is unaware and each Director has taken all the steps that he or she ought to have taken as a Director to make himself or herself aware of any relevant audit information and to establish that the Bank's auditor is aware of that information. This confirmation is given and should be interpreted in accordance with the provisions of the Companies Act 2006.

Risk management

RISK MANAGEMENT

All narrative and quantitative tables are unaudited unless otherwise stated. The audited information is required to comply with the requirements of relevant International Financial Reporting Standards.

Risk management is at the heart of Helping Britain Prosper and creating a more sustainable and inclusive future for people and businesses.

Our mission is to protect our customers, shareholders, colleagues and the Group, while enabling sustainable growth in targeted segments. This is achieved through informed risk decisions and robust risk management, supported by a consistent risk-focused culture.

The risk overview (pages 5 to 9) provides a summary of risk management within the Group and the key focus areas for 2021, including the significant impact that COVID-19 continues to have on all principal risks faced by the Group. The risk overview also highlights the importance of the connectivity of principal, emerging and strategic risks and how they are embedded into the Group's strategic risk management framework.

This full risk management section provides a more in-depth picture of how risk is managed within the Group, detailing the Group's emerging risks, approach to stress testing, risk governance, committee structure, appetite for risk and a full analysis of the principal risk categories (pages 23 to 67), the framework by which risks are identified, managed, mitigated and monitored.

Each principal risk category is described and managed using the following standard headings: definition, exposures, measurement, mitigation and monitoring.

LLOYDS BANK GROUP'S APPROACH TO RISK

The Group operates a prudent approach to risk with rigorous management controls to support sustainable business growth and minimise losses. Through a strong and independent risk function (Risk division), a robust control framework is maintained to identify and escalate current and emerging risks, support sustainable growth within the Group's risk appetite, and to drive and inform good risk reward decision-making.

To meet ring-fencing requirements, core UK retail and commercial financial services and ancillary retail activities are ring-fenced from other activities of the Lloyds Banking Group. The Group has adopted the enterprise risk management framework (ERMF) of Lloyds Banking Group and supplemented with additional tailored practices to address the ring-fencing requirements.

The Group's ERMF is structured to align with the industry-accepted internal control framework standards.

The ERMF applies to every area of the business and covers all types of risk. It is reviewed, updated and approved by the Board at least annually to reflect any changes in the nature of the Group's business and external regulations, law, corporate governance and industry best practice. The ERMF provides the Group with an effective mechanism for developing and embedding risk policies and risk management strategies which are aligned with the risks faced by its businesses. It also seeks to facilitate effective communication on these matters across the Group.

Role of the Lloyds Bank Group Board and senior management

Key responsibilities of the Board and senior management include:

- Approval of the ERMF and Board risk appetite
- Approval of Group-wide risk principles and policies
- The cascade of delegated authority (for example to Board sub-committees and the Group Chief Executive)
- Effective oversight of risk management consistent with risk appetite

Risk appetite

The Group's approach to setting, governing, embedding and monitoring risk appetite is detailed in the risk appetite framework, a key component of the ERMF.

Risk appetite is defined within the Group as the amount and type of risk that the Group is prepared to seek, accept or tolerate in delivering its strategy.

Group strategy and risk appetite are developed in tandem. Business planning aims to optimise value within the Group's risk appetite parameters and deliver on its promise to Help Britain Prosper.

The Group's risk appetite statement details the risk parameters within which the Group operates. The statement forms part of the Group's control framework and is embedded into its policies, authorities and limits, to guide decision-making and risk management. Group risk appetite is regularly reviewed and refreshed to ensure appropriate coverage across our principal risks and any emerging risks, and to align with internal or external change.

The Board is responsible for approving the Group's Board risk appetite statement annually. Group Board-level metrics are augmented by further sub-Board-level metrics and cascaded into more detailed business appetite metrics and limits.

The following areas are currently included in the Group Board risk appetite:

Market: the Group has effective controls in place to identify and manage the market risk inherent in our customer and client focused activities

Credit: the Group has a conservative and well balanced credit portfolio through the economic cycle, generating an appropriate return on equity, in line with the Group's target return on equity in aggregate

Funding and liquidity: the Group maintains a prudent liquidity profile and a balance sheet structure that limits its reliance on potentially volatile sources of funding

Capital: the Group maintains capital levels commensurate with a prudent level of solvency to achieve financial resilience and market confidence

Change/execution: the Group has limited appetite for negative impacts on customers, colleagues, or the Group as a result of change activity

Conduct: the Group delivers fair outcomes for its customers

Data: the Group has zero appetite for data related regulatory fines or enforcement actions

People: the Group leads responsibly and proficiently, manages people resource effectively, supports and develops colleague skills and talent, creates and nurtures the right culture and meets legal and regulatory obligations related to its people

Lloyds Bank plc

Risk management

Operational resilience: the Group has limited appetite for disruption to services to customers and stakeholders from significant unexpected events

Operational: the Group has robust controls in place to manage operational losses, reputational events and regulatory breaches. It identifies and assesses emerging risks and acts to mitigate these

Model: material models are performing in line with expectations

Regulatory and legal: the Group interprets and complies with all relevant regulation and all applicable laws (including codes of conduct which could have legal implications) and/or legal obligations

Climate: the Group takes action to identify, manage and mitigate its climate risk and support the Group and its customers in transitioning to a low carbon economy

Governance frameworks

The Group's approach to risk is based on a robust control framework and a strong risk management culture which are the foundation for the delivery of effective risk management and guide the way all employees approach their work, behave and make decisions.

Governance is maintained through delegation of authority from the Board to individuals through the management hierarchy. Senior executives are supported where required by a committee-based structure which is designed to ensure open challenge and support effective decision-making.

The Group's risk appetite, principles, policies, procedures, controls and reporting are regularly reviewed and updated where needed to ensure they remain fully in line with regulation, law, corporate governance and industry good practice.

The interaction of the executive and non-executive governance structures relies upon a culture of transparency and openness that is encouraged by both the Board and senior management.

Board-level engagement, coupled with the direct involvement of senior management in Group-wide risk issues at Group Executive Committee level, ensures that escalated issues are promptly addressed and remediation plans are initiated where required.

Line managers are directly accountable for identifying and managing risks in their individual businesses, ensuring that business decisions strike an appropriate balance between risk and reward and are consistent with the Group's risk appetite.

Clear responsibilities and accountabilities for risk are defined across the Group through a three lines of defence model which ensures effective independent oversight and assurance in respect of key decisions.

The Risk Committee governance framework is outlined on page 18.

Three lines of defence model

The ERMF is implemented through a 'three lines of defence' model which defines clear responsibilities and accountabilities and ensures effective independent oversight and assurance activities take place covering key decisions.

Business lines (first line) have primary responsibility for risk decisions, identifying, measuring, monitoring and controlling risks within their areas of accountability. They are required to establish effective governance and control frameworks for their business to be compliant with Group policy requirements, to maintain appropriate risk management skills, mechanisms and toolkits, and to act within Group risk appetite parameters set and approved by the Board.

Risk division (second line) is a centralised function, headed by the Chief Risk Officer, providing oversight and constructive challenge to the effectiveness of risk decisions taken by business management, providing proactive advice and guidance, reviewing, challenging and reporting on the risk profile of the Group and ensuring that mitigating actions are appropriate.

It also has a key role in promoting the implementation of a strategic approach to risk management reflecting the risk appetite and ERMF agreed by the Board that encompasses:

- Overseeing embedding of effective risk management processes
- Transparent, focused risk monitoring and reporting
- Provision of expert and high quality advice and guidance to the Board, executives and management on strategic issues and horizon scanning, including pending regulatory changes
- A constructive dialogue with the first line through provision of advice, development of common methodologies, understanding, education, training, and development of new risk management tools

The primary role of Group Internal Audit (third line) is to help the Board and executive management protect the assets, reputation and sustainability of the Group. Group Internal Audit is led by the Group Chief Internal Auditor. Group Internal Audit provides independent assurance to the Audit Committee and the Board through performing reviews and engaging with committees and executive management, providing opinion, challenge and informal advice on risk and the state of the control environment. Group Internal Audit is a single independent internal audit function, reporting to the Audit Committee of the Group and the Audit Committees of the key subsidiaries.

Risk and control cycle from identification to reporting

To allow senior management to make informed risk decisions, the business follows a continuous risk management approach which includes producing appropriate, accurate and focused risk reporting. The risk and control cycle sets out how this should be approached. This cycle, from identification to reporting, ensures consistency and is intended to manage and mitigate the risks impacting the Group.

The process for risk identification, measurement and control is integrated into the overall framework for risk governance. Risk identification processes are forward-looking to ensure emerging risks are identified. Risks are captured and measured using robust and consistent quantification methodologies. The measurement of risks includes the application of stress testing and scenario analysis, and considers whether relevant controls are in place before risks are incurred.

Identified risks are reported on a monthly basis or as frequently as necessary to the appropriate committee. The extent of the risk is compared to the overall risk appetite as well as specific limits or triggers. When thresholds are breached, committee minutes are clear on the actions and time frames required to resolve the breach and bring risk within tolerances. There is a clear process for escalation of risks and risk events.

Lloyds Bank plc

Risk management

All key controls are recorded and assessed on a regular basis, in response to triggers or minimum annually. Control assessments consider both the adequacy of the design and operating effectiveness. Where a control is not effective, the root cause is established and action plans implemented to improve control design or performance. Control effectiveness against all residual risks are aggregated by risk category and reported and monitored via the monthly Consolidated Risk Report (CRR). The CRR is reviewed and independently challenged by the Risk division and provided to the Risk division Executive Committee and Group Risk Committee. On an annual basis, a point in time assessment is made for control effectiveness against each risk category and across subgroups. The CRR data is the primary source used for this point-in-time assessment and a year-on-year comparison on control effectiveness is reported to the Board.

One Risk and Control Self-Assessment (One RCSA) is part of the Group's risk and control strategy to deliver a stronger risk culture and simplified risk and control environment. Following improvements made to the Group's approach to risk management, implementation was completed at the end of 2021 across Divisional and Sub-Group Risk Profiles. One RCSA will continue to embed across the Group as risk practices, data quality, culture and capability mature.

Risk culture

Based on the Group's prudent business model, prudent approach to risk management, and guided by the Board, the senior management articulates the core risk values to which the Group aspires, and sets the tone at the top. Senior management establishes a strong focus on building and sustaining long-term relationships with customers, through the economic cycle. Lloyds Banking Group's Code of Responsibility reinforces colleagues' accountability for the risks they take and their responsibility to prioritise their customers' needs.

Risk resources and capabilities

Appropriate mechanisms are in place to avoid over-reliance on key personnel or system/technical expertise within the Group. Adequate resources are in place to serve customers both under normal working conditions and in times of stress, and monitoring procedures are in place to ensure that the level of available resource can be increased if required. Colleagues undertake appropriate training to ensure they have the skills and knowledge necessary to enable them to deliver fair outcomes for customers.

There is ongoing investment in risk systems and models alongside the Group's investment in customer and product systems and processes. This drives improvements in risk data quality, aggregation and reporting leading to effective and efficient risk decisions.

Risk decision-making and reporting

Risk analysis and reporting enables better understanding of risks and returns, supporting the identification of opportunities as well as better management of risks.

An aggregate view of the Group's overall risk profile, key risks and management actions, and performance against risk appetite, including the CRR, is reported to and discussed monthly at the Lloyds Banking Group and Ring Fenced-Banks Risk Committees with regular reporting to the Board Risk Committee and the Board.

Rigorous stress testing exercises are carried out to assess the impact of a range of adverse scenarios with different probabilities and severities to inform strategic planning.

The Chief Risk Officer regularly informs the Board Risk Committee of the aggregate risk profile and has direct access to the Chair and members of Board Risk Committee.

Financial reporting risk management systems and internal controls

The Group maintains risk management systems and internal controls relating to the financial reporting process which are designed to:

- Ensure that accounting policies are appropriately and consistently applied, transactions are recorded accurately, and undertaken in accordance with delegated authorities, that assets are safeguarded and liabilities are properly stated
- Enable the calculation, preparation and reporting of financial, prudential regulatory and tax outcomes in accordance with applicable International Financial Reporting Standards, statutory and regulatory requirements
- Enable certifications by the Senior Accounting Officer relating to maintenance of appropriate tax accounting and in accordance with the 2009 Finance Act
- Ensure that disclosures are made on a timely basis in accordance with statutory and regulatory requirements (for example UK Finance Code for Financial Reporting Disclosure and the US Sarbanes-Oxley Act)
- Ensure ongoing monitoring to assess the impact of emerging regulation and legislation on financial, prudential regulatory and tax reporting
- Ensure an accurate view of the Group's performance to allow the Board and senior management to appropriately manage the affairs and strategy of the business as a whole

The Audit Committee reviews the quality and acceptability of Lloyds Bank Group's financial disclosures. In addition, the Lloyds Banking Group Disclosure Committee assists the Lloyds Bank Group Chief Executive and Chief Financial Officer in fulfilling their disclosure responsibilities under relevant listing and other regulatory and legal requirements.

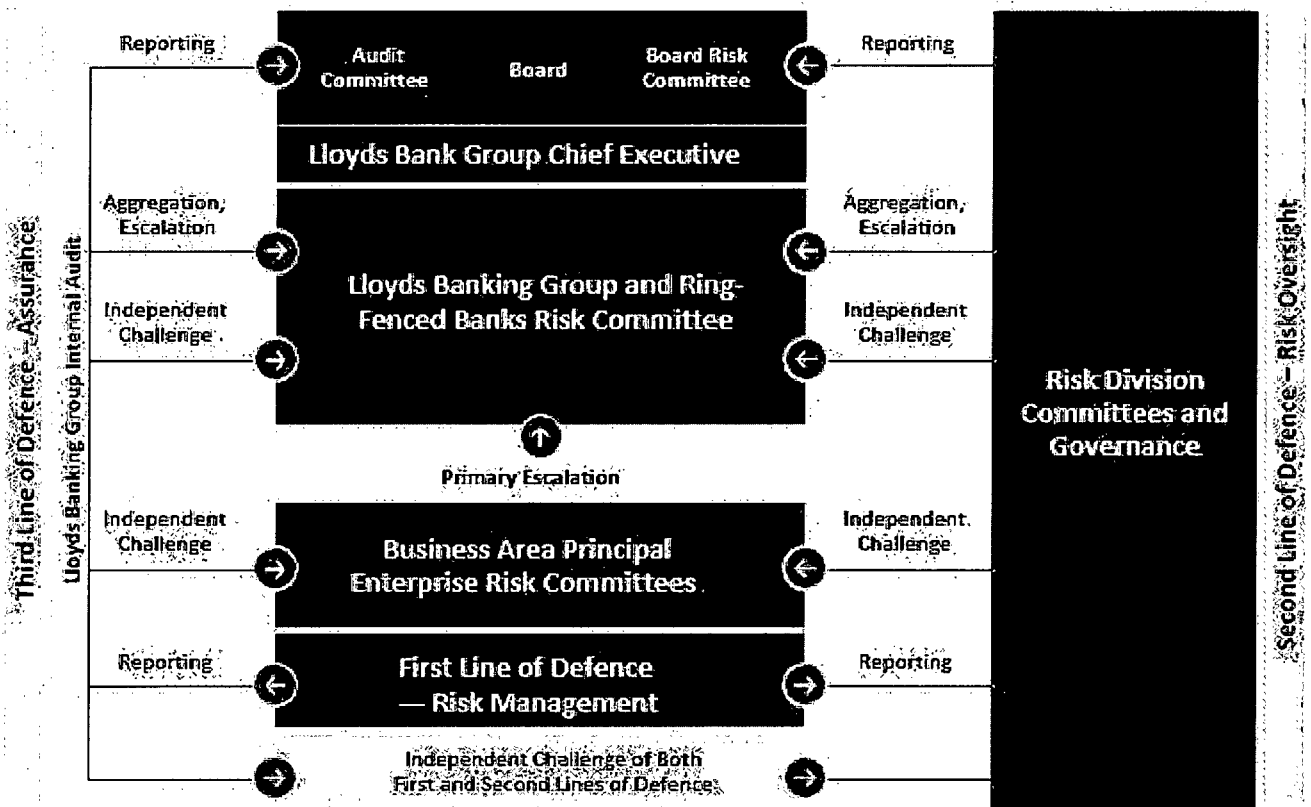

Lloyds Bank plc Risk management

RISK GOVERNANCE

The risk governance structure below is integral to effective risk management across Lloyds Banking Group, including Lloyds Bank Group. To meet ring-fencing requirements the Boards and Board Committees of Lloyds Banking Group and the Ring-Fenced Banks (Lloyds Bank plc and Bank of Scotland plc) as well as relevant Committees of Lloyds Banking Group and the Ring-Fenced Banks will sit concurrently, referred to as the Aligned Board Model. The Risk division is appropriately represented on key committees to ensure that risk management is discussed in these meetings. This structure outlines the flow and escalation of risk information and reporting from business areas and the Risk division to the Group Executive Committee and Board. Conversely, strategic direction and guidance is cascaded down from the Board and Group Executive Committee.

The Company Secretariat supports senior and Board-level committees, and supports the Chairs in agenda planning. This gives a further line of escalation outside the three lines of defence.

Risk governance structure

Lloyds Bank Group Chief Executive Committees

- Lloyds Banking Group and Ring-Fenced Banks Executive Committee (GEC)
- Lloyds Banking Group and Ring-Fenced Banks Risk Committees (GRC)
- Lloyds Banking Group and Ring-Fenced Banks Asset and Liability Committees (GALCO)
- Lloyds Banking Group and Ring-Fenced Banks Cost Management Committees
- Lloyds Banking Group and Ring-Fenced Banks Conduct Review Committees
- Lloyds Banking Group and Ring-Fenced Banks People Committees
- Lloyds Banking Group and Ring-Fenced Banks Net Zero Committees
- Lloyds Banking Group and Ring-Fenced Banks Conduct Investigations Committees

Risk Division Committees and Governance

- Lloyds Banking Group and Ring-Fenced Banks Market Risk Committee
- Lloyds Banking Group and Ring-Fenced Banks Economic Crime Prevention Committee
- Lloyds Banking Group and Ring-Fenced Banks Financial Risk Committee
- Lloyds Banking Group and Ring-Fenced Banks Capital Risk Committee
- Lloyds Banking Group and Ring-Fenced Banks Model Governance Committee
- Ring-Fence Compliance Committee

Lloyds Bank plc

Risk management

Board, Executive and Risk Committees

The Group's risk governance structure strengthens risk evaluation and management, while also positioning the Group to manage the changing regulatory environment in an efficient and effective manner.

Assisted by the Board Risk and Audit Committees, the Board approves the Group's overall governance, risk and control frameworks and risk appetite. Refer to the corporate governance section on pages 10 to 13, for further information on Board Committees.

The sub-group, divisional and functional risk committees review and recommend sub-group, divisional and functional risk appetite and monitor local risk profile and adherence to appetite.

Executive and Risk Committees

Lloyds Bank Group Chief Executive is supported by the following:

Committees	Risk focus
Lloyds Banking Group and Ring-Fenced Banks Executive Committee (GEC)	Assists the Group Chief Executive in exercising their authority in relation to material matters having strategic, cross-business area or Group-wide implications.
Lloyds Banking Group and Ring-Fenced Banks Risk Committees (GRC)	Responsible for the development, implementation and effectiveness of Lloyds Banking Group's enterprise risk management framework, the clear articulation of the Group's risk appetite and monitoring and reviewing of the Group's aggregate risk exposures, control environment and concentrations of risk.
Lloyds Banking Group and Ring-Fenced Banks Asset and Liability Committees (GALCO)	Responsible for the strategic direction of the Group's assets and liabilities and the profit and loss implications of balance sheet management actions. The committee reviews and determines the appropriate allocation of capital, funding and liquidity, and market risk resources and makes appropriate trade-offs between risk and reward.
Lloyds Banking Group and Ring-Fenced Banks Cost Management Committees	Leads and shapes the Group's approach to cost management, ensuring appropriate governance and process over Group-wide cost management activities and effective control of the Group's cost base.
Lloyds Banking Group and Ring-Fenced Banks Conduct Review Committees	Provides senior management oversight, challenge and accountability in connection with the Group's engagement with conduct review matters as agreed with the Group Chief Executive.
Lloyds Banking Group and Ring-Fenced Banks People Committees	Supporting Lloyds Banking Group's People and Property Director in exercising their responsibilities in relation to the Group's people and colleague policies, overseeing the development of and monitoring adherence to the remuneration policy, oversees compliance with Senior Managers and Certification Regime (SM&CR) and other regulatory requirements, monitors colleague engagement surveys, progress of the Group towards its culture targets and oversees the implementation of action plans.
Lloyds Banking Group and Ring-Fenced Banks Net Zero Committees	Recommends and implements the strategy and plans for delivering the Group's aspiration to be viewed as a trusted responsible business as part of the purpose of Helping Britain Prosper, reporting to the GEC, GRC, Responsible Business Committee where appropriate on material sustainability related risk and opportunities across the Group; and recommending to the GEC and Responsible Business Committee the Group's Responsible Business Report and Helping Britain Prosper Plan.
Lloyds Banking Group and Ring-Fenced Banks Conduct Investigations Committee	Responsible for providing recommendations regarding performance adjustment, including the individual risk-adjustment process and risk-adjusted performance assessment, and making final decisions on behalf of the Group on the appropriate course of action relating to conduct breaches, under the formal scope of the SM&CR.
The Lloyds Banking Group and Ring-Fenced Banks Risk Committee is supported through escalation and ongoing reporting by business area risk committees, cross-divisional committees addressing specific matters of Group-wide significance and the following second line of defence Risk committees which ensure effective oversight of risk management:	
Lloyds Banking Group and Ring-Fenced Banks Market Risk Committee	Responsible for monitoring, oversight and challenge of market risk exposures across the Group. Reviews and proposes changes to the market risk management framework, and reviews the adequacy of data quality needed for managing market risks. It is also responsible for escalating issues of Group level significance to GEC level (usually via GALCO) relating to the management of the Group's market risks.
Lloyds Banking Group and Ring-Fenced Banks Economic Crime Prevention Committee	Brings together accountable stakeholders and subject matter experts to ensure that the development and application of economic crime risk management complies with the Group's strategic aims, Group corporate responsibility, Group risk appetite and Group economic crime prevention (fraud, anti-money laundering, anti-bribery and sanctions) policy. It provides direction and appropriate focus on priorities to enhance the Group's economic crime risk management capabilities in line with business and customer objectives while aligning to the Group's target operating model.
Lloyds Banking Group and Ring-Fenced Banks Financial Risk Committee	Responsible for overseeing, reviewing, challenging and recommending to GEC/Board Risk Committee/Board for Lloyds Banking Group and Ring-Fenced Bank (i) annual internal stress Tests, (ii) all Prudential Regulation Authority (PRA) and any other regulatory stress tests, (iii) annual liquidity stress tests, (iv) reverse stress tests, (v) Individual Liquidity Adequacy Assessment (ILAA), (vi) Internal Capital Adequacy Assessment Process (ICAAP), (vii) Pillar 3, (viii) recovery/resolution plans, and (ix) relevant ad hoc stress tests or other analysis as and when required by the Committee.

Lloyds Bank plc

Risk management

Committees	Risk focus
Lloyds Banking Group and Ring-Fenced Banks Capital Risk Committee	Responsible for providing oversight of all relevant capital matters within the Lloyds Banking Group, Ring-Fenced Bank and material subsidiaries, including latest capital position and plans, capital risk appetite proposals, Pillar 2 developments (including stress testing), recovery and resolution matters and the impact of regulatory reforms and developments specific to capital.
Lloyds Banking Group and Ring-Fenced Banks Model Governance Committee	Responsible for supporting the Model Risk and Validation Director in fulfilling their responsibilities, from a Group-wide perspective, under the Lloyds Banking Group model governance policy through provision of debate, challenge and support of decisions. The committee will be held as required to facilitate approval of models, model changes and model related items as required by model policy, including items related to the governance framework as a whole and its application.
Ring-Fence Compliance Committee	This committee is designed to provide executive sponsorship and strategic direction to ongoing perimeter compliance, the closure and remediation of breaches, monitoring and reporting of new breaches and associated governance and delivery enhancements to the Ring-Fencing Compliance Risk Framework.

STRESS TESTING

Overview

Stress testing is recognised as a key risk management tool by the Boards, senior management, the businesses and the Risk and Finance functions of all parts of the Group and its legal entities. It is fully embedded in the planning process of the Group and its key legal entities as a key activity in medium-term planning, and senior management is actively involved in stress testing activities via the governance process.

Scenario stress testing is used for:

Risk identification:

- Understand key vulnerabilities of the Group and its key legal entities under adverse economic conditions

Risk appetite:

- Assess the results of the stress test against the risk appetite of all parts of the Group to ensure the Group and its legal entities are managed within their risk parameters
- Inform the setting of risk appetite by assessing the underlying risks under stress conditions

Strategic and capital planning:

- Allow senior management and the Boards of the Group and its applicable legal entities to adjust strategies if the plan does not meet risk appetite in a stressed scenario
- Support the Internal Capital Adequacy Assessment Process (ICAAP) by demonstrating capital adequacy, and meet the requirements of regulatory stress tests that are used to inform the setting of the Prudential Regulation Authority (PRA) and management buffers (see capital risk on pages 47 to 54) of the Group and its separately regulated legal entities

Risk mitigation:

- Drive the development of potential actions and contingency plans to mitigate the impact of adverse scenarios. Stress testing also links directly to the recovery planning process of the Group and its legal entities

Internal stress tests

On at least an annual basis, the Group conducts macroeconomic stress tests of the operating plan, which are supplemented with higher-level refreshes if necessary. The exercise aims to highlight the key vulnerabilities of the Group's and its legal entities' business plans to adverse changes in the economic environment, and to ensure that there are adequate financial resources in the event of a downturn.

Reverse stress testing

Reverse stress testing is used to explore the vulnerabilities of the Group's and its key legal entities' strategies and plans to extreme adverse events that would cause the businesses to fail. Where this identifies plausible scenarios with an unacceptably high risk, the Group or its entities will adopt measures to prevent or mitigate that and reflect these in strategic plans.

Other stress testing activity

The Group's stress testing programme also involves undertaking assessments of liquidity scenarios, market risk sensitivities and scenarios, and business-specific scenarios (see the principal risk categories on pages 6 to 8 for further information on risk-specific stress testing). If required, ad hoc stress testing exercises are also undertaken to assess emerging risks, as well as in response to regulatory requests. This wide-ranging programme provides a comprehensive view of the potential impacts arising from the risks to which the Group is exposed and reflects the nature, scale and complexity of the Group. Lloyds Banking Group participated in Part 1 of the Bank of England's Climate Biennial Exploratory Stress test in 2021 and will leverage the experience gained through that exercise to further embed climate risk into risk management and stress testing activities.

Methodology

The stress tests at all levels must comply with all regulatory requirements, achieved through the comprehensive construction of macroeconomic scenarios and a rigorous divisional, functional, risk and executive review and challenge process, supported by analysis and insight into impacts on customers and business drivers.

The engagement of all required business, Risk and Finance teams is built into the preparation process, so that the appropriate analysis of each risk category's impact upon the business plans is understood and documented. The methodologies and modelling approach used for stress testing ensure that a clear link is shown between the macroeconomic scenarios, the business drivers for each area and the resultant stress testing outputs. All material assumptions used in modelling are documented and justified, with a clearly communicated review and sign-off process. Modelling is supported by expert judgement and is subject to Lloyds Banking Group model governance policy.

Lloyds Bank plc

Risk management

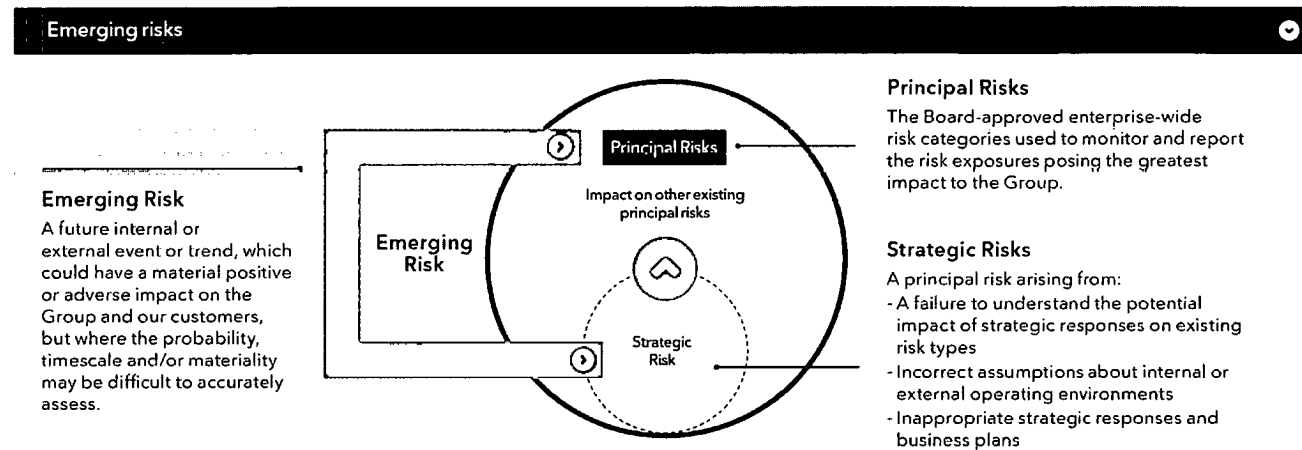

Governance

Clear accountabilities and responsibilities for stress testing are assigned to senior management and the Risk and Finance functions throughout the Group and its key legal entities. This is formalised through the Lloyds Banking Group business planning and stress testing policy and procedure, which are reviewed at least annually.

The Group Financial Risk Committee (GFRC), chaired by the Chief Risk Officer and attended by the Chief Financial Officer and other senior Risk and Finance colleagues, is the committee that has primary responsibility for overseeing the development and execution of the Group's stress tests.

The review and challenge of the Group's detailed stress forecasts, the key assumptions behind these, and the methodology used to translate the economic assumptions into stressed outputs conclude with the appropriate Finance and Risk sign-off. The outputs are then presented to GFRC and the Board Risk Committee for review and challenge, before being approved by the Board.

EMERGING RISKS

Background and framework

Understanding emerging risks is an essential component of the Group's risk management approach, enabling the Group to identify the most pertinent risks and opportunities, and to respond through strategic planning and appropriate risk mitigation.

Although emerging risk is not a principal risk, if left undetected emerging risks have the potential to adversely impact the Group or result in missed opportunities.

Impacts from emerging risks on the Group's principal risks can materialise via two different routes:

- Emerging risks can impact the Group's principal risks directly in the absence of an appropriate strategic response.
- Alternatively, emerging risks can be a source of new strategic risks, dependent on our chosen response and the underlying assumptions on how given emerging risks may manifest.

Where an emerging risk is considered material enough in its own right, the Group may choose to recognise the risk as a principal risk. Recent examples of this include climate risk and strategic risk. Such elevations are considered and approved through the Board as part of the annual refresh of Lloyds Banking Group's enterprise risk management framework.

Risk identification

The basis for risk identification is founded on collaboration between functions across the Group. The activity incorporates internal horizon scanning and engagement with external experts to gain an external context, ensuring broad coverage.

This activity is inherently linked with and builds upon the annual strategic planning cycle and is used to identify key external trends, risks and opportunities for the Group.

The Group is evolving its methodology in respect of the identification and prioritisation of emerging risks. 2021 saw the development of a quantitative risk assessment methodology for understanding the connectivity of strategic risk. The Group has drawn on this methodology and findings to expand its insights.

Lloyds Bank plc

Risk management

Notable emerging risks and their implications

The Group considers the following emerging risk themes as having the potential to increase in significance and affect the performance of the Group.

Emerging risk theme	Key considerations
Breakdown of the EU	Wide-ranging risks associated with dissolution of the European Union, with member states choosing to function independently.
Climate change transition risk	Risks arising from the Group's participation choices, policies and investments to support transition to a zero carbon economy and its ability to meet published climate targets.
Data-driven propositions	Harnessing real-time data, emerging technologies and communication channels, to meet consumer appetite for bespoke products and services.
Digital currencies	Risks and opportunities posed by introduction of new, or wider adoption of existing, digital currencies, associated supporting infrastructure and subsequent management.
Evolving regulation	Changing regulatory standards and possibility of retrospective application, driving reputational damage, fines, litigation and remediation activity.
Future pandemics and the world's ability to respond	Economic, political, social and technological impacts caused by mutations of existing viruses, new viruses, or resistance to treatments for existing illnesses.
Inequality and changing demographic	Widening wealth and opportunity gap, increasing diversity and changing age mix within society, resulting in changing demands on banking.
Long term impact of the UK's exit from the EU	Long-term macro-economic, regulatory and social impacts on the UK as a result of the UK's exit from the EU.
Modern skills and recruitment diversity	Diversification of recruitment approach in respect of candidate backgrounds, skills and avenues of attainment, to adapt to a modern technology-driven landscape.
Pace of technological change	Ability to keep pace with accelerating technological change, evolving technology landscape, changing customer expectations and new product and service propositions.
Populism, de-globalisation and supply chains	Disenfranchisement driving geopolitical tensions between states, diminishing integration and adverse effects on supply chains.
Science, technology, engineering and mathematics (STEM) qualification supply vs demand	Risks posed by the balance of STEM degree qualification in the UK lagging behind the accelerating demands for STEM qualified candidates in the workforce.
Scottish independence	Wide-ranging consequences arising from the movement for Scotland to become a sovereign state, independent from the United Kingdom.
Ways of working	Ability to provide a colleague proposition enabling flexible location and agile working, aligning to individual requirements, together with associated risks of such arrangements (e.g. Operational, People and Data risk).

Risk mitigation

Emerging risks are managed through the Group's strategic risk framework, detailed on page 66. Pertinent emerging risks are considered as part of the Group's strategic and business planning processes and primarily addressed through the Group's strategy.

Key actions to tackle the emerging challenges and capitalise on opportunities as part of the Group's strategy include the following:

Purpose: At the heart of the Group's purpose are the themes of inclusion, sustainability and being people-first. As such, the Group's strategy aims to fully embed a purpose that supports a more inclusive and sustainable future for the Group's customers and colleagues.

Outcomes will see products, services and activities, aligning to societal and regulatory expectations, which drive impacts across housing, financial wellbeing, businesses and jobs, communities, regions, and sustainability.

Customer proposition: As part of its strategy, the Group aims to enhance its proposition, better aligning to its purpose, while supporting transition to a low carbon economy and adapting to the changing demographic of both its customer base and that of the UK.

Key components include:

- Creating better engagement, improving customer journeys and enhancing experiences and tools to drive greater financial resilience and well-being for customers
- Supporting customers and businesses in respect of making their homes, vehicles, properties and activities more sustainable
- Capitalising on the Group's existing asset and product capabilities for corporate and institutional clients to play a leading role in the transition to Net Zero, addressing regional inequalities and supporting UK prosperity by helping corporates trade internationally

Talent: The Group is firmly committed to being diverse, employing new ways of working, where colleagues are supported in having a growth mindset and empowered to make decisions at pace.

The strategy places focus on a colleague proposition that can attract and retain the best people, while leveraging talent pools across the UK and exploring in-house skills growth strategies, alongside partnerships with universities and businesses, to supplement scarce skill sets.

For the long term, the Group intends to use its strategic workforce planning capability for understanding and meeting the evolving demand of skills from its businesses and functions. This will also act as the bedrock for key strategic decisions and interventions in respect of important elements of the Group's talent strategy in the future.

Technology: Simplification of the Group's estate and leveraging contemporary technologies are core components of the Group's strategy.

The Group aims to manage the challenges of a rapidly evolving landscape by employing technology that is aligned to industry best practice refresh rates, while promoting autonomy and empowerment within teams by streamlining governance.

This will be supplemented with an aligned business and technology vision and a rationalised hybrid cloud technology estate and modern engineering standards.

Lloyds Bank plc

Risk management

Data: Being data-driven is central to the Group's transformation activity. More than one third of the benefits from the Group's business strategies are reliant on the ability to successfully leverage data. As such managing data risk and employing strong data ethics are key considerations for the strategy.

The Group has developed a data management strategy to provide the common framework and direction by uplifting data quality, simplifying data architecture, enhancing data governance and implementing market leading tools to improve its ability to deliver a data-first culture. The Group has also invested in data ethics framework and strong governance for its advanced analytics and cloud programmes.

In addition to the strategic actions detailed above, the Group works closely with regulatory authorities and industry bodies to ensure that the Group can monitor external developments (e.g. potential regulatory divergence from EU) and identify and respond to the evolving landscape, particularly in relation to regulatory and legal risk.

FULL ANALYSIS OF RISK CATEGORIES

The Group's risk framework covers all types of risk which affect the Group and could impact on the achievement of its strategic objectives. A detailed description of each category is provided on pages 23 to 67.

Risk categories recognised by the Group are periodically reviewed to ensure that they reflect the Group risk profile in light of internal and external factors, such as the Group strategy and the regulatory environment in which it operates. Changes include the recategorisation of governance risk, from a principal risk type to a secondary risk under operational risk, plus enhancement to the naming of some secondary risk categories.

Principal risk categories	Secondary risk categories
Market risk Page 24	– Trading book – Banking book – Pensions
Credit risk Page 28	– Retail credit – Commercial credit
Funding and liquidity risk Page 43	– Funding and liquidity
Capital risk Page 47	– Capital
Change/execution risk Page 55	– Change/execution
Conduct risk Page 56	– Conduct
Data risk Page 58	– Data
People risk Page 59	– People – Health and safety
Operational resilience risk Page 60	– Operational resilience
Operational risk Page 62	– Business process – Economic crime financial – Economic crime fraud – External service provision – Financial reporting – Governance – Internal service provision – IT systems – Security – Sourcing and supply chain management
Model risk Page 64	– Model
Regulatory and legal risk Page 65	– Regulatory compliance – Legal
Strategic risk Page 66	– Strategic
Climate risk Page 67	– Climate

The Group considers both reputational and financial impact in the course of managing all its risks and therefore does not classify reputational impact as a separate risk category.

Lloyds Bank plc

Risk management

MARKET RISK

DEFINITION

Market risk is defined as the risk that the Group's capital or earnings profile is affected by adverse market rates or prices, in particular interest rates and credit spreads in both the Banking business and the Group's defined benefit pension schemes.

MEASUREMENT

Group risk appetite is calibrated primarily to a number of multi-risk Group economic scenarios, and is supplemented with sensitivity-based measures. The scenarios assess the impact of unlikely, but plausible, adverse stresses on income with the worst case for banking activities, defined benefit pensions, insurance and trading portfolios reported against independently, and across the Group as a whole.

The Group risk appetite is cascaded first to the Group Asset and Liability Committee (GALCO), chaired by the Chief Financial Officer, where risk appetite is approved and monitored by risk type, and then to the Group Market Risk Committee (GMRC) where risk appetite is sub-allocated by division. These metrics are reviewed regularly by senior management to inform effective decision-making.

MITIGATION

GALCO is responsible for approving and monitoring Group market risks, management techniques, market risk measures, behavioural assumptions, and the market risk policy. Various mitigation activities are assessed and undertaken across the Group to manage portfolios and seek to ensure they remain within approved limits. The mitigation actions will vary dependent on exposure but will, in general, look to reduce risk in a cost effective manner by offsetting balance sheet exposures and externalising to the financial markets dependent on market liquidity. The market risk policy is owned by Group Corporate Treasury (GCT) and refreshed annually. The policy is underpinned by supplementary market risk procedures, which define specific market risk management and oversight requirements.

MONITORING

GALCO and GMRC regularly review high level market risk exposure as part of the wider risk management framework. They also make recommendations to the Board concerning overall market risk appetite and market risk policy. Exposures at lower levels of delegation are monitored at various intervals according to their volatility, from daily in the case of trading portfolios to monthly or quarterly in the case of less volatile portfolios. Levels of exposures compared to approved limits and triggers are monitored by Risk and appropriate escalation procedures are in place.

How market risks arise and are managed across the Group's activities is considered in more detail below.

BANKING ACTIVITIES

Exposures

The Group's banking activities expose it to the risk of adverse movements in market rates or prices, predominantly interest rates, credit spreads, exchange rates and equity prices. The volatility of market rates or prices can be affected by both the transparency of prices and the amount of liquidity in the market for the relevant asset, liability or instrument.

Interest rate risk

Yield curve risk in the Group's divisional portfolios, and in the Group's capital and funding activities, arises from the different repricing characteristics of the Group's non-trading assets, liabilities and off-balance sheet positions.

Basis risk arises from the potential changes in spreads between indices, for example where the Bank lends with reference to a central bank rate but funds with reference to a market rate, e.g. SONIA, and the spread between these two rates widens or tightens.

Optionality risk arises predominantly from embedded optionality within assets, liabilities or off-balance sheet items where either the Group or the customer can affect the size or timing of cash flows. One example of this is mortgage prepayment risk where the customer owns an option allowing them to prepay when it is economical to do so. This can result in customer balances amortising more quickly or slowly than anticipated due to customers' response to changes in economic conditions.

Foreign exchange risk

Economic foreign exchange exposure arises from the Group's investment in its overseas operations (net investment exposures are disclosed in note 44 on page 179). In addition, the Group incurs foreign exchange risk through non-functional currency flows from services provided by customer-facing divisions, the Group's debt and capital management programmes and is exposed to volatility in its CET1 ratio, due to the impact of changes in foreign exchange rates on the retranslation of non-Sterling-denominated risk-weighted assets.

Equity risk

Equity risk arises primarily from exposure to the Lloyds Banking Group share price through deferred shares and deferred options granted to employees as part of their benefits package.

Credit spread risk

Credit spread risk arises largely from: (i) the liquid asset portfolio held in the management of Group liquidity, comprising of government, supranational and other eligible assets; (ii) the Credit Valuation Adjustment (CVA) and Debit Valuation Adjustment (DVA) sensitivity to credit spreads; (iii) a number of the Group's structured medium-term notes where the Group has elected to fair value the notes through the profit and loss account; and (iv) banking book assets in Commercial Banking held at fair value under IFRS 9.

Measurement

Interest rate risk exposure is monitored monthly using, primarily:

Market value sensitivity: this methodology considers all repricing mismatches (behaviourally adjusted where appropriate) in the current balance sheet and calculates the change in market value that would result from an instantaneous 25, 100 and 200 basis points parallel rise or fall in the yield curve. Sterling interest rates are modelled with a floor below zero per cent, with negative rate floors also modelled for non-Sterling currencies where appropriate (product-specific floors apply). The market value sensitivities are calculated on a static balance sheet using principal cash flows excluding interest, commercial margins and other spread components and are therefore discounted at the risk-free rate.

Interest income sensitivity: this measures the impact on future net interest income arising from various economic scenarios. These include instantaneous 25, 100 and 200 basis point parallel shifts in all yield curves and the Group economic scenarios. Sterling interest rates are modelled with a floor below zero per cent, with negative rate floors also modelled for non-Sterling currencies where appropriate (product-specific floors apply). These scenarios are reviewed every year and are designed to replicate severe but plausible economic events, capturing risks that would not be evident through the use of parallel shocks alone such as basis risk and steepening or flattening of the yield curve. Additional negative rate scenarios are also used, where floors are removed, to ensure that this risk is monitored; however, these are not measured against the limit framework for the purposes of risk appetite.

Lloyds Bank plc Risk management

Unlike the market value sensitivities, the interest income sensitivities incorporate additional behavioural assumptions as to how and when individual products would reprice in response to changing rates.

Reported sensitivities are not necessarily predictive of future performance as they do not capture additional management actions that would likely be taken in response to an immediate, large, movement in interest rates. These actions could reduce the net interest income sensitivity, help mitigate any adverse impacts or they may result in changes to total income that are not captured in the net interest income.

Structural hedge: the structural hedging programme managing interest rate risk in the banking book relies on assumptions made around customer behaviour. A number of metrics are in place to monitor the risks within the portfolio.

The Group has an integrated Asset and Liability Management (ALM) system which supports non-traded asset and liability management of the Group. This provides a single consolidated tool to measure and manage interest rate repricing profiles (including behavioural assumptions), perform stress testing and produce forecast outputs. The Group is aware that any assumptions-based model is open to challenge. A full behavioural review is performed annually, or in response to changing market conditions, to ensure the assumptions remain appropriate and the model itself is subject to annual re-validation, as required under Lloyds Banking Group's model governance policy. The key behavioural assumptions are:

- Embedded optionality within products
- The duration of balances that are contractually repayable on demand, such as current accounts and overdrafts, together with net free reserves of the Group
- The re-pricing behaviour of managed rate liabilities, such as variable rate savings

The table below shows, split by material currency, the Group's market value sensitivities to an instantaneous parallel up and down 25 and 100 basis points change to all interest rates.

Lloyds Bank Group Banking activities: market value sensitivity (audited)								
	2021				2020			
	Up 25bps £m	Down 25bps £m	Up 100bps £m	Down 100bps £m	Up 25bps £m	Down 25bps £m	Up 100bps £m	Down 100bps £m
Sterling	26.1	(27.6)	98.4	(129.8)	66.3	7.3	265.3	10.4
US Dollar	(0.3)	0.9	(1.1)	4.0	(2.2)	3.7	(8.6)	7.9
Euro	(5.1)	(2.9)	(19.3)	(11.5)	(6.3)	(5.0)	(24.1)	(9.0)
Other	(0.2)	0.3	(1.0)	0.8	—	—	(0.2)	—
Total	20.5	(29.3)	77.0	(136.5)	57.8	6.0	232.4	9.3

This is a risk-based disclosure and the amounts shown would be amortised in the income statement over the duration of the portfolio.

The market value sensitivity to a down 100 basis points shock has increased due to rates being higher than at year end 2020 leading to a larger downshock being applied before hitting the modelled interest rate floor. The sensitivity to an up 100 basis points shock has decreased as a result of hedging activity and changes to mortgage prepayment assumptions.

The table below shows supplementary value sensitivity to a steepening and flattening (c.100 basis points around the three-year point) in the yield curve. This ensures there are no unintended consequences to managing risk to parallel shifts in rates.

Lloyds Bank Group Banking activities: market value sensitivity to a steepening and flattening of the yield curve (audited)				
	2021		2020	
	Steepener £m	Flattener £m	Steepener £m	Flattener £m
Sterling	85.8	(114.4)	(53.2)	14.3
US Dollar	(7.0)	8.2	(6.4)	7.5
Euro	(13.8)	(6.9)	(16.4)	(3.9)
Other	0.2	(0.2)	(0.1)	0.5
Total	65.2	(113.3)	(76.1)	18.4

The table below shows the banking book one year net interest income sensitivity to an instantaneous parallel up and down 25 basis points change to all interest rates.

Lloyds Bank Group Banking activities: net interest income sensitivity (audited)				
	2021		2020	
	Up 25bps £m	Down 25bps £m	Up 25bps £m	Down 25bps £m
Client facing activity and associated hedges	174.9	(406.7)	254.6	(142.5)

Lloyds Bank plc

Risk management

The table below shows supplementary income sensitivity on a one to three-year forward-looking basis to an instantaneous parallel up 25, down 25 and up 50 basis points change to all interest rates.

	2021								
	Up 25bps			Down 25bps			Up 50bps		
	Year 1	Year 2	Year 3	Year 1	Year 2	Year 3	Year 1	Year 2	Year 3
	£m	£m	£m	£m	£m	£m	£m	£m	£m
Client-facing activity and associated hedges	174.9	269.8	397.3	(406.7)	(512.0)	(639.0)	348.7	526.9	782.1

Year 1 net interest income sensitivity, to up 25 basis points, has decreased year-on-year mostly due to the additional structural hedging that has been transacted in 2021 in addition to the use of simpler illustrative pass through assumptions. The increase in risk sensitivity year-on-year, to down 25 basis points, is driven by greater modelled margin compression risk following the rise in interest rates in December 2021. This results in the full 25 basis points downshock being applied at December 2021 whereas a 10 basis points shock was applied at December 2020 due to the Group's assumption, at the time, for modelling Sterling interest rates with a floor of zero per cent (product-specific floors apply).

The three year net interest income sensitivity to a down 25 basis points shock is driven predominantly by margin compression on Retail and Commercial Bank savings products as well as structural hedge maturities to be reinvested in years two and three. The sensitivity to an up 25 basis points and 50 basis points shock is largely due to reinvestment of structural hedge maturities.

The sensitivities are illustrative and do not reflect new business margin implications and/or pricing actions, other than as outlined.

The following assumptions have been applied:

- Instantaneous parallel shift in interest rate curve, including bank base rate
- Balance sheet remains constant
- Illustrative 50 per cent deposit pass-through

Basis risk, foreign exchange, equity and credit spread risks are measured primarily through scenario analysis by assessing the impact on profit before tax over a 12-month horizon arising from a change in market rates, and reported within the Board risk appetite on a monthly basis. Supplementary measures such as sensitivity and exposure limits are applied where they provide greater insight into risk positions. Frequency of reporting supplementary measures varies from daily to quarterly appropriate to each risk type.

Mitigation

The Group's policy is to optimise reward while managing its market risk exposures within the risk appetite defined by the Board. Lloyds Banking Group's market risk policy and procedures outlines the hedging process, and the centralisation of risk from divisions into Group Corporate Treasury (GCT), e.g. via the transfer pricing framework. GCT is responsible for managing the centralised risk and does this through natural offsets of matching assets and liabilities, and appropriate hedging activity of the residual exposures, subject to the authorisation and mandate of GALCO within the Board risk appetite. The hedges are externalised to the market by derivative desks within GCT and the Commercial Bank. The Group mitigates income statement volatility through hedge accounting. This reduces the accounting volatility arising from the Group's economic hedging activities and any hedge accounting ineffectiveness is continuously monitored.

The largest residual risk exposure arises from balances that are deemed to be insensitive to changes in market rates (including current accounts, a portion of variable rate deposits and investable equity), and is managed through the Group's structural hedge. Consistent with the Group's strategy to deliver stable returns, GALCO seeks to minimise large reinvestment risk, and to smooth earnings over a range of investment tenors. The structural hedge consists of longer-term fixed rate assets or interest rate swaps and the amount and duration of the hedging activity is reviewed regularly by GALCO.

While the Bank faces margin compression in low rate environments, its exposure to pipeline and prepayment risk are not considered material and are hedged in line with expected customer behaviour. These are appropriately monitored and controlled through divisional Asset and Liability Committees (ALCOs).

Net investment foreign exchange exposures are managed centrally by GCT, by hedging non-Sterling asset values with currency borrowing. Economic foreign exchange exposures arising from non-functional currency flows are identified by divisions and transferred and managed centrally. The Group also has a policy of forward hedging its forecasted currency profit and loss to year end. The Group makes use of both accounting and economic foreign exchange exposures, as an offset against the impact of changes in foreign exchange rates on the value of non-Sterling-denominated risk-weighted assets. This involves the holding of a structurally open currency position; sensitivity is minimised where, for a given currency, the ratio of the structural open position to risk-weighted assets equals the CET1 ratio. Continually evaluating this structural open currency position against evolving non-Sterling-denominated risk-weighted assets mitigates volatility in the Group's CET1 ratio.

Monitoring

The appropriate limits and triggers are monitored by senior executive committees within the Banking divisions. Banking assets, liabilities and associated hedging are actively monitored and if necessary rebalanced to be within agreed tolerances.

DEFINED BENEFIT PENSION SCHEMES

Exposures

The Group's defined benefit pension schemes are exposed to significant risks from their assets and liabilities. The liability discount rate exposes the Group to interest rate risk and credit spread risk, which are partially offset by fixed interest assets (such as gilts and corporate bonds) and swaps. Equity and alternative asset risk arises from direct asset holdings. Scheme membership exposes the Group to longevity risk. Increases to pensions in deferment and in payment expose the Group to inflation risk.

For further information on defined benefit pension scheme assets and liabilities please refer to note 27 on page 140.

Measurement

The Group's management of the schemes' assets is the responsibility of the Trustees of the schemes who are responsible for setting the investment strategy and for agreeing funding requirements with the Group. The Group will be liable for meeting any funding deficit that may arise. As part of the triennial valuation process, the Group will agree with the Trustees a funding strategy to eliminate the deficit over an appropriate period.

Longevity risk is measured using both 1-in-20 year stresses (risk appetite) and 1-in-200 year stresses (regulatory capital).

Lloyds Bank plc

Risk management

Mitigation

The Group takes an active involvement in agreeing mitigation strategies with the schemes' Trustees. An interest rate and inflation hedging programme is in place to reduce liability risk. The schemes have also reduced equity allocation and invested the proceeds in credit assets. The Trustees have put in place longevity swaps to mitigate longevity risk. The merits of longevity risk transfer and hedging solutions are reviewed regularly.

Monitoring

In addition to the wider risk management framework, governance of the schemes includes two specialist pensions committees.

The surplus, or deficit, in the schemes is tracked monthly along with various single factor and scenario stresses which consider the assets and liabilities holistically. Key metrics are monitored monthly including the Group's capital resources of the scheme, the performance against risk appetite triggers, and the performance of the hedged asset and liability matching positions.

TRADING PORTFOLIOS

Exposures

The Group's trading activity is small relative to its peers. The Group's trading activity is undertaken solely to meet the financial requirements of commercial and retail customers for foreign exchange and interest rate products. These activities support customer flow and market making activities.

All trading activities are performed within the Commercial Banking division. While the trading positions taken are generally small, any extreme moves in the main risk factors and other related risk factors could cause significant losses in the trading book depending on the positions at the time. The average 95 per cent 1-day trading VaR (Value at Risk; diversified across risk factors) was £0.1 million for 31 December 2021.

Trading market risk measures are applied to all of the Group's regulatory trading books and they include daily VaR, sensitivity-based measures, and stress testing calculations.

Measurement

The Group internally uses VaR as the primary risk measure for all trading book positions.

The risk of loss measured by the VaR model is the minimum expected loss in earnings given the 95 per cent confidence. The total and average trading VaR numbers reported below have been obtained after the application of the diversification benefits across the five risk types. The maximum and minimum VaR reported for each risk category did not necessarily occur on the same day as the maximum and minimum VaR reported at Group level.

The Group's closing VaR, allowing for diversification, at 31 December 2021 across interest rate risk, foreign exchange risk, equity risk, credit spread risk and inflation risk was less than £0.05 million. During the year ended 31 December 2021, the Group's minimum VaR was less than £0.05 million and its average and maximum VaR was £0.1 million.

For the year ended 31 December 2021, excluding the effects of diversification, the maximum total VaR for all of the above risks was £0.2 million, the average total VaR was £0.1 million and minimum VaR was less than £0.05 million. The closing VaR at 31 December 2021, excluding the effects of diversification, was less than £0.06 million.

For the year ended 31 December 2021, the maximum and average interest rate risk VaR was £0.1 million and the minimum interest rate VaR was less than £0.05 million. The minimum, maximum and average VaR for all other risk types was less than £0.05 million. As at 31 December 2021, the closing VaR for all risk types was less than £0.05 million.

The market risk for the trading book continues to be low relative to the size of the Group and in comparison to peers. This reflects the fact that the Group's trading operations are customer-centric and focused on hedging and recycling client risks.

Although it is an important market standard measure of risk, VaR has limitations. One of them is the use of a limited historical data sample which influences the output by the implicit assumption that future market behaviour will not differ greatly from the historically observed period. Another known limitation is the use of defined holding periods which assumes that the risk can be liquidated or hedged within that holding period. Also calculating the VaR at the chosen confidence interval does not give enough information about potential losses which may occur if this level is exceeded. The Group fully recognises these limitations and supplements the use of VaR with a variety of other measurements which reflect the nature of the business activity. These include detailed sensitivity analysis, position reporting and a stress testing programme.

Trading book VaR (1-day 99 per cent) is compared daily against both hypothetical and actual profit and loss at underlying legal entity level (HBOS and Lloyds Bank).

Mitigation

The level of exposure is controlled by establishing and communicating the approved risk limits and controls through policies and procedures that define the responsibility and authority for risk taking. Market risk limits are clearly and consistently communicated to the business. Any new or emerging risks are brought within risk reporting and defined limits.

Monitoring

Trading risk appetite is monitored daily with 1-day 95 per cent VaR and stress testing limits. These limits are complemented with position level action triggers and profit and loss referrals. Risk and position limits are set and managed at both desk and overall trading book levels. They are reviewed at least annually and can be changed as required within the overall Group risk appetite framework.

Lloyds Bank plc

Risk management

CREDIT RISK

DEFINITION

Credit risk is defined as the risk that parties with whom the Group has contracted fail to meet their financial obligations (both on and off-balance sheet).

EXPOSURES

The principal sources of credit risk within the Group arise from loans and advances, contingent liabilities, commitments, debt securities and derivatives to customers, financial institutions and sovereigns. The credit risk exposures of the Group are set out in note 44 on page 179.

In terms of loans and advances (for example mortgages, term loans and overdrafts) and contingent liabilities (for example credit instruments such as guarantees and documentary letters of credit), credit risk arises both from amounts advanced and commitments to extend credit to a customer or bank. With respect to commitments to extend credit, the Group is also potentially exposed to an additional loss up to an amount equal to the total unutilised commitments. However, the likely amount of loss may be less than the total unutilised commitments, as most retail and certain commercial lending commitments may be cancelled based on regular assessment of the prevailing creditworthiness of customers. Most commercial term commitments are also contingent upon customers maintaining specific credit standards.

Credit risk also arises from debt securities and derivatives. Credit risk exposure for derivatives is limited to the current cost of replacing contracts with a positive value to the Group. Such amounts are reflected in note 44 on page 179.

Additionally, credit risk arises from leasing arrangements where the Group is the lessor. Note 2(J) on page 94 provides details on the Group's approach to the treatment of leases.

The investments held in the Group's defined benefit pension schemes also expose the Group to credit risk. Note 27 on page 140 provides further information on the defined benefit pension schemes' assets and liabilities.

Loans and advances, contingent liabilities, commitments, debt securities and derivatives also expose the Group to refinance risk. Refinance risk is the possibility that an outstanding exposure cannot be repaid at its contractual maturity date. If the Group does not wish to refinance the exposure then there is refinance risk if the obligor is unable to repay by securing alternative finance. This may occur for a number of reasons which may include: the borrower is in financial difficulty, because the terms required to refinance are outside acceptable appetite at the time or the customer is unable to refinance externally due to a lack of market liquidity. Refinance risk exposures are managed in accordance with the Group's existing credit risk policies, processes and controls, and are not considered to be material given the Group's prudent and through-the-cycle credit risk appetite. Where heightened refinance risk exists exposures are minimised through intensive account management and, where appropriate, are classed as impaired and/or forborne.

MEASUREMENT

The process for credit risk identification, measurement and control is integrated into the Board-approved framework for credit risk appetite and governance.

Credit risk is measured from different perspectives using a range of appropriate modelling and scoring techniques at a number of levels of granularity, including total balance sheet, individual portfolio, pertinent concentrations and individual customer - for both new business and existing exposure. Key metrics, which may include total exposure, expected credit loss (ECL), risk-weighted assets, new business quality, concentration risk and portfolio performance, are reported monthly to Risk Committees and Forums.

Measures such as ECL, risk-weighted assets, observed credit performance, predicted credit quality (usually from predictive credit scoring models), collateral cover and quality, and other credit drivers (such as cash flow, affordability, leverage and indebtedness) have been incorporated into the Group's credit risk management practices to enable effective risk measurement across the Group.

The Group has also continued to strengthen its capabilities and abilities for identifying, assessing and managing climate-related risks and opportunities, recognising that Climate change is likely to result in changes in the risk profile and outlook for the Group's customers, the sectors the Group operates in and collateral/asset valuations. For further information, please refer to LBG's 2021 Climate Report.

In addition, stress testing and scenario analysis are used to estimate impairment losses and capital demand forecasts for both regulatory and internal purposes and to assist in the formulation of credit risk appetite.

As part of the 'three lines of defence' model, the Risk division is the second line of defence providing oversight and independent challenge to key risk decisions taken by business management. The Risk division also tests the effectiveness of credit risk management and internal credit risk controls. This includes ensuring that the control and monitoring of higher risk and vulnerable portfolios and sectors is appropriate and confirming that appropriate loss allowances for impairment are in place. Output from these reviews helps to inform credit risk appetite and credit policy.

As the third line of defence, Group Internal Audit undertakes regular risk-based reviews to assess the effectiveness of credit risk management and controls.

MITIGATION

The Group uses a range of approaches to mitigate credit risk.

Prudent, through-the-cycle credit principles, risk policies and appetite statements: the independent Risk division sets out the credit principles, credit risk policies and credit risk appetite statements. These are subject to regular review and governance, with any changes subject to an approval process. Risk teams monitor credit performance trends and the outlook. Risk teams also test the adequacy of and adherence to credit risk policies and processes throughout the Group. This includes tracking portfolio performance against an agreed set of credit risk appetite tolerances.

Robust models and controls: see model risk on page 64.

Limitations on concentration risk: there are portfolio controls on certain industries, sectors and products to reflect risk appetite as well as individual, customer and bank limit risk tolerances. Credit policies and appetite statements are aligned to the Group's risk appetite and restrict exposure to higher risk countries and potentially vulnerable sectors and asset classes. Note 44 on page 181 provides an analysis of loans and advances to customers by industry (for commercial customers) and product (for retail customers). Exposures are monitored to prevent both an excessive concentration of risk and single name concentrations. These concentration risk controls are not necessarily in the form of a maximum limit on exposure, but may instead require new business in concentrated sectors to fulfil additional minimum policy and/or guideline requirements. The Group's largest credit limits are regularly monitored by the Board Risk Committee and reported in accordance with regulatory requirements.

Lloyds Bank plc Risk management

Defined country risk management framework: the Group sets a broad maximum country risk appetite. Risk-based appetite for all countries is set within the independent Risk division, taking into account economic, financial, political and social factors as well as the approved business and strategic plans of the Group.

Specialist expertise: credit quality is managed and controlled by a number of specialist units within the business and Risk division, which provide for example: intensive management and control; security perfection; maintenance of customer and facility records; expertise in documentation for lending and associated products; sector-specific expertise; and legal services applicable to the particular market segments and product ranges offered by the Group.

Stress testing: the Group's credit portfolios are subject to regular stress testing. In addition to the Group-led, PRA and other regulatory stress tests, exercises focused on individual divisions and portfolios are also performed. For further information on stress testing process, methodology and governance see page 20.

Frequent and robust credit risk assurance: assurance of credit risk is undertaken by an independent function operating within the Risk division which are part of the Group's second line of defence. Their primary objective is to provide reasonable and independent assurance and confidence that credit risk is being effectively managed and to ensure that appropriate controls are in place and being adhered to. Group Internal Audit also provides assurance to the Audit Committee on the effectiveness of credit risk management controls across the Group's activities.

Collateral

The principal types of acceptable collateral include:

- Residential and commercial properties
- Charges over business assets such as premises, inventory and accounts receivable
- Financial instruments such as debt securities vehicles
- Cash
- Guarantees received from third parties

The Group maintains appetite parameters on the acceptability of specific classes of collateral.

For non-mortgage retail lending to small businesses, collateral may include second charges over residential property and the assignment of life cover.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the underlying exposure. Debt securities, including treasury and other bills, are generally unsecured, with the exception of asset-backed securities and similar instruments such as covered bonds, which are secured by portfolios of financial assets. Collateral is generally not held against loans and advances to financial institutions. However, securities are held as part of reverse repurchase or securities borrowing transactions or where a collateral agreement has been entered into under a master netting agreement. Derivative transactions with financial counterparties are typically collateralised under a Credit Support Annex (CSA) in conjunction with the International Swaps and Derivatives Association (ISDA) Master Agreement. Derivative transactions with non-financial customers are not usually supported by a CSA.

The requirement for collateral and the type to be taken at origination will be based upon the nature of the transaction and the credit quality, size and structure of the borrower. For non-retail exposures, if required, the Group will often seek that any collateral includes a first charge over land and buildings owned and occupied by the business, a debenture over the assets of a company or limited liability partnership, personal guarantees, limited in amount, from the directors of a company or limited liability partnership and key man insurance. The Group maintains policies setting out which types of collateral valuation are acceptable, maximum loan to value (LTV) ratios and other criteria that are to be considered when reviewing an application. The fundamental business proposition must evidence the ability of the business to generate funds from normal business sources to repay a customer or counterparty's financial commitment, rather than reliance on the disposal of any security provided.

Although lending decisions are primarily based on expected cash flows, any collateral provided may impact the pricing and other terms of a loan or facility granted. This will have a financial impact on the amount of net interest income recognised and on internal loss given default estimates that contribute to the determination of asset quality and returns.

The Group requires collateral to be realistically valued by an appropriately qualified source, independent of both the credit decision process and the customer, at the time of borrowing. In certain circumstances, for retail residential mortgages this may include the use of automated valuation models based on market data, subject to accuracy criteria and LTV limits. Where third parties are used for collateral valuations, they are subject to regular monitoring and review. Collateral values are subject to review, which will vary according to the type of lending, collateral involved and account performance. Such reviews are undertaken to confirm that the value recorded remains appropriate and whether revaluation is required, considering, for example, account performance, market conditions and any information available that may indicate that the value of the collateral has materially declined. In such instances, the Group may seek additional collateral and/or other amendments to the terms of the facility. The Group adjusts estimated market values to take account of the costs of realisation and any discount associated with the realisation of the collateral when estimating credit losses.

The Group considers risk concentrations by collateral providers and collateral type with a view to ensuring that any potential undue concentrations of risk are identified and suitably managed by changes to strategy, policy and/or business plans.

The Group seeks to avoid correlation or wrong-way risk where possible. Under the Group's repurchase (repo) policy, the issuer of the collateral and the repo counterparty should be neither the same nor connected. The same rule applies for derivatives. The Risk division has the necessary discretion to extend this rule to other cases where there is significant correlation. Countries with a rating equivalent to AA- or better may be considered to have no adverse correlation between the counterparty domiciled in that country and the country of risk (issuer of securities).

Refer to note 44 on page 200 for further information on collateral.

Additional mitigation for Retail customers

The Group uses a variety of lending criteria when assessing applications for mortgages and unsecured lending. The general approval process uses credit acceptance scorecards and involves a review of an applicant's previous credit history using internal data and information held by Credit Reference Agencies (CRA).

Lloyds Bank plc

Risk management

The Group also assesses the affordability and sustainability of lending for each borrower. For secured lending this includes use of an appropriate stressed interest rate scenario. Affordability assessments for all lending are compliant with relevant regulatory and conduct guidelines. The Group takes reasonable steps to validate information used in the assessment of a customer's income and expenditure.

In addition, the Group has in place quantitative limits such as maximum limits for individual customer products, the level of borrowing to income and the ratio of borrowing to collateral. Some of these limits relate to internal approval levels and others are policy limits above which the Group will typically reject borrowing applications. The Group also applies certain criteria that are applicable to specific products, for example applications for buy-to-let mortgages.

For UK mortgages, the Group's policy permits owner occupier applications with a maximum LTV of 95 per cent. This can increase to 100 per cent for specific products where additional security is provided by a supporter of the applicant and held on deposit by the Group. Applications with an LTV above 90 per cent are subject to enhanced underwriting criteria, including higher scorecard cut-offs and loan size restrictions.

Buy-to-let mortgages within Retail are limited to a maximum loan size of £1,000,000 and 75 per cent LTV. Buy-to-let applications must pass a minimum rental cover ratio of 125 per cent under stressed interest rates, after applicable tax liabilities. Portfolio landlords (customers with four or more mortgaged buy-to-let properties) are subject to additional controls including evaluation of overall portfolio resilience.

The Group's policy is to reject any application for a lending product where a customer is registered as bankrupt or insolvent, or has a recent County Court Judgment or financial default registered at a CRA used by the Group above de minimis thresholds. In addition, the Group typically rejects applicants where total unsecured debt, debt-to-income ratios, or other indicators of financial difficulty exceed policy limits.

Where credit acceptance scorecards are used, new models, model changes and monitoring of model effectiveness are independently reviewed and approved in accordance with the governance framework set by the Group Model Governance Committee.

Additional mitigation for Commercial customers

Individual credit assessment and independent sanction of customer and bank limits: with the exception of small exposures to SME customers where certain relationship managers have limited delegated sanctioning authority, credit risk in commercial customer portfolios is subject to sanction by the independent Risk division, which considers the strengths and weaknesses of individual transactions, the balance of risk and reward, and how credit risk aligns to the Group and divisional risk appetite. Exposure to individual counterparties, groups of counterparties or customer risk segments is controlled through a tiered hierarchy of credit authority delegations and risk-based credit limit guidances per client group for larger exposures. Approval requirements for each decision are based on a number of factors including, but not limited to, the transaction amount, the customer's aggregate facilities, any risk mitigation in place, credit policy, risk appetite, credit risk ratings and the nature and term of the risk. The Group's credit risk appetite criteria for counterparty and customer loan underwriting is generally the same as that for loans intended to be held to maturity. All hard loan/bond underwriting must be sanctioned by the Risk division. A pre-approved credit matrix may be used for 'best efforts' underwriting.

Counterparty credit limits: limits are set against all types of exposure in a counterparty name, in accordance with an agreed methodology for each exposure type. This includes credit risk exposure on individual derivatives and securities financing transactions, which incorporates potential future exposures from market movements against agreed confidence intervals. Aggregate facility levels by counterparty are set and limit breaches are subject to escalation procedures.

Daily settlement limits: settlement risk arises in any situation where a payment in cash, securities or equities is made in the expectation of a corresponding receipt in cash, securities or equities. Daily settlement limits are established for each relevant counterparty to cover the aggregate of all settlement risk arising from the Group's market transactions on any single day. Where possible, the Group uses Continuous Linked Settlement in order to reduce foreign exchange (FX) settlement risk.

Master netting agreements

It is credit policy that a Group-approved master netting agreement must be used for all derivative and traded product transactions and must be in place prior to trading, with separate documentation required for each Group entity providing facilities. This requirement extends to trades with clients and the counterparties used for the Bank's own hedging activities, which may also include clearing trades with Central Counterparties (CCPs).

Any exceptions must be approved by the appropriate credit sanctioner. Master netting agreements do not generally result in an offset of balance sheet assets and liabilities for accounting purposes, as transactions are usually settled on a gross basis. However, within relevant jurisdictions and for appropriate counterparty types, master netting agreements do reduce the credit risk to the extent that, if an event of default occurs, all trades with the counterparty may be terminated and settled on a net basis. The Group's overall exposure to credit risk on derivative instruments subject to master netting agreements can change substantially within a short period, since this is the net position of all trades under the master netting agreement.

Other credit risk transfers

The Group also undertakes asset sales, credit derivative based transactions, securitisations (including significant risk transfer transactions), purchases of credit default swaps and purchase of credit insurance as a means of mitigating or reducing credit risk and/or risk concentration, taking into account the nature of assets and the prevailing market conditions.

MONITORING

In conjunction with the Risk division, businesses identify and define portfolios of credit and related risk exposures and the key behaviours and characteristics by which those portfolios are managed and monitored. This entails the production and analysis of regular portfolio monitoring reports for review by senior management. The Risk division in turn produces an aggregated view of credit risk across the Group, including reports on material credit exposures, concentrations, concerns and other management information, which is presented to the divisional risk committees and forums, Group Risk Committee and the Board Risk Committee.

Models

The performance of all models used in credit risk is monitored in line with the Group's model governance framework - see model risk on page 64.

Intensive care of customers in financial difficulty

The Group operates a number of solutions to assist borrowers who are experiencing financial stress. The material elements of these solutions through which the Group has granted a concession, whether temporarily or permanently, are set out below.

Lloyds Bank plc

Risk management

Forbearance

The Group's aim in offering forbearance and other assistance to customers in financial distress is to benefit both the customer and the Group by supporting its customers and acting in their best interests by, where possible, bringing customer facilities back into a sustainable position.

The Group offers a range of tools and assistance to support customers who are encountering financial difficulties. Cases are managed on an individual basis, with the circumstances of each customer considered separately and the action taken judged as being appropriate and sustainable for both the customer and the Group.

Forbearance measures consist of concessions towards a debtor that is experiencing or about to experience difficulties in meeting its financial commitments. This can include modification of the previous terms and conditions of a contract or a total or partial refinancing of a troubled debt contract, either of which would not have been required had the debtor not been experiencing financial difficulties.

The provision and review of such assistance is controlled through the application of an appropriate policy framework and associated controls. Regular review of the assistance offered to customers is undertaken to confirm that it remains appropriate, alongside monitoring of customers' performance and the level of payments received.

The Group classifies accounts as forborne at the time a customer in financial difficulty is granted a concession. However, where customers were temporarily impacted by COVID-19, the Group looked to follow regulator principles and guidance on the granting of concessions resulting from the impact of the pandemic.

Balances in default or classified as Stage 3 are always considered to be non-performing. Balances may be non-performing but not in default or Stage 3, where for example they are within their non-performing forbearance cure period.

Non-performing exposures can be reclassified as performing forborne after a minimum 12-month cure period, providing there are no past due amounts or concerns regarding the full repayment of the exposure. A minimum of a further 24 months must pass from the date the forborne exposure was reclassified as performing forborne before the account can exit forbearance. If conditions to exit forbearance are not met at the end of this probation period, the exposure shall continue to be identified as forborne until all the conditions are met.

The Group's treatment of loan renegotiations is included in the impairment policy in note 2(H) on page 93.

Customers receiving support from UK Government sponsored programmes

To assist customers in financial distress, the Group participates in UK Government sponsored programmes for households, including the Income Support for Mortgage Interest programme, under which the government pays the Group all or part of the interest on the mortgage on behalf of the customer. This is provided as a government loan which the customer must repay.

Support for customers during the COVID-19 pandemic

Working closely with the UK Government and regulators, the Group supported its retail, small business and commercial customers through a comprehensive and unprecedented range of flexible measures to help alleviate temporary financial pressure on customers during the crisis.

For retail customers, the Group provided payment holidays of up to three months across a range of products including mortgages, personal loans, credit cards and motor finance, extensions of up to 6 months in total were available.

Similarly, the Group provided significant support for its small business and commercial customers as well as providing loans to businesses under the different government schemes, including Bounce Back Loan Scheme (BBLs), Coronavirus Business Interruption Loan Scheme (CBILS) and Coronavirus Large Business Interruption Loan Scheme (CLBILS). These schemes closed in March 2021, replaced by the Recovery Loan Scheme through which the Group is also providing support. The Group continues to provide ongoing support to BBLs customers through the Pay As You Grow (PAYG) scheme, where customers are able to access a number of options including repayment holidays and term extensions. The Group also supported its customers through repayment holidays and its own COVID-19 fund which included fee-free lending for new overdrafts or overdraft limit increases as well as new or increased invoice discounting and finance facilities. The Group also offered SME customers a mentoring service to help navigate a path beyond the pandemic.

LLOYDS BANK GROUP CREDIT RISK PORTFOLIO IN 2021

Overview

- Performance across the Group's lending portfolios has been robust, driven in part by the successful public policy interventions to address the financial impacts of COVID-19, including government-backed lending schemes and payment holidays, which have limited the increase in unemployment and helped keep credit defaults and business failures low
- Portfolios have also benefitted from the Group's proactive risk management and prudent credit risk appetite, with robust cashflow criteria and LTVs in the Group's secured portfolios
- However, looking forward some portfolio deterioration may be expected, especially considering the withdrawal of government COVID-19 support measures and effects from a number of downside risks, including higher inflation and rising interest rates
- Repayments under the government-backed lending schemes began in the second half of 2021, with arrears levels being carefully monitored, alongside continued review of customer trends and indicators to ensure early signs of customer distress are quickly identified
- The Group continues to hold appropriate expected credit loss (ECL) allowances in light of the uncertainties and to protect against downside risks
- The impairment credit in 2021 was £1,318 million, compared to a charge of £4,060 million in 2020. The full-year credit resulted from a release of expected credit loss allowances based upon improvements to the macroeconomic outlook for the UK, combined with robust observed credit performance, with a low run rate impairment charge
- As a result, the Group's customer related ECL allowances reduced in the period from £6,127 million to £3,998 million. Reductions in Commercial Banking ECL allowances also reflected improved outcomes on restructuring cases, reduction in Stage 2 exposures and lower flows to default
- Stage 2 loans and advances to customers reduced from £51,280 million to £34,884 million and as a percentage of total lending reduced by 3.4 percentage points to 7.2 per cent (31 December 2020: 10.6 per cent), predominantly reflecting the improvement in the Group's forward-looking macroeconomic assumptions. Of these, 89.0 per cent were up to date (31 December 2020: 91.6 per cent). Stage 2 coverage reduced to 3.4 per cent (31 December 2020: 4.6 per cent)
- Stage 3 loans and advances to customers reduced in the period to £6,406 million (31 December 2020: £6,443 million) but remained stable as a percentage of total lending at 1.3 per cent (31 December 2020: 1.3 per cent). Stage 3 coverage reduced by 5.0 percentage points to 27.4 per cent (31 December 2020: 32.4 per cent), largely driven by an increase in Retail BBLs assets which hold zero ECL allowances due to the

Lloyds Bank plc
Risk management

UK Government guarantee in place, the improved macroeconomic outlook, and a small number of single name releases in Commercial Banking, including coronavirus impacted restructuring cases

Prudent risk appetite and risk management

- The Group continues to take a prudent approach to credit risk and has a through-the-cycle credit risk appetite, while working closely with customers to help and support them through and recover from the crisis
- Sector and asset class concentrations within the portfolios are closely monitored and controlled, with mitigating actions taken where appropriate. Sector and product caps and policies limit exposure to certain higher risk and vulnerable sectors and asset classes
- The Group's effective risk management seeks to ensure early identification and management of customers and counterparties who may be showing signs of distress
- The Group will continue to work closely with its customers throughout the recovery to ensure they receive the appropriate level of support, including where repayments under the UK Government scheme lending fall due

Group loans and advances to customers

The following pages contain analysis of the Group's loans and advances to customers by sub-portfolio. Loans and advances to customers are categorised into the following stages:

Stage 1 assets comprise of newly originated assets (unless purchased or originated credit impaired), as well as those which have not experienced a significant increase in credit risk. These assets carry an expected credit loss allowance equivalent to the expected credit losses that result from those default events that are possible within 12 months of the reporting date (12 month expected credit losses).

Stage 2 assets are those which have experienced a significant increase in credit risk since origination. These assets carry an expected credit loss allowance equivalent to the expected credit losses arising over the lifetime of the asset (lifetime expected credit losses).

Stage 3 assets have either defaulted or are otherwise considered to be credit impaired. These assets carry a lifetime expected credit loss.

Purchased or originated credit-impaired assets (POCI) are those that have been originated or acquired in a credit impaired state. This includes within the definition of credit impaired the purchase of a financial asset at a deep discount that reflects impaired credit losses.

1 Includes forbearance, client and product-specific indicators not reflected within quantitative PD assessments.

2 Includes assets that have triggered PD movements, or other rules, given that being 1-29 days in arrears in and of itself is not a Stage 2 trigger.

3 Expected credit loss allowance on loans and advances to customers (drawn and undrawn).

The Group's assessment of a significant increase in credit risk, and resulting categorisation of Stage 2, includes customers moving into early arrears as well as a broader assessment that an up to date customer has experienced a level of deterioration in credit risk since origination. A more sophisticated assessment is required for up to date customers, which varies across divisions and product type. This assessment incorporates specific triggers such as a significant proportionate increase in probability of default relative to that at origination, recent arrears, forbearance activity, internal watch lists and external bureau flags. Up to date exposures in Stage 2 are likely to show lower levels of expected credit loss (ECL) allowance relative to those that have already moved into arrears given that an arrears status typically reflects a stronger indication of future default and greater likelihood of credit losses.

Lloyds Bank plc

Risk management

Retail

- Performance in the Retail portfolio has remained robust, driven in part by the successful public policy interventions, government-backed lending schemes and payment holidays, which have limited unemployment and helped keep credit defaults and business failures low. The portfolio has also benefitted from proactive risk management and the continued low interest rate environment
 - New business quality remains strong
 - Early arrears rates remain below pre-pandemic levels on personal lending products
 - Coverage across all IFRS 9 stages has decreased largely due to the improved macroeconomic outlook
- Strong credit performance and an improved economic outlook have allowed the Group to progressively unwind many of the additional precautionary credit quality controls introduced during the pandemic, whilst continuing to ensure that customers and the Group remain protected against any remaining uncertainty in the economy and cost of living increases
- A Retail impairment credit of £455 million for 2021 compares to a charge of £2,384 million for 2020. This significant decrease resulted from a release of customer related expected credit loss (ECL) allowances driven by the Group's improved macroeconomic outlook, combined with robust observed credit performance, with charges relating to flows to arrears and defaults remaining low despite expiry of all payment holidays
- Existing IFRS 9 staging rules and triggers have been maintained across Retail, with the exception of minor changes to the Loans & Overdraft portfolios to tighten criteria and align to the credit cards portfolio. Transfers between stages have been primarily driven by credit risk rating movements and the estimated impact of the economic factors on a customer's forward-looking default risk
- Retail customer related ECL allowance as a percentage of drawn loans and advances (coverage) decreased to 0.6 per cent (31 December 2020: 1.0 per cent) due to the favourable updates in the Group's economic forecast. As at 31 December 2021 the majority of ECL decreases are reflected within Stage 2 under IFRS 9, representing cases which have observed a significant increase in credit risk since origination (SICR)
- Stage 2 loans and advances comprises 7.9 per cent of the Retail portfolio (31 December 2020: 10.5 per cent), of which 87.2 per cent are up to date, performing loans (31 December 2020: 89.3 per cent)
- Stage 2 ECL coverage has decreased to 3.3 per cent (31 December 2020: 4.4 per cent), reflecting the improved macroeconomic outlook
- Stage 3 loans and advances have remained broadly flat at 1.0 per cent of total loans and advances (31 December 2020: 0.8 per cent and Stage 3 ECL coverage decreased to 20.9 per cent (31 December 2020: 25.2 per cent) due to an increase in BBLS assets which hold zero ECL due to the government guarantee in place, and the improved macroeconomic outlook

Portfolios

UK mortgages

- The UK mortgages portfolio is well positioned with low arrears and a strong loan to value (LTV) profile. The Group has actively improved the quality of the portfolio over the years using robust affordability and credit controls, while the balances of higher risk portfolios originated prior to 2008 have continued to reduce
- While the housing market has remained resilient throughout 2021 with strong customer demand, the Group has taken action to protect credit quality and participates in the government guarantee scheme for greater than 90 per cent LTVs, which provides risk mitigation at the highest exposures
- Total loans and advances increased to £308.3 billion (31 December 2020: £294.8 billion), with a small reduction in average LTV to 42.1 per cent (31 December 2020: 43.5 per cent). The proportion of balances with an LTV greater than 90 per cent decreased to 0.5 per cent (31 December 2020: 0.6 per cent). The average LTV of new business decreased to 63.3 per cent (31 December 2020: 63.9 per cent)
- There was an impairment credit of £273 million for 2021 compared to a charge of £478 million for 2020, reflecting improvements to the UK's macroeconomic outlook and improved house prices. Total ECL coverage remained stable at 0.3 per cent (31 December 2020: 0.3 per cent)
- Stage 2 loans and advances decreased to 7.1 per cent of the portfolio (31 December 2020: 9.8 per cent) and Stage 2 ECL coverage has increased to 1.8 per cent (31 December 2020: 1.6 per cent). These impacts also reflect improvements in the UK's macroeconomic outlook, with a reduction in balances transferred into Stage 2 based on the forward-looking view of their credit performance, in addition to favourable experience and house price assumptions
- Stage 3 loans and advances remained stable at 0.6 per cent of the portfolio (31 December 2020: 0.6 per cent) and Stage 3 ECL coverage decreased to 9.5 per cent (31 December 2020: 10.3 per cent). This reflects favourable credit performance, in addition to favourable house price assumptions (both observed and forecast)

Credit cards

- Credit cards balances decreased to £14.5 billion (31 December 2020 £15.1 billion) due to reduced levels of customer spend
- There was an impairment credit of £49 million for 2021, compared to a charge of £800 million for 2020, reflecting lower than anticipated arrears emergence and improvements in the macroeconomic outlook. Total ECL coverage decreased to 3.6 per cent (31 December 2020: 6.1 per cent)
- This favourability is reflected in Stage 2 loans and advances which decreased to 14.3 per cent of the portfolio (31 December 2020: 21.7 per cent) and Stage 2 ECL coverage which has reduced to 12.0 per cent (31 December 2020: 16.2 per cent)
- Stage 3 loans and advances decreased to 2.0 per cent of the portfolio (31 December 2020: 2.3 per cent) and Stage 3 ECL coverage increased to 56.9 per cent (31 December 2020: 56.0 per cent)

Lloyds Bank plc

Risk management

Loans and overdrafts

- Loans and advances for personal current account and the personal loans portfolios remained broadly flat at £9.6 billion (31 December 2020: £9.5 billion), reflecting recovering customer demand with rising economic activity
- The impairment charge was £39 million for the full year 2021 compared to £739 million for the full year 2020. This decrease is due to the improved outlook within the Group's macroeconomic forecasts, in addition to favourable credit performance, reducing both Stage 2 ECL coverage to 15.4 per cent (31 December 2020: 22.6 per cent) and overall ECL coverage to 4.7 per cent (31 December 2020: 7.6 per cent)

UK Motor Finance

- The UK Motor Finance portfolio decreased from £15.2 billion for 2020 to £14.3 billion for 2021 due to reduced market activity and new car supply issues as a result of the pandemic
- There was an impairment credit of £151 million for 2021 compared to a charge of £226 million for 2020, reflecting improvements to the Group's macroeconomic outlook and higher than expected used car prices. ECL coverage decreased to 2.1 per cent (31 December 2020: 3.3 per cent)
- Updates to Residual Value (RV) and Voluntary Termination (VT) risk held against Personal Contract Purchase (PCP) and Hire Purchase (HP) lending are included within the impairment charge. Observed car price gains partially driven by global supply issues, supported by better than expected disposal experience, result in combined RV and VT provisions of £95 million as at 31 December 2021 (31 December 2020: £192 million)
- Stage 2 ECL coverage decreased to 4.0 per cent (31 December 2020: 7.7 per cent) and Stage 3 ECL coverage decreased to 57.7 per cent (31 December 2020: 66.8 per cent) this reflects favourable credit performance, in addition to updates to the Group's outlook on used car prices

Other

- Other loans and advances decreased slightly to £19.2 billion (31 December 2020: £19.4 billion). The decrease was largely driven by a reduction in balances on the Bounce Back Loan Scheme (BBLs) and the Coronavirus Business Interruption Loan Scheme (CBILs) as the schemes closed in March 2021 and repayments commenced from the second quarter of 2021
- Bounce Back Loans benefit from Pay as You Grow (PAYG) options including repayment holidays and term extensions which have the potential to delay recognition of customer financial difficulties
- Stage 3 loans and advances increased to 4.1 per cent (31 December 2020: 1.0 per cent) driven largely by BBLs assets. However, Stage 3 coverage reduced to 13.8 per cent (31 December 2020: 39.3 per cent) as these assets hold zero ECL due to government guarantees in place
- There was an impairment credit of £21 million for 2021 compared to a charge of £141 million for 2020, primarily due to the improved outlook within the Group's economic forecasts

Lloyds Bank plc Risk management

Interest only mortgages

The Group provides interest only mortgages to owner occupier mortgage customers whereby only payments of interest are made for the term of the mortgage with the customer responsible for repaying the principal outstanding at the end of the loan term. At 31 December 2021, owner occupier interest only balances as a proportion of total owner occupier balances had reduced to 18.7 per cent (31 December 2020: 21.6 per cent). The average indexed loan to value remained low at 36.8 per cent (31 December 2020: 39.0 per cent).

For existing interest only mortgages, a contact strategy is in place during the term of the mortgage to ensure that customers are aware of their obligations to repay the principal upon maturity of the loan.

Treatment strategies are in place to help customers anticipate and plan for repayment of capital at maturity and support those who may have difficulty in repaying the principal amount. A dedicated specialist team supports customers who have passed their contractual maturity date and are unable to fully repay the principal. A range of treatments are offered to customers based on their individual circumstances to create fair and sustainable outcomes.

Retail forbearance

The basis of disclosure for forbearance is aligned to definitions used in the European Banking Authority's FINREP reporting. Total forbearance for the major retail portfolios has improved by £476 million to £5.4 billion driven primarily by a reduction in customers where the treatment sees arrears reset and are added to the loan balance (capitalisations).

The main customer treatments included are: repair, where arrears are added to the loan balance and the arrears position cancelled; instances where there are suspensions of interest and/or capital repayments; past term interest only mortgages; and refinance personal loans.

As a percentage of loans and advances, forbearance loans improved to 1.5 per cent at 31 December 2021 (31 December 2020: 1.7 per cent).

Total expected credit losses (ECL) as a proportion of loans and advances which are forborne has increased to 7.2 per cent (31 December 2020: 7.0 per cent).

1 Expected credit loss allowance as a percentage of total loans and advances which are forborne is calculated excluding loans in recoveries for Credit cards, Loans and overdrafts (31 December 2021: £87 million; 31 December 2020: £75 million).

2 In line with FINREP reporting and regulatory guidelines, Retail forborne loans and advances do not include COVID-19 moratoria.

Lloyds Bank plc

Risk management

Commercial Banking

Portfolio overview

- Commercial Banking has actively supported its customers throughout the pandemic, through a range of propositions including capital repayment holidays, working capital line increases and financial covenant waivers, as well as supporting small businesses and corporates through full use of the UK Government lending schemes
- Credit performance across the portfolios has been robust, driven in part by the strong market liquidity and government intervention measures, which have helped to support clients and kept credit defaults and business failures at low levels. Portfolios have also benefitted from the Group's prudent risk management and the continued low interest rate environment
- As the economy continued its recovery and business' cashflows started to normalise, there has been an improvement in customer credit ratings, particularly in the larger corporates segment of Commercial, partially reversing some of the downgrades seen earlier during the pandemic. The Corporate and Institutional business continues to have a predominance of investment grade clients and is well positioned against the uncertain economic outlook
- While some sectors such as travel, transportation, non-essential retail, leisure and hospitality were particularly impacted by the crisis, exposure to these sectors remains relatively limited and, in general, sectors have been more resilient than anticipated to date. The Group still expects recovery to be slower in a few of the impacted sectors and anticipates longer term structural changes in these, and a number of other sectors. Sector and credit risk appetite continue to be proactively managed to ensure the Group is protected, and customers are supported in the right way
- The SME portfolio remains largely secured and credit impacts have been relatively muted throughout the pandemic, recognising that Government support measures have prevented more widespread defaults and business failures. Repayments under the UK Government lending schemes began in the second half of 2021, with low arrears to date. The level of arrears continues to be carefully monitored, with early risk mitigation activities taken as appropriate
- Even though economic conditions have improved, significant uncertainties remain, with a number of prevailing headwinds and the withdrawal of the Government COVID-19 support measures yet to impact portfolio performance. Some credit deterioration is therefore expected in 2022
- However, the Group continues to support its more vulnerable customers early through focused risk management via its Watchlist and Business Support framework, and will continue to balance prudent risk appetite with ensuring support for financially viable customers on their road to recovery

Impairments

- There was an impairment credit of £857 million in 2021, compared to an impairment charge of £1,280 million in 2020. The credit for 2021 includes a release of expected credit loss (ECL) allowances resulting from improvements to the Group's view of the UK macroeconomic outlook, and a net release on coronavirus impacted restructuring cases within the Business Support Unit (BSU). The remaining net release reflects other Stage 3 releases, credit quality improvements, reduced balance sheet lending, and low levels of gross charges from cases flowing into default. As a result, total ECL allowances reduced by £995 million to £1,315 million at 31 December 2021 (31 December 2020: £2,310 million)
- The Group recognises that credit quality has been partly supported by the UK Government schemes and the ECL provision at 31 December 2021 assumes some additional losses will emerge now that the support has ended and structural change starts to emerge in some sectors
- Stage 2 loans and advances reduced by £7,855 million to £6,083 million (31 December 2020: £13,938 million), largely driven by the improvement in the Group's forward-looking economic assumptions, with 97.3 per cent of Stage 2 balances up to date. As a result, Stage 2 as a proportion of total loans and advances to customers reduced to 8.9 per cent (31 December 2020: 18.8 per cent). Stage 2 ECL coverage was lower at 4.0 per cent (31 December 2020: 5.1 per cent) with the reduction in coverage a direct result of the change in the forward-look multiple economic scenarios
- Stage 3 loans and advances reduced to £2,862 million (31 December 2020: £3,485 million) and as a proportion of total loans and advances to customers, reduced to 4.2 per cent (31 December 2020: 4.7 per cent). SME customer flows to Stage 3 have been lower and non-SME flows were offset by repayments and write-offs. Stage 3 ECL coverage reduced to 34.8 per cent (31 December 2020: 38.5 per cent) predominantly driven by the release of provisions on a small number of cases in Business Support, including coronavirus impacted restructuring cases, where coverage levels were relatively higher

Commercial Banking UK Direct Real Estate

- Commercial Banking UK Direct Real Estate gross lending stood at £10.9 billion at 31 December 2021 (net of exposures subject to protection through Significant Risk Transfer (SRT) securitisations). The Group has a further £0.7 billion of real estate lending in Business Banking within the Retail division
- The Group classifies Direct Real Estate as exposure which is directly supported by cash flows from property activities (as opposed to trading activities, such as hotels, care homes and housebuilders). Exposures of £5.2 billion to social housing providers are also excluded
- Recognising this is a cyclical sector, policies and caps are in place to control origination quality and exposure levels, including in a number of asset type categories. The Group's focus remains on the UK market and business propositions have been written in line with a prudent, through-the-cycle risk appetite with conservative LTVs, strong quality of income, proven management teams and predominately in stronger sub sectors
- Overall performance has proved resilient despite the rent collection challenge during COVID-19. Retail and Leisure have remained the most challenged sub sectors, but despite this, the portfolio remains well positioned and proactively managed, with appropriate risk mitigants in place:
 - Exposures continue to be heavily weighted towards investment real estate (c.90 per cent) rather than development. Of these investment exposures, over 82 per cent have an LTV of less than 60 per cent, with an average LTV of 42 per cent
 - Approximately 90 per cent of exposures greater than £5 million have an interest cover ratio of greater than 2.0 times and in SME, LTV at origination has been typically limited to c.55 per cent, given prudent repayment cover criteria (which includes a notional base rate serviceability stress)
 - Approximately 55 per cent of exposures relate to commercial real estate (with no speculative development lending) with the remainder predominantly related to residential real estate. The underlying sub sector split is diversified with more limited exposure to higher risk sub sectors (c.14 per cent of exposures secured by Retail assets, with appetite tightened since 2018)
 - In the office sub sector, risk appetite continues to be proactively managed with appropriate risk mitigation tightening seen in 2021. The Group remains focused on high quality origination in this sector

Lloyds Bank plc Risk management

- Use of Significant Risk Transfer (SRT) securitisations also acts as a risk mitigant, with run-off of these carefully managed and tracked
- Both investment and development lending is subject to specific credit risk appetite criteria. Development lending criteria includes maximum loan to gross development value and maximum loan to cost, with funding typically only released against completed work, as confirmed by the Group's monitoring quantity surveyor

Lloyds Bank plc

Risk management

FUNDING AND LIQUIDITY RISK

DEFINITION

Funding risk is defined as the risk that the Group does not have sufficiently stable and diverse sources of funding or the funding structure is inefficient. Liquidity risk is defined as the risk that the Group has insufficient financial resources to meet its commitments as they fall due, or can only secure them at excessive cost.

EXPOSURE

Liquidity exposure represents the potential stressed outflows in any future period less expected inflows. The Group considers liquidity exposure from both an internal and a regulatory perspective.

MEASUREMENT

Liquidity risk is managed through a series of measures, tests and reports that are primarily based on contractual maturities with behavioural overlays as appropriate. The Group undertakes quantitative and qualitative analysis of the behavioural aspects of its assets and liabilities in order to reflect their expected behaviour.

MITIGATION

The Group manages and monitors liquidity risks and ensures that liquidity risk management systems and arrangements are adequate with regard to the internal risk appetite, Group strategy and regulatory requirements. Liquidity policies and procedures are subject to independent internal oversight by Risk. Overseas branches and subsidiaries of the Group may also be required to meet the liquidity requirements of the entity's domestic country. Management of liquidity requirements is performed by the overseas branch or subsidiary in line with Lloyds Banking Group policy. The Group plans funding requirements over its planning period, combining business as usual and stressed conditions. The Group manages its liquidity position both with regard to its internal risk appetite and the Liquidity Coverage Ratio (LCR) as required by the PRA, the Capital Requirements Directive (CRD IV) and the Capital Requirements Regulation (CRR) liquidity requirements.

The Group's funding and liquidity position is underpinned by its significant customer deposit base, and is supported by strong relationships across customer segments. The Group has consistently observed that in aggregate the retail deposit base provides a stable source of funding. Funding concentration by counterparty, currency and tenor is monitored on an ongoing basis and where concentrations do exist, these are managed as part of the planning process and limited by the internal funding and liquidity risk monitoring framework, with analysis regularly provided to senior management.

To assist in managing the balance sheet, the Group operates a Liquidity Transfer Pricing (LTP) process which: allocates relevant interest expenses from the centre to the Group's banking businesses within the internal management accounts; helps drive the correct inputs to customer pricing; and is consistent with regulatory requirements. LTP makes extensive use of behavioural maturity profiles, taking account of expected customer loan prepayments and stability of customer deposits, modelled on historic data.

The Group can monetise liquid assets quickly, either through the repurchase agreements (repo) market or through outright sale. In addition, the Group has pre-positioned a substantial amount of assets at the Bank of England's Discount Window Facility which can be used to access additional liquidity in a time of stress. The Group considers diversification across geography, currency, markets and tenor when assessing appropriate holdings of liquid assets. The Group's liquid asset buffer is available for deployment at immediate notice, subject to complying with regulatory requirements.

MONITORING

Daily monitoring and control processes are in place to address internal and regulatory liquidity requirements. The Group monitors a range of market and internal early warning indicators on a daily basis for early signs of liquidity risk in the market or specific to the Group. This captures regulatory metrics as well as metrics the Group considers relevant for its liquidity profile. These are a mixture of quantitative and qualitative measures, including: daily variation of customer balances; changes in maturity profiles; funding concentrations; changes in LCR outflows; credit default swap (CDS) spreads; and basis risks.

The Group carries out internal stress testing of its liquidity and potential cash flow mismatch position over both short (up to one month) and longer-term horizons against a range of scenarios forming an important part of the internal risk appetite. The scenarios and assumptions are reviewed at least annually to ensure that they continue to be relevant to the nature of the business, including reflecting emerging horizon risks to the Group. For further information on the Group's 2021 liquidity stress testing results refer to page 46.

The Group maintains a Contingency Funding Framework as part of the wider Recovery Plan which is designed to identify emerging liquidity concerns at an early stage, so that mitigating actions can be taken to avoid a more serious crisis developing. Contingency Funding Plan invocation and escalation processes are based on analysis of five major quantitative and qualitative components, comprising assessment of: early warning indicators; prudential and regulatory liquidity risk limits and triggers; stress testing results; event and systemic indicators; and market intelligence.

Funding and liquidity management in 2021

The Group has maintained its robust funding and liquidity position with the loan to deposit ratio remaining stable at 96 per cent as at 31 December 2021 and customer deposit growth remaining strong over the course of the year. Ahead of the closure of the Term Funding Scheme with additional incentives for SMEs (TFSME) in October 2021, the Group drew additional funds taking the total amount outstanding to £30 billion as at 31 December 2021.

The Group's liquid assets continue to exceed the regulatory minimum and internal risk appetite, with a liquidity coverage ratio (LCR) of 126 per cent (based on a monthly rolling average over the previous 12 months) as at 31 December 2021.

The Group saw limited term funding needs over the course of 2021 given the availability of customer deposits and TFSME, both of which are more cost effective sources of funding for the Group. Overall, wholesale funding totalled £63.2 billion as at 31 December 2021.

Lloyds Bank credit ratings continue to reflect the resilience of the bank's business model and the strength of the balance sheet. Over the course of June and July, Moody's, S&P and Fitch all returned the outlook on Lloyds Bank's credit ratings to Stable, from Negative. This reflected better underlying economic expectations for the UK and the belief that Lloyds Bank is well positioned to benefit from the macroeconomic recovery. In July, Moody's finalised and updated their methodology which resulted in a one notch upgrade to the Subordinated issuances of Lloyds Bank.

Risk management

Liquidity portfolio

At 31 December 2021, the banking business had £114.7 billion of highly liquid unencumbered LCR eligible assets, based on a monthly rolling average over the previous 12 months post any liquidity haircuts (31 December 2020: £113.4 billion), of which £113.2 billion is LCR level 1 eligible (31 December 2020: £112.0 billion) and £1.5 billion is LCR level 2 eligible (31 December 2020: £1.4 billion). These assets are available to meet cash and collateral outflows and regulatory requirements.

LCR eligible assets	Average 2021 ¹ £bn	Average 2020 ¹ £bn
Level 1		
Cash and central bank reserves	50.3	46.5
High quality government/MDB/agency bonds ²	60.6	62.6
High quality covered bonds	2.3	2.9
Total	113.2	112.0
Level 2 ³	1.5	1.4
Total LCR eligible assets	114.7	113.4

¹ Based on 12 months rolling average to 31 December. Eligible assets are calculated as an average of month-end observations over the previous 12 months post any liquidity haircuts.

² Designated multilateral development bank (MDB).

³ Includes Level 2A and Level 2B.

LCR eligible assets by currency

	Sterling £bn	US Dollar £bn	Euro £bn	Other currencies £bn	Total £bn
At 31 December 2021					
Level 1	92.4	7.9	12.9	—	113.2
Level 2	0.7	0.4	—	0.4	1.5
Total¹	93.1	8.3	12.9	0.4	114.7
At 31 December 2020					
Level 1	94.4	7.3	10.3	—	112.0
Level 2	0.9	0.3	0.2	—	1.4
Total¹	95.3	7.6	10.5	—	113.4

¹ Based on 12 months rolling average to 31 December. Eligible assets are calculated as an average of month-end observations over the previous 12 months post any liquidity haircuts.

The banking business also has a significant amount of non-LCR eligible liquid assets which are eligible for use in a range of central bank or similar facilities. Future use of such facilities will be based on prudent liquidity management and economic considerations, having regard for external market conditions.

Stress testing results

Internal liquidity stress testing results at 31 December 2021 (calculated as an average of month end observations over the previous 12 months) showed that the banking business had liquidity resources representing 131 per cent of modelled outflows over a three month period from all wholesale funding sources, retail and corporate deposits, intraday requirements and rating dependent contracts under the Group's most severe liquidity stress scenario.

This scenario includes a two notch downgrade of the Group's current long-term debt rating and accompanying one notch short-term downgrade implemented instantaneously by all major rating agencies.

Lloyds Bank plc

Risk management

CAPITAL RISK

DEFINITION

Capital risk is defined as the risk that the Group has a sub-optimal quantity or quality of capital or that capital is inefficiently deployed across the Group.

EXPOSURES

A capital risk event arises when the Group has insufficient capital resources to support its strategic objectives and plans, and to meet both regulatory and external stakeholder requirements and expectations. This could arise due to a depletion of the Group's capital resources as a result of the crystallisation of any of the risks to which it is exposed, or through a significant increase in risk-weighted assets as a result of rule changes or economic deterioration. Alternatively a shortage of capital could arise from an increase in the minimum requirements for capital, leverage or MREL either at Group level or regulated entity level. The Group's capital management approach is focused on maintaining sufficient and appropriate capital resources across all regulated levels of its structure in order to prevent such exposures.

MEASUREMENT

In accordance with UK ring-fencing legislation, the Group was appointed as the Ring-Fenced Bank sub-group ('RFB sub-group') under Lloyds Banking Group plc. As a result the Group is subject to separate supervision by the UK Prudential Regulation Authority (PRA) on a sub-consolidated basis (as the RFB sub-group) in addition to the supervision applied to Lloyds Bank plc on an individual basis.

The Group maintains capital levels on a consolidated and individual basis commensurate with a prudent level of solvency to achieve financial resilience and market confidence. To support this, capital risk appetite on both a consolidated and individual basis is calibrated by taking into consideration both an internal view of the amount of capital to hold as well as external regulatory requirements.

Under UK law, EU capital rules that existed on 31 December 2020 continue to apply to the Group following the end of the transition period for the UK's withdrawal from the European Union, subject to the temporary transitional powers (TTP) granted to the PRA which extend until 31 March 2022. The Group continues to therefore measure both its capital requirements and the amount of capital resources it holds to meet those requirements through applying the regulatory framework defined by the Capital Requirements Directive and Regulation (CRD IV), as amended by revisions to the Capital Requirements Directive implemented in December 2020 (CRD V) and by those provisions of the revised Capital Requirements Regulation (CRR II) that came into force in June 2019 and December 2020. The requirements are implemented in the UK by the PRA and supplemented through additional regulation under the PRA Rulebook and associated statements of policy, supervisory statements and other guidance.

The remaining provisions of CRR II will apply in the UK from 1 January 2022 and have been largely enacted via the PRA Rulebook.

The minimum amount of total capital, under Pillar 1 of the regulatory capital framework, is set at 8 per cent of total risk-weighted assets. At least 4.5 per cent of risk-weighted assets are required to be covered by common equity tier 1 (CET1) capital and at least 6 per cent of risk-weighted assets are required to be covered by tier 1 capital. These minimum Pillar 1 requirements are supplemented by additional minimum requirements under Pillar 2A of the regulatory capital framework, the aggregate of which is referred to as the Group's Total Capital Requirement (TCR), and a number of regulatory buffers as described below.

Under Pillar 2A, additional minimum requirements are set through the issuance of an Individual Capital Requirement (ICR), which adjusts the Pillar 1 minimum requirement for those risks not covered or not fully covered under Pillar 1. A key input into the PRA's ICR process is the Group's own assessment of the amount of capital it needs, a process known as the Internal Capital Adequacy Assessment Process (ICAAP). During the year the PRA reduced the Group's nominal Pillar 2A capital requirement, which was the equivalent of around 4.0 per cent of risk-weighted assets as at 31 December 2021, of which the minimum amount to be met by CET1 capital was the equivalent of around 2.2 per cent of risk-weighted assets. During 2022, the PRA will revert to setting a variable amount for the Group's Pillar 2A capital requirement (being a set percentage of risk-weighted assets), with fixed add-ons for certain risk types.

A range of additional regulatory capital buffers apply under the capital rules, which are required to be met with CET1 capital. These include a capital conservation buffer (2.5 per cent of risk-weighted assets) and a time-varying countercyclical capital buffer (CCyB) which is currently around 0 per cent of risk-weighted assets following the decision by UK regulators to reduce the UK CCyB rate to nil during the first half of 2020 as part of the measures introduced in response to the coronavirus pandemic. In December 2021 the Bank of England's Financial Policy Committee announced that the UK CCyB rate will increase to 1 per cent in December 2022, with an expectation that it will increase to 2 per cent in Q2 2023 if the economy continues to recover broadly in line with the Bank of England's central projections and upon the assumption there is no significant change to the financial stability outlook. This would represent an equivalent increase in the Group's CCyB to 0.9 per cent in December 2022 and 1.9 per cent in Q2 2023, based upon the position of the Group at 31 December 2021.

In addition, the Group in its capacity as the RFB sub-group is subject to an other systemically important institution (O-SII) buffer of 2.0 per cent of risk-weighted assets (formerly referred to as the systemic risk buffer) which is designed to hold systemically important banks to higher capital standards so that they can withstand a greater level of stress before requiring resolution. The next review of the RFB sub-group's O-SII buffer will take place in December 2023, based upon year-end 2022 financial results, with any changes applying from 1 January 2025. The FPC is proposing to amend the O-SII buffer framework in order to change the metric for determining the buffer rate from total assets to the UK leverage exposure measure.

As part of the Group's capital planning process, forecast capital positions are subjected to stress testing to determine the adequacy of the Group's capital resources against minimum requirements, including the ICR. The PRA considers outputs from the Group's stress tests, in conjunction with other information, as part of the process for informing the setting of a capital buffer for the Group, known as the PRA Buffer. The PRA requires this buffer to remain confidential.

Usage of the PRA Buffer would trigger a dialogue between the Group and the PRA to agree what action is required whereas a breach of the combined capital buffer (all other regulatory buffers, as referenced above) would give rise to mandatory restrictions upon any discretionary capital distributions. The PRA has previously communicated its expectation that banks' capital and liquidity buffers can be drawn down as necessary to support the real economy through a shock and that sufficient time would be made available to restore buffers in a gradual manner.

In addition to the risk-based capital framework outlined above, the Group is also subject to minimum capital requirements under the UK Leverage Ratio Framework. The leverage ratio is calculated by dividing fully loaded tier 1 capital resources by the leverage exposure which is a defined measure of on-balance sheet assets and off-balance sheet items.

Lloyds Bank plc

Risk management

The minimum leverage ratio requirement under the UK Leverage Ratio Framework is 3.25 per cent. This is supplemented by a time-varying countercyclical leverage buffer (CCLB), which is currently 0 per cent of the leverage exposure measure, and an additional leverage ratio buffer of 0.7 per cent of the leverage exposure measure which reflects the application of the Group's O-SII buffer. Following the FPC's announcements on the planned increase of the UK CCyB rate, the Group's CCLB would be expected to increase to 0.3 per cent in December 2022 and 0.7 per cent in Q2 2023, based upon the position of the Group at 31 December 2021.

At least 75 per cent of the 3.25 per cent minimum leverage ratio requirement as well as 100 per cent of regulatory leverage buffers must be met by CET1 capital.

The leverage ratio framework does not currently give rise to higher regulatory capital requirements for the Group than the risk-based capital framework.

MITIGATION

The Group's capital management framework is part of a comprehensive capital management framework within Lloyds Banking Group that includes the setting of capital risk appetite and capital planning and stress testing activities. Close monitoring of capital and leverage ratios is undertaken to ensure the Group meets regulatory requirements and risk appetite levels and deploys its capital resources efficiently.

The Group monitors early warning indicators and maintains a Capital Contingency Framework as part of the Lloyds Banking Group Recovery Plan which are designed to identify emerging capital concerns at an early stage, so that mitigating actions can be taken, if needed. The Recovery Plan sets out a range of potential mitigating actions that the Group could take in response to a stress, including as part of the wider Lloyds Banking Group response. For example the Group is able to accumulate additional capital through the retention of profits over time, which can be enhanced through reducing or cancelling dividend payments upstreamed to its parent (Lloyds Banking Group plc), by raising new equity via an injection of capital from its parent and by issuing additional tier 1 or tier 2 capital securities to its parent. The cost and availability of additional capital from its parent is dependent upon market conditions and perceptions at the time.

The Group is also able to manage the demand for capital through management actions including adjusting its lending strategy, risk hedging strategies and through business disposals.

Capital policies and procedures are well established and subject to independent oversight.

MONITORING

The Group's capital is actively managed and monitoring capital ratios is a key factor in the Group's planning processes and stress testing. Multi-year base case forecasts of the Group's capital position, based upon the Group's operating plan, are produced at least annually to inform the Group capital plan whilst shorter term forecasts are undertaken to understand and respond to variations of the Group's actual performance against the plan. The Group's capital plan is tested for capital adequacy using relevant stress scenarios and sensitivities covering adverse economic conditions as well as other adverse factors that could impact the Group.

Regular monitoring of the capital position for the Group and its key regulated entities is undertaken by a range of committees, including Group Capital Risk Committee (GCRC), Group Financial Risk Committee (GFRC), Group and Ring-Fenced Banks Asset and Liability Committees (GALCO), Group and Ring-Fenced Banks Risk Committees (GRC), Board Risk Committee (BRC) and the Board. This includes reporting of actual ratios against forecasts and risk appetite, base case and stress scenario projected ratios, and review of early warning indicators and assessment against the Capital Contingency Framework.

The regulatory framework within which the Group operates continues to be developed at a global level through the Financial Stability Board (FSB) and Basel Committee on Banking Supervision (BCBS) and within the UK by the PRA and through directions from the Financial Policy Committee (FPC). The Group continues to monitor these developments very closely, analysing the potential capital impacts to ensure that, through organic capital generation and management actions, the Group continues to maintain a strong capital position that exceeds both minimum regulatory requirements and the Group's risk appetite and is consistent with market expectations.

MINIMUM REQUIREMENT FOR OWN FUNDS AND ELIGIBLE LIABILITIES (MREL)

Global systemically important banks (G-SIBs) are subject to an international standard on total loss absorbing capacity (TLAC). The standard, which first applied from 1 January 2019, is designed to enhance the resilience of the global financial system by ensuring that failing G-SIBs have sufficient capital to absorb losses and recapitalise under resolution, whilst continuing to provide critical banking services.

In the UK, the Bank of England has implemented the requirements of the international TLAC standard through the establishment of a framework which sets out minimum requirements for own funds and eligible liabilities (MREL). The purpose of MREL is to require firms to maintain sufficient own funds and eligible liabilities that are capable of credibly bearing losses or recapitalising a bank whilst in resolution. MREL can be satisfied by a combination of regulatory capital and certain unsecured liabilities (which must be subordinate to a firm's operating liabilities).

The Bank of England's MREL statement of policy (MREL SoP) sets out its approach to setting external MREL and the distribution of MREL resources internally within groups. Internal MREL resources are intended to enable a material subsidiary to be recapitalised as part of a group resolution strategy without the need for the Bank of England to apply its resolution powers directly to the subsidiary itself.

The Group's parent, Lloyds Banking Group plc, is subject to the Bank of England's MREL SoP and must therefore maintain a minimum level of external MREL resources. Lloyds Banking Group plc operates a single point of entry (SPE) resolution strategy, with Lloyds Banking Group plc as the designated resolution entity. Under this strategy, the Group has been identified as a material subsidiary of Lloyds Banking Group plc and must therefore maintain a minimum level of internal MREL resources. As at 31 December 2021, the Group's internal MREL resources exceeded the interim minimum required.

The Bank of England completed a review of its existing approach to setting MREL in December 2021 and has published a revised approach which became effective and binding on the Group from 1 January 2022. There has been no change to the basis for determining the Group's internal MREL.

Lloyds Bank plc

Risk management

ANALYSIS OF CAPITAL POSITION

The Group's common equity tier 1 (CET1) capital ratio has increased to 16.7 per cent (31 December 2020: 15.5 per cent) largely reflecting profits for the year and a reduction in risk-weighted assets, partially offset by dividends paid (net of the brought forward foreseeable dividend accrual), pension contributions made to the defined benefit pension schemes and a release of IFRS 9 transitional relief which largely offset the impairment credit through profits.

Risk-weighted assets reduced by £9,286 million, or 5 per cent, from £170,862 million at 31 December 2020 to £161,576 million at 31 December 2021. This was primarily as a result of optimisation activity undertaken in Commercial Banking, partially offset by balance sheet growth in the business. Credit migrations have had a limited impact on the risk-weighted asset position, in part due to the increase in house prices.

The Group continues to apply the revised IFRS 9 transitional arrangements for capital which provide for temporary capital relief for the increase in accounting impairment provisions following the initial implementation of IFRS 9 ('static' relief) and subsequent relief for any increases in Stage 1 and Stage 2 expected credit losses since 1 January 2020 ('dynamic' relief). The transitional arrangements do not cover Stage 3 expected credit losses.

On 1 January 2022, the CET1 capital ratio reduced by around 250 basis points to 14.1 per cent, reflecting the following:

- An increase in risk-weighted assets to £178 billion, in addition to other related modelled impacts on CET1 capital, following the implementation of new CRD IV mortgage, retail unsecured and commercial banking models to meet revised regulatory standards for modelled outputs and the UK implementation of the remainder of CRR II which includes a new standardised approach for measuring counterparty credit risk. These were partially offset by the removal of risk-weighted assets linked to the reversal of the revised treatment that had previously been applied to intangible software assets. The new CRD IV models are subject to finalisation and approval by the PRA and therefore uncertainty over the final impacts remains
- An increase in intangible software assets deducted from CET1 capital following the reversal of the revised treatment
- A reduction in IFRS 9 relief reflecting both phasing under the transitional arrangements and the impact of the new CRD IV models

The transitional total capital ratio remained at 23.5 per cent, with the benefit of the increase in CET1 capital and reduction in risk-weighted assets broadly offset by reductions in Additional Tier 1 (AT1) and Tier 2 capital instruments. The latter largely reflected the reduction in transitional limits applied to legacy tier 1 and tier 2 capital instruments and calls made on both AT1 and tier 2 capital instruments, partially offset by new issuances.

The UK leverage ratio reduced to 5.3 per cent from 5.5 percent at 31 December 2020, as a result of the reduction in the fully loaded total tier 1 capital position which was partially offset by the reduction in the leverage exposure measure, the latter primarily reflecting movements in securities financing transactions and off-balance sheet items, net of increased balance sheet lending.

TOTAL CAPITAL REQUIREMENT

The Group's total capital requirement (TCR) as at 31 December 2021, being the aggregate of the Group's Pillar 1 and current Pillar 2A capital requirements, was £19,364 million (31 December 2020: £20,567 million).

Lloyds Bank plc
Risk management

CAPITAL RESOURCES

An analysis of the Group's capital position as at 31 December 2021 is presented in the following section on both a transitional arrangements basis and a fully loaded basis in respect of legacy capital securities that were subject to grandfathering provisions prior to 1 January 2022. In addition the Group's capital position under both bases reflects the application of the separate transitional arrangements for IFRS 9.

Capital resources (audited)

The table below summarises the consolidated capital position of the Group. The Group's Pillar 3 disclosures will provide a comprehensive analysis of the own funds of the Group.

¹ Includes an adjustment applied to reserves to reflect the application of the IFRS 9 transitional arrangements for capital.

Lloyds Bank plc
Risk management

Movements in capital resources

The key difference between the transitional capital calculation as at 31 December 2021 and the fully loaded equivalent is primarily related to legacy capital securities that previously qualified as tier 1 or tier 2 capital, but that do not fully qualify under the regulation, which can be included in additional tier 1 (AT1) or tier 2 capital (as applicable) up to specified limits which reduced by 10 per cent per annum until 2022. From 1 January 2022, legacy capital securities will cease to be recognised as eligible regulatory capital, with the exception of securities that qualify for the extended transitional rules under CRR II. As of 31 December 2021, the Group has a single legacy capital security that qualifies for the extension which will allow it to be recognised as tier 2 capital until June 2025.

The key movements on a transitional capital basis are set out in the table below.

	Common equity tier 1 £m	Additional tier 1 £m	Tier 2 £m	Total capital £m
At 31 December 2020	26,567	7,295	6,301	40,163
Profit for the year	5,202	—	—	5,202
Interim dividends paid out on ordinary shares during the year ¹	(1,900)	—	—	(1,900)
IFRS 9 transitional adjustment to retained earnings	(1,254)	—	—	(1,254)
Pension contributions	(944)	—	—	(944)
Fair value through other comprehensive income reserve	196	—	—	196
Deferred tax asset	(973)	—	—	(973)
Goodwill and other intangible assets	116	—	—	116
Movements in other equity, subordinated liabilities, other tier 2 items and related adjustments	—	(2,346)	(245)	(2,591)
Distributions on other equity instruments	(344)	—	—	(344)
Other movements ²	238	—	—	238
At 31 December 2021	26,904	4,949	6,056	37,909

¹ Net of the brought forward foreseeable dividend accrual of £1,000 million.

² Includes other pension movements.

CET1 capital resources have increased by £337 million over the year, primarily reflecting profits, with the impairment credit more than offset by the partial unwind of IFRS 9 transitional relief. Further offsets comprised of the following:

- the interim ordinary dividend paid out in October 2021
- distributions on other equity instruments
- pension contributions made to the defined benefit pension schemes
- an increase in deferred tax assets deducted from capital which primarily reflects the remeasurement of deferred tax assets following the announced increase in the UK corporation tax rate from 1 April 2023. The remeasurement has a limited overall capital benefit as the tax credit through profits is largely offset by the increase in the deferred tax asset deduction.

AT1 capital resources have reduced by £2,346 million during the year, reflecting the reduced transitional limit applied to legacy tier 1 capital instruments and the net impact of the derecognition of called AT1 capital instruments and subsequent issuance of new AT1 capital instruments.

Tier 2 capital resources have reduced by £245 million during the year, largely reflecting the reduced transitional limit applied to legacy tier 2 capital instruments, the derecognition of called tier 2 capital instruments, regulatory amortisation and the impact of movements in rates, partially offset by the issuance of new tier 2 capital instruments.

Foreign exchange movements	(134)	(70)	(204)	(36)	—	—	(240)
Other	—	—	—	—	—	(732)	(732)
Risk-weighted assets at 31 December 2021	116,011	19,005	135,016	1,464	203	22,575	159,258
Threshold risk-weighted assets ³							2,318
Total risk-weighted assets as at 31 December 2021							161,576

1 Credit risk includes securitisation risk-weighted assets.

2 Counterparty credit risk includes movements in contributions to the default funds of central counterparties and movements in credit valuation adjustment risk.

3 Threshold risk-weighted assets reflect the element of deferred tax assets that are permitted to be risk-weighted instead of being deducted from CET1 capital.

The risk-weighted assets movement table provides analysis of the movement in risk-weighted assets in the period by risk type and an insight into the key drivers of the movements.

Credit risk, risk weighted assets:

- Asset size reduction of £4.3 billion predominantly reflects increased levels of optimisation in Commercial Banking and lower unsecured balances, partially offset by increased mortgage lending.
- Asset quality mainly reflects the impact of retail model calibrations with limited credit migration in part due to the benefit of House Price Index increases.
- Methodology and policy changes of £3.1 billion include reductions in risk-weighted assets through securitisation activity, other optimisation activity and enhanced identification of SME exposures.

Counterparty credit risk, risk-weighted assets: reduced by £1.0 billion predominantly due to movements in market rates during the period.

Operational risk, risk-weighted assets: reduced by £0.7 billion due to a reduction in 3 year average income levels.

Lloyds Bank plc

Risk management

Leverage ratio

Analysis of leverage movements

The Group's fully loaded UK leverage ratio reduced to 5.3 per cent (31 December 2020: 5.5 per cent), driven by the impact of the reduction in the fully loaded total tier 1 capital position. This was offset in part by the reduction in the leverage exposure measure which reduced by £8.9 billion during the year, largely reflecting movements in securities financing transactions and off-balance sheet items, net of increased balance sheet lending. Following a direction received from the PRA during 2020 the Group is permitted to exclude lending under the UK Government's Bounce Back Loan Scheme (BBLs) from the leverage exposure measure.

The average UK leverage ratio was 5.2 per cent over the quarter, which largely reflected a higher average exposure measure compared to the position at the end of the quarter, partially offset by a higher average fully loaded total tier 1 capital position.

The table below summarises the component parts of the Group's leverage ratio.

	Fully loaded	
	At 31 Dec 2021 £m	At 31 Dec 2020 £m
Total tier 1 capital for leverage ratio		
Common equity tier 1 capital	26,904	26,567
Additional tier 1 capital	4,268	5,935
Total tier 1 capital	31,172	32,502
Exposure measure		
Statutory balance sheet assets		
Derivative financial instruments	5,511	8,341
Securities financing transactions	49,708	56,073
Loans and advances and other assets	547,630	535,525
Total assets	602,849	599,939
Qualifying central bank claims	(50,824)	(43,973)
Deconsolidation adjustments		
Derivative financial instruments	2	16
Loans and advances and other assets	(612)	(139)
Total deconsolidation adjustments¹	(610)	(123)
Derivatives adjustments		
Adjustments for regulatory netting	(2,584)	(2,225)
Adjustments for cash collateral	(905)	(5,601)
Net written credit protection	22	145
Regulatory potential future exposure	3,652	5,744
Total derivatives adjustments	185	(1,937)
Securities financing transactions adjustments	1,321	1,060
Off-balance sheet items	49,349	53,350
Regulatory deductions and other adjustments²	(17,620)	(14,770)
Total exposure measure	584,650	593,546
Average exposure measure³	598,563	
UK leverage ratio	5.3%	5.5%
Average UK leverage ratio³	5.2%	

1 Deconsolidation adjustments relate to the deconsolidation of certain Group entities that fall outside the scope of the Group's regulatory capital consolidation.

2 Includes adjustments to exclude lending under the UK Government's Bounce Back Loan Scheme (BBLs) and the netting of regular-way purchases and sales awaiting settlement in accordance with CRR Article 500d.

3 The average UK leverage ratio is based on the average of the month end tier 1 capital position and average exposure measure over the quarter (1 October 2021 to 31 December 2021). The average of 5.2 per cent compares to 5.2 per cent at the start and 5.3 per cent at the end of the quarter.

Lloyds Bank plc
Risk management

Application of IFRS 9 on a full impact basis for capital and leverage

	IFRS 9 full impact	
	At 31 Dec 2021	At 31 Dec 2020
Common equity tier 1 (£m)	26,253	24,591
Transitional tier 1 (£m)	31,202	31,886
Transitional total capital (£m)	38,039	39,422
Total risk-weighted assets (£m)	161,805	171,015
Common equity tier 1 ratio (%)	16.2%	14.4%
Transitional tier 1 ratio (%)	19.3%	18.6%
Transitional total capital ratio (%)	23.5%	23.1%
UK leverage ratio exposure measure (£m)	584,000	591,570
UK leverage ratio (%)	5.2%	5.2%

The Group applies the full extent of the IFRS 9 transitional arrangements for capital as set out under CRR Article 473a (as amended via the CRR 'Quick Fix' revisions published in June 2020). Specifically, the Group has opted to apply both paragraphs 2 and 4 of CRR Article 473a (static and dynamic relief) and in addition to apply a 100 per cent risk weight to the consequential Standardised credit risk exposure add-back as permitted under paragraph 7a of the revisions.

As at 31 December 2021, static relief under the transitional arrangements amounted to £264 million (31 December 2020: £370 million) and dynamic relief amounted to £387 million (31 December 2020: £1,606 million) through CET1 capital.

Lloyds Bank plc

Risk management

CHANGE/EXECUTION RISK

DEFINITION

Change/execution risk is defined as the risk that, in delivering its change agenda, the Group fails to ensure compliance with laws and regulation, maintain effective customer service and availability, and/or operate within the Group's risk appetite.

EXPOSURES

Change/execution risks arise when the Group undertakes activities which require products, processes, people, systems or controls to change. These changes can be as a result of external drivers (for example, a new piece of regulation that requires the Group to put in place a new process or reporting) and/or internal drivers including business process changes, technology upgrades and strategic business or technology transformation.

MEASUREMENT

The Group currently measures change/execution risk against defined risk appetite metrics which are a combination of leading, quality and delivery indicators across the investment portfolio. These indicators are reported through internal governance structures and monthly execution metrics; which forms part of the Board risk appetite metrics, and are under ongoing evolution and enhancement to ensure ongoing support of the Group's change agenda.

MITIGATION

The Group takes a range of mitigating actions with respect to change/execution risk. These include the following:

- The Board establishes a Group-wide risk appetite and metric for change/execution risk
- Ensuring compliance with the change policy and associated policies and procedures, which set out the principles and key controls that apply across the business and are aligned to the Group risk appetite
- Businesses assess the potential impacts of undertaking any change activity on their ability to execute effectively, on customers and colleagues and on the potential consequences for existing business risk profiles
- The implementation of effective governance and control frameworks to ensure adequate controls are in place to manage change activity and act to mitigate the change/execution risks identified. These controls are monitored in line with the change policy and enterprise risk management framework
- Events and incidents related to change activities are escalated and managed appropriately in line with risk framework guidance
- Ensuring there are sufficient, appropriately skilled resources to support the safe delivery of the Group's current and future change portfolio

MONITORING

Change/execution risks are monitored and reported through to the Board and Group Governance Committees in accordance with the Group's enterprise risk management framework. Risk exposures are assessed monthly through established governance in both the Lloyds Banking Group Transformation and Business Risk Committees with escalation to Executive Committees where required. Material change/execution related risk events or incidents are escalated in accordance with the Lloyds Banking Group operational risk policy and change policy. In addition there is oversight, challenge and reporting at Risk division level to support overall management of risks and ongoing effectiveness of controls.

Lloyds Bank plc

Risk management

CONDUCT RISK

DEFINITION

Conduct risk is defined as the risk of customer detriment across the customer lifecycle including: failures in product management, distribution and servicing activities; from other risks materialising, or other activities which could undermine the integrity of the market or distort competition, leading to unfair customer outcomes, regulatory censure, reputational damage or financial loss.

EXPOSURES

The Group faces significant conduct risks, which affect all aspects of the Group's operations and all types of customers.

Conduct risks can impact directly or indirectly on the Group's customers and could materialise from a number of areas across the Group, including:

- Business and strategic planning that does not sufficiently consider customer needs
- Ineffective development, management and monitoring of products, their distribution (including the sales process, fair value assessment and responsible lending criteria) and post-sales service (including the management of customers in financial difficulties)
- Unclear, unfair, misleading or untimely customer communications
- A culture that is not sufficiently customer-centric
- Poor governance of colleagues' incentives and rewards and approval of schemes which drive unfair customer outcomes
- Ineffective identification, management and oversight of legacy conduct issues
- Ineffective management and resolution of customers' complaints or claims
- Outsourcing of customer service and product delivery to third parties that do not have the same level of control, oversight and culture as the Group

There is a high level of scrutiny regarding financial institutions' treatment of customers, including those in vulnerable circumstances, from regulatory bodies, the media, politicians and consumer groups. The COVID-19 pandemic has magnified existing challenges, and brought new challenges for customers, affecting health, income and relationships. The Group continues to apply significant focus to its treatment of customers in financial difficulties to ensure fair outcomes.

The Group is also exposed to the risk of engaging in activities or failing to manage conduct which could constitute market abuse, undermine the integrity of a market in which it is active, distort competition or create conflicts of interest.

There continues to be a significant focus on market misconduct, and action has been taken to move to risk-free rates following the ending of the majority of London Inter-bank Offered Rate (LIBOR) measures on 1st January 2022.

The Group continuously adapts to market developments that could pose heightened conduct risk, including: the potential for more customers in financial difficulties driven by the increased cost of living/evolving COVID-19 situation, ongoing scrutiny in ensuring transparency and fairness of pricing communications, increased expectation regarding fair customer treatment due to the introduction of the FCA's Consumer Duty in 2022, and ensuring victims of Authorised Push Payment Fraud receive fair outcomes.

MEASUREMENT

To articulate its conduct risk appetite, the Group has sought more granularity through the use of suitable Conduct Risk Appetite Metrics (CRAMs) and tolerances that indicate where it may be operating outside its conduct risk appetite.

CRAMs have been designed for services and products offered by the Group and are measured by a consistent set of common metrics. These contain a range of product design, sales and process metrics (including outcome testing outputs) to provide a more holistic view of conduct risks; some products also have a suite of additional bespoke metrics.

Each of the tolerances for the metrics are agreed for the individual product or service and are regularly tracked. At a consolidated level these metrics are part of the Board risk appetite. The Group has, and continues to, evolve its approach to conduct risk measurements, to include emerging conduct themes.

MITIGATION

The Group takes a range of mitigating actions with respect to conduct risk and remains focused on delivering a leading customer experience.

All three retail brands have now received Accessibility Standards accreditation from the Money and Mental Health Policy Institute in recognition of the Group's work to make services more accessible for customers with mental health problems. The Group's ongoing commitment to fair customer outcomes sets the tone from the top and supports the development of our values-led culture with customers at the heart, strengthening links between actions to support conduct, culture and customer and enabling more effective control management. Actions to encourage good conduct include:

- Conduct risk appetite established at Group and business area level, with metrics included in the Group risk appetite to ensure ongoing focus
- Simplified and enhanced conduct policies and procedures in place to ensure appropriate controls and processes that deliver fair customer outcomes, and support market integrity and competition requirements
- Customer needs considered through divisional customer plans, with integral conduct lens
- Cultural transformation: achieving a values-led culture through a consistent focus on behaviours to ensure the Group is transforming its culture for success in a digital world. This is supported by strong direction and tone from senior executives and the Board
- Continuous embedding of the customer vulnerability framework aligned with the FCA guidance on fair treatment of vulnerable customers launched in January 2021. Development and continued oversight of the implementation of the vulnerability strategy continues through the Lloyds Banking Group Customer Vulnerability Committee (GCVC) operating at a senior level to prioritise change, drive implementation and ensure consistency across the Group
- Robust product governance framework to ensure products continue to offer customers fair value, and consistently meet their needs throughout their product lifecycle
- Effective complaints management through responding to, and learning from, root causes of complaint volumes and Financial Ombudsman Service (FOS) change rates

Lloyds Bank plc

Risk management

- Review and oversight of thematic conduct agenda items at senior committees, ensuring holistic consideration of key Lloyds Banking Group-wide conduct risks
- Robust recruitment and training, with a continued focus on how the Group manages colleagues' performance with clear customer accountabilities
- Ongoing engagement with third parties involved in serving the Group's customers to ensure consistent delivery
- Monitoring and testing of customer outcomes to ensure the Group delivers fair outcomes for customers throughout the product and service lifecycle, and make continuous improvements to products, services and processes
- Continued focus on market conduct and member of the Fixed Income, Currencies and Commodities Markets Standard Board and committed to conducting its market activities consistent with the principles of the UK Money Markets code, the Global Precious Metals Code and the FX Global Code
- Adoption of robust change delivery methodology to enable prioritisation and delivery of initiatives to address conduct challenges
- Continued focus on proactive identification and mitigation of conduct risk in the Lloyds Banking Group's strategy
- Active engagement with regulatory bodies and other stakeholders to develop understanding of concerns related to customer treatment, effective competition and market integrity, to ensure that the Group's strategic conduct focus continues to meet evolving stakeholder expectations
- The Group closely monitors the outcomes of business banking customers, particularly those with COVID-19 response products (BBLS, CBILS) to ensure the appropriate support is in place

MONITORING

Conduct risk is governed through divisional risk committees and significant issues are escalated to the Lloyds Banking Group Risk Committee, in accordance with the Lloyds Banking Group's enterprise risk management framework, as well as through the monthly Consolidated Risk Report. Risk exposures are discussed at divisional risk committees, where oversight, challenge and reporting are completed to assess the effectiveness controls. Remedial action is recommended, if required. All material conduct risk events are escalated in accordance with the Lloyds Banking Group operational risk policy to the respective Business Managing Director/Head of Business.

A number of activities support the close monitoring of conduct risk including:

- The use of CRAMs across the Group, with a clear escalation route to Board
- Second line oversight activities
- Horizon scanning

Lloyds Bank plc

Risk management

DATA RISK

DEFINITION

Data risk is defined as the risk of the Group failing to effectively govern, manage and control its data (including data processed by third party suppliers), leading to unethical decisions, poor customer outcomes, loss of value to the Group and mistrust.

EXPOSURES

Data risk is present in all aspects of the business where data is processed, both within the Group and by third parties including colleague and contractor, prospective and existing customer lifecycle and insight processes. Data risk manifests:

- When personal data is not gathered legally, for a legitimate purpose, or is not managed or protected from misuse and/or processed in a way that complies with General Data Protection Regulations (GDPR) and other data privacy regulatory obligations
- When data quality (accuracy, completeness, consistency, uniqueness, validity and timeliness) is not managed, resulting in data used in systems, processes and products not being fit for the intended purpose
- When data records are not created, retained, protected, destroyed, or retrieved appropriately
- When data governance fails to provide robust oversight of data decision-making and the control mechanisms to ensure strategies and management instructions are implemented effectively
- When data standards are not maintained across core data, data management risks are not managed and data-related issues are not remediated as a result of poor data management, resulting in inaccurate, incomplete data that is not available at the right time, to the right people, to enable business decisions to be made, and regulatory reporting requirements to be fulfilled
- When critical data mapping and data information standards are not followed, impacting compliance, traceability and understanding of data

MEASUREMENT

Data risk is measured through a series of quantitative and qualitative indicators, aligned to key sources of data risk for the Group covering data governance, data management and data privacy and ethics. In addition to risk appetite measures and limits, data risks and controls are monitored and governed through Group and sub-group committees on a regular basis. Significant issues are escalated to the Group Risk Committee.

MITIGATION

Data risk is a key component of the Group's enterprise risk management framework, where the focus is on the end-to-end management of data risk. This ensures that risks are identified, assessed, managed, monitored and reported using the risk and control self-assessment process.

Investment continues to be made to enhance the maturity of data risk management. Examples include:

- Delivering a data strategy and data risk and control library to ensure data risks are managed within appetite
- Enhancing data quality, capability and awareness in data management and privacy
- Enhancing assurance of suppliers
- Delivering enhanced controls and processes for data retention and destruction, deleting large volumes of historic over-retained data
- Embedding data by design and ethics principles into the data science lifecycle and progressing opportunities to simplify the completion of privacy records impact assessments

MONITORING

Data risk is governed through Group and sub-group committees and significant issues are escalated to Group Risk Committee, in accordance with the Lloyds Banking Group's enterprise risk management framework. Risk exposures are discussed at Group and sub-group committees, where oversight, challenge and reporting are completed to assess the effectiveness of controls and agree remedial actions. All material data risk events are escalated in accordance with the Lloyds Banking Group operational risk policy and data risk policies and, where personal data is concerned, the Group Data Protection Officer. In addition, Group-wide data risk issues and the top data risks that the Group faces are discussed at the Data Cross Divisional Committee and Group Data Committee.

A number of activities support the close monitoring of data risk, including:

- Implementation of the data risk and control library to ensure greater coverage and insight of data risk, and ensuring data risks are managed within appetite
- Design and monitoring of data risk appetite metrics, including key risk indicators and key performance indicators
- Monitoring and reporting of progress against the Data Capability Assessment Model
- Monitoring of significant data-related issues, complaints, events and breaches
- Identification and mitigation of data risk when planning and implementing transformation or business change
- Implementation of controls to mitigate data risk, including data privacy, ethics, data management and records management
- Effective monitoring and testing of compliance with data privacy and data management regulatory requirements. For example GDPR and Basel Committee on Banking Supervision (BCBS 239) requirements
- Horizon scanning for changes in the external environment, including, but not limited to, changes to laws, rules and regulations; for example, arising from the UK's exit from the EU and ensuring data flows remain effective

Lloyds Bank plc

Risk management

PEOPLE RISK

DEFINITION

People risk is defined as the risk that the Group fails to provide an appropriate colleague and customer-centric culture, supported by robust reward and wellbeing policies and processes; effective leadership to manage colleague resources; effective talent and succession management; and robust control to ensure all colleague-related requirements are met.

EXPOSURES

The Group's management of material people risks is critical to its capacity to deliver against its strategic objectives, particularly in the context of organisational, political and external market change and increasing digitisation. The Group is exposed to the following key people risks:

- Failure to recruit, develop and retain a diverse workforce, with the appropriate mix and required level of skills and capabilities to meet the current and future needs of the Group
- Non-inclusive culture, ineffective leadership, poor communication, weak performance, inappropriate remuneration policies and poor colleague conduct
- Ineffective succession planning or failure to identify appropriate talent pipeline
- Failure to manage capacity, colleagues having excessive demands placed on them resulting in wellbeing issues and business objectives not being met
- Failure to meet all colleague-related legal and regulatory requirements
- Inadequately designed people processes that are not resilient to withstand unexpected events
- The increasing digitisation of the business is changing the capability mix required and may impact the Group's ability to attract and retain talent
- Senior Managers and Certification Regime (SM&CR) and additional regulatory constraints on remuneration structures may impact the Group's ability to attract and retain talent
- Colleague engagement may be challenged by a number of factors ranging from adjustment to new ways of working, dissatisfaction with reward; and ongoing media attention on culture within the banking sector

MEASUREMENT

People risk is measured through a series of quantitative and qualitative indicators, aligned to key sources of people risk for the Group such as succession, diversity, retention, colleague engagement and wellbeing. In addition to risk appetite measures and limits, people risks and controls are monitored on a monthly basis via the Group's risk governance framework and reporting structures.

MITIGATION

The Group takes many mitigating actions with respect to people risk. Key areas of focus include:

- Focusing on leadership and colleague engagement, through delivery of strategies to attract, retain and develop high calibre people together with implementation of rigorous succession planning
- Continued focus on the Group's culture and inclusivity strategy by developing and delivering initiatives that reinforce the appropriate behaviours which generate the best possible long-term outcomes for customers and colleagues
- Managing organisational capability and capacity through divisional people strategies to ensure there are the right skills and resources to meet customers' needs and deliver the Group's strategic plan
- Maintaining effective remuneration arrangements to ensure they promote an appropriate culture and colleague behaviours that meet customer needs and regulatory expectations
- Ensuring colleague wellbeing strategies and support are in place to meet colleague needs, and that the skills and capability growth required to maximise the potential of our people
- Ensuring compliance with legal and regulatory requirements related to SM&CR, embedding compliant and appropriate colleague behaviours in line with Group policies, values and its people risk priorities
- Ongoing consultation with the Group's recognised unions on changes which impact their members
- Reviewing and enhancing people processes to ensure they are fit for purpose and operationally resilient

MONITORING

Monitoring and reporting is undertaken at Board, Group, entity and divisional committees. Key people risk metrics are reported and discussed monthly at the Group People Risk Committee with escalation to Group Risk and Executive Committees and the Board where required.

All material people risk events are escalated in accordance with Lloyds Banking Group's operational risk policy.

Lloyds Bank plc

Risk management

OPERATIONAL RESILIENCE RISK

DEFINITION

Operational resilience risk is defined as the risk that the Group fails to design resilience into business operations, underlying infrastructure and controls (people, process, technology) so that it is able to withstand external or internal events which could impact the continuation of operations, and fails to respond in a way which meets customer and stakeholder expectations and needs when the continuity of operations is compromised.

EXPOSURES

Ineffective operational resilience risk management could lead to vital services not being available to customers, and in extreme circumstances, bank failure could result. The Group has in place a transparent and effective operating model to identify and monitor critical business processes from a customer, Group and financial industry perspective. The failure to adequately build resilience into a critical business process may occur in a variety of ways, including:

- The Group being overly reliant on one location to deliver a critical business process
- The Group not having an adequate succession plan in place for designated subject matter experts
- The Group being overly reliant on a supplier which fails to provide a service
- A weakness in the Group's cyber or security defences leaving it vulnerable to an attack
- The Group failing to upgrade its IT systems and leaving them vulnerable to failure

Effective operational resilience ensures the Group designs resilience into its systems, is able to withstand and/or recover from a significant unexpected event occurring and can continue to provide services to its customers. A significant outage could result in customers being unable to access accounts or conduct transactions, which as well as presenting significant reputational risk for the Group would negatively impact the Group's purpose. Operational resilience is also an area of continued regulatory and industry focus, similar in importance to financial resilience.

Failure to manage operational resilience effectively could impact the following other risk categories:

- Regulatory compliance: non-compliance with new/existing operational resilience regulations, for example, through failure to identify emerging regulation or not embedding regulatory requirements within the Group's policies, processes and procedures or identify further future emerging regulation
- Operational risk: being unable to safely provide customers with business services
- Conduct risk: an operational resilience failure may render the Group liable to fines from the FCA for poor conduct
- Market risk: the Group being unable to provide key services could have ramifications for the wider market and could impact share price

MEASUREMENT

Operational resilience risk is managed across the Group through the Group's enterprise risk management framework and operational risk policies. Board risk appetite metrics for operational resilience are in place and are well understood. These specific measures are subject to ongoing monitoring and reporting, including a mandatory review of thresholds on at least an annual basis. To strengthen the management of operational resilience risk, the Group mobilised an operational resilience enhancement programme which is designed to focus on end-to-end resilience and the management of key risks to critical processes.

MITIGATION

The Group has increased its focus on operational resilience and has updated its operational resilience strategy to reflect changing priorities of both customers and regulators. Furthermore, the Group is in the process of responding to the publication of regulatory policy statements. Focus has been given to ensure compliance, and further consideration to how the existing framework will be adapted including consideration of important business services and impact tolerances. At the core of its approach to operational resilience are the Group's critical business processes which drive all activity, including further mapping of the processes to identify any additional resilience requirements such as impact tolerances in the event of a service outage. The Group continues to maintain and develop playbooks that guide its response to a range of interruptions from internal and external threats and tests these through scenario-based testing and exercising.

Lloyds Banking Group's new strategy considers the changing risk management requirements, adapting the change delivery model to be more agile and develop the people skills and capabilities needed. The Group continues to review and invest in its control environment to ensure it addresses the risks it faces. Risks are reported and discussed at local governance forums and escalated to executive management and the Board as appropriate. The Group employs a range of risk management strategies, including: avoidance, mitigation, transfer (including insurance) and acceptance. Where there is a reliance on third-party suppliers to provide services, the Lloyds Banking Group's sourcing policy ensures that outsourcing initiatives follow a defined process including due diligence, risk evaluation and ongoing assurance.

During the COVID-19 pandemic, business continuity plans have continued to prove resilient, with particular attention applied to heightened risks in the supply chain.

Mitigating actions to the principal operational resilience risk are:

- **Cyber:** the threat landscape associated with cyber risk continues to evolve and there is significant regulatory attention on this subject. The Board continues to invest heavily to protect the Group from cyber-attacks. Investment continues to focus on improving the Group's approach to identity and access management, improving capability to detect and respond to cyber-attacks and improved ability to manage vulnerabilities across the estate. With effect from 1 January 2021, the Group has entered into a cyber insurance policy, which provides cover for specified information security risks.
- **IT resilience:** the Group continues to optimise its approach to IT and operational resilience by investing in technology improvements and enhancing the resilience of systems that support the Group's critical business processes, primarily through the technology resilience programme, with independent verification of progress on an annual basis. The Board recognises the role that resilient technology plays in maintaining banking services across the wider industry. As such, the Board dedicates considerable time and focus to this subject at both the Board and the Board Risk Committee, and continues to sponsor key investment programmes that enhance resilience.

Lloyds Bank plc

Risk management

- **People:** the Group acknowledges the risks associated to the failure to maintain appropriately skilled and available colleagues. The Group continues to optimise its approach to ensure that, where applicable, colleagues are capable of supporting a critical business process. Key controls and processes are regularly reported to committee(s) and alignment with Lloyds Banking Group's strategy is closely monitored.
- **Property:** the Group's property portfolio remains a key focus in ensuring resilience requirements are appropriately maintained. Processes are in place to identify key buildings where a critical business process is performed. Depending on criticality, a number of mitigating controls are in place to manage the risk of severe critical business process disruption. The Group remains committed to investment in the upkeep of the property portfolio, primarily through the Group property upkeep investment programme.
- **Sourcing:** the threat landscape associated with third-party suppliers and the critical services they provide continues to receive a significant amount of regulatory attention. The Group acknowledges the importance of demonstrating control and responsibility for those critical business services which could cause significant harm to the Group's customers. The Group segments its suppliers by criticality and has processes in place to support ongoing vendor management.

MONITORING

Monitoring and reporting of operational resilience risk is undertaken at Board, Group, entity and divisional committees. Each committee monitors key risks, control effectiveness, key risk and control indicators, events, operational losses, risk appetite metrics and the results of independent testing conducted by the Risk division and/or Group Internal Audit.

The Group maintains a formal approach to operational resilience risk event escalation, whereby material events are identified, captured and escalated. Root causes are determined, and action plans put in place to ensure an optimum level of control to keep customers and the business safe, reduce costs, and improve efficiency.

Lloyds Bank plc

Risk management

OPERATIONAL RISK

DEFINITION

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

EXPOSURES

The principal operational risks to the Group which could result in customer detriment, unfair customer outcomes, financial loss, disruption and/or reputational damage are:

- A cyber-attack
- Failure of IT systems, due to volume of change, and/or aged infrastructure
- Internal and/or external economic crime
- Failure to ensure compliance with increasingly complex and detailed regulation including anti-money laundering, anti-bribery, counter-terrorist financing, and financial sanctions and prohibitions laws and regulations

A number of these risks could increase where there is a reliance on third-party suppliers to provide services to the Group or its customers.

MEASUREMENT

Operational risk is managed across the Group through an operational risk framework and operational risk policies. The operational risk framework includes a risk and control self-assessment process, risk impact likelihood matrix, key risk and control indicators, risk appetite, a robust operational event management and escalation process, scenario analysis and an operational loss process.

The table below shows high level loss and event trends for the Group using Basel II categories. Based on data captured on the Group's One Risk and Control Self-Assessment, in 2021 the highest frequency of events occurred in external fraud (80.19 per cent) and execution, delivery and process management (10.68 per cent). Clients, products and business practices accounted for 94.70 per cent of losses by value, driven by legacy issues where impacts materialised in 2021 (excluding PPI).

	% of total volume		% of total losses	
	2021	2020	2021	2020
Business disruption and system failures ²	0.49	0.83	(0.64)	0.47
Clients, products and business practices	8.32	12.43	94.70	52.07
Damage to physical assets	0.08	0.41	0.00	14.39
Employee practices and workplace safety	—	0.29	0.00	0.04
Execution, delivery and process management	10.68	13.09	1.05	26.33
External fraud	80.19	72.78	4.79	6.59
Internal fraud	0.24	0.17	0.10	0.11
Total	100.00	100.00	100.00	100.00

1 2020 breakdowns have been restated to reflect a number of events that have been reclassified following an internal review.

2 Business disruption and system failures benefitted from a recovery in 2021, which related to a 2019 event.

Operational risk losses and scenario analysis is used to inform the Internal Capital Adequacy Assessment Process (ICAAP). The Group calculates its minimum (Pillar I) operational risk capital requirements using The Standardised Approach (TSA). Pillar II is calculated using internal and external loss data and extreme but plausible scenarios that may occur in the next 12 months.

MITIGATION

The Group continues to focus on changing risk management requirements, adapting the change delivery model to be more agile and developing the people skills and capabilities needed. Risks are reported and discussed at local governance forums and escalated to executive management and the Board as appropriate to ensure the correct level of visibility and engagement. The Group employs a range of risk management strategies, including: avoidance, mitigation, transfer (including insurance) and acceptance. Where there is a reliance on third-party suppliers to provide services, Lloyds Banking Group's sourcing policy ensures that outsourcing initiatives follow a defined process including due diligence, risk evaluation and ongoing assurance.

Mitigating actions to the principal operational risks are:

- The Group adopts a risk-based approach to mitigate the internal and external fraud risks it faces, reflecting the current and emerging fraud risks within the market. Fraud risk appetite metrics holistically cover the impacts of fraud in terms of losses to the Group, costs of fraud systems and operations, and customer experience of actual and attempted fraud. Oversight of the appropriateness and performance of these metrics is undertaken regularly through business area and Group-level committees. This approach drives a continual programme of prioritised enhancements to the Group's technology and process and people-related controls; with an emphasis on preventative controls supported by real time detective controls wherever feasible. Group-wide policies and operational control frameworks are maintained and designed to provide customer confidence, protect the Group's commercial interests and reputation, comply with legal requirements and meet regulatory requirements. The Group's fraud awareness programme remains a key component of its fraud control environment, and awareness of fraud risk is supported by mandatory training for all colleagues. This is further strengthened by material annual investment into both technology and the personal development needs of colleagues. The Group also plays an active role with other financial institutions, industry bodies and law enforcement agencies in identifying and combatting fraud

Lloyds Bank plc

Risk management

- The Group has adopted policies and procedures designed to detect and prevent the use of its banking network for money laundering, terrorist financing, bribery, tax evasion, human trafficking, modern-day slavery and wildlife trafficking, and activities prohibited by legal and regulatory sanctions. Against a background of complex and detailed laws and regulations, and of continued criminal and terrorist activity, the Group regularly reviews and assesses its policies, procedures and organisational arrangements to keep them current, effective and consistent across markets and jurisdictions. The Group requires mandatory training on these topics for all employees. Specifically, the anti-money laundering procedures include 'know-your-customer' requirements, transaction monitoring technologies, reporting of suspicions of money laundering or terrorist financing to the applicable regulatory authorities, and interaction between the Group's Financial Intelligence Unit and external agencies and other financial institutions. The Group economic crime prevention policy prohibits the payment, offer, acceptance or request of a bribe, including 'facilitation payments' by any employee or agent and provides a confidential reporting service for anonymous reporting of suspected or actual bribery activity. The Group economic crime prevention policy also sets out a framework of controls for compliance with legal and regulatory sanctions
- In addition to its efforts internally, the Group also contributes to economic crime prevention by supporting and championing industry-level activity, including:
 - Working with the Lending Standards Board to improve customer outcomes related to Authorised Push Payment (APP) fraud. The Group remains a signatory to the industry code for APP fraud, which has improved customer protection and the reimbursement of funds to victims
 - Co-chairing the inaugural Public Private Threat Group with National Economic Crime Centre (NECC). This builds on the success of the Fusion Cell in 2020, which was established in response to the changing economic crime threat related to COVID-19
 - Maintaining partnerships with key partners such as City of London Police, Global Cyber Alliance and the North East Business Resilience Centre
 - Active membership of Stop Scams UK (SSUK), designed to stop scams at source by bringing together partnerships from various industry sectors. The Group is involved in a new SSUK pilot, Project 159, which aims to provide consumers with a secure connection to their bank

Operational resilience risk, pages 60 to 61, provides further information on the mitigating actions for cyber and IT resilience.

MONITORING

Monitoring and reporting of operational risk is undertaken at Board, Group, entity and divisional committees. Each committee monitors key risks, control effectiveness, key risk and control indicators, events, operational losses, risk appetite metrics and the results of independent testing conducted by the Risk division and/or Group Internal Audit.

The Group maintains a formal approach to operational risk event escalation, whereby material events are identified, captured and escalated. Root causes of events are determined, and action plans put in place to ensure an optimum level of control to keep customers and the business safe, reduce costs, and improve efficiency.

The insurance programme is monitored and reviewed regularly, with recommendations being made to the Group's senior management annually prior to each renewal. Insurers are monitored on an ongoing basis, to ensure counterparty risk is minimised. A process is in place to manage any insurer rating changes or insolvencies.

Lloyds Bank plc

Risk management

MODEL RISK

DEFINITION

Model risk is defined as the risk of financial loss, regulatory censure, reputational damage or customer detriment, as a result of deficiencies in the development, application or ongoing operation of models and rating systems.

Models are defined as quantitative methods that process input data into quantitative outputs, or qualitative outputs (including ordinal letter output) which have a quantitative measure associated with them. Model governance policy is restricted to specific categories of application of models, principally financial risk, treasury and valuation, with certain exclusions, such as prescribed calculations and project appraisal calculations.

EXPOSURES

The Group makes extensive use of models. They perform a variety of functions including:

- Capital calculation
- Credit decisioning, including fraud
- Pricing models
- Impairment calculation
- Stress testing and forecasting
- Market risk measurement

As a result of the wide scope and breadth of coverage, there is exposure to model risk across a number of the Group's principal risk categories.

Model risk remains above pre-pandemic levels. The effect of government-led customer support schemes weakened relationships between model inputs and outputs, and there remains a reliance on the use of judgement, particularly in the areas for forecasting and impairment. However, recent months have seen more stable patterns for model outputs, and model drivers are expected to remain valid in the longer term.

In addition, in common with the rest of the industry, changes required to capital models following new regulations will create a temporary increase in the risk relating to these models during the period of transition. Further information on capital impacts are detailed in the capital risk section on pages 47 to 54.

MEASUREMENT

The Board risk appetite metric is the key component for measuring the Group's most material models; performance is reported monthly to the Group and Board Risk Committees.

MITIGATION

The model risk management framework, established by and with continued oversight from an independent team in the Risk division, provides the foundation for managing and mitigating model risk within the Group. Accountability is cascaded from the Board and senior management via the Group enterprise risk management framework.

This provides the basis for Lloyds Banking Group's model governance policy, which defines the mandatory requirements for models across Lloyds Bank Group, including:

- The scope of models covered by the policy
- Model materiality
- Roles and responsibilities, including ownership, independent oversight and approval
- Key principles and controls regarding data integrity, development, validation, implementation, ongoing maintenance and revalidation, monitoring, and the process for non-compliance

The model owner takes responsibility for ensuring the fitness for purpose of the models and rating systems, supported and challenged by the independent specialist Group function.

The above ensures all models in scope of policy, including those involved in regulatory capital calculation, are developed consistently and are of sufficient quality to support business decisions and meet regulatory requirements.

MONITORING

The Lloyds Banking Group Model Governance Committee is the primary body for overseeing model risk. Policy requires that key performance indicators are monitored for every model to ensure they remain fit for purpose and all issues are escalated appropriately. Material model issues are reported to the Group and Board Risk Committees monthly, with more detailed papers as necessary to focus on key issues.

Lloyds Bank plc

Risk management

REGULATORY AND LEGAL RISK

DEFINITION

Regulatory and legal risk is defined as the risk of financial penalties, regulatory censure, criminal or civil enforcement action or customer detriment as a result of failure to identify, assess, correctly interpret, comply with, or manage regulatory and/or legal requirements.

EXPOSURES

The Group has a zero risk appetite for material legal or regulatory breaches. However, due to the wide scope and breadth of its regulatory permissions, the Group remains exposed to the evolving UK legal and regulatory landscape, such as changes to the Regulatory Framework due to the UK's exit from the EU and other changing regulatory standards as well as uncertainty arising from the current and future litigation landscape.

MEASUREMENT

Regulatory and legal risks are measured against a defined risk appetite metric, which is an assessment of material regulatory breaches and material legal incidents.

MITIGATION

The Group undertakes a range of key mitigating actions to manage regulatory and legal risk. These include the following:

- The Board has established a Group-wide risk appetite and metric for regulatory and legal risk
- Lloyds Banking Group policies and procedures set out the principles and key controls that should apply across Lloyds Bank Group which are aligned to the Lloyds Bank Group risk appetite. Mandated policies and processes require appropriate control frameworks, management information, standards and colleague training to be implemented to identify and manage regulatory and legal risk
- Business units identify, assess and implement policy and regulatory requirements and establish local controls, processes, procedures and resources to ensure appropriate governance and compliance
- Business units regularly produce management information to assist in the identification of issues and test management controls are working effectively
- Risk and Legal departments provide oversight, proactive support and constructive challenge to the business in identifying and managing regulatory and legal issues
- Risk division conducts thematic reviews of regulatory compliance and provides oversight of regulatory compliance assessments across businesses and divisions where appropriate
- Business units, with the support of divisional and Group-level teams, conduct ongoing horizon scanning to identify and address changes in regulatory and legal requirements
- The Group engages with regulatory authorities and industry bodies on forthcoming regulatory changes, market reviews and investigations, ensuring programmes are established to deliver new regulation and legislation
- The Group has adapted quickly to evolving regulatory expectations during the COVID-19 pandemic and has engaged with regulatory authorities throughout

MONITORING

Material risks are managed through the relevant divisional-level committees, with review and escalation through Group-level committees where appropriate, including the escalation of any material regulatory breaches or material legal incidents.

Lloyds Bank plc

Risk management

STRATEGIC RISK

DEFINITION

Strategic risk is defined as the risk which results from:

- Incorrect assumptions about internal or external operating environments
- Failure to understand the potential impact of strategic responses and business plans on existing risk types
- Failure to respond or the inappropriate strategic response to material changes in the external or internal operating environments

EXPOSURES

The Group faces significant risks due to the changing regulatory and competitive environments in the financial services sector, with an increased pace, scale and complexity of change. Customer, shareholder and employee expectations continue to evolve and current societal trends are being accelerated following the COVID-19 pandemic.

Strategic risks can manifest themselves in existing principal risks or as new exposures which could adversely impact the Group and its businesses.

In considering strategic risks, a key focus is the interconnectivity of individual risks and the cumulative effect of different risks on the Group's overall risk profile.

The Group has invested in implementing a robust framework for the identification, assessment and quantification of strategic risks and their incorporation into business planning and strategic investment decisions. With Board support, the Group will continue to invest in evolving the strategic risk management framework and embedding it into the Group's day-to-day business operations.

MEASUREMENT

The Group assesses and monitors strategic risk implications as part of business planning and in its day-to-day activities, ensuring they respond appropriately to internal and external factors including changes to regulatory, macroeconomic and competitive environments. An assessment is made of the key strategic risks that are considered to impact the Group, leveraging internal and external information and the key mitigants or actions that could be taken in response.

2021 saw development of the Group's quantitative risk assessment approach, assessing the:

- Connectivity of inherent risks, which can magnify their impact and severity
- Time horizons in respect of the crystallisation of impacts, should risks manifest

MITIGATION

The range of mitigating actions includes the following:

- Horizon scanning is conducted across the Group to identify potential threats, risks, emerging issues and opportunities and to explore future trends
- The Group's business planning processes include formal assessment of the strategic risk implications of new business, product entries and other strategic initiatives
- The Group's governance framework mandates individuals' and committees' responsibilities and decision-making rights, to ensure that strategic risks are appropriately reported and escalated

MONITORING

A review of the Group's strategic risks is undertaken on an annual basis and the findings are reported to the Group and Board Risk Committees.

Risks, alongside their control effectiveness, are articulated and reported regularly to Group and Board Risk Committees.

Lloyds Bank plc

Risk management

CLIMATE RISK

DEFINITION

Climate risk is defined as the risk that the Group experiences losses and/or reputational damage as a result of physical events, transition risk, or as a consequence of the responses to managing these changes, either directly or through our customers.

EXPOSURES

Climate risk can arise from:

- Physical risks - changes in climate or weather patterns which are acute, event driven (e.g. flood or storms), or chronic, longer-term shifts (e.g. rising sea levels or droughts)
- Transition risks - changes associated with the move towards a low carbon economy, including changes to policy, legislation and regulation, technology and changes to customer preferences; or legal risks from failing to manage these changes

Climate risk manifests through, and has the potential to impact, the Group's existing principal financial and non-financial risks. The Group has adopted a comprehensive approach to embedding climate risk into its enterprise risk management framework, establishing climate risk as its own principal risk, as well as its integration into our existing principal risks.

The Group has undertaken an analysis of the main physical and transition risk which may impact the Group and our customers, as well as how these may impact across the different principal risks within the Group's enterprise risk management framework. For further information see page 55 in the 2021 Lloyds Banking Group Climate Report.

The Group has identified loans and advances to customers in sectors at increased risk from the impacts of climate change, see page 59 in the 2021 Lloyds Banking Group Climate Report.

MEASUREMENT

In order to identify the main physical and transition risks which could impact the Group, a number of workshops have been held with subject matter experts across the divisions and Risk division. These workshops have taken into account the sectors most exposed to the risks from climate change and also the impacts across the other principal risks in the Group's enterprise risk management framework. These outputs have been used to establish the key risks impacting the Group to inform where updates are required to the Group's risk management processes to ensure suitable management of climate risk.

The Group is continuing to develop a number of metrics to track key areas of climate risk across its main portfolios. In Commercial Banking, the Group has continued to enhance our internal climate risk assessment methodologies and tools to assess the physical and transition risks relevant to our clients, developing and launching a bespoke qualitative climate risk assessment tool with a focus on transition risks and readiness, which will be completed at least annually as part of regular client engagements for our large corporate portfolio.

Initial consideration of climate risks was included within Lloyds Banking Group's financial planning process, considering the key impacts for the Group across key business areas where detailed sector reviews have been undertaken.

The Group has continued to develop its scenario modelling capabilities and Lloyds Banking Group participated in the Bank of England's Climate Biennial Exploratory Scenario on the Financial Risks for Climate Change. Commentary on climate-related risks was included in the Group's annual Individual Capital Adequacy Assessment Process. Work continues to improve our scenario analysis capabilities and other analytical tools.

MITIGATION

In 2021, the Lloyds Banking Group climate risk policy was established to provide an overarching framework for the management of climate risks, intended to support appropriate consideration of climate risks across key activities. The policy also supports Lloyds Banking Group's climate-related external ambitions and progress against the relevant regulatory requirements, including the Task Force on Climate-related Financial Disclosures (TCFD) recommendations.

The Group is continuing to integrate consideration of climate risk as part of its activity and processes for managing other principal risks in our enterprise risk management framework. Lloyds Banking Group's credit risk policy includes mandatory requirements to consider environmental risks in key risk management activities. In Commercial Banking, Relationship Managers must ensure that climate risk is considered for all new and renewal facilities, and specifically commented on for customers who bank with us where total limits exceed £500,000 (excluding automated renewal process). In Retail, Lloyds Banking Group's credit risk policies require due regard to be paid to energy efficiency (EPC controls) and physical risks (such as flood assessments) in our mortgages business, and transition risks (pace and growth of electric vehicles) within our motor portfolio.

The Group has undertaken sector deep dives where there is lending to customers in sectors at increased risk from the impacts of climate change, considering both risks and opportunities as the Group looks to support its customers' responses to climate change.

Lloyds Banking Group has twelve external sector statements that help articulate appropriate areas of climate-related risk appetite and the Group's approach to the risk assessment of its customers. Lloyds Banking Group is continuing to refine and enhance these statements.

MONITORING

Governance for climate risk is embedded into the Group's existing governance structure and is complementary to governance of the Group's sustainability strategy.

Climate risk is included as part of regular risk reporting to the Lloyds Banking Group and Ring-Fenced Banks Board Risk Committees. This is currently focused on a qualitative assessment against external expectations and Lloyds Banking Group's external commitments. A Board-approved risk appetite statement for climate risk is also in place, supported by an initial metric to ensure the Group continues to progress activities at pace.

The Group is continuing to develop its approach to measuring and monitoring climate risk and will enhance reporting going forward as understanding and capabilities increase, which will also be used to set further quantitative and qualitative risk appetite metrics as appropriate.

Lloyds Bank plc

Forward looking statements

This document contains certain forward looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934, as amended, and section 27A of the US Securities Act of 1933, as amended, with respect to the business, strategy, plans and/or results of Lloyds Bank plc together with its subsidiaries (the Lloyds Bank Group) and its current goals and expectations. Statements that are not historical or current facts, including statements about the Lloyds Bank Group's or its directors' and/or management's beliefs and expectations, are forward looking statements. Words such as, without limitation, 'believes', 'achieves', 'anticipates', 'estimates', 'expects', 'targets', 'should', 'intends', 'aims', 'projects', 'plans', 'potential', 'will', 'would', 'could', 'considered', 'likely', 'may', 'seek', 'estimate', 'probability', 'goal', 'objective', 'deliver', 'endeavour', 'prospects', 'optimistic' and similar expressions or variations on these expressions are intended to identify forward looking statements. These statements concern or may affect future matters, including but not limited to: projections or expectations of the Lloyds Bank Group's future financial position, including profit attributable to shareholders, provisions, economic profit, dividends, capital structure, portfolios, net interest margin, capital ratios, liquidity, risk-weighted assets (RWAs), expenditures or any other financial items or ratios; litigation, regulatory and governmental investigations; the Lloyds Bank Group's future financial performance; the level and extent of future impairments and write-downs; the Lloyds Bank Group's ESG targets and/or commitments; statements of plans, objectives or goals of the Lloyds Bank Group or its management and other statements that are not historical fact; expectations about the impact of COVID-19; and statements of assumptions underlying such statements. By their nature, forward looking statements involve risk and uncertainty because they relate to events and depend upon circumstances that will or may occur in the future. Factors that could cause actual business, strategy, plans and/or results (including but not limited to the payment of dividends) to differ materially from forward looking statements include, but are not limited to: general economic and business conditions in the UK and internationally; market related risks, trends and developments; risks concerning borrower and counterparty credit quality; fluctuations in interest rates, inflation, exchange rates, stock markets and currencies; volatility in credit markets; volatility in the price of our securities; any impact of the transition from IBORs to alternative reference rates; the ability to access sufficient sources of capital, liquidity and funding when required; changes to the Lloyds Bank Group's or Lloyds Banking Group plc's credit ratings; the ability to derive cost savings and other benefits including, but without limitation, as a result of any acquisitions, disposals and other strategic transactions; inability to capture accurately the expected value from acquisitions; potential changes in dividend policy; the ability to achieve strategic objectives; insurance risks; management and monitoring of conduct risk; exposure to counterparty risk; credit rating risk; tightening of monetary policy in jurisdictions in which the Lloyds Bank Group operates; instability in the global financial markets, including within the Eurozone, and as a result of ongoing uncertainty following the exit by the UK from the European Union (EU) and the effects of the EU-UK Trade and Cooperation Agreement; political instability including as a result of any UK general election and any further possible referendum on Scottish independence; operational risks; conduct risk; technological changes and risks to the security of IT and operational infrastructure, systems, data and information resulting from increased threat of cyber and other attacks; natural pandemic (including but not limited to the COVID-19 pandemic) and other disasters; inadequate or failed internal or external processes or systems; acts of hostility or terrorism and responses to those acts, or other such events; geopolitical unpredictability; risks relating to sustainability and climate change (and achieving climate change ambitions), including the Lloyds Bank Group's or the Lloyds Banking Group's ability along with the government and other stakeholders to measure, manage and mitigate the impacts of climate change effectively; changes in laws, regulations, practices and accounting standards or taxation; changes to regulatory capital or liquidity requirements and similar contingencies; assessment related to resolution planning requirements; the policies and actions of governmental or regulatory authorities or courts together with any resulting impact on the future structure of the Lloyds Bank Group; failure to comply with anti-money laundering, counter terrorist financing, anti-bribery and sanctions regulations; failure to prevent or detect any illegal or improper activities; projected employee numbers and key person risk; increased labour costs; assumptions and estimates that form the basis of our financial statements; the impact of competitive conditions; and exposure to legal, regulatory or competition proceedings, investigations or complaints. A number of these influences and factors are beyond the Lloyds Bank Group's control. Please refer to the latest Annual Report on Form 20-F filed by Lloyds Bank plc with the US Securities and Exchange Commission (the SEC), which is available on the SEC's website at www.sec.gov, for a discussion of certain factors and risks. Lloyds Bank plc may also make or disclose written and/or oral forward-looking statements in other written materials and in oral statements made by the directors, officers or employees of Lloyds Bank plc to third parties, including financial analysts. Except as required by any applicable law or regulation, the forward-looking statements contained in this document are made as of today's date, and the Lloyds Bank Group expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward looking statements contained in this document whether as a result of new information, future events or otherwise. The information, statements and opinions contained in this document do not constitute a public offer under any applicable law or an offer to sell any securities or financial instruments or any advice or recommendation with respect to such securities or financial instruments.

Lloyds Bank plc
Independent auditors' report

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF LLOYDS BANK PLC

Report on the audit of the financial statements

1. Opinion

In our opinion:

- the financial statements of Lloyds Bank plc (the 'Bank') and its subsidiaries (the 'Group' or 'LB') give a true and fair view of the state of the Group's and of the Bank's affairs as at 31 December 2021 and of the Group's profit for the year then ended;
- the Group financial statements have been properly prepared in accordance with United Kingdom adopted international accounting standards and International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB);
- the Bank's financial statements have been properly prepared in accordance with United Kingdom adopted international accounting standards and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise the:

Group	Bank
<ul style="list-style-type: none"> • Consolidated balance sheet as at 31 December 2021; • Consolidated income statement for the year then ended; • Consolidated statement of comprehensive income for the year then ended; • Consolidated statement of changes in equity for the year then ended; • Consolidated cash flow statement for the year then ended; and • Notes 1 to 47 to the financial statements, which include the accounting principles and policies. 	<ul style="list-style-type: none"> • Balance sheet as at 31 December 2021; • Statement of comprehensive income for the year then ended; • Statement of changes in equity for the year then ended; • Cash flow statement for the year then ended; and • Notes 1 to 47 to the financial statements, which include the accounting principles and policies, as applicable to the Bank.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom adopted international accounting standards as applied in accordance with the provisions of the Companies Act 2006.

2. Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the Group and the Bank in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard as applied to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. The non-audit services provided to the Group and the Bank for the year are disclosed in note 10 to the financial statements. We confirm that we have not provided any non-audit services prohibited by the FRC's Ethical Standard to the Group or the Bank.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

3. Audit scope, approach, and execution

Key audit matters	The key audit matters that we identified in the current year were: <ul style="list-style-type: none"> • Expected credit losses (Group and Bank) • Regulatory and litigation matters (Group and Bank) • Defined benefit obligations (Group and Bank) • IT systems that impact financial reporting (Group and Bank)
Materiality	Overall materiality used for the Group consolidated financial statements was £290 million, which was determined on the basis of profit before tax and net assets. Overall materiality used for the Bank's financial statements was £290 million, which was determined on the basis of net assets and capped at Group materiality.
Scoping	Our audit scope covers 90% of the Group's revenue, 95% of the Group's profit before tax and 97% of the Group's total assets.

First year audit transition

This is the first year we have been appointed as auditors to the Group. We undertook a number of transitional procedures to prepare for the audit including establishing our independence from the Group which involved ceasing a number of commercial relationships and banking arrangements and changing the financial arrangements for our partners and over 3,000 staff who are in the audit division at Deloitte, or who work on the Lloyds Banking Group audit including the LB Group and Bank audit. We used the time prior to commencing our audit to meet with Group leadership and non-executive directors to gain an understanding of the business, its issues and the environment in which it operates.

We became independent of the Group and commenced our audit planning on 1 January 2020. From that date we attended all Audit Committee meetings, initially in an observer capacity, and continued to meet regularly with Group leadership, non-executive directors and the Group's main regulators. We worked alongside the former auditor, reviewed their working papers and shadowed some of their meetings to gain an understanding of the Group's processes, their audit risk assessment, and the controls on which they relied for the purposes of issuing their audit opinion.

Throughout 2020 we held regular meetings of audit partners and senior staff who would be responsible for undertaking the most significant areas of the Group audit. The main purpose of these meetings were to outline our audit approach, including discussing possible significant audit risks, the use of analytics in assessing significant and non-significant risks, to discuss testing approaches, and to brief our teams on the Group's key processes, systems and structure. During these meetings, we also heard directly from the Group on the changes impacting the business to inform our audit planning and risk assessment.

Lloyds Bank plc

Independent auditors' report

Our audit approach

We structured our approach to the audit to reflect how the Group is organised as well as ensuring our audit was both effective and risk focused. Our audit approach can be summarised into the following areas that enabled us to obtain the evidence required to form an opinion on the Group and the Bank's financial statements:

- **Risk assessment and audit planning.** We identified and instructed partners for the Group and Bank audit, as well as identified partners to lead areas requiring significant audit judgement including expected credit losses and provisions for regulatory and litigation matters. These partners met regularly with management to understand business strategy, accounting judgements and estimations and other matters which arose during the year that could have impacted the Group's financial reporting. Our risk assessment was further informed by detailed analytics as well as other quantitative and qualitative audit procedures, including consideration of matters such as the impact of the global pandemic and climate change on the account balances, disclosures and company practices;
- **Audit procedures undertaken at a Group level and at the Bank.** In addition to the above, the Group's and the Bank's operations, comprised primarily of retail and commercial banking operations, were subject to audit procedures. Government work-from-home orders and travel restrictions in force during the year required our team to work and communicate remotely. We were able to complete our audit work through increased videoconferencing and direct reviews of work completed, and continued to attend virtually the planning and clearance meetings with management. We also performed audit work on the Group and Bank financial statements, including the consolidation of the Group's results, the preparation of the financial statements, litigation provisions and exposures in addition to the Group's entity level and oversight controls relevant to financial reporting;
- **Internal controls testing approach.** We tested internal controls over financial reporting where our scoping and risk assessment determined those controls to be relevant to the audit. This included testing of general IT controls, process level controls and entity level controls at the Group level; and
- **The impact of climate change on our audit.** In planning our audit, we have considered the impact of climate change on the Group's operations and subsequent impact on its financial statements. The Group sets out its assessment of the potential impact on page 67 of the Risk Management section of the Annual Report.

In conjunction with our climate risk specialists, we have held discussions with the Group to understand their:

- process for identifying affected operations, including the governance and controls over this process, and the subsequent effect on the financial reporting for the Group; and
- long-term strategy to respond to climate change risks as they evolve including the effect on the Group's forecasts.

Our audit work has involved:

- challenging the completeness of the physical and transition risks identified and considered in the Group's climate risk assessment and the conclusion that there is no material impact of climate change risk on the current year financial reporting;
- assessing the Group's qualitative loan sector analysis, which supports the Group's conclusion that there is no material financial statement impact of climate risk on expected credit losses; and
- assessing disclosures in the annual report, and challenging the consistency between the financial statements and the remainder of the annual report.

As part of our audit procedures we read the Group's disclosures on page 67 to consider whether they are materially inconsistent with the financial statements or knowledge obtained in the audit and we did not identify any material inconsistencies as a result of these procedures.

4. Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the Group's and the Bank's ability to continue to adopt the going concern basis of accounting included:

- using our knowledge of the Group and the Bank, the financial services industry, the financial services regulatory environment and the general economic environment to identify inherent risks in the business model and how such risks might affect the financial resources or ability to continue operations over the going concern period;
- making enquiries of Group management about the assumptions, including climate risk considerations, used in their going concern models, and assessing the reasonableness of those assumptions and historical forecasting accuracy;
- evaluating the Group's strategic plans, short and longer term financial budgets, funding, liquidity and capital adequacy plans including internal stress tests;
- considering the Group's operational resilience;
- reading analyst reports, industry data, Bank of England reports and other external information to determine if it provided corroborative or contradictory evidence in relation to the Group's assumptions;
- reviewing correspondence and meeting with prudential and conduct regulators to assess whether there are any matters that may impact the going concern assessment;
- testing the underlying data generated to prepare the forecast scenarios and determined whether there was adequate support for the assumptions underlying the forecasts; and
- evaluating the Group's disclosures on going concern against the requirements of IAS 1.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Group's and the Bank's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Lloyds Bank plc
Independent auditors' report

5. Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit, and directing the efforts of the engagement team.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Expected credit losses (Group and Bank)

Key audit matter description

How the scope of our audit responded to the key audit matter

Refer to notes 2, 3, 11, 15 and 44 in the financial statements

The Group has recognised £4.0bn of expected credit losses ("ECL") at 31 December 2021. The determination of ECL consists of a number of assumptions that require a high degree of judgement and involve complex impairment modelling. The key areas we identified as having the most significant level of management judgement were in respect of:

- Multiple Economic Scenarios (MES);
- Retail ECL; and
- Commercial ECL.

Multiple economic scenarios

The measurement of expected credit losses is required to reflect an unbiased probability-weighted range of possible future outcomes.

The Group's economics team develops the future economic scenarios. Firstly, a base case forecast is produced based on a set of conditioning assumptions, which are designed to reflect the Group's best view of future events. A full distribution of economic scenarios around this base case is produced using a Monte Carlo simulation and scenarios within that distribution are ranked using estimated relationships with industrywide historical loss data.

Four scenarios are derived from the distribution as averages of constituent modelled scenarios around the 15th, 75th and 95th percentiles of the distribution corresponding to an upside, a downside and a severe downside, respectively. The upside, the base case and the downside scenarios are weighted at 30% and the severe downside at 10%.

These four scenarios are then used as key assumptions in the determination of the ECL allowance.

The development of these multiple economic scenarios is inherently uncertain, highly complex, and requires significant judgement. The global pandemic has increased the uncertainty of the conditioning assumptions used to develop the base case and, to account for this, the Group have recognised an adjustment to their multiple economic scenarios model to account for the significant downside uncertainties.

Working with our internal economic team and modelling specialists, we performed the following procedures:

- Tested the controls over the generation of the multiple economic scenarios including those over the Group's governance processes to determine the base case, different scenarios and the weightings applied to each scenario;
- Challenged and evaluated economic forecasts in the base scenario such as the unemployment rate, House Price Index and Gross Domestic Product through comparison to an independent economic outlook, external analysts and market data;
- Challenged and evaluated the appropriateness of the methodology applied to generate alternative macroeconomic scenarios, including associated weightings, and assumptions within;
- Tested whether the methodology has been appropriately reflected in the model code by producing an independent version of the model generating alternative macroeconomic scenarios and reconciling its outputs to the Group's model;
- Tested the completeness and accuracy of the data used by the model;
- Performed a stand back assessment of the appropriateness of the weightings applied to each of the scenarios based on publicly available data; and
- Evaluated the adequacy of disclosures in respect of significant judgements and sources of estimation uncertainty including macroeconomic scenarios.

In respect of the adjustment to the multiple economic scenarios model, we performed the following procedures:

- Tested the controls over review, challenge, and approval of this central adjustment;
 - Tested the completeness and accuracy of the data used in the quantification of the model adjustment; and
 - Evaluated the adequacy of the disclosures of the adjustment, including the sensitivity analysis.
-

Independent auditors' report

Key audit matter description	How the scope of our audit responded to the key audit matter
<p>Retail ECL</p> <p>The ECL for the Retail division is determined on a collective basis using impairment models to calculate a probability weighted estimate by applying an appropriate probability of default, estimated exposure at default and taking account of collateral held or other loss mitigants, discounted using the effective interest rate.</p> <p>The key judgements and estimates in determining the ECL for the Retail division include:</p> <ul style="list-style-type: none"> • model estimations, including model assumptions and data used such as statistical modelling triangulations, behavioral lives, and portfolio data; • the appropriate allocation of assets into the correct stage of 1, 2 or 3 under IFRS 9 'Financial Instruments' taking into account any significant deterioration in credit risk since inception; and • in-model and post-model adjustments (IMAs and PMAs) which are recognised to address identified model and data limitations. 	<p>We tested controls across the process to determine the ECL provisions including the following:</p> <ul style="list-style-type: none"> • Model governance including model validation and monitoring; • In-model adjustments (IMA) and post-model adjustments (PMA); • Model assumptions; • The allocation of assets into stages; and • Data accuracy and completeness. <p>Working with our internal modelling specialists, our audit procedures over the key areas of estimation included:</p> <ul style="list-style-type: none"> • Model estimations, where we: <ul style="list-style-type: none"> – assessed and challenged the appropriateness of modelling approach and assumptions used; – independently replicated the models for the most material portfolios and compared outputs of our instances of the models to the Group's; – evaluated whether other models operate in line with their specification through inspecting and re-running the model code designed by the Group; – assessed model performance by evaluating variations between observed data and model predictions; – developed an understanding of and assessed model limitations and remedial actions; and – tested the completeness and accuracy of the data used in model execution and calibration. • Allocation of assets into stages, where we: <ul style="list-style-type: none"> – evaluated the appropriateness of quantitative and qualitative criteria used for allocation into IFRS 9 stages; – tested the appropriateness of the stage allocation for a sample of exposures; and – tested the data used by models in assigning IFRS 9 stages and evaluated the appropriateness of the model logic used. • In-model and post-model adjustments, where we: <ul style="list-style-type: none"> – challenged the methodology, approach and assumptions in developing IMAs and PMAs, and evaluated the Group's selection of approach for indications of bias; – tested the completeness and accuracy of the data used; – performed a recalculation of the IMAs and PMAs; and – evaluated the completeness of IMAs and PMAs based on our understanding of model and data limitations, including those highlighted by the COVID-19 pandemic. • Adequacy of disclosures, where we: <ul style="list-style-type: none"> – assessed whether the disclosures appropriately address the uncertainty which exists in determining the ECL.

Lloyds Bank plc
Independent auditors' report

Key audit matter description	How the scope of our audit responded to the key audit matter
<p>Commercial ECL</p> <p>The ECL in the Commercial Banking division is calculated on a collective basis for performing loans, being those in stage 1 and 2, and on an individual basis for larger impaired loans in stage 3.</p> <p>The collective provision is determined using impairment models. The models use a number of significant judgments to calculate a probability weighted ECL estimate applying an appropriate probability of default, estimated exposure at default and taking account of collateral held or other loss mitigants, discounted using the effective interest rate. The key driver of the probability of default and, therefore, the staging of Commercial Banking exposures is the credit risk rating. The determination of these credit risk ratings is performed on a counterparty basis for larger exposures by a credit officer and involves a high degree of judgement and consideration of multiple sources of information.</p> <p>Therefore, we focused our work on testing the credit risk ratings feeding the collective models and the appropriateness of the methodology.</p> <p>For individual assessments of larger exposures in Stage 3, the significant judgements in determining provisions and where we focused our work are the:</p> <ul style="list-style-type: none"> • completeness and appropriateness of the potential workout and restructuring scenarios identified; • probability assigned to each identified potential workout and restructuring scenario through the use of best, likely or worst case flags; and • valuation assumptions used in determining the workout and restructuring scenarios. 	<p>We tested the controls across the process to determine the ECL provisions including:</p> <ul style="list-style-type: none"> • the determination of credit risk ratings; • the allocation into stages, particularly the assessment of a significant change in credit risk; • model governance and arithmetical accuracy of provision calculations; • data accuracy and completeness; and • recognition and calculation of post-model adjustments. <p>We performed the following audit procedures over:</p> <ul style="list-style-type: none"> • Expected credit losses determined through impairment models: <ul style="list-style-type: none"> – Independently assessed the credit rating and tested whether a significant increase in credit risk had occurred to result in a stage 2 classification against IFRS 9 criteria; – Assessed and challenged the model methodologies, approach and assumptions, including those used in developing the IMAs and PMAs; – Tested the completeness and accuracy of data used; and – Performed a recalculation of the IFRS 9 collective provision. • Expected credit losses assessed individually: <ul style="list-style-type: none"> – Assessed the exposures to determine if they met the definition of credit impaired; – Performed independent assessments to determine the appropriateness of recovery scenarios and associated cash flows, including considerations of climate risks on recoveries; – Evaluated valuations, including the use of internal specialists for business valuations; and – Independently assessed and challenged the completeness of workout and restructuring scenarios identified and weightings applied. • Adequacy of disclosures, where we: <ul style="list-style-type: none"> – assessed whether the disclosures appropriately address the uncertainty which exists in determining the ECL.
<p>Key observations communicated to the Audit Committee</p> <p>We are satisfied that the ECL are reasonable and recognised in accordance with the requirements of IFRS 9. The calculations are based on appropriate methodologies using reasonable modelled assumptions, including IMAs and PMAs addressing model shortcomings. Where control deficiencies were identified, particularly in data linkage to models, compensating controls were identified and operated effectively. Overall ECL levels are reasonable compared to peer benchmarking information, although we did identify some prudence in our assessment of some of the model adjustments.</p>	

Lloyds Bank plc
Independent auditors' report

Regulatory and litigation matters (Group and Bank)

Key audit matter description	How the scope of our audit responded to the key audit matter
<p>Refer to notes 2, 3 and 29 in the financial statements.</p> <p>The Group operates in an environment where it is subject to regulatory investigations, litigation and customer remediation. The Group is currently exposed to a number of regulatory and litigation matters. The Group's and the Bank's provision for these matters is £1.1bn and £146 million respectively at 31 December 2021, the most significant of which is the HBOS Reading matter.</p> <p>Significant judgement is required by the Group in determining whether, under IAS 37 Provisions, Contingent Liabilities and Contingent Assets:</p> <ul style="list-style-type: none"> • a reliable estimate can be made of the amount of the obligation, particularly where the information available is limited as is the case with HBOS Reading; and • any contingent liabilities and underlying significant estimation uncertainties are adequately disclosed. 	<p>We performed the following audit procedures:</p> <ul style="list-style-type: none"> • Tested the Group's controls over the completeness of provisions, the robustness of the assessment of the provision against the requirements of IAS 37, the appropriateness of judgements used to determine a 'best estimate' and the completeness and accuracy of data used in the process; • evaluated the assessment of the provisions, associated probabilities, and potential outcomes in accordance with IAS 37; • verified and challenged whether the methodology, data and significant judgements and assumptions used in the valuation of the provisions are appropriate in the context of the applicable financial reporting framework; • In respect of HBOS Reading, we inspected information available for the limited number of awards made by the Foskett panel and tested the methodology applied to determine the provision; • inspected correspondence and, where appropriate, made direct enquiry with the Group's regulators and internal and external legal counsel; • where no provision was made, we critically assessed and challenged the conclusion in the context of the requirements of IAS 37 Provisions, Contingent Liabilities and Contingent Assets; and • evaluated whether the disclosures made in the financial statements appropriately reflect the facts and key sources of estimation uncertainty.

Key observations communicated to the Audit Committee

While there is significant judgement required in estimating the timing and value of future settlements, particularly in relation to the HBOS Reading matter, we are satisfied that the approach to the estimation of these provisions is consistent with the requirements of IAS 37.

Defined benefit obligations (Group and Bank)

Key audit matter description	How the scope of our audit responded to the key audit matter
<p>Refer to notes 2, 3 and 27 in the financial statements</p> <p>The Group and the Bank operate a number of defined benefit retirement schemes, the obligations for which totalled £47.1bn for the Group, and £29.2bn for the Bank at 31 December 2021. Their valuation is determined with reference to key actuarial assumptions including mortality assumptions, discount rates and inflation rates. Due to the size of these schemes, small changes in these assumptions can have a material impact on the value of the defined benefit obligation and therefore, the assessment of these assumptions are a key judgement.</p>	<p>We performed the following audit procedures:</p> <ul style="list-style-type: none"> • Tested the Group's controls over the valuation of the defined benefit obligations, including controls over the assumptions setting process; and • Challenged the key actuarial assumptions used by comparing against ranges and expectations determined by our internal actuarial experts, which are calculated with reference to the central assumptions adopted by the actuarial firms for whom we have reviewed and accepted their methodologies.

Key observations communicated to the Audit Committee

We are satisfied that the Group's judgements in relation to the actuarial assumptions were reasonable.

Lloyds Bank plc
Independent auditors' report

IT systems that impact financial reporting (Group and Bank)

Key audit matter description	How the scope of our audit responded to the key audit matter
<p>The Group's IT environment is inherently complex as it supports a broad range of banking products and facilitates the processing of a significant volume of transactions.</p> <p>The IT systems within the Group form a critical component of the Group's financial reporting activities and impact all account balances with a reliance on automated and IT dependent manual controls. Due to the significant reliance on IT systems, effective General IT Controls (GITCs) are critical to allow reliance to be placed on the completeness and accuracy of financial data and the integrity of automated system functionality (e.g. system calculations).</p> <p>We identified the IT systems that impact financial reporting as a key audit matter because of the:</p> <ul style="list-style-type: none"> • pervasive reliance on complex technology that is integral to the operation of key business processes and financial reporting; • reliance on technology which continues to develop in line with the business strategy, such as the increase in the use of automation across the Group and increasing reliance on third parties; and • importance of the IT controls in maintaining an effective control environment. A key interdependency exists between the ability to rely on IT controls and the ability to rely on financial data, system configured automated controls and system reports. <p>IT controls, in the context of our audit scope, primarily relate to privileged access at the infrastructure level, user access security at the application level and change control.</p>	<p>Our IT audit scope tested the Group's IT controls over information systems deemed relevant to the audit based on the financial data, system configured automated controls and/or key financial reports that reside within it.</p> <p>We used IT specialists to support our evaluation of the risks associated with IT in the following areas:</p> <ul style="list-style-type: none"> • General IT Controls, including user access and change management controls; • Key financial reports and system configured automated controls; and • Cyber security risk assessment. <p>Where deficiencies in the IT control environment were identified, our risk assessment procedures included an assessment of those deficiencies to determine the impact on our audit plan. Where relevant, the audit plan was adjusted to mitigate the unaddressed IT risk.</p> <p>Where we were able to identify and test appropriate mitigating controls over affected financial statement line items, our testing approach remained unchanged.</p> <p>In a limited number of areas, we adopted a non-controls reliance approach and we therefore performed additional substantive procedures.</p>

Key observations communicated to the Audit Committee

IT control deficiencies were identified in respect of privileged user access to IT infrastructure and in application user access management. The existence of these deficiencies in the year resulted in an increased risk in relation to data, reports and automated system functionality from the affected systems.

However, overall, in combination with business mitigating controls, we are satisfied that the Group's overall IT control environment appropriately supports the financial reporting process.

6. Our application of materiality

6.1 Materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

	Group financial statements	Bank financial statements
Materiality	£290 million (2020: £260 million)	£290 million (2020: £260 million)
Basis for determining materiality	<p>In determining our benchmark for materiality, we have considered the metrics used by investors and other users of the financial statements. We have determined the following benchmarks to be the most relevant to users of the financial statements:</p> <ul style="list-style-type: none"> • Pre-tax profit; and • Net assets. <p>The determined materiality represents 5% of pre-tax profit and 0.7% of net assets.</p> <p>The increase in materiality from the predecessor auditor's determination of £260 million in 2020 is primarily due to the increase in profit at 31 December 2021.</p>	<p>The Bank's materiality represents 0.7% of net assets, and is capped at Group materiality.</p>
Rationale for the benchmark applied	<p>Given the importance of these measures to investors and users of the financial statements, we have used pre-tax profit as the primary benchmark for our determination of materiality, and net assets as a supporting benchmark.</p>	<p>The users of the Bank's financial statements are primarily focused on the balance sheet since it is considered a key indicator of financial health. As such, we have used net assets as the benchmark for materiality.</p> <p>However, given the size of the entity's balance sheet, we have capped materiality at the Group's materiality.</p>

Lloyds Bank plc
Independent auditors' report

6.2 Performance materiality

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole.

	Group financial statements	Bank financial statements
Performance materiality	60% of Group materiality – £175 million	60% of the Bank's materiality – £175 million
Basis and rationale for determining performance materiality	In determining performance materiality, we considered the following factors: <ol style="list-style-type: none"> a. The current financial year being Deloitte LLP's first year auditing the Group and the Bank's financial statements; b. The quality of the control environment and whether we were able to rely on controls; c. Degree of centralisation and commonality of controls and processes; d. The uncertain economic environment arising from the COVID-19 pandemic; e. The nature, volume and size of uncorrected misstatements arising in the previous audit; and f. The nature, volume and size of uncorrected misstatements that remain uncorrected in the current period. 	

6.3 Error reporting threshold

We agreed with the Audit Committee that we would report all audit differences in excess of £15 million (2020: £13 million), as well as any differences below this threshold, which in our view, warranted reporting on qualitative grounds. We also report to the Audit Committee on disclosure matters that we identified when assessing the overall presentation of the financial statements.

7. Other Information

The other information comprises the information included in the Annual Report, other than the financial statements and our auditor's report thereon. The Directors are responsible for the other information contained within the Annual Report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

We have nothing to report in this regard.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in course of the audit or otherwise appears to be materially misstated.

If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We summarise below our work in relation to areas of the other information including those areas upon which we are specifically required to report:

Our responsibility	Our reporting
Matters we are specifically required to report	
Strategic report and directors' report	Report whether they are consistent with the audited financial statements and are prepared in accordance with applicable legal requirements. Report if we have identified any material misstatements in either report in the light of the knowledge and understanding of the Group and of the Bank and their environment obtained in the course of the audit.
Principal risks (within the Strategic Report)	Review the confirmation and description in the light of the knowledge gathered during the audit, such as through considering the directors' processes to support the statements made, challenging the Group's key judgements and estimates, consideration of historical forecasting accuracy and evaluating macro-economic assumptions.
	We have nothing to report in respect of these matters.

8. Responsibilities of Directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group's and the Bank's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or the Bank or to cease operations, or have no realistic alternative but to do so.

9. Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Lloyds Bank plc
Independent auditors' report

10. Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing the risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- The nature of the industry and sector, control environment and business performance including the design of the Group's remuneration policies, key drivers for directors' remuneration, bonus levels and performance targets;
- The Group's own assessment of the risks that irregularities may occur either as a result of fraud or error that was approved by the board on 23 February 2022;
- Enquiring of management, in-house legal counsel, internal audit and the Audit Committee, including obtaining and reviewing supporting documentation, concerning the Group's policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud; and
 - the internal controls established to mitigate risks related to fraud or non-compliance with laws and regulations;
- Discussing among the engagement team including relevant internal specialists, including tax, valuations, pensions, IT and industry specialists regarding how and where fraud might occur in the financial statements and any potential indicators of fraud; and
- Obtaining an understanding of the legal and regulatory frameworks that the Group and the Bank operate in, focusing on those laws and regulations that had a direct effect on the financial statements, such as provisions of the UK Companies Act, pensions legislation and tax legislation or that had a fundamental effect on the operations of the Group, including regulation and supervisory requirements of the Prudential Regulation Authority, Financial Reporting Council and Financial Conduct Authority.

Audit response to risks identified

As a result of performing the above, we identified the Group's and Bank's determination of "expected credit losses" as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures in response to those key audit matters. In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override.

In addition to the above, our procedures to respond to risks identified included the following:

- Reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- Enquiring of management, the Audit Committee and in-house and external legal counsel concerning actual and potential litigation and claims;
- Performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- Reading minutes of meetings of those charged with governance, reviewing internal audit reports and correspondence with regulators; and
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including specialists and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Lloyds Bank plc
Independent auditors' report

Report on other legal and regulatory requirements

11. Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- The information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- The strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the Group and of the Bank and their environment obtained in the course of the audit, we have not identified any material misstatements in the strategic report or the directors' report.

12. Matters on which we are required to report by exception

Adequacy of explanations received and accounting records Under the Companies Act 2006 we are required to report to you if, in our opinion: <ul style="list-style-type: none">• We have not received all the information and explanations we require for our audit; or• Adequate accounting records have not been kept by the Bank, or returns adequate for our audit have not been received from branches not visited by us; or• The Bank's financial statements are not in agreement with the accounting records and returns.	We have nothing to report in respect of these matters.
Directors' remuneration Under the Companies Act 2006 we are also required to report if in our opinion certain disclosures of directors' remuneration have not been made or is not in agreement with the accounting records and returns.	We have nothing to report in respect of these matters.

13. Other matters which we are required to address

Auditor tenure

Following the recommendation of the Audit Committee, we were appointed by shareholders at its annual general meeting on 20 May 2021 to audit the financial statements of Lloyds Banking Group plc, including Lloyds Bank plc for the year ended 31 December 2021 and subsequent financial periods. The period of total uninterrupted engagement of the firm is accordingly one year.

Consistency of the audit report with the additional report to the Audit Committee

Our audit opinion is consistent with the additional report to the Audit Committee we are required to provide in accordance with ISAs (UK).

14. Use of our report

This report is made solely to the Bank's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Bank's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Bank and the Bank's members as a body, for our audit work, for this report, or for the opinions we have formed.

As required by the Financial Conduct Authority (FCA) Disclosure Guidance and Transparency Rule (DTR) 4.1.14R, these financial statements form part of the European Single Electronic Format (ESEF) prepared Annual Financial Report filed on the National Storage Mechanism of the UK FCA in accordance with the ESEF Regulatory Technical Standard ('ESEF RTS'). This auditor's report provides no assurance over whether the annual financial report has been prepared using the single electronic format specified in the ESEF RTS.

The accompanying notes are an integral part of the financial statements.

Lloyds Bank plc

Notes to the accounts

Note 1: Basis of preparation

The consolidated financial statements of Lloyds Bank plc (the Bank) and its subsidiary undertakings (the Group) have been prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006. The financial statements have also been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).

The financial information has been prepared under the historical cost convention, as modified by the revaluation of investment properties, financial assets measured at fair value through other comprehensive income, trading securities and certain other financial assets and liabilities at fair value through profit or loss and all derivative contracts. The Directors consider that it is appropriate to continue to adopt the going concern basis in preparing the financial statements. In reaching this assessment, the Directors have considered the implications of the short-term impacts of the COVID-19 pandemic and climate change upon the Group's performance and projected funding and capital position. The Directors have also taken into account the impact of further stress scenarios.

Details of those IFRS pronouncements which will be relevant to the Group but which were not effective at 31 December 2021 and which have not been applied in preparing these financial statements are given in note 46.

In 2019 the Group adopted IFRS 16 and amendments to IAS 12 and early-adopted the hedge accounting amendments *Interest Rate Benchmark Reform* issued by the IASB. In 2021, the Group has adopted the *Interest Rate Benchmark Reform Phase 2* amendments issued by the IASB. These amendments require that changes to expected future cash flows that both arise as a direct result of IBOR Reform and are economically equivalent to the previous cash flows are accounted for as a change to the effective interest rate with no adjustment to the asset's or liability's carrying value; no immediate gain or loss is recognised. The new requirements also provide relief from the requirements to discontinue hedge accounting as a result of amending hedge documentation if the changes are required solely as a result of IBOR Reform. The amendments do not have a material impact on the Group's comparatives, which have not been restated.

The following changes have been made to the presentation of the Group's assets and liabilities on the face of the balance sheet:

- Property, plant and equipment is included in other assets (note 21)
- Reverse repurchase agreements with banks and customers are shown separately from loans and advances to banks and loans and advances to customers respectively; and repurchase agreements with banks and customers are shown separately from deposits from banks and customer deposits respectively

There has been no change in the basis of accounting for any of the underlying transactions. Comparatives have been presented on a consistent basis for all of the above.

Note 2: Accounting policies

The accounting policies are set out below. These accounting policies have been applied consistently.

(A) Consolidation

The assets, liabilities and results of Group undertakings (including structured entities) are included in the financial statements on the basis of accounts made up to the reporting date. Group undertakings include subsidiaries, associates and joint ventures. Details of the Group's subsidiaries and related undertakings are given on pages 209 to 212.

(1) Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it has power over the entity, is exposed to, or has rights to, variable returns from its involvement with the entity, and has the ability to affect those returns through the exercise of its power. This generally accompanies a shareholding of more than one half of the voting rights although in certain circumstances a holding of less than one half of the voting rights may still result in the ability of the Group to exercise control. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. The Group reassesses whether or not it controls an entity if facts and circumstances indicate that there are changes to any of the above elements. Subsidiaries are fully consolidated from the date on which control is transferred to the Group; they are de-consolidated from the date that control ceases.

Structured entities are entities that are designed so that their activities are not governed by way of voting rights. In assessing whether the Group has power over such entities in which it has an interest, the Group considers factors such as the purpose and design of the entity; its practical ability to direct the relevant activities of the entity; the nature of the relationship with the entity; and the size of its exposure to the variability of returns of the entity.

The treatment of transactions with non-controlling interests depends on whether, as a result of the transaction, the Group loses control of the subsidiary. Changes in the parent's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions; any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the parent entity. Where the Group loses control of the subsidiary, at the date when control is lost the amount of any non-controlling interest in that former subsidiary is derecognised and any investment retained in the former subsidiary is remeasured to its fair value; the gain or loss that is recognised in profit or loss on the partial disposal of the subsidiary includes the gain or loss on the remeasurement of the retained interest.

Intercompany transactions, balances and unrealised gains and losses on transactions between Group companies are eliminated.

The acquisition method of accounting is used to account for business combinations by the Group. The consideration for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred except those relating to the issuance of debt instruments (see (E)(4) below) or share capital (see (O) below). Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair value at the acquisition date.

(2) Joint ventures and associates

Joint ventures are joint arrangements over which the Group has joint control with other parties and has rights to the net assets of the arrangements. Joint control is the contractually agreed sharing of control of an arrangement and only exists when decisions about the relevant activities require the unanimous consent of the parties sharing control. Associates are entities over which the Group has significant influence.

Lloyds Bank plc
Notes to the accounts

Note 2: Accounting policies (continued)

Significant influence is the power to participate in the financial and operating policy decisions of the entity, but is not control or joint control of those policies, and is generally achieved through holding between 20 per cent and 50 per cent of the voting share capital of the entity.

The Group utilises the venture capital exemption for investments where significant influence or joint control is present and the business unit operates as a venture capital business. These investments are designated at initial recognition at fair value through profit or loss. Otherwise, the Group's investments in joint ventures and associates are accounted for by the equity method of accounting.

(B) Goodwill

Goodwill arises on business combinations and represents the excess of the cost of an acquisition over the fair value of the Group's share of the identifiable assets, liabilities and contingent liabilities acquired. Where the fair value of the Group's share of the identifiable assets, liabilities and contingent liabilities of the acquired entity is greater than the cost of acquisition, the excess is recognised immediately in the income statement.

Goodwill is recognised as an asset at cost and is tested at least annually for impairment. If an impairment is identified the carrying value of the goodwill is written down immediately through the income statement and is not subsequently reversed. At the date of disposal of a subsidiary, the carrying value of attributable goodwill is included in the calculation of the profit or loss on disposal.

(C) Other intangible assets

Intangible assets which have been determined to have a finite useful life are amortised on a straight-line basis over their estimated useful life as follows: up to 7 years for capitalised software; 10 to 15 years for brands and other intangible assets.

Intangible assets with finite useful lives are reviewed at each reporting date to assess whether there is any indication that they are impaired. If any such indication exists the recoverable amount of the asset is determined and in the event that the asset's carrying amount is greater than its recoverable amount, it is written down immediately. Certain brands have been determined to have an indefinite useful life and are not amortised. Such intangible assets are assessed annually to determine whether the asset is impaired and to reconfirm that an indefinite useful life remains appropriate. In the event that an indefinite life is inappropriate, a finite life is determined and a further impairment review is performed on the asset.

(D) Revenue recognition

(1) Net interest income

Interest income and expense are recognised in the income statement using the effective interest method for all interest-bearing financial instruments, except for those classified at fair value through profit or loss. The effective interest method is a method of calculating the amortised cost of a financial asset or liability and of allocating the interest income or interest expense over the expected life of the financial instrument. The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument to the gross carrying amount of the financial asset (before adjusting for expected credit losses) or to the amortised cost of the financial liability, including early redemption fees, other fees, and premiums and discounts that are an integral part of the overall return. In the case of financial assets that are purchased or originated credit-impaired, the effective interest rate is the rate that discounts the estimated future cash flows to the amortised cost of the instrument. Direct incremental transaction costs related to the acquisition, issue or disposal of a financial instrument are also taken into account. Interest income from non-credit impaired financial assets is recognised by applying the effective interest rate to the gross carrying amount of the asset; for credit impaired financial assets, the effective interest rate is applied to the net carrying amount after deducting the allowance for expected credit losses. Impairment policies are set out in (H) below.

(2) Fee and commission income and expense

Fees and commissions receivable which are not an integral part of the effective interest rate are recognised as income as the Group fulfils its performance obligations. The Group's principal performance obligations arising from contracts with customers are in respect of value added current accounts, credit cards and debit cards. These fees are received, and the Group provides the service, monthly; the fees are recognised in income on this basis. The Group also receives certain fees in respect of its asset finance business where the performance obligations are typically fulfilled towards the end of the customer contract; these fees are recognised in income on this basis. Where it is unlikely that the loan commitments will be drawn, loan commitment fees are recognised in fee and commission income over the life of the facility, rather than as an adjustment to the effective interest rate for loans expected to be drawn. Incremental costs incurred to generate fee and commission income are charged to fees and commissions expense as they are incurred.

(3) Other

Dividend income is recognised when the right to receive payment is established.

Revenue recognition policies specific to trading income are set out in (E)(3) below; those relating to leases are set out in (J)(1) below.

(E) Financial assets and liabilities

On initial recognition, financial assets are classified as measured at amortised cost, fair value through other comprehensive income or fair value through profit or loss, depending on the Group's business model for managing the financial assets and whether the cash flows represent solely payments of principal and interest. The Group assesses its business models at a portfolio level based on its objectives for the relevant portfolio, how the performance of the portfolio is managed and reported, and the frequency of asset sales. Financial assets with embedded derivatives are considered in their entirety when considering their cash flow characteristics. The Group reclassifies financial assets only when its business model for managing those assets changes. A reclassification will only take place when the change is significant to the Group's operations and will occur at a portfolio level and not for individual instruments; reclassifications are expected to be rare. Equity investments are measured at fair value through profit or loss unless the Group elects at initial recognition to account for the instruments at fair value through other comprehensive income. For these instruments, principally strategic investments, dividends are recognised in profit or loss but fair value gains and losses are not subsequently reclassified to profit or loss following derecognition of the investment.

The Group initially recognises loans and advances, deposits, debt securities in issue and subordinated liabilities when the Group becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of securities and other financial assets and trading liabilities are recognised on trade date, being the date that the Group is committed to purchase or sell an asset.

Financial assets are derecognised when the contractual right to receive cash flows from those assets has expired or when the Group has transferred its contractual right to receive the cash flows from the assets and either: substantially all of the risks and rewards of ownership have been transferred; or the Group has neither retained nor transferred substantially all of the risks and rewards, but has transferred control.

Financial liabilities are derecognised when the obligation is discharged, cancelled or expires.

Lloyds Bank plc
Notes to the accounts

Note 2: Accounting policies (continued)

(1) Financial instruments measured at amortised cost

Financial assets that are held to collect contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A basic lending arrangement results in contractual cash flows that are solely payments of principal and interest on the principal amount outstanding. Where the contractual cash flows introduce exposure to risks or volatility unrelated to a basic lending arrangement such as changes in equity prices or commodity prices, the payments do not comprise solely principal and interest. Financial assets measured at amortised cost are predominantly loans and advances to customers and banks together with certain debt securities used by the Group to manage its liquidity. Loans and advances are initially recognised when cash is advanced to the borrower at fair value inclusive of transaction costs. Interest income is accounted for using the effective interest method (see (D) above).

Financial liabilities are measured at amortised cost, except for trading liabilities and other financial liabilities designated at fair value through profit or loss on initial recognition which are held at fair value.

Where changes are made to the contractual cash flows of a financial asset or financial liability that are economically equivalent and arise as a direct consequence of interest rate benchmark reform, the Group updates the effective interest rate and does not recognise an immediate gain or loss.

(2) Financial assets measured at fair value through other comprehensive income

Financial assets that are held to collect contractual cash flows and for subsequent sale, where the assets' cash flows represent solely payments of principal and interest, are recognised in the balance sheet at their fair value, inclusive of transaction costs. Interest calculated using the effective interest method and foreign exchange gains and losses on assets denominated in foreign currencies are recognised in the income statement. All other gains and losses arising from changes in fair value are recognised directly in other comprehensive income, until the financial asset is either sold or matures, at which time the cumulative gain or loss previously recognised in other comprehensive income is recognised in the income statement other than in respect of equity shares, for which the cumulative revaluation amount is transferred directly to retained profits. The Group recognises a charge for expected credit losses in the income statement (see (H) below). As the asset is measured at fair value, the charge does not adjust the carrying value of the asset, it is reflected in other comprehensive income.

(3) Financial instruments measured at fair value through profit or loss

Financial assets are classified at fair value through profit or loss where they do not meet the criteria to be measured at amortised cost or fair value through other comprehensive income or where they are designated at fair value through profit or loss to reduce an accounting mismatch. All derivatives are carried at fair value through profit or loss. Derivatives are carried on the balance sheet as assets when their fair value is positive and as liabilities when their fair value is negative. Refer to note 41(3) (Financial instruments: Financial assets and liabilities carried at fair value) for details of valuation techniques and significant inputs to valuation models.

Derivatives embedded in a financial asset are not considered separately; the financial asset is considered in its entirety when determining whether its cash flows are solely payments of principal and interest. Derivatives embedded in financial liabilities are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the income statement.

Trading securities, which are debt securities and equity shares acquired principally for the purpose of selling in the short term or which are part of a portfolio which is managed for short-term gains, do not meet these criteria and are also measured at fair value through profit or loss. Financial assets measured at fair value through profit or loss are recognised in the balance sheet at their fair value. Fair value gains and losses together with interest coupons and dividend income are recognised in the income statement within net trading income.

Financial liabilities are measured at fair value through profit or loss where they are trading liabilities or where they are designated at fair value through profit or loss in order to reduce an accounting mismatch; where the liabilities are part of a group of liabilities (or assets and liabilities) which is managed, and its performance evaluated, on a fair value basis; or where the liabilities contain one or more embedded derivatives that significantly modify the cash flows arising under the contract and would otherwise need to be separately accounted for. Financial liabilities measured at fair value through profit or loss are recognised in the balance sheet at their fair value. Fair value gains and losses are recognised in the income statement within net trading income in the period in which they occur, except that gains and losses attributable to changes in own credit risk are recognised in other comprehensive income.

The fair values of assets and liabilities traded in active markets are based on current bid and offer prices, respectively, which include the expected effects of potential changes to laws and regulations, risks associated with climate change and other factors. If the market is not active the Group establishes a fair value by using valuation techniques. The fair values of derivative financial instruments are adjusted where appropriate to reflect credit risk (via credit valuation adjustments (CVAs)), debit valuation adjustments (DVAs) and funding valuation adjustments (FVAs)), market liquidity and other risks.

(4) Borrowings

Borrowings (which include deposits from banks, customer deposits, debt securities in issue and subordinated liabilities) are recognised initially at fair value, being their issue proceeds net of transaction costs incurred. These instruments are subsequently stated at amortised cost using the effective interest method.

Preference shares and other instruments which carry a mandatory coupon or are redeemable on a specific date are classified as financial liabilities. The coupon on these instruments is recognised in the income statement as interest expense. Securities which carry a discretionary coupon and have no fixed maturity or redemption date are classified as other equity instruments. Interest payments on these securities are recognised as distributions from equity in the period in which they are paid. An exchange of financial liabilities on substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of a financial liability extinguished and the new financial liability is recognised in profit or loss together with any related costs or fees incurred.

When a financial liability is exchanged for an equity instrument, the new equity instrument is recognised at fair value and any difference between the carrying value of the liability and the fair value of the new equity is recognised in profit or loss.

(5) Sale and repurchase agreements (including securities lending and borrowing)

Securities sold subject to repurchase agreements (repos) continue to be recognised on the balance sheet where substantially all of the risks and rewards are retained. Funds received for repos carried at fair value are included within trading liabilities. Conversely, securities purchased under agreements to resell (reverse repos), where the Group does not acquire substantially all of the risks and rewards of ownership, are measured at amortised cost or at fair value. Those measured at fair value are recognised within trading securities. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method.

Lloyds Bank plc
Notes to the accounts

Note 2: Accounting policies (continued)

Securities borrowing and lending transactions are typically secured; collateral takes the form of securities or cash advanced or received. Securities lent to counterparties are retained on the balance sheet. Securities borrowed are not recognised on the balance sheet, unless these are sold to third parties, in which case the obligation to return them is recorded at fair value as a trading liability. Cash collateral given or received is treated as a loan and advance measured at amortised cost or customer deposit.

(F) Hedge accounting

As permitted by IFRS 9, the Group continues to apply the requirements of IAS 39 to its hedging relationships.

Changes in the fair value of all derivative instruments, other than those in effective cash flow and net investment hedging relationships, are recognised immediately in the income statement. As noted in (2) and (3) below, the change in fair value of a derivative in an effective cash flow or net investment hedging relationship is allocated between the income statement and other comprehensive income.

Hedge accounting allows one financial instrument, generally a derivative such as a swap, to be designated as a hedge of another financial instrument such as a loan or deposit or a portfolio of such instruments. At the inception of the hedge relationship, formal documentation is drawn up specifying the hedging strategy, the hedged item, the hedging instrument and the methodology that will be used to measure the effectiveness of the hedge relationship in offsetting changes in the fair value or cash flow of the hedged risk. The effectiveness of the hedging relationship is tested both at inception and throughout its life and if at any point it is concluded that it is no longer highly effective in achieving its documented objective, hedge accounting is discontinued. Note 14 provides details of the types of derivatives held by the Group and presents separately those designated in hedge relationships.

Where there is uncertainty arising from interest rate benchmark reform, the Group assumes that the interest rate benchmark on which the hedged cash flows and/or the hedged risk are based, or the interest rate benchmark on which the cash flows of the hedging instrument are based, are not altered as a result of interest rate benchmark reform. The Group does not discontinue a hedging relationship during the period of uncertainty arising from the interest rate benchmark reform solely because the actual results of the hedge are not highly effective.

Where the contractual terms of a financial asset, financial liability or derivative are amended, on an economically equivalent basis, as a direct consequence of interest rate benchmark reform, the uncertainty arising from the reform is no longer present. In these circumstances, the Group amends the hedge documentation to reflect the changes required by the reform; these changes to the documentation do not in and of themselves result in the discontinuation of hedge accounting or require the designation of a new hedge relationship.

(1) Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk; this also applies if the hedged asset is classified as a financial asset at fair value through other comprehensive income. If the hedge no longer meets the criteria for hedge accounting, changes in the fair value of the hedged item attributable to the hedged risk are no longer recognised in the income statement. The cumulative adjustment that has been made to the carrying amount of the hedged item is amortised to the income statement using the effective interest method over the period to maturity.

(2) Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income in the cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in the income statement. Amounts accumulated in equity are reclassified to the income statement in the periods in which the hedged item affects profit or loss. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised in the income statement when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

(3) Net investment hedges

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income, the gain or loss relating to the ineffective portion is recognised immediately in the income statement. Gains and losses accumulated in equity are included in the income statement when the foreign operation is disposed of. The hedging instrument used in net investment hedges may include non-derivative liabilities as well as derivative financial instruments.

(G) Offset

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right of offset and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. Cash collateral on exchange traded derivative transactions is presented gross unless the collateral cash flows are always settled net with the derivative cash flows. In certain situations, even though master netting agreements exist, the lack of management intention to settle on a net basis results in the financial assets and liabilities being reported gross on the balance sheet.

(H) Impairment of financial assets

The impairment charge in the income statement reflects the change in expected credit losses, including those arising from fraud. Expected credit losses are recognised for loans and advances to customers and banks, other financial assets held at amortised cost, financial assets (other than equity investments) measured at fair value through other comprehensive income, and certain loan commitments and financial guarantee contracts. Expected credit losses are calculated as an unbiased and probability-weighted estimate using an appropriate probability of default, adjusted to take into account a range of possible future economic scenarios, and applying this to the estimated exposure of the Group at the point of default after taking into account the value of any collateral held, repayments, or other mitigants of loss and including the impact of discounting using the effective interest rate.

At initial recognition, allowance (or provision in the case of some loan commitments and financial guarantees) is made for expected credit losses resulting from default events that are possible within the next 12 months (12-month expected credit losses). In the event of a significant increase in credit risk since origination, allowance (or provision) is made for expected credit losses resulting from all possible default events over the expected life of the financial instrument (lifetime expected credit losses). Financial assets where 12-month expected credit losses are recognised are considered to be Stage 1; financial assets which are considered to have experienced a significant increase in credit risk since initial recognition are in Stage 2; and financial assets which have defaulted or are otherwise considered to be credit-impaired are allocated to Stage 3. Some Stage 3 assets, mainly in Commercial Banking, are subject to individual rather than collective assessment. Such cases are subject to a risk-based impairment sanctioning process, and these are reviewed and updated at least quarterly, or more frequently if there is a significant change in the credit profile. The collective assessment of impairment aggregates financial instruments with similar risk characteristics, such as whether the facility is revolving in nature or secured and the type of security against financial assets.

Lloyds Bank plc
Notes to the accounts

Note 2: Accounting policies (continued)

An assessment of whether credit risk has increased significantly since initial recognition considers the change in the risk of default occurring over the remaining expected life of the financial instrument. In determining whether there has been a significant increase in credit risk, the Group uses quantitative tests based on relative and absolute probability of default (PD) movements linked to internal credit ratings together with qualitative indicators such as watchlists and other indicators of historical delinquency, credit weakness or financial difficulty. The use of internal credit ratings and qualitative indicators ensures alignment between the assessment of staging and the Group's management of credit risk which utilises these internal metrics within distinct retail and commercial portfolio risk management practices. However, unless identified at an earlier stage, the credit risk of financial assets is deemed to have increased significantly when more than 30 days past due. The use of a payment holiday in and of itself has not been judged to indicate a significant increase in credit risk, with the underlying long-term credit risk deemed to be driven by economic conditions and captured through the use of forward-looking models. These portfolio-level models are capturing the anticipated volume of increased defaults and therefore an appropriate assessment of staging and expected credit loss. Where the credit risk subsequently improves such that it no longer represents a significant increase in credit risk since initial recognition, the asset is transferred back to Stage 1.

Assets are transferred to Stage 3 when they have defaulted or are otherwise considered to be credit-impaired. Default is considered to have occurred when there is evidence that the customer is experiencing financial difficulty which is likely to affect significantly the ability to repay the amount due. IFRS 9 contains a rebuttable presumption that default occurs no later than when a payment is 90 days past due. The Group uses this 90 day backstop for all its products except for UK mortgages. For UK mortgages, the Group uses a backstop of 180 days past due as mortgage exposures more than 90 days past due, but less than 180 days, typically show high cure rates and this aligns with the Group's risk management practices. Key differences between Stage 3 balances and non-performing loans relate to the use of 180 days past due for Stage 3 mortgages and to the cure periods applied to forbearance exposures. The use of payment holidays is not considered to be an automatic trigger of regulatory default and therefore does not automatically trigger Stage 3. Days past due will also not accumulate on any accounts that have taken a payment holiday including those already past due.

In certain circumstances, the Group will renegotiate the original terms of a customer's loan, either as part of an ongoing customer relationship or in response to adverse changes in the circumstances of the borrower. In the latter circumstances, the loan will remain classified as either Stage 2 or Stage 3 until the credit risk has improved such that it no longer represents a significant increase since origination (for a return to Stage 1), or the loan is no longer credit-impaired (for a return to Stage 2). On renegotiation the gross carrying amount of the loan is recalculated as the present value of the renegotiated or modified contractual cash flows, which are discounted at the original effective interest rate. Renegotiation may also lead to the loan and associated allowance being derecognised and a new loan being recognised initially at fair value.

Purchased or originated credit-impaired financial assets (POCI) include financial assets that are purchased or originated at a deep discount that reflects incurred credit losses. At initial recognition, POCI assets do not carry an impairment allowance; instead, lifetime expected credit losses are incorporated into the calculation of the effective interest rate. All changes in lifetime expected credit losses subsequent to the assets' initial recognition are recognised as an impairment charge.

A loan or advance is normally written off, either partially or in full, against the related allowance when the proceeds from realising any available security have been received or there is no realistic prospect of recovery and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of impairment losses recorded in the income statement. For both secured and unsecured retail balances, the write-off takes place only once an extensive set of collections processes has been completed, or the status of the account reaches a point where policy dictates that continuing attempts to recover are no longer appropriate. For commercial lending, a write-off occurs if the loan facility with the customer is restructured, the asset is under administration and the only monies that can be received are the amounts estimated by the administrator, the underlying assets are disposed and a decision is made that no further settlement monies will be received, or external evidence (for example, third-party valuations) is available that there has been an irreversible decline in expected cash flows.

(I) Property, plant and equipment

Property, plant and equipment (other than investment property) is included at cost less accumulated depreciation. The value of land (included in premises) is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate the difference between the cost and the residual value over their estimated useful lives, as follows: the shorter of 50 years and the remaining period of the lease for freehold/long and short leasehold premises; the shorter of 10 years and, if lease renewal is not likely, the remaining period of the lease for leasehold improvements; 10 to 20 years for fixtures and furnishings; and 2 to 8 years for other equipment and motor vehicles.

The assets' residual values and useful lives are reviewed, taking into account considerations such as potential changes to legislation, including those that are climate-related, as well as other factors, and adjusted if appropriate, at each balance sheet date.

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In assessing the recoverable amount of assets the Group considers the effects of potential or actual changes in legislation, customer behaviour, climate-related risks and other factors. In the event that an asset's carrying amount is determined to be greater than its recoverable amount it is written down immediately. The recoverable amount is the higher of the asset's fair value less costs to sell and its value in use.

Investment property comprises freehold and long leasehold land and buildings that are held either to earn rental income or for capital accretion or both. In accordance with the guidance published by the Royal Institution of Chartered Surveyors, investment property is carried at fair value based on current prices for similar properties, adjusted for the specific characteristics of the property (such as location or condition). If this information is not available, the Group uses alternative valuation methods such as discounted cash flow projections or recent prices in less active markets. These valuations are reviewed at least annually by independent professionally qualified valuers. Investment property being redeveloped for continuing use as investment property, or for which the market has become less active, continues to be valued at fair value.

(J) Leases

Under IFRS 16, a lessor is required to determine whether a lease is a finance or operating lease. A lessee is not required to make this determination.

(1) As lessor

Assets leased to customers are classified as finance leases if the lease agreements transfer substantially all the risks and rewards of ownership to the lessee but not necessarily legal title. All other leases are classified as operating leases. When assets are subject to finance leases, the present value of the lease payments, together with any unguaranteed residual value, is recognised as a receivable, net of allowances for expected credit losses and residual value impairment, within loans and advances to banks and customers. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance lease income. Finance lease income is recognised in interest income over the term of the lease using the net investment method (before tax) so as to give a constant rate of return on the net investment in the leases. Unguaranteed residual values are reviewed regularly to identify any impairment.

Lloyds Bank plc
Notes to the accounts

Note 2: Accounting policies (continued)

Operating lease assets are included within other assets at cost and depreciated over their estimated useful lives, which equates to the lives of the leases, after taking into account anticipated residual values. Operating lease rental income is recognised on a straight-line basis over the life of the lease.

The Group evaluates non-lease arrangements such as outsourcing and similar contracts to determine if they contain a lease which is then accounted for separately.

(2) As lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Assets and liabilities arising from a lease are initially measured on a present value basis. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be determined, or the Group's incremental borrowing rate appropriate for the right-of-use asset arising from the lease and the liability recognised within other liabilities.

Lease payments are allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of twelve months or less. Low-value assets comprise IT equipment and small items of office furniture.

(K) Employee benefits

Short-term employee benefits, such as salaries, paid absences, performance-based cash awards and social security costs, are recognised over the period in which the employees provide the related services.

(1) Pension schemes

The Group operates a number of post-retirement benefit schemes for its employees including both defined benefit and defined contribution pension plans. A defined benefit scheme is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, dependent on one or more factors such as age, years of service and salary. A defined contribution plan is a pension plan into which the Group pays fixed contributions; there is no legal or constructive obligation to pay further contributions.

Scheme assets are included at their fair value and scheme liabilities are measured on an actuarial basis using the projected unit credit method. The defined benefit scheme liabilities are discounted using rates equivalent to the market yields at the balance sheet date on high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability. The Group's income statement charge includes the current service cost of providing pension benefits, past service costs, net interest expense (income), and plan administration costs that are not deducted from the return on plan assets. Past service costs, which represents the change in the present value of the defined benefit obligation resulting from a plan amendment or curtailment, are recognised when the plan amendment or curtailment occurs. Net interest expense (income) is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Remeasurements, comprising actuarial gains and losses, the return on plan assets (excluding amounts included in net interest expense (income) and net of the cost of managing the plan assets), and the effect of changes to the asset ceiling (if applicable) are reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurements recognised in other comprehensive income are reflected immediately in retained profits and will not subsequently be reclassified to profit or loss.

The Group's balance sheet includes the net surplus or deficit, being the difference between the fair value of scheme assets and the discounted value of scheme liabilities at the balance sheet date. Surpluses are only recognised to the extent that they are recoverable through reduced contributions in the future or through refunds from the schemes. In assessing whether a surplus is recoverable, the Group considers (i) its current right to obtain a refund or a reduction in future contributions and (ii) the rights of other parties existing at the balance sheet date. In determining the rights of third parties existing at the balance sheet date, the Group does not anticipate any future acts by other parties.

The costs of the Group's defined contribution plans are charged to the income statement in the period in which they fall due.

(2) Share-based compensation

Lloyds Banking Group operates a number of equity-settled, share-based compensation plans in respect of services received from certain of its employees. The value of the employee services received in exchange for equity instruments granted under these plans is recognised as an expense over the vesting period of the instruments, with a corresponding increase in equity. This expense is determined by reference to the fair value of the number of equity instruments that are expected to vest. The fair value of equity instruments granted is based on market prices, if available, at the date of grant. In the absence of market prices, the fair value of the instruments at the date of grant is estimated using an appropriate valuation technique, such as a Black-Scholes option pricing model or a Monte Carlo simulation. The determination of fair values excludes the impact of any non-market vesting conditions, which are included in the assumptions used to estimate the number of options that are expected to vest. At each balance sheet date, this estimate is reassessed and if necessary revised. Any revision of the original estimate is recognised in the income statement, together with a corresponding adjustment to equity. Cancellations by employees of contributions to the Group's Save As You Earn plans are treated as non-vesting conditions and the Group recognises, in the year of cancellation, the amount of the expense that would have otherwise been recognised over the remainder of the vesting period. Modifications are assessed at the date of modification and any incremental charges are charged to the income statement.

(L) Taxation

Tax expense comprises current and deferred tax. Current and deferred tax are charged or credited in the income statement except to the extent that the tax arises from a transaction or event which is recognised, in the same or a different period, outside the income statement (either in other comprehensive income, directly in equity, or through a business combination), in which case the tax appears in the same statement as the transaction that gave rise to it. The tax consequences of the Group's dividend payments (including distributions on other equity instruments), if any, are charged or credited to the statement in which the profit distributed originally arose.

Current tax is the amount of corporate income taxes expected to be payable or recoverable based on the profit for the period as adjusted for items that are not taxable or not deductible, and is calculated using tax rates and laws that were enacted or substantively enacted at the balance sheet date.

Lloyds Bank plc
Notes to the accounts

Note 2: Accounting policies (continued)

Current tax includes amounts provided in respect of uncertain tax positions when management expects that, upon examination of the uncertainty by Her Majesty's Revenue and Customs (HMRC) or other relevant tax authority, it is more likely than not that an economic outflow will occur. Provisions reflect management's best estimate of the ultimate liability based on their interpretation of tax law, precedent and guidance, informed by external tax advice as necessary. Changes in facts and circumstances underlying these provisions are reassessed at each balance sheet date, and the provisions are remeasured as required to reflect current information.

Deferred tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the balance sheet. Deferred tax is calculated using tax rates and laws that have been enacted or substantively enacted at the balance sheet date, and which are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax liabilities are generally recognised for all taxable temporary differences but not recognised for taxable temporary differences arising on investments in subsidiaries where the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future. Deferred tax liabilities are not recognised on temporary differences that arise from goodwill which is not deductible for tax purposes.

Deferred tax assets are recognised to the extent it is probable that taxable profits will be available against which the deductible temporary differences can be utilised, and are reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are not recognised in respect of temporary differences that arise on initial recognition of assets and liabilities acquired other than in a business combination. Deferred tax is not discounted.

(M) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). Foreign currency transactions are translated into the appropriate functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when recognised in other comprehensive income as qualifying cash flow or net investment hedges. Non-monetary assets that are measured at fair value are translated using the exchange rate at the date that the fair value was determined. Translation differences on equities and similar non-monetary items held at fair value through profit and loss are recognised in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets measured at fair value through other comprehensive income, such as equity shares, are included in the fair value reserve in equity unless the asset is a hedged item in a fair value hedge.

The results and financial position of all Group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows: the assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on the acquisition of a foreign entity, are translated into sterling at foreign exchange rates ruling at the balance sheet date; and the income and expenses of foreign operations are translated into sterling at average exchange rates unless these do not approximate to the foreign exchange rates ruling at the dates of the transactions, in which case income and expenses are translated at the dates of the transactions.

Foreign exchange differences arising on the translation of a foreign operation are recognised in other comprehensive income and accumulated in a separate component of equity together with exchange differences arising from the translation of borrowings and other currency instruments designated as hedges of such investments (see (F)(3) above). On disposal or liquidation of a foreign operation, the cumulative amount of exchange differences relating to that foreign operation is reclassified from equity and included in determining the profit or loss arising on disposal or liquidation.

(N) Provisions and contingent liabilities

Provisions are recognised in respect of present obligations arising from past events where it is probable that outflows of resources will be required to settle the obligations and they can be reliably estimated.

Contingent liabilities are possible obligations whose existence depends on the outcome of uncertain future events or those present obligations where the outflows of resources are uncertain or cannot be measured reliably. Contingent liabilities are not recognised in the financial statements but are disclosed unless they are remote.

Provision is made for expected credit losses in respect of irrevocable undrawn loan commitments and financial guarantee contracts (see (H) above).

(O) Share capital

Incremental costs directly attributable to the issue of new shares or options or to the acquisition of a business are shown in equity as a deduction, net of tax, from the proceeds. Dividends paid on the Group's ordinary shares are recognised as a reduction in equity in the period in which they are paid.

(P) Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise cash and non-mandatory balances with central banks and amounts due from banks with an original maturity of less than three months.

(Q) Investment in subsidiaries

Investments in subsidiaries are carried at historical cost, less any provisions for impairment.

Lloyds Bank plc

Notes to the accounts

Note 3: Critical accounting judgements and key sources of estimation uncertainty

The preparation of the Group's financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions in applying the accounting policies that affect the reported amounts of assets, liabilities, income and expenses. Due to the inherent uncertainty in making estimates, actual results reported in future periods may be based upon amounts which differ from those estimates. Estimates, judgements and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In preparing the financial statements, the Group has considered the impact of climate-related risks on its financial position and performance. While the effects of climate change represent a source of uncertainty, the Group does not consider there to be a material impact on its judgements and estimates from the physical, transition and other climate-related risks in the short to medium term.

The significant judgements, apart from those involving estimation, made by management in applying the Group's accounting policies in these financial statements (key judgements) and the key sources of estimation uncertainty that may have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year (key estimates), which together are considered critical to the Group's results and financial position, are as follows:

Allowance for expected credit losses

Key judgements:	<p>Determining an appropriate definition of default against which a probability of default, exposure at default and loss given default parameter can be evaluated</p> <p>The appropriate lifetime of an exposure to credit risk for the assessment of lifetime losses, notably on revolving products</p> <p>Establishing the criteria for a significant increase in credit risk (SICR)</p> <p>The use of management judgement alongside impairment modelling processes to adjust inputs, parameters and outputs to reflect risks not captured by models</p>
Key estimates:	<p>Base case and multiple economic scenarios (MES) assumptions, including the rate of unemployment and the rate of change of house prices, required for creation of MES scenarios and forward-looking credit parameters</p>

These judgements and estimates are subject to significant uncertainty.

The Group recognises an allowance for expected credit losses (ECLs) for loans and advances to customers and banks, other financial assets held at amortised cost, financial assets (other than equity investments) measured at fair value through other comprehensive income and certain loan commitment and financial guarantee contracts. At 31 December 2021, the Group's expected credit loss allowance was £4,000 million (2020: £6,132 million), of which £3,806 million (2020: £5,706 million) was in respect of drawn balances; and the Bank's expected credit loss allowance was £1,311 million (2020: £2,558 million), of which £1,197 million (2020: £2,313 million) was in respect of drawn balances.

The calculation of the Group's expected credit loss allowances and provisions against loan commitments and guarantees under IFRS 9 requires the Group to make a number of judgements, assumptions and estimates. The most significant are set out below.

Definition of default

The probability of default (PD) of an exposure, both over a 12-month period and over its lifetime, is a key input to the measurement of the ECL allowance. Default has occurred when there is evidence that the customer is experiencing significant financial difficulty which is likely to affect the ability to repay amounts due. The definition of default adopted by the Group is described in note 2(H) Impairment of financial assets. The Group has rebutted the presumption in IFRS 9 that default occurs no later than when a payment is 90 days past due for UK mortgages. As a result, at 31 December 2021, £0.5 billion of UK mortgages (2020: £0.6 billion) were classified as Stage 2 rather than Stage 3; the impact on the Group's ECL allowance was not material.

Lifetime of an exposure

A range of approaches, segmented by product type, has been adopted by the Group to estimate a product's expected life. These include using the full contractual life and taking into account behavioural factors such as early repayments, extensions and refinancing. For non-revolving retail assets, the Group has assumed the expected life for each product to be the time taken for all significant losses to be observed. For retail revolving products, the Group has considered the losses beyond the contractual term over which the Group is exposed to credit risk. For commercial overdraft facilities, the average behavioural life has been used. Changes to the assumed expected lives of the Group's assets could impact the ECL allowance recognised by the Group. The assessment of SICR and corresponding lifetime loss, and the PD, of a financial asset designated as Stage 2, or Stage 3, is dependent on its expected life.

Significant increase in credit risk

Performing assets are classified as either Stage 1 or Stage 2. An ECL allowance equivalent to 12 months' expected losses is established against assets in Stage 1; assets classified as Stage 2 carry an ECL allowance equivalent to lifetime expected losses. Assets are transferred from Stage 1 to Stage 2 when there has been a significant increase in credit risk since initial recognition. Credit-impaired assets are transferred to Stage 3 with a lifetime expected losses allowance. The Group uses both quantitative and qualitative indicators to determine whether there has been a SICR for an asset. For Retail, the following tables set out the retail master scale (RMS) grade triggers which result in a SICR for financial assets and the PD boundaries for each RMS grade. Loans and overdrafts SICR triggers have been refined in 2021 following a review of sensitivity to changes in economic assumptions, aligning to Credit cards (refined in 2020). The impact of this has been approximately £0.3 billion of additional assets being classified as Stage 2 at 31 December 2021, with a corresponding increase in the ECL of £15 million resulting from the transfer to a lifetime expected loss.

SICR triggers for key Retail portfolios

Origination grade	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Mortgages SICR grade	5	5	6	7	8	9	10							
Credit cards, loans and overdrafts SICR grade	4	5	6	7	8	9	10							

RMS grade	1	2	3	4	5	6	7	8	9	10	11	12	13	14
PD boundary % ¹	0.10	0.40	0.80	1.20	2.50	4.50	7.50	10.00	14.00	20.00	30.00	45.00	99.99	100.00

¹ Probability-weighted annualised lifetime probability of default.

For Commercial a doubling of PD with a minimum increase in PD of 1 per cent and a resulting change in the underlying grade is treated as a SICR.

Lloyds Bank plc
Notes to the accounts

Note 3: Critical accounting judgements and key sources of estimation uncertainty (continued)

The Group uses the internal credit risk classification and watchlist as qualitative indicators to identify a SICR. The Group does not use the low credit risk exemption in its staging assessments. The use of a payment holiday in and of itself has not been judged to indicate a significant increase in credit risk, nor forbearance, with the underlying long-term credit risk deemed to be driven by economic conditions and captured through the use of forward-looking models. These portfolio level models are capturing the anticipated volume of increased defaults and therefore an appropriate assessment of staging and expected credit loss.

All financial assets are assumed to have suffered a SICR if they are more than 30 days past due; credit cards, loans and overdrafts financial assets are also assumed to have suffered a SICR if they are in arrears on three or more separate occasions in a rolling 12-month period. Financial assets are classified as credit-impaired if they are 90 days past due, except for UK mortgages where a 180 days backstop is used.

A Stage 3 asset that is no longer credit-impaired is transferred back to Stage 2 as no cure period is applied to Stage 3. If an exposure that is classified as Stage 2 no longer meets the SICR criteria, which in some cases capture customer behaviour in previous periods, it is moved back to Stage 1.

The setting of precise trigger points combined with risk indicators requires judgement. The use of different trigger points may have a material impact upon the size of the ECL allowance. The Group monitors the effectiveness of SICR criteria on an ongoing basis.

Generation of multiple economic scenarios

The estimate of expected credit losses is required to be based on an unbiased expectation of future economic scenarios. The approach used to generate the range of future economic scenarios depends on the methodology and judgements adopted. The Group's approach is to start from a defined base case scenario, used for planning purposes, and to generate alternative economic scenarios around this base case. The base case scenario is a conditional forecast underpinned by a number of conditioning assumptions that reflect the Group's best view of key future developments. If circumstances appear likely to materially deviate from the conditioning assumptions, then the base case scenario is updated.

The base case scenario is central to a range of future economic scenarios generated by simulation of an economic model, for which the same conditioning assumptions apply as in the base case scenario. These scenarios are ranked by using estimated relationships with industry-wide historical loss data. With the base case already pre-defined, three other scenarios are identified as averages of constituent scenarios located around the 15th, 75th and 95th percentiles of the distribution. The full distribution is therefore summarised by a practical number of scenarios to run through ECL models representing an upside, the base case, and a downside scenario weighted at 30 per cent each, together with a severe downside scenario weighted at 10 per cent. The scenario weights represent the distribution of economic scenarios and not subjective views on likelihood. The inclusion of a severe downside scenario with a smaller weighting ensures that the non-linearity of losses in the tail of the distribution is adequately captured. The Group does not apply any reversion techniques within scenario generation, noting that data after the five-year forecast period shown has a relatively immaterial effect on the ECL provision.

A forum under the chairmanship of the Chief Economist meets at least quarterly to review and, if appropriate, recommend changes to the method by which economic scenarios are generated, for approval by the Chief Financial Officer and Chief Risk Officer. While no material changes were made to the model in 2021, the forum identified the need to consider an alternative approach to address interest rate risks not captured within the downside scenarios. The forum recommended that a non-modelled severe downside scenario was evaluated for potential incremental losses. This resulted in a management adjustment for UK mortgages which exhibited a sufficient uplift in ECL in a high rate scenario.

Base case and MES economic assumptions

The Group's base case economic scenario has been revised in light of the continuing impact of the coronavirus pandemic, intensifying global inflation pressures, and a shift towards a more restrictive stance of monetary policy by central banks. The Group's updated base case scenario built in three key conditioning assumptions. First, the current wave of coronavirus infections does not lead to a re-imposition of lockdown restrictions in the UK, although greater household caution is expected amid increased hospitalisation rates. Second, the rise in wholesale energy prices is passed on to consumers through a 50 per cent increase in retail energy prices in April 2022. Third, inflation expectations rise in response to increasing headline inflation but subsequently revert to levels consistent with the Bank of England's 2 per cent inflation target.

Based on these assumptions and incorporating the improved economic data in the fourth quarter, the Group's base case outlook is for a modest rise in the unemployment rate alongside a deceleration in residential and commercial property price growth, as the UK Bank Rate is raised in response to increasing inflationary pressures. Risks around this base case economic view lie in both directions and are partly captured by the generation of alternative economic scenarios described above. Uncertainties relating to key epidemiological developments, notably the possibility that a vaccine-resistant strain could emerge, are not specifically captured by these scenarios. These specific risks are recognised outside of the modelled scenarios with a central adjustment.

The Group has accommodated the latest available information at the reporting date in defining its base case scenario and generating alternative economic scenarios. The scenarios include forecasts for key variables in the fourth quarter of 2021, for which actuals may have since emerged prior to publication.

Lloyds Bank plc
Notes to the accounts

Note 3: Critical accounting judgements and key sources of estimation uncertainty (continued)

Scenarios by year

Key annual assumptions made by the Group are shown below. Gross domestic product is presented as an annual change, house price growth and commercial real estate price growth are presented as the growth in the respective indices within the period. UK Bank Rate and unemployment rate are averages for the period.

The key UK economic assumptions made by the Group averaged over a five-year period are also shown below. The five-year period reflects movements within the current reporting year such that 31 December 2021 reflects the five years 2021 to 2025. The prior year comparative data has been re-presented to align to the equivalent period, 2020 to 2024. The inclusion of the reporting year within the five-year period reflects the need to predict variables which remain unpublished at the reporting date, and recognises that credit models utilise both level and annual change in calculating ECL. The use of calendar years also maintains a comparability between tables disclosed.

ECL sensitivity to economic assumptions

The table below shows the Group's ECL for the upside, base case, downside and severe downside scenarios. The stage allocation for an asset is based on the overall scenario probability-weighted PD and, hence, the staging of assets is constant across all the scenarios. In each economic scenario the ECL for individual assessments and post-model adjustments is constant reflecting the basis on which they are evaluated. Judgements applied through changes to inputs are reflected in the scenario sensitivities. The probability-weighted view shows the extent to which a higher ECL allowance has been recognised to take account of multiple economic scenarios relative to the base case; the uplift being £221 million compared to £495 million at 31 December 2020, noting that if the impact of MES staging was also included, as shown in the table below, this would increase to £228 million compared to £536 million at 31 December 2020.

	At 31 December 2021					At 31 December 2020				
	Probability-weighted £m	Upside £m	Base case £m	Downside £m	Severe downside £m	Probability-weighted £m	Upside £m	Base case £m	Downside £m	Severe downside £m
UK mortgages	837	637	723	967	1,386	1,027	614	803	1,237	2,306
Retail excluding UK mortgages	1,429	1,286	1,392	1,516	1,706	2,368	2,181	2,310	2,487	2,745
Commercial Banking	1,316	1,182	1,246	1,384	1,728	2,315	1,853	2,102	2,575	3,554
Other	418	416	418	419	421	422	420	422	422	428
ECL allowance	4,000	3,521	3,779	4,286	5,241	6,132	5,068	5,637	6,721	9,033

The table below shows the Group's ECL for the upside, base case, downside and severe downside scenarios, with staging of assets based on each specific scenario probability of default. ECL applied through individual assessments and post-model adjustments is reported flat against each economic scenario, reflecting the basis on which they are evaluated. Judgements applied through changes to inputs are reflected in the scenario sensitivities. A probability-weighted scenario is not shown as this does not reflect the basis on which ECL is reported.

	At 31 December 2021				At 31 December 2020			
	Upside £m	Base case £m	Downside £m	Severe downside £m	Upside £m	Base case £m	Downside £m	Severe downside £m
UK mortgages	636	722	973	1,448	602	797	1,269	2,578
Retail excluding UK mortgages	1,270	1,388	1,535	1,767	2,154	2,299	2,509	2,819
Commercial Banking	1,180	1,244	1,397	1,976	1,842	2,079	2,629	3,985
Other	416	418	419	422	420	421	422	429
ECL allowance	3,502	3,772	4,324	5,613	5,018	5,596	6,829	9,811

The impact of changes in the UK unemployment rate and House Price Index (HPI) have also been assessed. Although such changes would not be observed in isolation, as economic indicators tend to be correlated in a coherent scenario, this gives insight into the sensitivity of the Group's ECL to gradual changes in these two critical economic factors. The assessment has been made against the base case with the reported staging unchanged.

The table below shows the impact on the Group's ECL resulting from a 1 percentage point (pp) increase or decrease in the UK unemployment rate. The increase or decrease is presented based on the adjustment phased evenly over the first 10 quarters of the base case scenario. An immediate increase or decrease would drive a more material ECL impact as it would be fully reflected in both 12-month and lifetime PDs.

	At 31 December 2021		At 31 December 2020	
	1pp increase in unemployment £m	1pp decrease in unemployment £m	1pp increase in unemployment £m	1pp decrease in unemployment £m

Note 3: Critical accounting judgements and key sources of estimation uncertainty (continued)

The table below shows the impact on the Group's ECL in respect of UK mortgages of an increase or decrease in loss given default for a 10 percentage point (pp) increase or decrease in the UK House Price Index (HPI). The increase or decrease is presented based on the adjustment phased evenly over the first 10 quarters of the base case scenario.

	At 31 December 2021		At 31 December 2020	
	10pp increase in HPI	10pp decrease in HPI	10pp increase in HPI	10pp decrease in HPI
ECL impact, £m	(112)	162	(206)	284

Individual assessments

Stage 3 ECL in Commercial Banking is largely assessed on an individual basis using bespoke assessment of loss for each specific client. These assessments are carried out by the Business Support Unit based on detailed reviews and expected recovery strategies. While these assessments are based on the Group's latest economic view, the use of Group-wide multiple economic scenarios and weightings is not considered appropriate for these cases due to their individual characteristics. In place of this, a range of case-specific outcomes are considered with any alternative better or worse outcomes that carry a 25 per cent likelihood taken into account in establishing a probability-weighted ECL. At 31 December 2021, individually assessed provisions for Commercial Banking were £905 million (2020: £1,215 million) which reflected a range of £741 million to £1,023 million (2020: £977 million to £1,536 million), based on the range of alternative outcomes considered.

Application of judgement in adjustments to modelled ECL

Impairment models fall within the Group's model risk framework with model monitoring, periodic validation and back testing performed on model components (i.e. probability of default, exposure at default and loss given default). Limitations in the Group's impairment models or data inputs may be identified through the ongoing assessment and validation of the output of the models. In these circumstances, management make appropriate adjustments to the Group's allowance for impairment losses to ensure that the overall provision adequately reflects all material risks. These adjustments are determined by considering the particular attributes of exposures which have not been adequately captured by the impairment models and range from changes to model inputs and parameters, at account level, through to more qualitative post-model adjustments.

Judgements are not typically assessed under each distinct economic scenario used to generate ECL, but instead are applied on the basis of final modelled ECL which reflects the probability-weighted view of all scenarios. All adjustments are reviewed quarterly and are subject to internal review and challenge, including by the Audit Committee, to ensure that amounts are appropriately calculated and that there are specific release criteria identified.

The coronavirus pandemic and the various support measures that have been put in place have resulted in an economic environment which differs significantly from the historical economic conditions upon which the impairment models have been built. As a result there has been a greater need for management judgements to be applied alongside the use of models. At 31 December 2021 management judgement resulted in additional ECL allowances totalling £1,278 million (2020: £1,333 million). This comprises judgements added due to COVID-19 and other judgements not directly linked to COVID-19 but which have increased in size during the pandemic. The table below analyses total ECL allowance by portfolio, separately identifying the amounts that have been modelled, those that have been individually assessed and those arising through the application of management judgement.

	Modelled ECL £m	Individually assessed £m	Judgements due to COVID-19 ¹ £m	Other judgements £m	Total ECL £m
At 31 December 2021

Total	3,584	1,215	838	495	6,132

¹ Judgements introduced to address the impact that COVID-19 and resulting interventions have had on the Group's economic outlook and observed loss experience, which have required additional model limitations to be addressed.

Judgements due to COVID-19

UK mortgages: £67 million (2020: £36 million)

These adjustments principally comprise:

Increase in time to repossession: £52 million (2020: £36 million)

This reflects an adjustment made to allow for an increase in the time assumed between default and repossession as a result of the Group temporarily suspending the repossession of properties to support customers during the pandemic.

Lloyds Bank plc
Notes to the accounts

Note 3: Critical accounting judgements and key sources of estimation uncertainty (continued)

Credit cards: £94 million (2020: £128 million) and Other Retail: £57 million (2020: £193 million)

These adjustments principally comprise:

Recognition of impact of support measures: Credit cards: £94 million (2020: £100 million) Other Retail: £40 million (2020: £118 million)

Government support and subdued levels of consumer spending are judged to have contributed to the reduced flow of accounts into default and to improved average credit scores across portfolios. Management believes that the resulting position does not fully reflect the underlying credit risk in the portfolios although there is no longer an expectation that the reduced level of defaults experienced in 2020 was temporary. Adjustments continue to be made to increase expected future rates of default and predicted exposures at default relative to modelled ECL.

Commercial Banking: £155 million (2020: £81 million)

These adjustments principally comprise:

Adjustment to economic variables used as inputs to models: £88 million (2020: £91 million)

Observed reductions in the rate of UK corporate insolvencies, used as an input to commercial default models, continue to be substituted with an increase proportionate to that seen in unemployment to generate a level of predicted defaults. As anticipated, the rate of recoveries has returned to pre-pandemic levels towards the end of 2021 and, with model outputs based on 12 months observed insolvency data, management believe the historically low levels of insolvencies seen during early 2021 do not reflect the underlying credit risk.

Specific sector risks: £80 million (2020: £nil)

At 31 December 2020 modelled ECL incorporated an economic outlook containing a material reduction in corporate profits. This is no longer assumed, which generates a reduction in modelled ECL and therefore leaves potential risk on specific sectors. An updated assessment of risks including COVID-driven restrictions, inflation and interest rate pressures has been undertaken which continues to suggest that a number of specific industries remain more exposed. Judgement has therefore been raised in place of this to ensure a more targeted stress on likelihood and severity of loss in sectors which are considered to face an elevated risk incorporating any impact on SICR through the increased likelihood of loss.

Other: £400 million (2020: £400 million)

COVID risk to base case conditioning assumptions: £400 million (2020: £400 million)

An important element of the methodology used to calculate the Group's ECL allowance is the determination of a base case economic scenario, predicated on certain conditioning assumptions, which is then used to derive alternative economic scenarios using stochastic shocks. While the base case outlook has improved throughout the year, unexpected and adverse COVID-19 mutations may partially invalidate the base case conditioning assumptions and therefore the potential range of losses considered. The base case represents the Groups most likely view, however management believes that in the context of the pandemic, the possibility that the conditioning assumptions are invalidated is firmly to the downside. In particular, the possibility that a future virus mutation has vaccine resistance leading to serious social and economic disruption. Such a possibility lies outside of the Group's current methodology because it would invalidate one of the key assumptions behind the base case forecast. The likelihood and impact of a vaccine resistant mutation is difficult to estimate with any precision therefore the Group has considered a number of approaches to create a reasonable estimate of this additional downside risk.

An adjustment of £400 million (31 December 2020: £400 million) has been made to increase the Group's ECL allowances to reflect the increased downside risk and the potential for the severity of losses to stretch beyond the Group's severe scenario. One approach used to quantify this amount is to apply a 15 per cent re-weighting from the stated upside to the stated severe downside scenario, a larger re-weight than at 31 December 2020 given that the current severe scenario reflects the improved conditioning assumptions of the base case, whereas the downside risk remains constant. Another approach is to apply a 1 percentage point increase in unemployment allied with a 10 per cent lower HPI in 2022, reflecting a broader assessment of a more immediate and therefore greater ECL impact than the gradual increase reflected in the stated univariate sensitivities. Such an increase is proportionate to the level of volatility seen in forecasts every six months as the pandemic has unfolded.

As the adjustment has been calculated centrally it has not been allocated to specific portfolios. It has therefore been allocated against Stage 1 assets given that the downside risks are largely considered to relate to non-defaulted exposures, the majority of which are in Stage 1. Detailed portfolio level disclosures continue to reflect the Group's economic assumptions at the Group's stated weightings. An indicative allocation to allow users to understand where the Group believes that the additional losses could arise is as follows: UK mortgages: c.£200 million, Credit cards and Other Retail: c.£100 million, Commercial Banking c.£100 million. The Group continues to monitor and assess the likelihood and consequences of its current conditioning assumptions.

Other judgements

UK mortgages: £478 million (2020: £510 million)

These adjustments principally comprise:

Adjustment to modelled forecast parameters: £65 million (2020: £193 million)

Adjustments to the estimated defaults used within the ECL calculation for UK mortgages were introduced in 2020 following the adoption of new default forecast models. Work has progressed through the year to embed the new model, including updates to model design choices through the implementation of formal model changes or through in-model adjustments, which are considered judgemental pending final evaluation and model governance. These remaining in-model adjustments now target a combination of specific enhancements which will continue to be progressed through to model changes. The reduction in the adjustment is also partly due to the improved economic outlook which reduces the impact of adopting the new forecast model.

End-of-term interest-only: £174 million (2020: £179 million)

The current definition of default used in the UK mortgages impairment model excludes past term interest-only accounts that continue to make interest payments but have missed their capital payment upon maturity of the loan. This adjustment therefore mitigates the risk that the model understates the credit losses associated with interest-only accounts which have missed, or will potentially miss, their final capital payment. For those accounts that have reached end of term this adjustment manually overwrites PDs to 70 per cent or 100 per cent, thereby moving them into Stage 2, or Stage 3, depending on whether they are considered performing or non-performing respectively. For interest-only accounts with six years or less to maturity an appropriate incremental PD uplift is made to PDs based on the probability of missing a future capital payment, assessed through segmentation of behaviour score, debt-to-value and worst ever arrears status.

Notes to the accounts

Note 3: Critical accounting judgements and key sources of estimation uncertainty (continued)

Long-term defaults: £87 million (2020: £87 million)

The Group suspended mortgage litigation activity between late 2014 and mid 2018 as changes were implemented to the treatment of amounts in arrears, interrupting the natural flow of accounts to possession. An adjustment is made to ensure adequate provision coverage considering the resulting build-up of accounts in long-term default. Coverage is uplifted to the equivalent levels of those accounts already in repossession on an estimated shortfall of balances expected to flow to possession. A further adjustment is made to mitigate for the risk that credit model provision understates the probability of possession for accounts which have been in default for more than 24 months, with an arrears balance increase in the last 6 months. These accounts have their probability of possession set to 95 per cent based on observed historical losses incurred on accounts that were of an equivalent status.

Adjustment for specific segments: £54 million (2020: £20 million)

The Group monitors risks across specific segments of its portfolios which may not be fully captured through wider collective models. Along with continued judgemental increases to probability of default (2020: £20 million), the Group has taken an additional £36 million judgement for fire safety and cladding uncertainty. This captures risks within the assessment of affordability and asset valuations, not captured by underlying models. Though experience remains limited the risk is now considered sufficiently material to address through judgement, given that more cases have been assessed as having defective cladding, or other fire safety issues, together with emerging evidence of higher arrears and weaker sales values relative to the wider portfolio.

Inflation and interest rate risk: £52 million (2020: £nil)

The Group's approach to MBS modelling incorporates a range of interest rate scenarios, however it is recognised that given current inflationary pressures the risk of a very rapid increase in interest rates may not be fully captured in the range of economic assumptions used to assess credit losses. Therefore an additional management judgement for the mortgage portfolio, for which default rates are most sensitive to interest rates, has been taken to reflect this heightened risk. The quantification of this risk adopts an alternative severe downside scenario which leverages the Group's internal stress exercise. The increase in ECL therefore reflects the incremental losses from adopting a severe downside scenario with interest rates increasing to 4 per cent, with peak unemployment and house price falls broadly consistent with the Group's stated severe downside scenario. The Group will continue to reassess inflationary risks and whether this additional judgement is required.

Credit cards: £(9) million (2020: £(56) million) and Other Retail: £50 million (2020: £43 million)

These adjustments principally comprise:

Lifetime extension on revolving products: Credit cards: £41 million (2020: £71 million) and Other Retail: £5 million (2020: £10 million)

Unsecured revolving products use a model lifetime definition of three years based on historic data which shows that substantially all accounts resolve in this time. An adjustment is made to extend the lifetime used for Stage 2 exposures to six years by increasing default probabilities through the extrapolation of the default trajectory observed throughout the three years and beyond. The resulting additional ECL allowance is added to Stage 2 accounts proportionate to the modelled three-year PD. The decrease in this judgement during 2021 is primarily due to the Group's improved economic outlook, meaning that the model view of lifetime three year losses is lower and therefore this extrapolation to six years is proportionally lower.

Credit card loss given default alignment (LGD): £(37) million (2020: £(55) million)

The MBNA impairment model was developed using historical MBNA data. Following the acquisition of the business and the subsequent migration of this portfolio to Lloyds Banking Group's collections strategies, an adjustment is required to reflect the recent improvement in cure rates now evident as collections strategies harmonise, which are not captured by the original MBNA model development data. The reduction in the judgement reflects a lower level of anticipated defaults, now expected from an improved economic outlook, against which the LGD adjustments would be applied.

Defined benefit pension scheme obligations

Key judgement: Determination of an appropriate yield curve

Key estimates: Discount rate applied to future cash flows

Expected lifetime of the schemes' members

Expected rate of future inflationary increases

The net asset recognised in the balance sheet at 31 December 2021 in respect of the Group's defined benefit pension scheme obligations was £4,404 million comprising an asset of £4,531 million and a liability of £1,127 million (2020: a net asset of £1,578 million comprising an asset of £1,714 million and a liability of £136 million); and for the Bank was £2,384 million (comprising an asset of £765 million and a liability of £38 million). The Group's accounting policy for its defined benefit pension scheme obligations is set out in note 2(K).

The accounting valuation of the Group's defined benefit pension schemes' liabilities requires management to make a number of assumptions. The key areas of estimation uncertainty are the discount rate applied to future cash flows, the expected lifetime of the schemes' members and the expected rate of future inflationary increases.

The discount rate is required to be set with reference to market yields at the end of the reporting period on high quality corporate bonds in the currency of and with a term consistent with the defined benefit pension schemes' obligations. The average duration of the schemes' obligations is approximately 17 years. The market for bonds with a similar duration is limited and, as a result, significant management judgement is required to determine an appropriate yield curve on which to base the discount rate. Assuming that there is no change in other assumptions or in the value of the schemes' assets, the effect on the net accounting surplus at 31 December 2021 of a decrease of 10 basis points in the discount rate would be a reduction of £795 million (2020: £890 million). To the extent that changes in the discount rate arise from changes in gilt yields, rather than credit spreads, the impact is largely mitigated by the schemes' asset-liability matching strategies.

The cost of the benefits payable by the schemes will also depend upon the life expectancy of the members. The mortality assumptions used by the Group are based on standard industry tables for both current mortality rates and the rate of future mortality improvement, adjusted in line with the actual experience of the Group's schemes. Assuming that there is no change in other assumptions or in the value of the schemes' assets, the effect on the net accounting surplus at 31 December 2021 of an increase of one year in the average life of scheme members would be a reduction of £1,934 million (2020: £2,146 million). The Group has in place a longevity swap, as described in note 27, to partially mitigate mortality risk.

Lloyds Bank plc

Notes to the accounts

Note 3: Critical accounting judgements and key sources of estimation uncertainty (continued)

The majority of the Group's plans provide benefits linked to inflation both in deferment and in payment and the Group sets its inflation assumption with reference to an implied inflation curve. Assuming that there is no change in other assumptions or in the value of the schemes' assets, the effect on the net accounting surplus at 31 December 2021 of an increase of 10 basis points in the expected rate of inflation would be a decrease of £481 million (2020: £531 million). This impact would be offset by gains recognised on the pension schemes' holding of index linked gilts and inflation linked swaps.

Further sensitivities and the balance sheet impact of changes in the principal actuarial assumptions are provided in part (v) of note 27.

Uncertain tax positions

Key judgement: Interpreting tax rules on the Group's open tax matters

The Lloyds Banking Group has an open matter in relation to a claim for group relief of losses incurred in its former Irish banking subsidiary, which ceased trading on 31 December 2010. In 2013, HMRC informed the Lloyds Banking Group that its interpretation of the UK rules means that the group relief is not available. In 2020, HMRC concluded their enquiry into the matter and issued a closure notice. The Lloyds Banking Group's interpretation of the UK rules has not changed and hence it has appealed to the First Tier Tax Tribunal, with a hearing expected in 2022. If the final determination of the matter by the judicial process is that HMRC's position is correct, management estimate that this would result in an increase in current tax liabilities of approximately £730 million (including interest) and a reduction in deferred tax assets of approximately £330 million. The Lloyds Banking Group, having taken appropriate advice, does not consider that this is a case where additional tax will ultimately fall due.

The Group makes other estimates in relation to tax which do not require significant judgements, see further discussion in note 28.

Regulatory and legal provisions

Key judgements: Determining the scope of reviews required by regulators
The impact of legal decisions that may be relevant to claims received
Determining whether a reliable estimate is available for obligations arising from past events

Key estimates: The number of future complaints
The proportion of complaints that will be upheld
The average cost of redress

At 31 December 2021, the Group carried provisions of £1,054 million (2020: £520 million) and the Bank £146 million (2020: £140 million) against the cost of making redress payments to customers and the related administration costs in connection with historical regulatory breaches.

Determining the amount of the provisions, which represent management's best estimate of the cost of settling these issues, requires the exercise of significant judgement and estimation. It will often be necessary to form a view on matters which are inherently uncertain, such as the scope of reviews required by regulators, and to estimate the number of future complaints, the extent to which they will be upheld, the average cost of redress and the impact of decisions reached by legal and other review processes that may be relevant to claims received. Consequently the continued appropriateness of the underlying assumptions is reviewed on a regular basis against actual experience and other relevant evidence and adjustments made to the provisions where appropriate.

Management has applied significant judgement in determining the provision required for HBOS Reading; further details are provided in note 29.

Fair value of financial instruments

Key estimate: Interest rate spreads, earnings multiples and interest rate volatility

At 31 December 2021, the carrying value of the Group's financial instrument assets held at fair value was £35,095 million (2020: £37,275 million), and its financial instrument liabilities held at fair value was £11,180 million (2020: £15,059 million). The carrying value of the Bank's financial instrument assets held at fair value was £36,956 million (2020: £38,966 million) and financial instrument liabilities held at fair value was £15,923 million (2020: £18,979 million).

The Group's valuation control framework and a description of level 1, 2 and 3 financial assets and liabilities is set out in note 41(2). The valuation techniques for level 3 financial instruments involve management judgement and estimates, the extent of which depends on the complexity of the instrument and the availability of market observable information. In addition, in line with market practice, the Group applies credit, debit and funding valuation adjustments in determining the fair value of its uncollateralised derivative positions. A description of these adjustments is set out in note 41.

Capitalised software enhancements

Key judgement: Assessing future trading conditions that could affect the Group's business operations

Key estimate: Estimated useful life of internally generated capitalised software

At 31 December 2021, the carrying value of the Group's capitalised software enhancements was £3,383 million (2020: £3,281 million).

In determining the estimated useful life of capitalised software enhancements, management consider the product's lifecycle and the Group's technology strategy; assets are reviewed annually to assess whether there is any indication of impairment and to confirm that the remaining estimated useful life is still appropriate. For the year ended 31 December 2021, the amortisation charge was £884 million, including a software write-off as the Group invests in new technology and systems infrastructure, and at 31 December 2021, the weighted-average remaining estimated useful life of the Group's capitalised software enhancements was 4.7 years (2020: 4.9 years). If the Group reduced by one year the estimated useful life of those assets with a remaining estimated useful life of more than two years at 31 December 2021, the 2022 amortisation charge would be approximately £200 million higher.

Lloyds Bank plc
Notes to the accounts

Note 4: Segmental analysis

The Group provides a wide range of banking and financial services in the UK and in certain locations overseas. The Group Executive Committee (GEC) of the Lloyds Banking Group has been determined to be the chief operating decision-maker, as defined by IFRS 8 *Operating Segments*, for the Group. The Group's operating segments reflect its organisational and management structures. The GEC reviews the Group's internal reporting based around these segments in order to assess performance and allocate resources. They consider interest income and expense on a net basis and consequently the total interest income and expense for all reportable segments is presented net. The segments are differentiated by the type of products provided and by whether the customers are individuals or corporate entities.

The Group's activities are organised into two financial reporting segments: Retail and Commercial Banking.

Retail offers a broad range of financial service products, including current accounts, savings, mortgages, motor finance and unsecured consumer lending to personal and small business customers.

Commercial Banking provides a range of products and services such as lending, transactional banking, working capital management, risk management and debt capital markets services to SMEs, corporates and financial institutions.

Other comprises income and expenditure not attributed to the Group's financial reporting segments. These amounts include the costs of certain central and head office functions.

Inter-segment services are generally recharged at cost, although some attract a margin. Inter-segment lending and deposits are generally entered into at market rates, except that non-interest bearing balances are priced at a rate that reflects the external yield that could be earned on such funds.

For the majority of those derivative contracts entered into by business units for risk management purposes, the business unit recognises the net interest income or expense on an accrual accounting basis and transfers the remainder of the movement in the fair value of the derivative to the central function where the resulting accounting volatility is managed where possible through the establishment of hedge accounting relationships. Any change in fair value of the hedged instrument attributable to the hedged risk is also recorded within the central function. This allocation of the fair value of the derivative and change in fair value of the hedged instrument attributable to the hedged risk avoids accounting asymmetry in segmental results and leads to accounting volatility, which is managed centrally and reported within Other.

Financial assets at fair value through other comprehensive income	1.69	1.12	1.64	442	302	430
Total interest income¹	2.24	2.42	2.90	12,920	13,866	16,098
Interest expense:						
Deposits from banks	1.34	1.19	1.39	(66)	(82)	(87)
Customer deposits	0.12	0.40	0.65	(386)	(1,270)	(2,054)
Repurchase agreements	0.10	0.36	1.08	(22)	(117)	(301)
Debt securities in issue ²	1.37	1.13	0.71	(746)	(761)	(476)
Lease liabilities	2.01	2.36	2.41	(30)	(39)	(39)
Subordinated liabilities	7.01	7.19	9.89	(634)	(827)	(921)
Total interest expense³	0.45	0.71	0.91	(1,884)	(3,096)	(3,878)
Net interest income				11,036	10,770	12,220

1 Includes £10 million (2020: £10 million; 2019: £26 million) of interest income on liabilities with negative interest rates and £38 million (2020: £42 million; 2019: £39 million) in respect of interest income on finance leases.

2 The impact of the Group's hedging arrangements is included on this line; excluding this impact the weighted average effective interest rate in respect of debt securities in issue would be 2.30 per cent (2020: 2.42 per cent; 2019: 2.25 per cent).

3 Includes £2 million (2020: £23 million; 2019: £119 million) of interest expense on assets with negative interest rates.

Included within interest income is £173 million (2020: £170 million; 2019: £196 million) in respect of credit-impaired financial assets. Net interest income also includes a credit of £584 million (2020: credit of £727 million; 2019: credit of £580 million) transferred from the cash flow hedging reserve (see note 33).

Note 6: Net fee and commission income

	2021 £m	2020 £m	2019 £m
Fee and commission income:			
Current accounts	634	610	656
Credit and debit card fees	878	748	961
Commercial banking fees	284	169	166
Private banking and asset management	—	1	38
Factoring	76	76	103
Other fees and commissions	323	320	439
Total fee and commission income	2,195	1,924	2,363
Fee and commission expense	(942)	(909)	(1,027)
Net fee and commission income	1,253	1,015	1,336

Fees and commissions which are an integral part of the effective interest rate form part of net interest income shown in note 5. Fees and commissions relating to instruments that are held at fair value through profit or loss are included within net trading income shown in note 7.

At 31 December 2021, the Group held on its balance sheet £76 million (31 December 2020: £76 million) in respect of services provided to customers and £70 million (31 December 2020: £83 million) in respect of amounts received from customers for services to be provided after the balance sheet date. Current unsatisfied performance obligations amount to £143 million (31 December 2020: £172 million); the Group expects to receive substantially all of this revenue by 2024.

Lloyds Bank plc
Notes to the accounts

Note 6: Net fee and commission income (continued)

Income recognised during the year included £13 million (2020: £18 million) in respect of amounts included in the contract liability balance at the start of the year and £nil (2020: £nil) in respect of amounts from performance obligations satisfied in previous years.

The most significant performance obligations undertaken by the Group are in respect of current accounts, the provision of other banking services for commercial customers and credit and debit card services.

In respect of current accounts, the Group receives fees for the provision of bank account and transaction services such as ATM services, fund transfers, overdraft facilities and other value-added offerings.

For commercial customers, alongside its provision of current accounts, the Group provides other corporate banking services including factoring and commitments to provide loan financing. Loan commitment fees are included in fees and commissions where the loan is not expected to be drawn down by the customer.

The Group receives interchange and merchant fees, together with fees for overseas use and cash advances, for provision of card services to cardholders and merchants.

Note 7: Net trading income

	2021	2020	2019
	£m	£m	£m

Total operating expenses	10,206	9,196	11,772

¹ Net of profits on disposal of operating lease assets of £249 million (2020: £127 million; 2019: £41 million).

² Comprising depreciation in respect of premises £121 million (2020: £124 million; 2019: £121 million), equipment £777 million (2020: £676 million; 2019: £710 million), operating lease assets £709 million (2020: £1,002 million; 2019: £1,006 million) and right-of-use assets £216 million (2020: £215 million; 2019: £203 million).

The average number of persons on a headcount basis employed by the Group during the year was as follows:

	2021	2020	2019
UK	63,649	67,115	69,321
Overseas	512	515	762
Total	64,161	67,630	70,083

Lloyds Bank plc
Notes to the accounts

Note 10: Auditors' remuneration

Fees payable to the Bank's auditors¹ are as follows:

	2021	2020	2019
	£m	£m	£m
Fees payable for the:			
– audit of the Bank's current year Annual report	4.7	4.5	4.2
– audits of the Bank's subsidiaries	9.5	8.9	8.6
– total audit fees in respect of the statutory audit of Group entities ²	14.2	13.4	12.8
– services normally provided in connection with statutory and regulatory filings or engagements	0.7	1.6	1.3
Total audit fees³	14.9	15.0	14.1
Other audit-related fees³	0.4	0.3	0.2
All other fees³	0.5	0.9	0.3
Total non-audit services⁴	0.9	1.2	0.5
Total fees payable to the Bank's auditors by the Group	15.8	16.2	14.6

¹ Deloitte LLP became the Group's statutory auditor in 2021. PricewaterhouseCoopers LLP was the statutory auditor during 2020.

² As defined by the Financial Reporting Council (FRC).

³ As defined by the Securities and Exchange Commission (SEC).

⁴ As defined by the SEC. Total non-audit services as defined by the FRC include all fees other than audit fees in respect of the statutory audit of Group entities. These fees totalled £1.6 million in 2021 (2020: £2.8 million; 2019: £1.8 million).

The following types of services are included in the categories listed above:

Audit fees: This category includes fees in respect of the audit of the Group's annual financial statements and other services in connection with regulatory filings. Other services supplied pursuant to legislation relate primarily to costs incurred in connection with client asset assurance and with the Sarbanes-Oxley Act requirements associated with the audit of the financial statements of Lloyds Banking Group filed on Form 20-F.

Other audit-related fees: This category includes fees in respect of services for assurance and related services that are reasonably related to the performance of the audit or review of the financial statements, for example acting as reporting accountants in respect of debt prospectuses required by the Listing Rules.

All other fees: This category includes other assurance services not related to the performance of the audit or review of the financial statements, for example the review of controls operated by the Group on behalf of a third party. The auditors are not engaged to provide tax services.

It is the Group's policy to use the auditors only on assignments in cases where their knowledge of the Group means that it is neither efficient nor cost effective to employ another firm of accountants.

Lloyds Banking Group has procedures that are designed to ensure auditor independence for Lloyds Banking Group plc and all of its subsidiaries, including prohibiting certain non-audit services. All audit and non-audit assignments must be pre-approved by the Lloyds Banking Group Audit Committee (the Audit Committee) on an individual engagement basis; for certain types of non-audit engagements where the fee is 'de minimis' the Audit Committee has pre-approved all assignments subject to confirmation by management. On a quarterly basis, the Audit Committee receives and reviews a report detailing all pre-approved services and amounts paid to the auditors for such pre-approved services.

During the year the auditors¹ also earned fees payable by entities outside the consolidated Lloyds Bank Group in respect of the following:

	2021	2020	2019
	£m	£m	£m
Audits of Group pension schemes	0.3	0.1	0.1
Reviews of the financial position of corporate and other borrowers	—	1.3	—

¹ Deloitte LLP became the Group's statutory auditor in 2021. PricewaterhouseCoopers LLP was the statutory auditor during 2020.

Due from fellow Lloyds Banking Group undertakings	(1)	—	41	—	40
Financial assets at amortised cost	140	10	1,423	(193)	1,380
Impairment charge (credit) on drawn balances	140	10	1,423	(193)	1,380
Loan commitments and financial guarantees	(29)	13	(1)	—	(17)
Financial assets at fair value through other comprehensive income	(1)	—	—	—	(1)
Total impairment charge (credit)	110	23	1,422	(193)	1,362

The impairment charge includes a release of £77 million (2020: charge of £41 million; 2019: charge of £134 million) in respect of residual value impairment and voluntary terminations within the Group's UK motor finance business.

The Group's impairment charge comprises the following items:

Impact of transfers between stages

The net impact on the impairment charge of transfers between stages.

Other changes in credit quality

Changes in loss allowance as a result of movements in risk parameters that reflect changes in customer quality, but which have not resulted in a transfer to a different stage. This also contains the impact on the impairment charge as a result of write-offs and recoveries, where the related loss allowances are reassessed to reflect ultimate realisable or recoverable value.

Additions and repayments

Expected loss allowances are recognised on origination of new loans or further drawdowns of existing facilities. Repayments relate to the reduction of loss allowances resulting from the repayments of outstanding balances that have been provided against.

Methodology and model changes

Increase or decrease in impairment charge as a result of adjustments to the models used for expected credit loss calculations; either as changes to the model inputs or to the underlying assumptions, as well as the impact of changing the models used.

Movements in the Group's impairment allowances are shown in note 15.

Notes to the accounts

Note 12: Tax expense

(A) Analysis of tax (expense) credit for the year

	2021	2020	2019
	£m	£m	£m
UK corporation tax:			
Current tax on profit for the year	(1,349)	(423)	(1,239)
Adjustments in respect of prior years	83	336	98
	(1,266)	(87)	(1,141)
Foreign tax:			
Current tax on profit for the year	(21)	(18)	(58)
Adjustments in respect of prior years	22	24	4
	1	6	(54)
Current tax expense	(1,265)	(81)	(1,195)
Deferred tax:			
Current year	851	508	(104)
Adjustments in respect of prior years	(169)	(290)	58
Deferred tax (expense) credit	682	218	(46)
Tax (expense) credit	(583)	137	(1,241)

(B) Factors affecting the tax (expense) credit for the year

The UK corporation tax rate for the year was 19.0 per cent (2020: 19.0 per cent; 2019: 19.0 per cent). An explanation of the relationship between tax (expense) credit and accounting profit is set out below:

	2021	2020	2019
	£m	£m	£m
Profit before tax	5,785	1,329	3,474
UK corporation tax thereon	(1,099)	(253)	(660)
Impact of surcharge on banking profits	(415)	(122)	(367)
Non-deductible costs: conduct charges	(167)	(24)	(370)
Non-deductible costs: bank levy	(19)	(30)	—
Other non-deductible costs	(59)	(62)	(77)
Non-taxable income	22	37	36
Tax relief on coupons on other equity instruments	65	79	53
Tax-exempt gains on disposals	2	—	25
Tax losses where no deferred tax recognised	—	(3)	(7)
Remeasurement of deferred tax due to rate changes	1,168	435	(25)
Differences in overseas tax rates	(17)	10	(9)
Adjustments in respect of prior years	(64)	70	160
Tax (expense) credit	(583)	137	(1,241)

The tax expense in 2021 included the impact of non-deductible conduct charges which were significantly greater than in 2020, reflecting the Group's best estimate of tax-deductibility of provisions made in the year.

Note 13: Financial assets at fair value through profit or loss

These comprise financial assets mandatorily at fair value through profit or loss as follows:

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Loans and advances to customers	1,559	1,511	1,121	517
Corporate and other debt securities	—	—	3,404	1,203
Equity shares	239	163	4	4
Total	1,798	1,674	4,529	1,724

At 31 December 2021 £1,500 million (2020: £1,099 million) of financial assets at fair value through profit or loss of the Group and £3,116 million (2020: £1,600 million) of the Bank had a contractual residual maturity of greater than one year.

For amounts included above which are subject to repurchase and reverse repurchase agreements see note 44.

Total recognised derivative assets/liabilities	1,353,360	5,511	4,643	2,075,682	8,341	8,228

The notional amount of the contract does not represent the Group's exposure to credit risk, which is limited to the current cost of replacing contracts with a positive value to the Group should the counterparty default. To reduce credit risk the Group uses a variety of credit enhancement techniques such as netting and collateralisation, where security is provided against the exposure; a large proportion of the Group's derivatives are held through exchanges such as London Clearing House and are collateralised through those exchanges. Further details are provided in note 44 Credit risk.

The Group holds derivatives as part of the following strategies:

- Customer driven, where derivatives are held as part of the provision of risk management products to Group customers
- To manage and hedge the Group's interest rate and foreign exchange risk arising from normal banking business. The hedge accounting strategy adopted by the Group is to utilise a combination of fair value and cash flow hedge approaches as described in note 44

The principal derivatives used by the Group are as follows:

- Interest rate related contracts include interest rate swaps, forward rate agreements and options. An interest rate swap is an agreement between two parties to exchange fixed and floating interest payments, based upon interest rates defined in the contract, without the exchange of the underlying principal amounts. Forward rate agreements are contracts for the payment of the difference between a specified rate of interest and a reference rate, applied to a notional principal amount at a specific date in the future. An interest rate option gives the buyer, on payment of a premium, the right, but not the obligation, to fix the rate of interest on a future loan or deposit, for a specified period and commencing on a specified future date
- Exchange rate related contracts include forward foreign exchange contracts, currency swaps and options. A forward foreign exchange contract is an agreement to buy or sell a specified amount of foreign currency on a specified future date at an agreed rate. Currency swaps generally involve the exchange of interest payment obligations denominated in different currencies; the exchange of principal can be notional or actual. A currency option gives the buyer, on payment of a premium, the right, but not the obligation, to sell specified amounts of currency at agreed rates of exchange on or before a specified future date
- Credit derivatives, principally credit default swaps, are used by the Group as part of its trading activity and to manage its own exposure to credit risk. A credit default swap is a swap in which one counterparty receives a premium at pre-set intervals in consideration for guaranteeing to make a specific payment should a negative credit event take place
- Equity derivatives are also used by the Group as part of its equity-based retail product activity to eliminate the Group's exposure to fluctuations in various international stock exchange indices. Index-linked equity options are purchased which give the Group the right, but not the obligation, to buy or sell a specified amount of equities, or basket of equities, in the form of published indices on or before a specified future date

Customer loans	23	262	—	(633)	Interest income
Central bank balances	28	(3)	—	(95)	Interest income
Customer deposits	(27)	—	—	45	Interest expense

1 Comprising the change in fair value of the hedging derivatives (a loss of £2,138 million; 2020: gain of £709 million) and the amounts reclassified from reserves to the income statement (negative £584 million; 2020: negative £727 million).

2 Hedge ineffectiveness is included in the income statement within net trading income.

There was a gain of £3 million (2020: gain of £6 million) reclassified from the cash flow hedging reserve for which hedge accounting had previously been used but for which the hedged future cash flows are no longer expected to occur.

At 31 December 2021 £4,861 million of total recognised derivative assets of the Group and £4,031 million of total recognised derivative liabilities of the Group (2020: £7,393 million of assets and £7,064 million of liabilities) had a contractual residual maturity of greater than one year.

1 Included within debt securities in issue.

2 Included within amounts due to fellow Lloyds Banking Group undertakings.

3 Included within financial assets at fair value through other comprehensive income.

4 Included within loans and advances to customers.

5 Included within cash and balances at central banks.

6 Included within customer deposits.

The accumulated amount of fair value hedge adjustments remaining in the balance sheet for hedged items that have ceased to be adjusted for hedging gains and losses is an asset of £71 million (2020: asset of £9 million) relating to fixed rate issuances.

Lloyds Bank plc
Notes to the accounts

Note 14: Derivative financial instruments (continued)

Gains and losses arising from hedge accounting are summarised as follows:

The Bank At 31 December 2021	Gain (loss) recognised in other comprehensive income ¹ £m	Hedge ineffectiveness recognised in the income statement ² £m	Amounts reclassified from reserves to income statement as:		
			Hedged cash flows will no longer occur £m	Hedged item affected income statement £m	Income statement line item that includes reclassified amount
Fair value hedges					
<i>Interest rate</i>					
Fixed rate mortgages		—			
Fixed rate issuance		(7)			
Fixed rate bonds		(7)			
Fixed rate borrowings

Customer loans	(871)	(26)	—	(325)	Interest income
Central bank balances	(113)	—	—	(113)	Interest income
Customer deposits	129	2	—	18	Interest expense

The Bank At 31 December 2020	Gain (loss) recognised in other comprehensive income ¹ £m	Hedge ineffectiveness recognised in the income statement ² £m	Amounts reclassified from reserves to income statement as:		
			Hedged cash flows will no longer occur £m	Hedged item affected income statement £m	Income statement line item that includes reclassified amount
Fair value hedges					
<i>Interest rate</i>					
Fixed rate mortgages		—			
Fixed rate issuance		(35)			
Fixed rate bonds		8			
Fixed rate borrowings		—			
Cash flow hedges					
<i>Foreign exchange</i>					
Foreign currency issuance	(1)	—	(1)	(4)	Interest expense
<i>Interest rate</i>					
Customer loans	(166)	(31)	—	(324)	Interest income
Central bank balances	(111)	—	—	(60)	Interest income
Customer deposits	8	4	—	34	Interest expense

¹ Comprising the change in fair value of the hedging derivatives (a loss of £438 million; 2020: gain of £85 million) and the amounts reclassified from reserves to the income statement (negative £399 million; 2020: negative £355 million).

² Hedge ineffectiveness is included in the income statement within net trading income.

During 2021 there was no gain or loss (2020: gain of £1 million) reclassified from the cash flow hedging reserve for which hedge accounting had previously been used but for which the hedged future cash flows are no longer expected to occur.

At 31 December 2021 £6,277 million of total recognised derivative assets of the Bank and £5,492 million of total recognised derivative liabilities of the Bank (2020: £11,755 million of assets and £10,009 million of liabilities) had a contractual residual maturity of greater than one year.

¹ Exchange and other adjustments includes the impact of movements in exchange rates, discount unwind, derecognising assets as a result of modifications and adjustments in respect of purchased or originated credit-impaired financial assets (POCI). Where a POCI asset's expected credit loss is less than its expected credit loss on purchase or origination, the increase in its carrying value is recognised within gross loans, rather than as a negative impairment allowance.

The total allowance for impairment losses includes £95 million (2020: £192 million) in respect of residual value impairment and voluntary terminations within the Group's UK motor finance business.

Expected credit loss in respect of financial assets at fair value through other comprehensive income (memorandum item)	—	—	—	—

The movement tables are compiled by comparing the position at 31 December to that at the beginning of the year. Transfers between stages are deemed to have taken place at the start of the reporting period, with all other movements shown in the stage in which the asset is held at 31 December, with the exception of those held within purchased or originated credit-impaired, which are not transferable.

Additions and repayments comprise new loans originated and repayments of outstanding balances throughout the reporting period. Loans which are written off in the period are first transferred to Stage 3 before acquiring a full allowance and subsequent write-off.

At 31 December 2021 £2,186 million (2020: £1,082 million) of loans and advances to banks and reverse repurchase agreements of the Group and £2,142 million (2020: £1,024 million) of the Bank had a contractual residual maturity of greater than one year.

At 31 December 2021 £384,766 million (2020: £385,517 million) of loans and advances to customers and reverse repurchase agreements of the Group and £92,907 million (2020: £105,738 million) of the Bank had a contractual residual maturity of greater than one year.

At 31 December 2021 £3,042 million (2020: £5,110 million) of debt securities of the Group and £2,541 million (2020: £4,300 million) of the Bank had a contractual residual maturity of greater than one year.

For amounts included above which are subject to reverse repurchase agreements see note 44.

Lloyds Bank plc
Notes to the accounts

Note 16: Finance lease receivables

Finance lease receivables are classified as loans and advances to customers and accounted for at amortised cost. The balance is analysed as follows:

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Not later than 1 year	339	308	3	18
Later than 1 year and not later than 2 years	135	180	2	2
Later than 2 years and not later than 3 years	222	143	15	2
Later than 3 years and not later than 4 years	110	191	—	7
Later than 4 years and not later than 5 years	46	110	—	2
Later than 5 years	150	571	—	—
Gross investment in finance leases	1,002	1,503	20	31
Unearned future finance income on finance leases	(147)	(440)	—	—
Rentals received in advance	(12)	(16)	—	(1)
Net investment in finance leases	843	1,047	20	30

The net investment in finance leases represents amounts recoverable as follows:

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Not later than 1 year	280	237	3	17
Later than 1 year and not later than 2 years	108	135	2	2
Later than 2 years and not later than 3 years	198	104	15	2
Later than 3 years and not later than 4 years	94	159	—	7
Later than 4 years and not later than 5 years	35	86	—	2
Later than 5 years	128	326	—	—
Net investment in finance leases	843	1,047	20	30

Equipment leased to customers under finance leases primarily relates to structured financing transactions to fund the purchase of aircraft, ships and other large individual value items. There was an allowance for uncollectable finance lease receivables included in the allowance for impairment losses for the Group of £18 million (2020: £22 million).

Note 17: Financial assets at fair value through other comprehensive income

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Debt securities:				
Government securities	14,599	14,267	14,445	14,114
Asset-backed securities	55	65	—	—
Corporate and other debt securities	13,131	12,928	11,084	10,533

Equity shares	1	—	—	—
Total financial assets at fair value through other comprehensive income	27,786	27,260	25,529	24,647

At 31 December 2021 £24,947 million (2020: £25,826 million) of financial assets at fair value through other comprehensive income of the Group and £23,081 million (2020: £23,494 million) of the Bank had a contractual residual maturity of greater than one year.

All assets were assessed at Stage 1 at 31 December 2020 and 2021.

Lloyds Bank plc
Notes to the accounts

Note 18: Goodwill of the Group

	2021	2020
	£m	£m
At 1 January	470	474
Impairment charged to the income statement	—	(4)
At 31 December	470	470
Cost ¹	814	814
Accumulated impairment losses	(344)	(344)
At 31 December	470	470

¹ For acquisitions made prior to 1 January 2004, the date of transition to IFRS, cost is included net of amounts amortised up to 31 December 2003.

The goodwill held in the Group's balance sheet is tested at least annually for impairment. For the purposes of impairment testing the goodwill is allocated to the appropriate cash generating unit; of the total balance of £470 million (2020: £470 million), £302 million, 64 per cent (2020: £302 million, 64 per cent) has been allocated to Cards and £166 million, or 35 per cent (2020: £166 million, 35 per cent) has been allocated to Motor Finance, both in the Group's Retail division.

The recoverable amount of the goodwill relating to the Cards business has been based on a value-in-use calculation using post-tax cash flow projections based on financial budgets and plans approved by management covering a four-year period and a discount rate (post-tax) of 10.25 per cent. The cash flows beyond the four-year period assume 3.5 per cent growth. Management believes that any reasonably possible change in the key assumptions above would not cause the recoverable amount of the goodwill relating to the Cards business to fall below the balance sheet carrying value.

The recoverable amount of the goodwill relating to Motor Finance has also been based on a value-in-use calculation using post-tax cash flow projections based on financial budgets and plans approved by management covering a four-year period and a discount rate (post-tax) of 10.25 per cent. The cash flows beyond the four-year period are extrapolated using a growth rate of 3.5 per cent which does not exceed the long-term average growth rates for the markets in which Motor Finance participates. Management believes that any reasonably possible change in the key assumptions, including from the impacts of climate change or climate-related legislation, would not cause the recoverable amount of the goodwill relating to Motor Finance to fall below the balance sheet carrying value. The impairment charge of £4 million in 2020 related to the goodwill arising on a small, separable acquisition a number of years ago.

Balance sheet amount at 31 December 2020	380	—	451	—	3,281	4,112	2,960	

Brands arising from the acquisition of Bank of Scotland in 2009 are recognised on the Group's balance sheet and have been determined to have an indefinite useful life. The carrying value at 31 December 2021 was £380 million (2020: £380 million). The Bank of Scotland name has been in existence for over 300 years and there are no indications that the brand should not have an indefinite useful life. The recoverable amount has been based on a value-in-use calculation. The calculation uses post-tax projections for a six-year period of the income generated by the Bank of Scotland cost generating unit, a discount rate of 10.25 per cent and a future growth rate of 3.5 per cent. Management believes that any reasonably possible change in the key assumptions would not cause the recoverable amount of the Bank of Scotland brand to fall below its balance sheet carrying value.

Lloyds Bank plc
Notes to the accounts

Note 20: Investment in subsidiary undertakings of the Bank

	2021	2020
	£m	£m
At 1 January	33,353	34,084
Additions and capital injections	11	1,055
Capital contributions	36	33
Capital repayments	(2,576)	(1,801)
Disposals	(236)	(18)
At 31 December	30,588	33,353

Details of the subsidiaries and related undertakings are given on pages 209 to 212 and are incorporated by reference.

Certain subsidiary companies currently have insufficient distributable reserves to make dividend payments, however, there were no further significant restrictions on any of the Bank's subsidiaries in paying dividends or repaying loans and advances. All regulated banking subsidiaries are required to maintain capital at levels agreed with the regulators; this may impact those subsidiaries' ability to make distributions.

At 31 December	1,268	1,434	690	778

Lease liabilities are recognised within other liabilities (note 26). The maturity analysis of lease liabilities on an undiscounted basis is set out in the liquidity risk section of note 44.

The total cash outflow for leases in the year ended 31 December 2021 was £243 million. The amount recognised within interest expense in respect of lease liabilities is disclosed in note 5.

Note 23: Financial liabilities at fair value through profit or loss

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Liabilities designated at fair value through profit or loss: debt securities in issue	6,537	6,828	9,821	7,905
Trading liabilities:				
Other deposits	—	2	—	2
Short positions in securities	—	1	—	—
	—	3	—	2
Total financial liabilities at fair value through profit or loss	6,537	6,831	9,821	7,907

At 31 December 2021, the Group had £6,258 million (2020: £6,682 million) and the Bank had £9,543 million (2020: £7,758 million) of trading and other liabilities at fair value through profit or loss with a contractual residual maturity of greater than one year.

Liabilities designated at fair value through profit or loss primarily represent debt securities in issue which either contain substantive embedded derivatives which would otherwise need to be recognised and measured at fair value separately from the related debt securities, or which are accounted for at fair value to significantly reduce an accounting mismatch.

For the Group, the amount contractually payable on maturity of the debt securities held at fair value through profit or loss at 31 December 2021 was £10,558 million, which was £4,021 million higher than the balance sheet carrying value (2020: £11,503 million, which was £4,675 million higher than the balance sheet carrying value). At 31 December 2021 there was a cumulative £195 million increase in the fair value of these liabilities attributable to changes in credit spread risk; this is determined by reference to the quoted credit spreads of the Bank. Of the cumulative amount, an increase of £86 million arose in 2021 and an increase of £75 million arose in 2020.

In addition, the Bank has £3,317 million (2020: £1,122 million) of debt securities in issue which are accounted for at fair value to significantly reduce an accounting mismatch. The changes in the credit risk of these liabilities are linked to the changes in credit risk on corresponding assets that the Bank holds at fair value through profit or loss, representing debt securities issued by subsidiaries. Given the economic relationship between these assets and liabilities, the Bank presents changes in the credit risk of these liabilities in profit or loss in order to avoid creating or enlarging an accounting mismatch.

For the fair value of collateral pledged in respect of repurchase agreements see note 44.

Note 24: Debt securities in issue

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Medium-term notes issued	23,820	21,501	19,916	19,546

Total debt securities in issue	48,724	59,293	38,439	48,109

At 31 December 2021 £33,369 million (2020: £40,765 million) of debt securities in issue of the Group and £26,967 million (2020: £33,582 million) of the Bank had a contractual residual maturity of greater than one year.

Lloyds Bank plc
Notes to the accounts

Note 25: Securitisations and covered bonds

Securitisation programmes

The Group's balance sheet includes loans securitised under the Group's securitisation programmes, the majority of which have been sold by Group companies to bankruptcy remote structured entities. As the structured entities are funded by the issue of debt on terms whereby the majority of the risks and rewards of the portfolio are retained by the Group company, the structured entities are consolidated fully and all of these loans are retained on the Group's balance sheet, with the related notes in issue included within debt securities in issue.

Covered bond programmes

Certain loans and advances to customers have been assigned to bankruptcy remote limited liability partnerships to provide security for issues of covered bonds by the Group. The Group retains all of the risks and rewards associated with these loans and the partnerships are consolidated fully with the loans retained on the Group's balance sheet, and the related covered bonds in issue included within debt securities in issue.

The Group's principal securitisation and covered bond programmes, together with the balances of the advances subject to these arrangements and the carrying value of the notes in issue at 31 December, are listed below. The notes in issue are reported in note 24.

	2021		2020	
	Loans and advances securitised £m	Notes in issue £m	Loans and advances securitised £m	Notes in issue £m
Securitisation programmes				
UK residential mortgages	18,300	16,214	23,984	21,640
Commercial loans	388	1,839	2,884	4,004
Credit card receivables	11,615	8,474	5,890	4,340
Motor vehicle finance	235	251	1,826	1,915
Dutch residential mortgages	427	448	—	—
	30,965	27,226	34,584	31,899
Less held by the Group		(23,521)		(27,418)
Total securitisation programmes (notes 23 and 24)¹		3,705		4,481
Covered bond programmes				
Residential mortgage-backed	35,896	16,907	33,980	23,477
Social housing loan-backed	833	500	980	600
	36,729	17,407	34,960	24,077
Less held by the Group		—		(100)
Total covered bond programmes (note 24)		17,407		23,977
Total securitisation and covered bond programmes		21,112		28,458

¹ Includes £33 million (2020: £45 million) of securitisation notes held at fair value through profit or loss.

Cash deposits of £3,455 million (2020: £3,930 million) which support the debt securities issued by the structured entities, the term advances related to covered bonds and other legal obligations, are held by the Group. Additionally, the Group has certain contractual arrangements to provide liquidity facilities to some of these structured entities. At 31 December 2021 these obligations had not been triggered; the maximum exposure under these facilities was £52 million (2020: £52 million).

The Group has a number of covered bond programmes, for which limited liability partnerships have been established to ring-fence asset pools and guarantee the covered bonds issued by the Group. At the reporting date the Group had over-collateralised these programmes as set out in the table above to meet the terms of the programmes, to secure the rating of the covered bonds and to provide operational flexibility. From time to time, the obligations of the Group to provide collateral may increase due to the formal requirements of the programmes. The Group may also voluntarily contribute collateral to support the ratings of the covered bonds.

The Group recognises the full liabilities associated with its securitisation and covered bond programmes within debt securities in issue, although the obligations of the Group in respect of its securitisation issuances are limited to the cash flows generated from the underlying assets. The Group could be required to provide additional support to a number of the securitisation programmes to support the credit ratings of the debt securities issued, in the form of increased cash reserves and the holding of subordinated notes. Further, certain programmes contain contractual obligations that require the Group to repurchase assets should they become credit-impaired or as otherwise required by the transaction documents.

The Group has not provided financial or other support by voluntarily offering to repurchase assets from any of its public securitisation programmes during 2021 (2020: none).

Pension schemes

Defined benefit schemes

(i) **Characteristics of and risks associated with the Group's schemes**

The Group has established a number of defined benefit pension schemes in the UK and overseas. All significant schemes are based in the UK, with the three most significant being the main sections of the Lloyds Bank Pension Scheme No. 1, the Lloyds Bank Pension Scheme No. 2 and the HBOS Final Salary Pension Scheme. At 31 December 2021, these schemes represented 94 per cent of the Group's total gross defined benefit pension assets (2020: 94 per cent). These schemes provide retirement benefits calculated as a proportion of final pensionable salary depending upon the length of pensionable service; the minimum retirement age under the rules of the schemes at 31 December 2021 is generally 55, although certain categories of member are deemed to have a protected right to retire at 50.

The Group operates both funded and unfunded pension arrangements; the majority, including the three most significant schemes, are funded schemes in the UK. All of these UK funded schemes are operated as separate legal entities under trust law, are in compliance with the Pensions Act 2004 and are managed by a Trustee Board (the Trustee) whose role is to ensure that their scheme is administered in accordance with the scheme rules and relevant legislation, and to safeguard the assets in the best interests of all members and beneficiaries. The Trustee is solely responsible for setting investment policy and for agreeing funding requirements with the employer through the funding valuation process. The Board of Trustees must be composed of representatives of the scheme membership along with a combination of independent and employer appointed trustees to comply with legislation and scheme rules.

A valuation to determine the funding status of each scheme is carried out at least every three years, whereby scheme assets are measured at market value and liabilities (technical provisions) are measured using prudent assumptions. If a deficit is identified a recovery plan is agreed between the employer and the scheme Trustee and sent to the Pensions Regulator for review. The Group has not provided for these deficit contributions as the future economic benefits arising from these contributions are expected to be available to the Group. The Group's overseas defined benefit pension schemes are subject to local regulatory arrangements.

The most recent triennial funding valuations of the Group's three main defined benefit pension schemes showed an aggregate ongoing funding deficit of £7.3 billion as at 31 December 2019 (a funding level of 85.7 per cent) compared to a £7.3 billion deficit at 31 December 2016 (a funding level of 85.9 per cent). The revised deficit now includes an allowance for the impact of RPI reform announced by the Chancellor of the Exchequer in November 2020, and which is subject to judicial review in 2022. The latest annual update as at 31 December 2020 showed the funding deficit had improved to £6.0 billion. Under the agreed recovery plan, £0.8 billion plus a further 30 per cent of Lloyds Banking Group plc's in-year capital distributions to ordinary shareholders, up to a limit on total deficit contributions of £2.0 billion per annum, is payable from 2021 until the 2019 deficit has been removed. The deficit contributions are in addition to the regular contributions to meet benefits accruing over the year, and to cover the expenses of running the schemes. £1.1 billion of deficit contributions were paid to these schemes in 2021. The Group expects to pay contributions of at least £1.1 billion to its defined benefit schemes in 2022.

During 2009, the Group made one-off contributions to the Lloyds Bank Pension Scheme No. 1 and Lloyds Bank Pension Scheme No. 2 in the form of interests in limited liability partnerships for each of the two schemes which hold assets to provide security for the Group's obligations to the two schemes. At 31 December 2021, the limited liability partnerships held assets of £7.4 billion. The limited liability partnerships are consolidated fully in the Group's balance sheet.

The Group has also established three private limited companies which hold assets to provide security for the Group's obligations to the HBOS Final Salary Pension Scheme, a section of the Lloyds Bank Pension Scheme No. 1 and the Lloyds Bank Offshore Pension Scheme. At 31 December 2021 these held assets of £5.8 billion in aggregate. The private limited companies are consolidated fully in the Group's balance sheet. The terms of these arrangements require the Group to maintain assets in these vehicles to agreed minimum values in order to secure obligations owed to the relevant Group pension schemes. The Group has satisfied this requirement during 2021.

Lloyds Bank plc
Notes to the accounts

Note 27: Retirement benefit obligations (continued)

The last funding valuations of other Group schemes were carried out on a number of different dates. In order to report the position under IAS 19 as at 31 December 2021, the most recent valuation results for all schemes have been updated by qualified independent actuaries. The funding valuations use a more prudent approach to setting the discount rate and more conservative longevity assumptions than the IAS 19 valuations.

In a judgment in 2018, the High Court confirmed the requirement to equalise the Guaranteed Minimum Pension (GMP) benefits of men and women accruing between 1990 and 1997 from contracting out of the State Earnings Related Pension Scheme. The Group recognised a past service cost of £108 million in respect of equalisation in 2018 and, following agreement of the detailed implementation approach with the Trustee, a further £33 million was recognised in 2019. A further hearing was held during 2020 which confirmed the extent of the Trustee's obligation to revisit past transfers out of the schemes. The amount of any additional liability as a result of this judgment is still being reviewed but is not considered likely to be material.

Other	29	51	—	—
At 31 December	14,538	13,672	9,742	8,693

The Trustee's approach to investment is focused on acting in the members' best financial interests, with the integration of ESG (*Environmental, Social and Governance*) considerations into investment management processes and practices. This policy is reviewed annually (or more frequently as required) and has been shared with the schemes' investment managers for implementation.

(iv) Assumptions

The principal actuarial and financial assumptions used in valuations of the defined benefit pension schemes were as follows:

	2021	2020
	%	%
Discount rate	1.94	1.44
Rate of inflation:		
Retail Price Index (RPI)	3.21	2.80
Consumer Price Index (CPI)	2.92	2.41
Rate of salary increases	0.00	0.00
Weighted-average rate of increase for pensions in payment	2.88	2.61

On 25 November 2020 the Chancellor of the Exchequer announced the outcome of a consultation into a reform of the calculation of RPI. It is now expected that from 2030 RPI will be aligned with CPIH (the Consumer Price Index including owner-occupiers' housing costs). To determine the RPI assumption a term-dependent inflation curve has been used adjusting for an assumed inflation risk premium. In the period to 2030 a gap of 100 basis points has been assumed between RPI and CPI; thereafter no gap has been assumed. The RPI reform is subject to judicial review in 2022, and its outcome may impact these assumptions in the future.

	2021	2020
	Years	Years
Life expectancy for member aged 60, on the valuation date:		
Men	27.1	27.0
Women	29.1	29.0
Life expectancy for member aged 60, 15 years after the valuation date:		
Men	28.1	28.1
Women	30.3	30.2

The mortality assumptions used in the UK scheme valuations are based on standard tables published by the Institute and Faculty of Actuaries which were adjusted in line with the actual experience of the relevant schemes. The table shows that a member retiring at age 60 at 31 December 2021 is assumed to live for, on average, 27.1 years for a male and 29.1 years for a female. In practice there will be much variation between individual members but these assumptions are expected to be appropriate across all members. It is assumed that younger members will live longer in retirement than those retiring now. This reflects the expectation that mortality rates will continue to fall over time as medical science and standards of living improve. To illustrate the degree of improvement assumed, the table also shows the life expectancy for members aged 45 now, when they retire in 15 years' time at age 60. The Group has considered the impact of COVID-19 and evidence to date indicates that this did not have a material impact on the defined benefit obligation. The Group uses the CMI mortality projections model and in line with actuarial industry recommendations has placed no weight on 2020 mortality experience.

Lloyds Bank plc
Notes to the accounts

Note 27: Retirement benefit obligations (continued)

(v) Amount, timing and uncertainty of future cash flows

Risk exposure of the defined benefit schemes

While the Group is not exposed to any unusual, entity-specific or scheme-specific risks in its defined benefit pension schemes, it is exposed to a number of significant risks, detailed below:

Inflation rate risk: The majority of the plans' benefit obligations are linked to inflation both in deferment and once in payment. Higher inflation will lead to higher liabilities although this will be materially offset by holdings of inflation-linked gilts and, in most cases, caps on the level of inflationary increases are in place to protect against extreme inflation.

Interest rate risk: The defined benefit obligation is determined using a discount rate derived from yields on AA-rated corporate bonds. A decrease in corporate bond yields will increase plan liabilities although this will be materially offset by an increase in the value of bond holdings and through the use of derivatives.

Longevity risk: The majority of the schemes' obligations are to provide benefits for the life of the members so increases in life expectancy will result in an increase in the plans' liabilities.

Investment risk: Scheme assets are invested in a diversified portfolio of debt securities, equities and other return-seeking assets. If the assets underperform the discount rate used to calculate the defined benefit obligation, it will reduce the surplus or increase the deficit. Volatility in asset values and the discount rate will lead to volatility in the net pension asset on the Group's balance sheet and in other comprehensive income. To a lesser extent this will also lead to volatility in the pension expense in the Group's income statement.

The ultimate cost of the defined benefit obligations to the Group will depend upon actual future events rather than the assumptions made. The assumptions made are unlikely to be borne out in practice and as such the cost may be higher or lower than expected.

Sensitivity analysis

The effect of reasonably possible changes in key assumptions on the value of scheme liabilities and the resulting pension charge in the Group's income statement and on the net defined benefit pension scheme asset, for the Group's three most significant schemes, is set out below. The sensitivities provided assume that all other assumptions and the value of the schemes' assets remain unchanged, and are not intended to represent changes that are at the extremes of possibility. The calculations are approximate in nature and full detailed calculations could lead to a different result. It is unlikely that isolated changes to individual assumptions will be experienced in practice. Due to the correlation of assumptions, aggregating the effects of these isolated changes may not be a reasonable estimate of the actual effect of simultaneous changes in multiple assumptions.

	Effect of reasonably possible alternative assumptions							
	The Group				The Bank			
	Increase (decrease) in the income statement charge		(Increase) decrease in the net defined benefit pension scheme surplus		Increase (decrease) in the income statement charge		(Increase) decrease in the net defined benefit pension scheme surplus

	£m	£m	£m	£m	£m	£m	£m	£m
Inflation (including pension increases) ¹ :								
Increase of 0.1 per cent	12	11	481	531	7	6	309	337
Decrease of 0.1 per cent	(12)	(11)	(475)	(522)	(7)	(6)	(306)	(332)
Discount rate ² :								
Increase of 0.1 per cent	(24)	(20)	(774)	(866)	(14)	(12)	(480)	(534)
Decrease of 0.1 per cent	23	19	795	890	13	11	492	548
Expected life expectancy of members:								
Increase of one year	44	39	1,934	2,146	27	23	1,253	1,370
Decrease of one year	(42)	(37)	(1,852)	(2,052)	(26)	(23)	(1,200)	(1,310)

1 At 31 December 2021, the assumed rate of RPI inflation is 3.21 per cent and CPI inflation 2.92 per cent (2020: RPI 2.80 per cent and CPI 2.41 per cent).

2 At 31 December 2021, the assumed discount rate is 1.94 per cent (2020: 1.44 per cent).

Sensitivity analysis method and assumptions

The sensitivity analysis above reflects the impact on the liabilities of the Group's three most significant schemes which account for over 90 per cent of the Group's defined benefit obligations. While differences in the underlying liability profiles for the remainder of the Group's pension arrangements mean they may exhibit slightly different sensitivities to variations in these assumptions, the sensitivities provided above are indicative of the impact across the Group as a whole.

The inflation assumption sensitivity applies to the assumed rate of increase in both the Consumer Price Index (CPI) and the Retail Price Index (RPI), and includes the impact on the rate of increases to pensions, both before and after retirement. These pension increases are linked to inflation (either CPI or RPI) subject to certain minimum and maximum limits.

The sensitivity analysis (including the inflation sensitivity) does not include the impact of any change in the rate of salary increases as pensionable salaries have been frozen since 2 April 2014.

The life expectancy assumption has been applied by allowing for an increase/decrease in life expectation from age 60 of one year, based upon the approximate weighted average age for each scheme. While this is an approximate approach and will not give the same result as a one year increase in life expectancy at every age, it provides an appropriate indication of the potential impact on the schemes from changes in life expectancy.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from the prior year.

Lloyds Bank plc
Notes to the accounts

Note 27: Retirement benefit obligations (continued)

Asset-liability matching strategies

The main schemes' assets are invested in a diversified portfolio, consisting primarily of debt securities. The investment strategy is not static and will evolve to reflect the structure of liabilities within the schemes. Specific asset-liability matching strategies for each pension plan are independently determined by the responsible governance body for each scheme and in consultation with the employer.

A significant goal of the asset-liability matching strategies adopted by Group schemes is to reduce volatility caused by changes in market expectations of interest rates and inflation. In the main schemes, this is achieved by investing scheme assets in bonds, primarily fixed interest gilts and index linked gilts, and by entering into interest rate and inflation swap arrangements. These investments are structured to take into account the profile of scheme liabilities and actively managed to reflect both changing market conditions and changes to the liability profile. At 31 December 2021 the asset-liability matching strategy mitigated around 117 per cent of the liability sensitivity to interest rate movements and around 126 per cent of the liability sensitivity to inflation movements. In addition, a small amount of interest rate sensitivity arises through holdings of corporate and other debt securities. The higher level of hedging provides greater protection to the funding position of the schemes.

On 28 January 2020, the main schemes entered into a £10 billion longevity insurance arrangement to hedge part of the schemes' exposure to unexpected increases in life expectancy. This arrangement forms part of the schemes' investment portfolio and will provide income to the schemes in the event that pensions are paid out for longer than expected. The transaction was structured as a pass-through with Scottish Widows as the insurer, and onwards reinsurance to Pacific Life Re Limited. The valuation of the swap was £nil at inception and while there has been a slightly higher than expected number of deaths in the population covered by the arrangement, this has not had a material impact on the value of the swap. At 31 December 2021 the value of these swaps was £0.6 million, and is reflected in the value of scheme assets.

On 28 January 2022, the Lloyds Bank Pension Scheme No 1 entered into an additional £5.5 billion longevity insurance arrangement. The transaction is structured as a pass-through with Scottish Widows as the insurer, and onwards reinsurance to SCOR SE – UK Branch. The valuation of the swap was £nil at inception. In total the schemes have now hedged around 25 per cent of their longevity risk exposure.

Maturity profile of defined benefit obligation

The following table provides information on the weighted average duration of the defined benefit pension obligation and the distribution and timing of benefit payments:

	The Group		The Bank	
	2021 Years	2020 Years	2021 Years	2020 Years
Duration of the defined benefit obligation	17	19	16	17

Maturity analysis of benefits expected to be paid:

	The Group		The Bank	
	2021 £m	2020 £m	2021 £m	2020 £m
Within 12 months	1,352	1,293	940	914
Between 1 and 2 years	1,450	1,350	1,013	940
Between 2 and 5 years	4,651	4,347	3,188	2,989
Between 5 and 10 years	8,993	8,301	6,029	5,547
Between 10 and 15 years	9,668	9,093	6,170	5,796
Between 15 and 25 years	18,671	17,485	11,499	10,590
Between 25 and 35 years	13,846	13,479	7,925	7,709
Between 35 and 45 years	6,987	7,162	3,485	3,645
In more than 45 years	2,116	2,287	774	874

Maturity analysis method and assumptions

The projected benefit payments are based on the assumptions underlying the assessment of the obligations, including allowance for expected future inflation. They are shown in their undiscounted form and therefore appear large relative to the discounted assessment of the defined benefit obligations recognised in the Group's balance sheet. They are in respect of benefits that have been accrued prior to the respective year-end date only and make no allowance for any benefits that may have been accrued subsequently.

Defined contribution schemes

The Group operates a number of defined contribution pension schemes in the UK and overseas, principally Your Tomorrow and the defined contribution sections of the Lloyds Bank Pension Scheme No. 1.

During the year ended 31 December 2021 the charge to the income statement in respect of defined contribution schemes was £287 million (2020: £305 million; 2019: £273 million), representing the contributions payable by the employer in accordance with each scheme's rules.

Lloyds Bank plc
Notes to the accounts

Note 27: Retirement benefit obligations (continued)

Other post-retirement benefit schemes

The Group operates a number of schemes which provide post-retirement healthcare benefits to certain employees, retired employees and their dependants. The principal scheme relates to former Lloyds Bank staff and under this scheme the Group has undertaken to meet the cost of post-retirement healthcare for all eligible former employees (and their dependants) who retired prior to 1 January 1996. The Group has entered into an insurance contract to provide these benefits and a provision has been made for the estimated cost of future insurance premiums payable.

For the principal post-retirement healthcare scheme, the latest actuarial valuation of the liability was carried out at 31 December 2021 by qualified independent actuaries. The principal assumptions used were as set out above, except that the rate of increase in healthcare premiums has been assumed at 6.82 per cent (2020: 6.40 per cent).

Movements in the other post-retirement benefits obligation:

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
At 1 January	(109)	(126)	(68)	(85)
Actuarial gains	4	16	1	15
Insurance premiums paid	3	4	2	3
Charge for the year	(2)	(3)	(1)	(2)
Exchange and other adjustments	1	—	1	1
At 31 December	(103)	(109)	(65)	(68)

Note 28: Deferred tax

The Group's and the Bank's deferred tax assets and liabilities are as follows:

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Statutory position				
Deferred tax assets	4,048	3,468	2,434	2,109
Deferred tax liabilities	—	—	—	—
Net deferred tax asset at 31 December	4,048	3,468	2,434	2,109
Tax disclosure				
Deferred tax assets	6,377	5,327	3,861	3,042
Deferred tax liabilities	(2,329)	(1,859)	(1,427)	(933)
Net deferred tax asset at 31 December	4,048	3,468	2,434	2,109

The statutory position reflects the deferred tax assets and liabilities as disclosed in the consolidated balance sheet and takes into account the ability of the Group and the Bank to net assets and liabilities where there is a legally enforceable right of offset. The tax disclosure of deferred tax assets and liabilities ties to the amounts outlined in the tables below which splits the deferred tax assets and liabilities by type, before such netting.

Finance Act 2021, which was substantively enacted on 24 May 2021, increases the rate of corporation tax from 19 per cent to 25 per cent with effect from 1 April 2023. The impact of this rate change is an increase in the Group's net deferred tax asset as at 31 December 2021 of £942 million, comprising a £1,168 million credit included in the income statement and a £226 million charge included in equity. The tax credit in 2020 included an uplift in deferred tax assets following the announcement by the UK Government that it would maintain the corporation tax rate at 19 per cent.

On 27 October 2021, the UK Government announced its intention to decrease the rate of banking surcharge from 8 per cent to 3 per cent with effect from 1 April 2023. This change was substantively enacted on 2 February 2022 and its impact on deferred tax is therefore not included in these financial statements. Had this change in banking surcharge rate been substantively enacted at 31 December 2021, the impact would have been to recognise a £3 million deferred tax charge in the income statement and an £83 million credit within other comprehensive income, increasing the Group's net deferred tax asset by £80 million.

Lloyds Bank plc
Notes to the accounts

Note 28: Deferred tax (continued)

Movements in deferred tax assets and liabilities (before taking into consideration the offsetting of balances within the same taxing jurisdiction) can be summarised as follows:

Lloyds Bank plc
Notes to the accounts

Note 28: Deferred tax (continued)

At 31 December 2021 the Group carried net deferred tax assets on its balance sheet of £4,048 million (2020: £3,468 million) and the Bank carried deferred tax assets of £2,434 million (2020: £2,109 million) principally relating to tax losses carried forward.

Estimation of income taxes includes the assessment of recoverability of deferred tax assets. Deferred tax assets are only recognised to the extent that they are considered more likely than not to be recoverable based on existing tax laws and forecasts of future taxable profits against which the underlying tax deductions can be utilised. The Group has recognised a deferred tax asset of £5,018 million (2020: £4,054 million), and the Bank £3,190 million (2020: £2,507 million) in respect of trading losses carried forward. Substantially all of these losses have arisen in Bank of Scotland plc and Lloyds Bank plc, and they will be utilised as taxable profits arise in those legal entities in future periods.

The Group's expectations of future UK taxable profits require management judgement, and take into account the Group's long-term financial and strategic plans and anticipated future tax-adjusting items. In making this assessment, account is taken of business plans, the Board-approved operating plan and the expected future economic outlook as set out in the strategic report, as well as the risks associated with future regulatory, climate-related and other change, in order to produce a base case forecast of future UK taxable profits. Under current law there is no expiry date for UK trading losses not yet utilised, and given the forecast of future profitability and the Group's commitment to the UK market, in management's judgement it is more likely than not that the value of the losses will be recovered by the Group while still operating as a going concern. Banking tax losses that arose before 1 April 2015 can only be used against 25 per cent of taxable profits arising after 1 April 2016, and they cannot be used to reduce the surcharge on banking profits. These restrictions in utilisation mean that the value of the deferred tax asset in respect of tax losses is only expected to be fully recovered by 2047 (2020: 2049) in the base case forecast. The rate of recovery of the Group's tax loss asset is not a straight line, being affected by the relative profitability of the legal entities in future periods, and the relative size of their tax losses carried forward. It is expected in the base case that 60 per cent of the value will be recovered by 2034, when Bank of Scotland plc will have utilised all of its available tax losses. It is possible that future tax law changes could materially affect the timing of recovery and the value of these losses ultimately realised by the Group. The value of the deferred tax asset in respect of tax losses increased by £1,156 million in 2021 as a result of the change in UK tax rates.

Deferred tax not recognised

Deferred tax assets of £151 million (2020: £104 million) for the Group and £116 million (2020: £90 million) for the Bank have not been recognised in respect of £593 million for the Group and £453 million for the Bank of UK tax losses and other temporary differences which can only be used to offset future capital gains. UK capital losses can be carried forward indefinitely.

No deferred tax asset was recognised in 2020 in respect of unrelieved foreign tax credits of £46 million for the Group and £7 million for the Bank, as there were no expected profits against which the credits could be utilised. The formal closure of the branches in respect of which these credits arose means that the credits have now been extinguished.

No deferred tax has been recognised in respect of foreign trade losses where it is not more likely than not that we will be able to utilise them in future periods. Of the asset not recognised, £34 million for the Group and nil for the Bank (2020: £34 million for the Group and £nil for the Bank) relates to losses that will expire if not used within 20 years, and £5 million for the Group and £3 million for the Bank (2020: £43 million for the Group and £4 million for the Bank) relates to losses with no expiry date.

As a result of parent company exemptions on dividends from subsidiaries and on capital gains on disposal there are no significant taxable temporary differences associated with investments in subsidiaries, branches, associates and joint arrangements.

Provisions for financial commitments and guarantees

Provisions are recognised for expected credit losses on undrawn loan commitments and financial guarantees. See also note 15.

Regulatory and legal provisions

In the course of its business, the Group is engaged in discussions with the PRA, FCA and other UK and overseas regulators and other governmental authorities on a range of matters. The Group also receives complaints in connection with its past conduct and claims brought by or on behalf of current and former employees, customers, investors and other third parties and is subject to legal proceedings and other legal actions. Where significant, provisions are held against the costs expected to be incurred in relation to these matters and matters arising from related internal reviews. During the year ended 31 December 2021 the Group charged a further £1,177 million in respect of legal actions and other regulatory matters, including a charge in respect of HBOS Reading and charges for other legacy programmes.

The unutilised balance at 31 December 2021 was £1,054 million (31 December 2020: £520 million). The most significant items are as follows.

HBOS Reading – review

The Group completed its compensation assessment for those within the Customer Review in 2019 with more than £109 million of compensation paid, in addition to £15 million for ex-gratia payments and £6 million for the reimbursement of legal fees. The Group is now applying the recommendations from Sir Ross Cranston's review, issued in December 2019, including a reassessment of direct and consequential losses by an independent panel (the Foskett Panel), an extension of debt relief and a wider definition of de facto directors. The appeal process for the further assessment of debt relief and de facto director status is now nearing completion. Further details of the Foskett Panel were announced on 3 April 2020 and the Foskett Panel's full scope and methodology was published on 7 July 2020. The Foskett Panel's stated objective is to consider cases via a non-legalistic and fair process and to make their decisions in a generous, fair and common sense manner, assessing claims against an expanded definition of the fraud and on a lower evidential basis.

Following the emergence of the first outcomes of the Foskett Panel through 2021, the Group has charged a further £790 million in the year ended 31 December 2021, of which £600 million was recognised in the fourth quarter. This includes operational costs in relation to Dame Linda Dobbs' review, which is considering whether the issues relating to HBOS Reading were investigated and appropriately reported by the Group during the period from January 2009 to January 2017, and other programme costs. A significant proportion of the fourth quarter charge relates to the estimated future awards from the Foskett Panel. To date the Foskett Panel has shared outcomes on a limited subset of the total population which covers a wide range of businesses and different claim characteristics. The estimated awards provision recognised is therefore materially dependent on the assumption that the limited number of awards to date are representative of the full population of cases. The 2021 charge increases the lifetime cost to £1,225 million. The final outcome could be significantly different from the current provision once the re-review is concluded by the Foskett Panel. There is no confirmed timeline for the completion of the Foskett Panel re-review process. The Group is committed to implementing Sir Ross's recommendations in full.

Payment protection insurance

The Group has made provisions for PPI costs over a number of years totalling £21,906 million. Good progress continues to be made towards ensuring operational completeness, ahead of an orderly programme close. At 31 December 2021, a provision of £20 million remained outstanding (excluding amounts related to MBNA), with total cash payments of £178 million during the year.

In addition to the above provision, the Group continues to challenge PPI litigation cases, with mainly legal fees and operational costs associated with litigation activity recognised within regulatory and legal provisions, including a charge in the fourth quarter. PPI litigation remains inherently uncertain, with a number of key Court judgments due to be delivered in 2022.

Arrears handling related activities

To date the Group has provided a total of £1,026 million for arrears handling activities. The unutilised balance at 31 December 2021 was £26 million.

Other

Following the sale of TSB Banking Group plc, the Group raised a provision of £665 million in relation to various ongoing commitments in respect of the divestment. At 31 December £90 million remained unutilised; the Group expects the majority of the remaining provision to be utilised in the next twelve months and the provision to be fully utilised by 31 December 2025.

The Group carries provisions of £114 million in respect of dilapidations, rent reviews and other property-related matters. Provisions are also made for staff and other costs related to Group restructuring initiatives at the point at which the Group becomes committed to the expenditure; at 31 December 2021 provisions of £187 million (31 December 2020: £196 million) were held.

The Group carries provisions of £78 million (2020: £112 million) for indemnities and other matters relating to legacy business disposals in prior years. Whilst there remains significant uncertainty as to the timing of the utilisation of the provisions, the Group expects the majority of the remaining provisions to have been utilised by 31 December 2026.

¹ Issuances in the year generated cash inflows of £3,262 million (2020: £496 million); the repurchases and redemptions resulted in cash outflows of £3,049 million (2020: £2,726 million). Cash payments in respect of interest on subordinated liabilities in the year amounted to £423 million (2020: £759 million).

Certain of the above securities were issued or redeemed under exchange offers, which did not result in an extinguishment of the original financial liability for accounting purposes.

These securities will, in the event of the winding-up of the issuer, be subordinated to the claims of depositors and all other creditors of the issuer, other than creditors whose claims rank equally with, or are junior to, the claims of the holders of the subordinated liabilities. The subordination of specific subordinated liabilities is determined in respect of the issuer and any guarantors of that liability. The claims of holders of preference shares and preferred securities are generally junior to those of the holders of undated subordinated liabilities, which in turn are junior to the claims of holders of the dated subordinated liabilities. Neither the Group nor the Bank has had any defaults of principal, interest or other breaches with respect to its subordinated liabilities during 2021 (2020: none).

Lloyds Bank plc
Notes to the accounts

Note 31: Share capital

(1) Authorised share capital

As permitted by the Companies Act 2006, the Bank has removed references to authorised share capital from its articles of association.

(2) Issued and fully paid ordinary shares

	The Group and the Bank					
	2021	2020	2019	2021	2020	2019

(3) Share capital and control

There are no limitations on voting rights or restrictions on the transfer of shares in the Bank other than as set out in the articles of association, and certain restrictions which may from time to time be imposed by law and regulations (for example, insider trading laws).

Ordinary shares

The holders of ordinary shares are entitled to receive the Bank's report and accounts, attend, speak and vote at general meetings and appoint proxies to exercise voting rights. Holders of ordinary shares may also receive a dividend (subject to the provisions of the Bank's articles of association) and on a winding up may share in the assets of the Bank.

Issued and fully paid preference shares

The Bank has in issue various classes of preference shares which are all classified as liabilities under accounting standards.

¹ There has been no movements in this reserve in 2021, 2020 or 2019.

The merger reserve arose on the transfer of HBOS plc from the Bank's ultimate holding company in January 2010.

The revaluation reserves in respect of debt securities and equity shares held at fair value through other comprehensive income represent the cumulative after-tax unrealised change in the fair value of financial assets so classified since initial recognition; or in the case of financial assets obtained on acquisitions of businesses, since the date of acquisition.

The cash flow hedging reserve represents the cumulative after-tax gains and losses on effective cash flow hedging instruments that will be reclassified to the income statement in the periods in which the hedged item affects profit or loss.

The foreign currency translation reserve represents the cumulative after-tax gains and losses on the translation of foreign operations and exchange differences arising on financial instruments designated as hedges of the Group's net investment in foreign operations.

The Bank has in issue £4,268 million of Sterling, Dollar and Euro Additional Tier 1 (AT1) securities to Lloyds Banking Group plc. The AT1 securities are fixed rate resetting or floating rate Perpetual Subordinated Permanent Write-Down Securities with no fixed maturity or redemption date.

The principal terms of the AT1 securities are described below:

- The securities rank behind the claims against the Bank of unsubordinated creditors on a winding-up
- The fixed rate reset securities bear a fixed rate of interest until the first call date. After the initial call date, in the event that they are not redeemed, the fixed rate reset AT1 securities will bear interest at rates fixed periodically in advance. The floating rate AT1 securities will be reset quarterly both prior to and following the first call date
- Interest on the securities will be due and payable only at the sole discretion of the Bank and the Bank may at any time elect to cancel any interest payment (or any part thereof) which would otherwise be payable on any interest payment date. There are also certain restrictions on the payment of interest as specified in the terms
- The securities are undated and are repayable, at the option of the Bank, in whole at the first call date, or at any interest payment date thereafter. In addition, the AT1 securities are repayable, at the option of the Bank, in whole for certain regulatory or tax reasons. Any repayments require the prior consent of the PRA
- The securities will be subject to a Permanent Write Down should the Common Equity Tier 1 ratio of the Bank fall below 7.0 per cent

Note 36: Dividends on ordinary shares

Dividends paid during the year were as follows:

	2021 £m	2020 £m	2019 £m
Interim dividends	2,900	—	4,100

Lloyds Bank plc
Notes to the accounts

Note 37: Share-based payments

During the year ended 31 December 2021 Lloyds Banking Group plc operated a number of share-based payment schemes for which employees of the Lloyds Bank Group were eligible and all of which are equity settled. Details of all schemes operated by Lloyds Banking Group are set out below; these are managed and operated on a Lloyds Banking Group-wide basis. The amount charged to the Group's income statement in respect of Lloyds Banking Group share-based payment schemes, and which is included within staff costs (note 9), was £229 million (2020: £181 million; 2019: £337 million).

During the year ended 31 December 2021 the Lloyds Banking Group operated the following share-based payment schemes, all of which are equity settled.

Group Performance Share plan

The Group operates a Group Performance Share plan that is equity settled. Bonuses in respect of employee service in 2021 have been recognised in the charge in line with the proportion of the deferral period completed.

Save-As-You-Earn schemes

Eligible employees may enter into contracts through the Save-As-You-Earn (SAYE) schemes to save up to £500 per month and, at the expiry of a fixed term of three years, have the option to use these savings within six months of the expiry of the fixed term to acquire shares in the Group at a discounted price of no less than 80 per cent (90 per cent for the 2020 and 2021 plans) of the market price at the start of the invitation.

Movements in the number of share options outstanding under the SAYE schemes are set out below:

	2021		2020	
	Number of options	Weighted average exercise price (pence)	Number of options	Weighted average exercise price (pence)
Outstanding at 1 January	1,120,138,915	30.39	1,068,094,073	44.55
Granted	236,923,744	39.40	779,229,797	24.25
Exercised	(6,924,434)	30.57	(255,706,663)	47.51
Forfeited	(22,815,078)	28.78	(6,938,102)	43.30
Cancelled	(51,479,310)	32.57	(389,767,675)	42.24
Expired	(95,280,546)	49.03	(74,772,515)	47.26
Outstanding at 31 December	1,180,563,291	30.63	1,120,138,915	30.39
Exercisable at 31 December	336,561	51.03	792,741	47.49

The weighted average share price at the time that the options were exercised during 2021 was £0.47 (2020: £0.61). The weighted average remaining contractual life of options outstanding at the end of the year was 2.46 years (2020: 2.98 years).

The weighted average fair value of SAYE options granted during 2021 was £0.09 (2020: £0.05). The fair values of the SAYE options have been determined using a standard Black-Scholes model.

Other share option plans

Lloyds Banking Group Executive Share Plan 2003

The Plan was adopted in December 2003 and under the Plan share options may be granted to senior employees. Options under this plan have been granted specifically to facilitate recruitment (to compensate new recruits for any lost share awards), and also to make grants to key individuals for retention purposes. In some instances, grants may be made subject to individual performance conditions.

Participants are not entitled to any dividends paid during the vesting period.

	2021		2020	
	Number of options	Weighted average exercise price (pence)	Number of options	Weighted average exercise price (pence)
Outstanding at 1 January	6,666,372	Nil	7,634,638	Nil
Granted	5,308,496	Nil	1,990,449	Nil
Exercised	(5,129,115)	Nil	(2,122,302)	Nil

Forfeited	(385,184)	Nil	(111,100)	Nil
Lapsed	(558,679)	Nil	(677,976)	Nil
Outstanding at 31 December	5,901,890	Nil	6,666,372	Nil
Exercisable at 31 December	708,939	Nil	3,150,407	Nil

The weighted average fair value of options granted in the year was £0.45 (2020: £0.33). The fair values of options granted have been determined using a standard Black-Scholes model. The weighted average share price at the time that the options were exercised during 2021 was £0.44 (2020: £0.36). The weighted average remaining contractual life of options outstanding at the end of the year was 4.3 years (2020: 4.1 years).

Lloyds Bank plc
Notes to the accounts

Note 37: Share-based payments (continued)

Other share plans

Lloyds Banking Group Executive Group Ownership Share Plan

The plan, introduced in 2006, is aimed at delivering shareholder value by linking the receipt of shares to an improvement in the performance of the Group over a three-year period. Awards are made within limits set by the rules of the plan, with the limits determining the maximum number of shares that can be awarded equating to three times annual salary. In exceptional circumstances this may increase to four times annual salary.

At the end of the performance period for the 2018 grant, the targets had not been fully met and therefore these awards vested in 2021 at a rate of 33.75 per cent.

	2021 Number of shares	2020 Number of shares
Outstanding at 1 January	533,987,527	459,904,745
Granted	—	211,214,605
Vested	(39,621,415)	(47,775,806)
Forfeited	(144,437,243)	(96,015,542)
Dividend award	944,758	6,659,525
Outstanding at 31 December	350,873,627	533,987,527

Awards in respect of the 2019 grant are due to vest in 2022 at a rate of 41.80 per cent. In previous years participants were entitled to any dividends paid in the vesting period. However, following a regulatory change prohibiting the payment of dividend on such awards, the number of shares awarded has been determined by applying a share price adjusted to exclude the value of estimated future dividends.

The weighted average fair value of the awards granted in 2020 was £0.28.

Lloyds Banking Group Long Term Share Plan

The plan, introduced in 2021, which replaced the Executive Group Ownership Share Plan, is intended to provide alignment to our aim of delivering sustainable returns to shareholders, supported by our values and behaviours.

	2021 Number of shares
Granted	83,456,304
Forfeited	(5,573,236)
Outstanding at 31 December	77,883,068

The weighted average fair value of awards granted in the year was £0.36.

Chief Financial Officer buyout

William Chalmers joined the Group on 3 June 2019 and was appointed as Chief Financial Officer on 1 August 2019 on the retirement of George Culmer. He was granted deferred share awards over 4,086,632 shares, to replace unvested awards from his former employer, Morgan Stanley, that were forfeited as a result of him joining the Group.

	2021 Number of shares	2020 Number of shares
Outstanding at 1 January	1,810,712	3,268,460
Exercised	(1,124,627)	(1,457,748)
Outstanding at 31 December	686,085	1,810,712

Group Chief Executive buyout

Charlie Nunn joined the Group on 16 August 2021 as Group Chief Executive. He was granted deferred share awards over 8,301,708 shares to replace unvested awards from his former employer, HSBC, that were forfeited as a result of him joining the Group.

	2021 Number of shares
Granted	8,301,708
Exercised	(856,921)
Outstanding at 31 December	7,444,787

The weighted average fair value of awards granted in 2021 was £0.40.

Lloyds Bank plc
Notes to the accounts

Note 37: Share-based payments (continued)

Assumptions at 31 December 2021

The fair value calculations at 31 December 2021 for grants made in the year, using Black-Scholes models and Monte Carlo simulation, are based on the following assumptions:

	SAYE	Executive Share Plan 2003	Long Term Share Plan	Group Chief Executive buyout
Weighted average risk-free interest rate	0.49%	0.12%	0.16%	0.26%
Weighted average expected life	3.3 years	1.3 years	3.4 years	2.8 years
Weighted average expected volatility	28%	30%	31%	31%
Weighted average expected dividend yield	3.1%	3.2%	3.1%	3.1%
Weighted average share price	£0.45	£0.47	£0.40	£0.44
Weighted average exercise price	£0.39	Nil	Nil	Nil

Expected volatility is a measure of the amount by which the Group's shares are expected to fluctuate during the life of an option. The expected volatility is estimated based on the historical volatility of the closing daily share price over the most recent period that is commensurate with the expected life of the option. The historical volatility is compared to the implied volatility generated from market traded options in the Group's shares to assess the reasonableness of the historical volatility and adjustments made where appropriate.

Share Incentive Plan

Free shares

An award of shares may be made annually to employees up to a maximum of £3,600. The shares awarded are held in trust for a mandatory period of three years on the employee's behalf, during which period the employee is entitled to any dividends paid on such shares. The award is subject to a non-market based condition. If an employee leaves the Group within this three-year period for other than a 'good' reason, all of the shares awarded will be forfeited.

On 25 March 2021, the Group made an award of 1,017 (2020: 676) shares to all eligible employees. The number of shares awarded was 67,658,976 (2020: 45,612,424), with an average fair value of £0.42 (2020: £0.30) based on the market price at the date of award.

Matching shares

The Group undertakes to match shares purchased by employees up to the value of £45 per month; these matching shares are held in trust for a mandatory period of three years on the employee's behalf, during which period the employee is entitled to any dividends paid on such shares. The award is subject to a non-market based condition: if an employee leaves within this three-year period for other than a 'good' reason, all of the matching shares are forfeited. Similarly, if the employees sell their purchased shares within three years, their matching shares are forfeited.

The number of shares awarded relating to matching shares in 2021 was 46,621,026 (2020: 62,262,140), with an average fair value of £0.44 (2020: £0.34), based on market prices at the date of award.

Fixed share awards

Fixed share awards were introduced in 2014 in order to ensure that total fixed remuneration is commensurate with role and to provide a competitive reward package for certain Lloyds Banking Group employees, with an appropriate balance of fixed and variable remuneration, in line with regulatory requirements. The fixed share awards are delivered in Lloyds Banking Group shares, released over five years with 20 per cent being released each year following the year of award. From June 2020, the fixed share awards are released over three years with one third being released each year following the year of award. The number of shares purchased in 2021 was 8,320,948 (2020: 13,975,993).

The fixed share award is not subject to any performance conditions, performance adjustment or clawback. On an employee leaving the Group, there is no change to the timeline for which shares will become unrestricted.

Note 38: Related party transactions

Key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of an entity; the Group's key management personnel are the members of the Lloyds Banking Group plc Group Executive Committee together with its Non-Executive Directors.

The table below details, on an aggregated basis, key management personnel compensation:

	2021	2020	2019
	£m	£m	£m
Compensation			
Salaries and other short-term benefits	10	12	14
Share-based payments	14	12	14
Total compensation	24	24	28

The aggregate of the emoluments of the directors was £10.6 million (2020: £11.8 million; 2019: £11.7 million).

Aggregate company contributions in respect of key management personnel to defined contribution pension schemes were £nil (2020: £nil; 2019: £nil).

The total for the highest paid director (Sir António Horta-Osório) was £3,117,000 (2020: Juan Colombás: £4,169,000; 2019: Sir António Horta-Osório: £4,078,000); this did not include any gain on exercise of Lloyds Banking Group plc shares in any year.

Withdrawn (includes deposits of former key management personnel)	(26)	(38)	(41)
At 31 December	11	11	23

Deposits placed by key management personnel attracted interest rates of up to 1.0 per cent (2020: 2.0 per cent; 2019: 3.0 per cent).

At 31 December 2021, the Group did not provide any guarantees in respect of key management personnel (2020 and 2019: none).

At 31 December 2021, transactions, arrangements and agreements entered into by the Group and its banking subsidiaries with Directors and connected persons included amounts outstanding in respect of loans and credit card transactions of £0.6 million with five Directors and two connected persons (2020: £0.6 million with five Directors and two connected persons; 2019: £0.6 million with five Directors and two connected persons).

Lloyds Bank plc
Notes to the accounts

Note 38: Related party transactions (continued)

Balances and transactions with fellow Lloyds Banking Group undertakings

Balances and transactions between members of the Lloyds Bank Group

In accordance with IFRS 10 Consolidated Financial Statements, transactions and balances between the Bank and its subsidiary undertakings, and between those subsidiary undertakings, have all been eliminated on consolidation and thus are not reported as related party transactions of the Group.

The Bank, as a result of its position as parent of a banking group, has a large number of transactions with various of its subsidiary undertakings; these are included on the balance sheet of the Bank as follows:

	2021	2020
	£m	£m
Assets, included within:		
Financial assets at fair value through profit or loss	3,404	1,203
Derivative financial instruments	3,299	7,077
Financial assets at amortised cost: due from fellow Lloyds Banking Group undertakings	107,907	128,241
	114,610	136,521
Liabilities, included within:		
Due to fellow Lloyds Banking Group undertakings	21,540	33,170
Financial liabilities at fair value through profit or loss	—	—
Derivative financial instruments	2,508	4,738
Debt securities in issue	59	20
	24,107	37,928

Due to the size and volume of transactions passing through these accounts, it is neither practical nor meaningful to disclose information on gross inflows and outflows. During 2021 the Bank earned interest income on the above asset balances of £1,933 million (2020: £1,995 million; 2019: £2,491 million) and incurred interest expense on the above liability balances of £327 million (2020: £336 million; 2019: £655 million).

In addition, the Bank raised recharges of £1,609 million (2020: £1,403 million; 2019: £1,461 million) on its subsidiaries in respect of costs incurred and also received fees of £70 million (2020: £56 million; 2019: £62 million), and paid fees of £31 million (2020: £26 million; 2019: £57 million), for various services provided between the Bank and its subsidiaries.

Details of contingent liabilities and commitments entered into on behalf of fellow Lloyds Banking Group undertakings are given in note 39.

Balances and transactions with Lloyds Banking Group plc and fellow subsidiaries of the Bank

The Bank and its subsidiaries have balances due to and from the Bank's parent company, Lloyds Banking Group plc and fellow subsidiaries of the Bank. These are included on the balance sheet as follows:

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Assets, included within:				
Derivative financial instruments	634	690	634	690
Financial assets at amortised cost: due from fellow Lloyds Banking Group undertakings	739	738	517	530
	1,373	1,428	1,151	1,220
Liabilities, included within:				
Due to fellow Lloyds Banking Group undertakings	1,490	6,875	1,332	6,666
Financial liabilities at fair value through profit or loss	—	—	3,318	1,121
Derivative financial instruments	939	1,424	633	972
Debt securities in issue	17,961	12,686	14,650	11,551
Subordinated liabilities	5,176	4,599	5,311	4,745
	25,566	25,584	25,244	25,055

These balances include Lloyds Banking Group plc's banking arrangements and, due to the size and volume of transactions passing through these accounts, it is neither practical nor meaningful to disclose information on gross inflows and outflows. During 2021 the Group earned £11 million and the Bank earned £11 million interest income on the above asset balances (2020: Group £5 million, Bank £5 million; 2019: Group £20 million, Bank £20 million); the Group incurred £500 million and the Bank incurred £468 million interest expense on the above liability balances (2020: Group £478 million, Bank £461 million; 2019: Group £520 million, Bank £509 million).

Other related party transactions

Pension funds

The Group provides banking services to certain of its pension funds. At 31 December 2021, customer deposits of £480 million (2020: £151 million) related to the Group's pension funds.

Joint ventures and associates

At 31 December 2021 there were loans and advances to customers of £14 million (2020: £28 million) outstanding and balances within customer deposits of £22 million (2020: £73 million) relating to joint ventures and associates.

During the year the Group paid fees of £7 million (2020: £7 million) to the Lloyds Banking Group's Schroders Personal Wealth joint venture and also made a payment of £10 million (2020: £20 million) under the terms of agreements put in place on the establishment of the joint venture.

Lloyds Bank plc

Notes to the accounts

Note 39: Contingent liabilities, commitments and guarantees

Interchange fees

With respect to multi-lateral interchange fees (MIFs), the Lloyds Banking Group is not involved in the ongoing litigation which involves the card schemes Visa and Mastercard (as described below). However, the Group is a member/licensee of Visa and Mastercard and other card schemes. The litigation in question is as follows:

- Litigation brought by retailers against both Visa and Mastercard continues in the English Courts, in which retailers are seeking damages on grounds that Visa and Mastercard's MIFs breached competition law (this includes a judgment of the Supreme Court in June 2020 upholding the Court of Appeal's finding in 2018 that historic interchange arrangements of Mastercard and Visa infringed competition law)
- Litigation brought on behalf of UK consumers in the English Courts against Mastercard

Any impact on the Group of the litigation against Visa and Mastercard remains uncertain at this time, such that it is not practicable for the Group to provide an estimate of any potential financial effect. Insofar as Visa is required to pay damages to retailers for interchange fees set prior to June 2016, contractual arrangements to allocate liability have been agreed between various UK banks (including the Lloyds Banking Group) and Visa Inc, as part of Visa Inc's acquisition of Visa Europe in 2016. These arrangements cap the maximum amount of liability to which the Lloyds Banking Group may be subject and this cap is set at the cash consideration received by the Lloyds Banking Group for the sale of its stake in Visa Europe to Visa Inc in 2016. In 2016, the Group received Visa preference shares as part of the consideration for the sale of its shares in Visa Europe. In 2020, some of these Visa preference shares were converted into Visa Inc Class A common stock (in accordance with the provisions of the Visa Europe sale documentation) and they were subsequently sold by the Group. The sale has no impact on this contingent liability.

LIBOR and other trading rates

Certain Lloyds Banking Group companies, together with other panel banks, have been named as defendants in ongoing private lawsuits, including purported class action suits, in the US in connection with their roles as panel banks contributing to the setting of US Dollar, Japanese Yen and Sterling London Interbank Offered Rate and the Australian BBSW reference rate.

Certain Lloyds Banking Group companies are also named as defendants in (i) UK-based claims; and (ii) two Dutch class actions, raising LIBOR manipulation allegations. A number of the claims against the Lloyds Banking Group in the UK relating to the alleged mis-sale of interest rate hedging products also include allegations of LIBOR manipulation.

It is currently not possible to predict the scope and ultimate outcome on the Lloyds Banking Group of any private lawsuits or any related challenges to the interpretation or validity of any of the Lloyds Banking Group's contractual arrangements, including their timing and scale. As such, it is not practicable to provide an estimate of any potential financial effect.

Tax authorities

The Lloyds Banking Group has an open matter in relation to a claim for group relief of losses incurred in its former Irish banking subsidiary, which ceased trading on 31 December 2010. In 2013, HMRC informed the Lloyds Banking Group that its interpretation of the UK rules means that the group relief is not available. In 2020, HMRC concluded their enquiry into the matter and issued a closure notice. The Lloyds Banking Group's interpretation of the UK rules has not changed and hence it has appealed to the First Tier Tax Tribunal, with a hearing expected in 2022. If the final determination of the matter by the judicial process is that HMRC's position is correct, management estimate that this would result in an increase in current tax liabilities of approximately £730 million (including interest) and a reduction in deferred tax assets of approximately £330 million. The Lloyds Banking Group, having taken appropriate advice, does not consider that this is a case where additional tax will ultimately fall due.

There are a number of other open matters on which the Group is in discussions with HMRC (including the tax treatment of certain costs arising from the divestment of TSB Banking Group plc), none of which is expected to have a material impact on the financial position of the Group.

Other legal actions and regulatory matters

In addition, during the ordinary course of business the Group is subject to other complaints and threatened or actual legal proceedings (including class or group action claims) brought by or on behalf of current or former employees, customers, investors or other third parties, as well as legal and regulatory reviews, challenges, investigations and enforcement actions, which could relate to a number of issues, including financial, environmental or other regulatory matters, both in the UK and overseas. Where material, such matters are periodically reassessed, with the assistance of external professional advisers where appropriate, to determine the likelihood of the Group incurring a liability. In those instances where it is concluded that it is more likely than not that a payment will be made, a provision is established based on management's best estimate of the amount required at the relevant balance sheet date. In some cases it will not be possible to form a view, for example because the facts are unclear or because further time is needed to assess properly the merits of the case, and no provisions are held in relation to such matters. In these circumstances, specific disclosure in relation to a contingent liability will be made where material. However, the Group does not currently expect the final outcome of any such case to have a material adverse effect on its financial position, operations or cash flows. Where there is a contingent liability related to an existing provision the relevant disclosures are included within note 29.

Contingent liabilities, commitments and guarantees arising from the banking business

	The Bank	
	2021	2020
	£m	£m
Incurring on behalf of fellow Lloyds Banking Group undertakings	3,055	3,659

Of the amounts shown above in respect of undrawn formal standby facilities, credit lines and other commitments to lend, £55,690 million (2020: £59,240 million) for the Group and £30,653 million (2020: £32,847 million) for the Bank were irrevocable.

Capital commitments

Excluding commitments of the Group in respect of investment property (note 21), capital expenditure contracted but not provided for at 31 December 2021 amounted to £1,034 million (2020: £501 million) for the Group and £nil (2020: £nil) for the Bank. Of this amount for the Group, £1,034 million (2020: £501 million) related to assets to be leased to customers under operating leases. The Group's management is confident that future net revenues and funding will be sufficient to cover these commitments.

Note 40: Structured entities

The Group's interests in structured entities are consolidated. Details of the Group's interests in these structured entities are set out in note 25 for securitisations and covered bond vehicles, note 27 for structured entities associated with the Group's pension schemes, and below.

Asset-backed conduits

In addition to the structured entities discussed in note 25, which are used for securitisation and covered bond programmes, the Group sponsors an active asset-backed conduit, Cancara, which invests in client receivables and debt securities. The total consolidated exposure of Cancara at 31 December 2021 was £1,669 million (2020: £2,490 million), comprising £889 million of loans and advances (2020: £1,695 million) and £780 million of debt securities (2020: £795 million).

All lending assets and debt securities held by the Group in Cancara are restricted in use, as they are held by the collateral agent for the benefit of the commercial paper investors and the liquidity providers only. The Group provides liquidity facilities to Cancara under terms that are usual and customary for standard lending activities in the normal course of the Group's banking activities. During 2021 there have continued to be planned drawdowns on certain liquidity facilities for balance sheet management purposes, supporting the programme to provide funding alongside the proceeds of the asset-backed commercial paper issuance. The Group could be asked to provide support under the contractual terms of these arrangements including, for example, if Cancara experienced a shortfall in external funding, which may occur in the event of market disruption.

The external assets in Cancara are consolidated in the Group's financial statements.

Note 41: Financial instruments (continued)

(2) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is a measure as at a specific date and may be significantly different from the amount which will actually be paid or received on maturity or settlement date.

Wherever possible, fair values have been calculated using unadjusted quoted market prices in active markets for identical instruments held by the Group. Where quoted market prices are not available, or are unreliable because of poor liquidity, fair values have been determined using valuation techniques which, to the extent possible, use market observable inputs, but in some cases use non-market observable inputs. Valuation techniques used include discounted cash flow analysis and pricing models and, where appropriate, comparison to instruments with characteristics similar to those of the instruments held by the Group. The Group measures valuation adjustments for its derivative exposures on the same basis as the derivatives are managed.

The carrying amount of the following financial instruments is a reasonable approximation of fair value: cash and balances at central banks, items in the course of collection from banks, items in course of transmission to banks and notes in circulation.

Because a variety of estimation techniques are employed and significant estimates made, comparisons of fair values between financial institutions may not be meaningful. Readers of these financial statements are thus advised to use caution when using this data to evaluate the Group's financial position.

Fair value information is not provided for items that are not financial instruments or for other assets and liabilities which are not carried at fair value in the Group's consolidated balance sheet. These items include intangible assets, such as brands and acquired credit card relationships; premises and equipment; and shareholders' equity. These items are material and accordingly the Group believes that any fair value information presented would not represent the underlying value of the Group.

Valuation control framework

The key elements of the control framework for the valuation of financial instruments include model validation, product implementation review and independent price verification. These functions are carried out by appropriately skilled risk and finance teams, independent of the business area responsible for the products.

Model validation covers both qualitative and quantitative elements relating to new models. In respect of new products, a product implementation review is conducted pre and post-trading. Pre-trade testing ensures that the new model is integrated into the Group's systems and that the profit and loss and risk reporting are consistent throughout the trade lifecycle. Post-trade testing examines the explanatory power of the implemented model, actively monitoring model parameters and comparing in-house pricing to external sources. Independent price verification procedures cover financial instruments carried at fair value. The frequency of the review is matched to the availability of independent data, monthly being the minimum. Valuation differences in breach of established thresholds are escalated to senior management. The results from independent pricing and valuation reserves are reviewed monthly by senior management.

Formal committees, consisting of senior risk, finance and business management, meet at least quarterly to discuss and approve valuations in more judgemental areas, in particular for unquoted equities, structured credit, over-the-counter options and the credit valuation adjustment (CVA), funding valuation adjustment (FVA) and other valuation adjustments.

Valuation of financial assets and liabilities

Assets and liabilities carried at fair value or for which fair values are disclosed have been classified into three levels according to the quality and reliability of information used to determine the fair values.

Level 1

Level 1 fair value measurements are those derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 predominantly comprise listed equity shares, treasury bills and other government securities.

Level 2

Level 2 valuations are those where quoted market prices are not available, for example where the instrument is traded in a market that is not considered to be active or valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data. Examples of such financial instruments include most over-the-counter derivatives, financial institution issued securities, certificates of deposit and certain asset-backed securities.

Level 3

Level 3 portfolios are those where at least one input which could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include any unlisted equity investments which are valued using various valuation techniques that require significant management judgement in determining appropriate assumptions, including earnings multiples and estimated future cash flows. Certain of the Group's asset-backed securities and derivatives, principally where there is no trading activity in such securities, are also classified as level 3.

Transfers out of the level 3 portfolio arise when inputs that could have a significant impact on the instrument's valuation become market observable after previously having been non-market observable. In the case of asset-backed securities this can arise if more than one consistent independent source of data becomes available. Conversely, transfers into the portfolio arise when consistent sources of data cease to be available.

(3) Financial assets and liabilities carried at fair value

(A) Financial assets, excluding derivatives

Valuation hierarchy

At 31 December 2021, the Group's financial assets carried at fair value, excluding derivatives, totalled £29,584 million (2020: £28,934 million). The table below analyses these financial assets by balance sheet classification, asset type and valuation methodology (level 1, 2 or 3, as described on page 167). The fair value measurement approach is recurring in nature. There were no significant transfers between level 1 and 2 during the year.

Valuation methodology for financial assets, excluding derivatives

Loans and advances to customers and banks

The fair value of these assets is determined using discounted cash flow techniques. The discount rates are derived from market observable interest rates, a risk margin that reflects loan credit ratings and an incremental illiquidity premium based on historical spreads at origination on similar loans.

Debt securities

Debt securities measured at fair value and classified as level 2 are valued by discounting expected cash flows using an observable credit spread applicable to the particular instrument.

Where there is limited trading activity in debt securities, the Group uses valuation models, consensus pricing information from third-party pricing services and broker or lead manager quotes to determine an appropriate valuation. Debt securities are classified as level 3 if there is a significant valuation input that cannot be corroborated through market sources or where there are materially inconsistent values for an input. Asset classes classified as level 3 mainly comprise certain collateralised loan obligations and collateralised debt obligations.

(B) Financial liabilities, excluding derivatives

Valuation hierarchy

At 31 December 2021, the Group's financial liabilities carried at fair value, excluding derivatives, comprised its financial liabilities at fair value through profit or loss and totalled £6,537 million (2020: £6,831 million). The table below analyses these financial liabilities by balance sheet classification and valuation methodology (level 1, 2 or 3, as described on page 167). The fair value measurement approach is recurring in nature. There were no significant transfers between level 1 and 2 during the year.

	Level 1 £m	Level 2 £m	Level 3 £m	Total £m

Movements in level 3 portfolio

The table below analyses movements in the level 3 financial liabilities portfolio, excluding derivatives.

The Group	2021 £m	2020 £m
At 1 January	45	47
Gains recognised in the income statement within other income	(5)	—
Redemptions	(7)	(2)
At 31 December	33	45
Gains recognised in the income statement, within other income, relating to the change in fair value of those liabilities held at 31 December	(4)	—

Valuation methodology for financial liabilities, excluding derivatives

Liabilities held at fair value through profit or loss

These principally comprise debt securities in issue which are classified as level 2 and their fair value is determined using techniques whose inputs are based on observable market data. The carrying amount of the securities is adjusted to reflect the effect of changes in own credit spreads and the resulting gain or loss is recognised in other comprehensive income.

In the year ended 31 December 2021, the own credit adjustment arising from the fair valuation of £6,537 million (2020: £6,828 million) of the Group's debt securities in issue designated at fair value through profit or loss resulted in a loss of £86 million (2020: loss of £75 million), before tax, recognised in other comprehensive income.

Trading liabilities in respect of securities sold under repurchase agreements

The fair value of these liabilities is determined using discounted cash flow techniques. The discount rates are derived from observable repo curves specific to the type of security sold under the repurchase agreement.

(C) Derivatives

Valuation hierarchy

All of the Group's derivative assets and liabilities are carried at fair value. At 31 December 2021, such assets totalled £5,511 million for the Group and £6,898 million for the Bank (2020: £8,341 million for the Group and £12,595 million for the Bank) and liabilities totalled £4,643 million for the Group and £6,102 million for the Bank (2020: £8,228 million for the Group and £11,072 million for the Bank). The table below analyses these derivative balances by valuation methodology (level 1, 2 or 3, as described on page 167). The fair value measurement approach is recurring in nature. There were no significant transfers between level 1 and level 2 during the year.

The Group	2021				2020			
	Level 1 £m	Level 2 £m	Level 3 £m	Total £m	Level 1 £m	Level 2 £m	Level 3 £m	Total £m

Valuation methodology for derivatives

Where the Group's derivative assets and liabilities are not traded on an exchange, they are valued using valuation techniques, including discounted cash flow and options pricing models, as appropriate. The types of derivatives classified as level 2 and the valuation techniques used include:

- Interest rate swaps which are valued using discounted cash flow models; the most significant inputs into those models are interest rate yield curves which are developed from publicly quoted rates
- Foreign exchange derivatives that do not contain options which are priced using rates available from publicly quoted sources
- Credit derivatives which are valued using standard models with observable inputs, except for the items classified as level 3, which are valued using publicly available yield and credit default swap (CDS) curves
- Less complex interest rate and foreign exchange option products which are valued using volatility surfaces developed from publicly available interest rate cap, interest rate swaption and other option volatilities; option volatility skew information is derived from a market standard consensus pricing service. For more complex option products, the Group calibrates its models using observable at-the-money data; where necessary, the Group adjusts for out-of-the-money positions using a market standard consensus pricing service

Complex interest rate and foreign exchange products where inputs to the valuation are significant, material and unobservable are classified as level 3.

Where credit protection, usually in the form of credit default swaps, has been purchased or written on asset-backed securities, the security is referred to as a negative basis asset-backed security and the resulting derivative assets or liabilities have been classified as either level 2 or level 3 according to the classification of the underlying asset-backed security.

Certain unobservable inputs used to calculate CVA, FVA, and own credit adjustments, are not significant in determining the classification of the derivative and debt instruments. Consequently, these inputs do not form part of the level 3 sensitivities presented.

Lloyds Bank plc
Notes to the accounts

Note 41: Financial instruments (continued)

Derivative valuation adjustments

Derivative financial instruments which are carried in the balance sheet at fair value are adjusted where appropriate to reflect credit risk, market liquidity and other risks.

(i) *Uncollateralised derivative valuation adjustments*

The following table summarises the movement on this valuation adjustment account for the Group during 2020 and 2021:

	2021	2020
	£m	£m
At 1 January	242	214
Income statement charge (credit)	(88)	28
Transfers	—	—
At 31 December	154	242

Represented by:

	2021	2020
	£m	£m
Credit Valuation Adjustment	112	178
Debit Valuation Adjustment	(4)	(6)
Funding Valuation Adjustment	46	70
	154	242

Credit and Debit Valuation Adjustments (CVA and DVA) are applied to the Group's over-the-counter derivative exposures with counterparties that are not subject to strong interbank collateral arrangements. These exposures largely relate to the provision of risk management solutions for corporate customers within the Commercial Banking division.

A CVA is taken where the Group has a positive future uncollateralised exposure (asset). A DVA is taken where the Group has a negative future uncollateralised exposure (liability). These adjustments reflect interest rates and expectations of counterparty creditworthiness and the Group's own credit spread respectively.

The CVA is sensitive to:

- The current size of the mark-to-market position on the uncollateralised asset
- Expectations of future market volatility of the underlying asset
- Expectations of counterparty creditworthiness

Market Credit Default Swap (CDS) spreads are used to develop the probability of default for quoted counterparties. For unquoted counterparties, internal credit ratings and market sector CDS curves and recovery rates are used. The loss given default (LGD) is based on market recovery rates and internal credit assessments.

The combination of a one-notch deterioration in the credit rating of derivative counterparties and a ten per cent increase in LGD increases the CVA by £29 million. Current market value is used to estimate the projected exposure for products not supported by the model, which are principally complex interest rate options that are traded in very low volumes. For these, the CVA is calculated on an add-on basis (although no such adjustment was required at 31 December 2021).

The DVA is sensitive to:

- The current size of the mark-to-market position on the uncollateralised liability
- Expectations of future market volatility of the underlying liability
- The Group's own CDS spread

A one per cent rise in the CDS spread would lead to an increase in the DVA of £11 million.

The risk exposures that are used for the CVA and DVA calculations are strongly influenced by interest rates. Due to the nature of the Group's business the CVA/DVA exposures tend to be on average the same way around such that the valuation adjustments fall when interest rates rise. A one per cent rise in interest rates would lead to a £37 million fall in the overall valuation adjustment to £71 million. The CVA model used by the Group does not assume any correlation between the level of interest rates and default rates.

The Group has also recognised a Funding Valuation Adjustment to adjust for the net cost of funding uncollateralised derivative positions. This adjustment is calculated on the expected future exposure discounted at a suitable cost of funds. A ten basis points increase in the cost of funds will increase the funding valuation adjustment by £8 million.

(ii) *Market liquidity*

The Group includes mid to bid-offer valuation adjustments against the expected cost of closing out the net market risk in the Group's trading positions within a time frame that is consistent with historical trading activity and spreads that the trading desks have accessed historically during the ordinary course of business in normal market conditions.

At 31 December 2021, the Group's derivative trading business held mid to bid-offer valuation adjustments of £12 million (2020: £26 million).

Level 3 financial liabilities carried at fair value							

1 Ranges are shown where appropriate and represent the highest and lowest inputs used in the level 3 valuations.

2 Where the exposure to an unobservable input is managed on a net basis, only the net impact is shown in the table.

3 2020: -50bps/106bps

4 2020: 13%/128%

5 2020: +/- 50bps

6 2020: 33%/60%

7 2020: +/- 1%

Unobservable inputs

Significant unobservable inputs affecting the valuation of debt securities and derivatives are as follows:

- Interest rates and inflation rates are referenced in some derivatives where the payoff that the holder of the derivative receives depends on the behaviour of those underlying references through time
- Credit spreads represent the premium above the benchmark reference instrument required to compensate for lower credit quality; higher spreads lead to a lower fair value
- Volatility parameters represent key attributes of option behaviour; higher volatilities typically denote a wider range of possible outcomes

Reasonably possible alternative assumptions

Valuation techniques applied to many of the Group's level 3 instruments often involve the use of two or more inputs whose relationship is interdependent. The calculation of the effect of reasonably possible alternative assumptions included in the table above reflects such relationships.

Debt securities

Reasonably possible alternative assumptions have been determined in respect of the Group's structured credit investment by flexing credit spreads.

Derivatives

Reasonably possible alternative assumptions have been determined in respect of swaptions in the Group's derivative portfolios which are priced using industry standard option pricing models. Such models require interest rate volatilities which may be unobservable at longer maturities. To derive reasonably possible alternative valuations these volatilities have been flexed within a range.

(4) Financial assets and liabilities carried at amortised cost

(A) Financial assets

Valuation hierarchy

The table below analyses the fair values of the financial assets of the Group which are carried at amortised cost by valuation methodology (level 1, 2 or 3, as described on page 167). Financial assets carried at amortised cost are mainly classified as level 3 due to significant unobservable inputs used in the valuation models. Where inputs are observable, debt securities are classified as level 1 or 2.

Valuation methodology

Loans and advances to customers

The Group provides loans and advances to commercial, corporate and personal customers at both fixed and variable rates. Due to their short-term nature, the carrying value of the variable rate loans and those relating to lease financing is assumed to be their fair value.

To determine the fair value of loans and advances to customers, loans are segregated into portfolios of similar characteristics. A number of techniques are used to estimate the fair value of fixed rate lending; these take account of expected credit losses based on historic trends, prevailing market interest rates and expected future cash flows. For retail exposures, fair value is usually estimated by discounting anticipated cash flows (including interest at contractual rates) at market rates for similar loans offered by the Group and other financial institutions. Certain loans secured on residential properties are made at a fixed rate for a limited period, typically two to five years, after which the loans revert to the relevant variable rate. The fair value of such loans is estimated by reference to the market rates for similar loans of maturity equal to the remaining fixed interest rate period. The fair value of commercial loans is estimated by discounting anticipated cash flows at a rate which reflects the effects of interest rate changes, adjusted for changes in credit risk.

Lloyds Bank plc
Notes to the accounts

Note 41: Financial instruments (continued)

Loans and advances to banks

The carrying value of short-dated loans and advances to banks is assumed to be their fair value. The fair value of loans and advances to banks is estimated by discounting the anticipated cash flows at a market discount rate adjusted for the credit spread of the obligor or, where not observable, the credit spread of borrowers of similar credit quality.

Debt securities

The fair values of debt securities are determined predominantly from lead manager quotes and, where these are not available, by alternative techniques including reference to credit spreads on similar assets with the same obligor, market standard consensus pricing services, broker quotes and other research data.

Reverse repurchase agreements

The carrying amount is deemed a reasonable approximation of fair value given the short-term nature of these instruments.

(B) Financial liabilities

Valuation hierarchy

The table below analyses the fair values of the financial liabilities of the Group which are carried at amortised cost by valuation methodology (level 1, 2 or 3, as described on page 167).

Lloyds Bank plc
Notes to the accounts

Note 41: Financial instruments (continued)

Valuation methodology

Deposits from banks and customer deposits

The fair value of bank and customer deposits repayable on demand is assumed to be equal to their carrying value.

The fair value for all other deposits is estimated using discounted cash flows applying either market rates, where applicable, or current rates for deposits of similar remaining maturities.

Debt securities in issue

The fair value of short-term debt securities in issue is approximately equal to their carrying value. Fair value for other debt securities is calculated based on quoted market prices where available. Where quoted market prices are not available, fair value is estimated using discounted cash flow techniques at a rate which reflects market rates of interest and the Group's own credit spread.

Subordinated liabilities

The fair value of subordinated liabilities is determined by reference to quoted market prices where available or by reference to quoted market prices of similar instruments. Subordinated liabilities are classified as level 2, since the inputs used to determine their fair value are largely observable.

Repurchase agreements

The carrying amount is deemed a reasonable approximation of fair value given the short-term nature of these instruments.

(5) Reclassifications of financial assets

There have been no reclassifications of financial assets in 2020 or 2021.

Note 42: Transfers of financial assets

There were no significant transferred financial assets which were derecognised in their entirety, but with ongoing exposure. Details of transferred financial assets that continue to be recognised in full are as follows.

The Group and the Bank enter into repurchase and securities lending transactions in the normal course of business that do not result in derecognition of the financial assets as substantially all of the risks and rewards, including credit, interest rate, prepayment and other price risks are retained by the Group. In all cases, the transferee has the right to sell or repledge the assets concerned.

As set out in note 25, included within financial assets measured at amortised cost are loans transferred under the Group's securitisation and covered bond programmes. As the Group retains all or a majority of the risks and rewards associated with these loans, including credit, interest rate, prepayment and liquidity risk, they remain on the Group's balance sheet. Assets transferred into the Group's securitisation and covered bond programmes are not available to be used by the Group while the assets are within the programmes. However, the Group retains the right to remove loans from the covered bond programmes where they are in excess of the programme's requirements. In addition, where the Group has retained some of the notes issued by securitisation and covered bond programmes, the Group has the ability to sell or pledge these retained notes.

The table below sets out the carrying values of the transferred assets and the associated liabilities. For repurchase and securities lending transactions, the associated liabilities represent the Group's obligation to repurchase the transferred assets. For securitisation programmes, the associated liabilities represent the external notes in issue (note 25). The liabilities shown in the table below have recourse to the transferred assets.

	2021		2020

1 After impairment allowance.

2 The amounts offset in the balance sheet as shown above mainly represent derivatives and repurchase agreements with central clearing houses which meet the criteria for offsetting under IAS 32.

3 The Group enters into derivatives and repurchase and reverse repurchase agreements with various counterparties which are governed by industry standard master netting agreements. The Group holds and provides cash and securities collateral in respect of derivative transactions covered by these agreements. The right to set off balances under these master netting agreements or to set off cash and securities collateral only arises in the event of non-payment or default and, as a result, these arrangements do not qualify for offsetting under IAS 32.

The effects of over-collateralisation have not been taken into account in the above table.

The effects of over-collateralisation have not been taken into account in the above table.

Note 44: Financial risk management

Financial instruments are fundamental to the Group's activities and, as a consequence, the risks associated with financial instruments represent a significant component of the risks faced by the Group.

The primary risks affecting the Group through its use of financial instruments are: market risk, which includes interest rate risk and foreign exchange risk; credit risk; liquidity risk and capital risk. The following disclosures provide quantitative and qualitative information about the Group's exposure to these risks.

Credit risk

The Group's credit risk exposure arises in respect of the instruments below and predominantly in the United Kingdom. Credit risk appetite is set at Board level and is described and reported through a suite of metrics devised from a combination of accounting and credit portfolio performance measures, which include the use of various credit risk rating systems as inputs and assess credit risk at a counterparty level using three components: (i) the probability of default by the counterparty on its contractual obligations; (ii) the current exposures to the counterparty and their likely future development, from which the Group derives the exposure at default; and (iii) the likely loss ratio on the defaulted obligations, the loss given default. The Group uses a range of approaches to mitigate credit risk, including internal control policies, obtaining collateral, using master netting agreements and other credit risk transfers, such as asset sales and credit derivative based transactions.

Lloyds Bank plc
Notes to the accounts

Note 44: Financial risk management (continued)

(A) Maximum credit exposure

The maximum credit risk exposure of the Group and the Bank in the event of other parties failing to perform their obligations is detailed below. No account is taken of any collateral held and the maximum exposure to loss is considered to be the balance sheet carrying amount or, for non-derivative off-balance sheet transactions and financial guarantees, their contractual nominal amounts.

1 Offset items comprise deposit amounts available for offset, and amounts available for offset under master netting arrangements, that do not meet the criteria under IAS 32 to enable loans and advances and derivative assets respectively to be presented net of these balances in the financial statements.

2 Excluding equity shares.

3 Amounts shown net of related impairment allowances.

Note 44: Financial risk management (continued)

(B) Concentrations of exposure

The Group's management of concentration risk includes single name, industry sector and country limits as well as controls over the Group's overall exposure to certain products. As part of its credit risk policy, the Group considers sustainability risk (which incorporates Environmental (including climate), Social and Governance) in the assessment of Commercial Banking facilities.

At 31 December 2021 the most significant concentrations of exposure were in mortgages (comprising 66 per cent of total loans and advances to customers) and to financial, business and other services (comprising 14 per cent of the total).

Loans and advances to customers

¹ Includes both UK and overseas mortgage balances.

The Group's operations are predominantly UK-based and as a result an analysis of credit risk exposures by geographical region is not provided.

(C) Credit quality of assets

Loans and advances

The analysis of lending has been prepared based on the division in which the asset is held; with the business segment in which the exposure is recorded reflected in the ratings system applied. The internal credit ratings systems used by the Group differ between Retail and Commercial, reflecting the characteristics of these exposures and the way that they are managed internally; these credit ratings are set out below. All probabilities of default (PDs) include forward-looking information and are based on 12-month values, with the exception of credit-impaired.

Retail		Commercial	
Quality classification	IFRS 9 PD range	Quality classification	IFRS 9 PD range
RMS 1- 6	0.00-4.50%	CMS 1-10	0.00-0.50%
RMS 7-9	4.51-14.00%	CMS 11-14	0.51-3.00%
RMS 10	14.01-20.00%	CMS 15-18	3.01-20.00%
RMS 11-13	20.01-99.99%	CMS 19	20.01-99.99%
RMS 14	100.00%	CMS 20-23	100.00%

Stage 3 assets of the Group include balances of £650 million (2020: £179 million) (with outstanding amounts due of £1,279 million (2020: £732 million)) which have been subject to a partial write-off and where the Group continues to enforce recovery action.

Stage 2 and Stage 3 assets of the Group with a carrying amount of £1,540 million (2020: £22,200 million) were modified during the year. No material gain or loss was recognised by the Group.

As at 31 December 2021 assets that had been previously modified while classified as Stage 2 or Stage 3 and were classified as Stage 1 amounted to £6,657 million (not material at 31 December 2020).

Derivative assets

An analysis of derivative assets is given in note 14. The Group reduces exposure to credit risk by using master netting agreements and by obtaining collateral in the form of cash or highly liquid securities. In respect of the net credit risk relating to derivative assets of £3,142 million for the Group and £4,879 million for the Bank (2020: £4,968 million for the Group and £9,843 million for the Bank), cash collateral of £1,642 million for the Group and £930 million for the Bank (2020: £2,702 million for the Group and £1,308 million for the Bank) was held and a further £67 million for the Group and £37 million for the Bank (2020: £151 million for the Group and £116 million for the Bank) was due from OECD banks.

Financial guarantees and irrevocable loan commitments

Financial guarantees represent undertakings that the Group will meet a customer's obligation to third parties if the customer fails to do so. Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. The Group is theoretically exposed to loss in an amount equal to the total guarantees or unused commitments, however, the likely amount of loss is expected to be significantly less. Most commitments to extend credit are contingent upon customers maintaining specific credit standards.

(D) Collateral held as security for financial assets

The principal types of collateral accepted by the Group include: residential and commercial properties; charges over business assets such as premises, inventory and accounts receivable; financial instruments, cash and guarantees from third-parties. The terms and conditions associated with the use of the collateral are varied and are dependent on the type of agreement and the counterparty. The Group holds collateral against loans and advances and irrevocable loan commitments; qualitative and, where appropriate, quantitative information is provided in respect of this collateral below. Collateral held as security for financial assets at fair value through profit or loss and for derivative assets is also shown below.

The Group holds collateral in respect of loans and advances to banks and customers as set out below. The Group does not hold collateral against debt securities, comprising asset-backed securities and corporate and other debt securities, which are classified as financial assets held at amortised cost.

Loans and advances to banks

There were reverse repurchase agreements which are accounted for as collateralised loans within loans and advances to banks with a carrying value of £2,996 million for the Group and the Bank (2020: £1,626 million for the Group and the Bank), against which the Group and the Bank held collateral with a fair value of £92 million (2020: £1,040 million for the Group and the Bank).

These transactions were generally conducted under terms that are usual and customary for standard secured lending activities.

Loans and advances to customers

Retail lending

Mortgages

An analysis by loan-to-value ratio of the Group's and the Bank's residential mortgage lending is provided below. The value of collateral used in determining the loan-to-value ratios has been estimated based upon the last actual valuation, adjusted to take into account subsequent movements in house prices, after making allowances for indexation error and dilapidations.

In some circumstances, where the discounted value of the estimated net proceeds from the liquidation of collateral (i.e. net of costs, expected haircuts and anticipated changes in the value of the collateral to the point of sale) is greater than the estimated exposure at default, no credit losses are expected and no ECL allowance is recognised.

Other

The majority of non-mortgage retail lending is unsecured. At 31 December 2021, Stage 3 non-mortgage lending amounted to £1,104 million, net of an impairment allowance of £438 million (2020: £538 million, net of an impairment allowance of £492 million).

Stage 1 and Stage 2 non-mortgage retail lending amounted to £55,959 million (2020: £58,183 million). Lending decisions are predominantly based on an obligor's ability to repay rather than reliance on the disposal of any security provided. Where the lending is secured, collateral values are rigorously assessed at the time of loan origination and are thereafter monitored in accordance with business unit credit policy.

The Group's credit risk disclosures for unimpaired non-mortgage retail lending report assets gross of collateral and therefore disclose the maximum loss exposure. The Group believes that this approach is appropriate.

Commercial lending

Reverse repurchase transactions

At 31 December 2021 there were reverse repurchase agreements which were accounted for as collateralised loans with a carrying value of £46,712 million for the Group and the Bank (2020: £54,447 million for the Group and the Bank) against which the Group held collateral with a fair value of £48,423 million (2020: £60,441 million) and the Bank held collateral worth £48,423 million (2020: £55,031 million) all of which the Group was able to repledge. These transactions were generally conducted under terms that are usual and customary for standard secured lending activities.

Stage 3 secured lending

The value of collateral is re-evaluated and its legal soundness re-assessed if there is observable evidence of distress of the borrower; this evaluation is used to determine potential loss allowances and management's strategy to try to either repair the business or recover the debt.

At 31 December 2021, Stage 3 secured commercial lending amounted to £608 million, net of an impairment allowance of £198 million (2020: £704 million, net of an impairment allowance of £293 million). The fair value of the collateral held in respect of impaired secured commercial lending was £693 million (2020: £753 million) for the Group. In determining the fair value of collateral, no specific amounts have been attributed to the costs of realisation. For the purposes of determining the total collateral held by the Group in respect of impaired secured commercial lending, the value of collateral for each loan has been limited to the principal amount of the outstanding advance in order to eliminate the effects of any over-collateralisation and to provide a clearer representation of the Group's exposure.

Stage 3 secured commercial lending and associated collateral relates to lending to property companies and to customers in the financial, business and other services; transport, distribution and hotels; and construction industries.

Stage 1 and Stage 2 secured lending

For Stage 1 and Stage 2 secured commercial lending, the Group reports assets gross of collateral and therefore discloses the maximum loss exposure. The Group believes that this approach is appropriate as collateral values at origination and during a period of good performance may not be representative of the value of collateral if the obligor enters a distressed state.

Stage 1 and Stage 2 secured commercial lending is predominantly managed on a cash flow basis. On occasion, it may include an assessment of underlying collateral, although, for Stage 3 lending, this will not always involve assessing it on a fair value basis. No aggregated collateral information for the entire unimpaired secured commercial lending portfolio is provided to key management personnel.

Financial assets at fair value through profit or loss (excluding equity shares)

Securities held as collateral in the form of stock borrowed amounted to £7,052 million for the Group and £7,090 million for the Bank (2020: £11,925 million for the Group and £17,391 million for the Bank). Of this amount, £1,086 million for the Group and £1,214 million for the Bank (2020: £10,899 million for the Group and £16,639 million for the Bank) had been resold or repledged as collateral for the Group's own transactions.

These transactions were generally conducted under terms that are usual and customary for standard secured lending activities.

Derivative assets, after offsetting of amounts under master netting arrangements

The Group reduces exposure to credit risk by using master netting agreements and by obtaining collateral in the form of cash or highly liquid securities. In respect of the net derivative assets after offsetting of amounts under master netting arrangements of £3,142 million for the Group and £4,879 million for the Bank (2020: £4,968 million for the Group and £9,843 million for the Bank), cash collateral of £1,621 million for the Group and £930 million for the Bank (2020: £2,702 million for the Group and £1,308 million for the Bank) was held.

Lloyds Bank plc
Notes to the accounts

Note 44: Financial risk management (continued)

Irrevocable loan commitments and other credit-related contingencies

At 31 December 2021, there were irrevocable loan commitments and other credit-related contingencies of £58,030 million for the Group and £32,730 million for the Bank (2020: £61,604 million for the Group and £34,940 million for the Bank). Collateral is held as security, in the event that lending is drawn down, on £17,149 million for the Group and £1,002 million for the Bank (2020: £19,548 million for the Group and £1,720 million for the Bank) of these balances.

Collateral repossessed

During the year, £86 million of collateral was repossessed (2020: £125 million), consisting primarily of residential property. In respect of retail portfolios, the Group does not take physical possession of properties or other assets held as collateral and uses external agents to realise the value as soon as practicable, generally at auction, to settle indebtedness. Any surplus funds are returned to the borrower or are otherwise dealt with in accordance with appropriate insolvency regulations. In certain circumstances the Group takes physical possession of assets held as collateral against commercial lending. In such cases, the assets are carried on the Group's balance sheet and are classified according to the Group's accounting policies.

(E) Collateral pledged as security

The Group pledges assets primarily for repurchase agreements and securities lending transactions which are generally conducted under terms that are usual and customary for standard securitised borrowing contracts.

Repurchase transactions

Amortised cost

There are balances arising from repurchase transactions with banks of £30,085 million for the Group and £57 million for the Bank (2020: £18,767 million for the Group and £5,087 million for the Bank), which include amounts due under the Bank of England's Term Funding Scheme with additional incentives for SMEs (TFSME); the fair value of the collateral provided under these agreements at 31 December 2021 was £39,918 million for the Group and £44 million for the Bank (2020: £18,874 million for the Group and £5,197 million for the Bank).

There are balances arising from repurchase transactions with customers of £21 million for the Group and the Bank (2020: £9,417 million for the Group and the Bank); the fair value of the collateral provided under these agreements at 31 December 2021 was £112 million for the Group and the Bank (2020: £8,087 million for the Group and the Bank).

Financial liabilities at fair value through profit or loss

The fair value of collateral pledged in respect of repurchase transactions, accounted for as secured borrowing, where the secured party is permitted by contract or custom to repledge was £nil for the Group and the Bank at 31 December 2021 (2020: £nil for the Group and the Bank).

Securities lending transactions

The following on-balance sheet financial assets have been lent to counterparties under securities lending transactions:

	The Group		The Bank	
	2021	2020	2021	2020
	£m	£m	£m	£m
Financial assets at fair value through profit or loss	—	—	—	1,365
Financial assets at fair value through other comprehensive income	2,724	2,344	2,946	969
Total	2,724	2,344	2,946	2,334

Securitisations and covered bonds

In addition to the assets detailed above, the Group also holds assets that are encumbered through the Group's asset-backed conduits and its securitisation and covered bond programmes. Further details of these assets are provided in notes 25 and 40.

Market risk

(A) Interest rate risk

Interest rate risk arises from the different repricing characteristics of the assets and liabilities. Liabilities are either insensitive to interest rate movements, for example interest free or very low interest customer deposits, or are sensitive to interest rate changes but bear rates which may be varied at the Group's discretion and that for competitive reasons generally reflect changes in the UK Bank Rate, set by the Bank of England. The rates on the remaining deposits are contractually fixed for their term to maturity.

Many banking assets are sensitive to interest rate movements; there is a large volume of managed rate assets such as variable rate mortgages which may be considered as a natural offset to the interest rate risk arising from the managed rate liabilities. However, a significant proportion of the Group's lending assets, for example many personal loans and mortgages, bear interest rates which are contractually fixed. Interest rate sensitivity analysis relating to the Group's banking activities is set out in the tables marked audited on pages 25 to 26.

The Group's risk management policy is to optimise reward while managing its market risk exposures within the risk appetite defined by the Board. The largest residual risk exposure arises from balances that are deemed to be insensitive to changes in market rates (including current accounts, a portion of variable rate deposits and investable equity), and is managed through the Group's structural hedge. The structural hedge consists of longer-term fixed rate assets or interest rate swaps and the amount and duration of the hedging activity is reviewed regularly by the Lloyds Banking Group Asset and Liability Committee.

The Group and the Bank establish hedge accounting relationships for interest rate risk using cash flow hedges and fair value hedges. The Group and the Bank are exposed to cash flow interest rate risk on their variable rate loans and deposits together with their floating rate subordinated debt. The derivatives used to manage the structural hedge may be designated into cash flow hedges to manage income statement volatility. The economic items related to the structural hedge, for example current accounts, are not eligible hedged items under IAS 39 for inclusion into accounting hedge relationships. The Group and the Bank are exposed to fair value interest rate risk on their fixed rate customer loans, their fixed rate customer deposits and the majority of their subordinated debt. The Group and the Bank apply netting between similar risks before applying hedge accounting.

Lloyds Bank plc
Notes to the accounts

Note 44: Financial risk management (continued)

Hedge ineffectiveness arises during the management of interest rate risk due to residual unhedged risk. Sources of ineffectiveness, which the Group may decide to not fully mitigate, can include basis differences, timing differences and notional amount differences. The effectiveness of accounting hedge relationships is assessed between the hedging derivatives and the documented hedged item, which can differ to the underlying economically hedged item.

At 31 December 2021 the aggregate notional principal of interest rate and other swaps (predominately interest rate) designated as fair value hedges was £147,724 million (2020: £185,958 million) for the Group and £56,698 million (2020: £58,030 million) for the Bank with a net fair value liability of £266 million (2020: asset of £81 million) for the Group and a net fair value liability of £285 million (2020: liability of £4 million) for the Bank (note 14). There were gains recognised on the hedging instruments of £1,885 million (2020: losses of £87 million) for the Group and losses of £296 million (2020: losses of £225 million) for the Bank. There were losses on the hedged items attributable to the hedged risk of £1,690 million (2020: gains of £633 million) for the Group and gains of £282 million (2020: gains of £198 million) for the Bank. The gains and losses relating to the fair value hedges are recorded in net trading income.

The notional principal of the interest rate swaps designated as cash flow hedges at 31 December 2021 was £97,942 million (2020: £316,776 million) for the Group and £26,876 million (2020: £93,353 million) for the Bank with a net fair value asset of £nil (2020: asset of £28 million) for the Group and a net fair value asset of £nil (2020: liability of £31 million) for the Bank (note 14). In 2021, ineffectiveness recognised in the income statement that arises from cash flow hedges was a loss of £58 million (2020: gain of £259 million) for the Group and a loss of £24 million (2020: loss of £27 million) for the Bank.

Interest Rate Benchmark Reform

During 2021, the Group has continued to manage the transition to alternative benchmark rates under its Group-wide IBOR transition programme including delivery of the core changes required to its technology and business processes. Through this programme, the Group has ensured that the most appropriate benchmark rate is used for new products, has transitioned the vast majority of its legacy products to new benchmark rates for IBORs ceasing immediately after 31 December 2021 and has managed the impacts and risks relating to systems, processes, accounting and reporting. The Group does not expect material changes to its risk management approach and strategy as a result of interest rate benchmark reform.

The material risks identified include the following:

Conduct and litigation risk. The Group may be exposed to conduct and litigation charges as a direct result of inappropriate or negligent actions taken during IBOR transition resulting in detriment to the customer. The Group is working closely with its counterparties to avoid this outcome.

Market risk. IBOR transition is expected to lead to changes in the Group's market risk profile which will continue to be monitored and managed within the appropriate risk appetites. The key change is expected to be on the management of basis risk profile during the period when alternative benchmark rates are referenced in contracts up to the cessation of the in-scope IBOR index.

Credit risk. Clients may wish to renegotiate the terms of existing transactions as a consequence of IBOR reform. This could lead to a change in the credit risk exposure of the client depending on the outcome of the negotiations. The Group will continue to monitor and manage changes within the appropriate risk appetites.

Accounting risk. If IBOR transition is finalised in a manner that does not permit the application of the reliefs introduced in the IFRS Phase 2 amendments, the financial instrument may be required to be derecognised and a new instrument recognised. In addition, where instruments used in hedge accounting relationships are transitioned either at different times or to different benchmarks, this may result in additional volatility to the income statement either through hedge accounting ineffectiveness or failure of the hedge accounting relationships.

Operational risk. Additional operational risks may arise due to the IBOR transition programme impacting all businesses and functions within the Group and leading to the implementation of changes to technology, operations, client communication and the valuation of in-scope financial instruments.

At 31 December 2021, the Group had successfully transitioned all derivative products settled through the London Clearing House (LCH) that were dependent on Sterling, Euro, Japanese Yen and Swiss Franc LIBOR to alternative benchmark rates and has transitioned the majority of its commercial lending contracts from Sterling LIBOR to alternative benchmark rates. US Dollar LIBOR is not expected to cease before 30 June 2023 and the Group continues to work on its planned transition to alternative benchmark rates for those financial contracts currently referencing US dollar LIBOR.

Lloyds Bank plc
Notes to the accounts

Note 44: Financial risk management (continued)

At 31 December 2021, the Group and the Bank had the following significant exposures impacted by interest rate benchmark reform which have yet to transition to the replacement benchmark rate:

	The Group				The Bank			
	Sterling LIBOR £m	US Dollar LIBOR £m	Other LIBOR £m	Total £m	Sterling LIBOR £m	US Dollar LIBOR £m	Other LIBOR £m	Total £m
Non-derivative financial assets								
Financial assets at fair value through profit or loss	131	172	—	303	33	96	—	129
Loans and advances to banks and reverse repurchase agreements	—	3,252	—	3,252	—	3,252	—	3,252
Loans and advances to customers and reverse repurchase agreements	3,419	2,549	—	5,968	2,912	1,924	—	4,836
Due from fellow Lloyds Banking Group undertakings	—	—	—	—	7	127	—	134
Debt securities	—	—	—	—	—	—	—	—
Financial assets at amortised cost	3,419	5,801	—	9,220	2,919	5,303	—	8,222
	3,550	5,973	—	9,523	2,952	5,399	—	8,351
Non-derivative financial liabilities								
Financial liabilities at fair value through profit or loss	—	(100)	(3)	(103)	—	(100)	(3)	(103)
Debt securities in issue	—	(54)	(26)	(80)	—	(54)	(6)	(60)
	—	(154)	(29)	(183)	—	(154)	(9)	(163)
Derivative notional/contract amount								
Interest rate	4,271	120,797	—	125,068	1,411	120,502	10	121,923
Cross currency	—	22,663	—	22,663	—	21,868	—	21,868

As at 31 December 2021, the Sterling LIBOR balances in the above table relate to contracts that have not converted to a risk-free rate. The balance includes both contracts that mature in 2022 with further LIBOR interest rate fixings in the period and contracts where the counterparty has not yet agreed to fallback provisions that would have effect when LIBOR ceases. In both cases, these contracts will have both cash flows and valuations determined on a 'synthetic' LIBOR basis for reporting periods during 2022, unless they are transitioned to alternative benchmark rates.

In respect of the Group's hedge accounting relationships, for the purposes of determining whether:

- A forecast transaction is highly probable
- Hedged future cash flows are expected to occur
- A hedge is expected to be highly effective in achieving offsetting changes in fair value or cash flows attributable to the hedged risk
- An accounting hedging relationship should be discontinued because of a failure of the retrospective effectiveness test

the Group assumes that the interest rate benchmark on which the hedged risk or the cash flows of the hedged item or hedging instrument are based is not altered by uncertainties resulting from interest rate benchmark reform. In addition, for a fair value hedge of a non-contractually specified benchmark portion of interest rate risk, the Group assesses only at inception of the hedge relationship and not on an ongoing basis that the risk is separately identifiable and hedge effectiveness can be measured. The Group's most significant hedge accounting relationships are exposed to the following interest rate benchmarks: Sterling LIBOR, US Dollar LIBOR and EURIBOR.

At 31 December 2021, the Group expects that EURIBOR will continue to exist as a benchmark rate for the foreseeable future. Accordingly, the Group does not consider its fair value or cash flow hedges of the EURIBOR benchmark interest rate to be directly affected by interest rate benchmark reform and as a result does not anticipate changing the hedged risk to a different benchmark.

The notional amount of the hedged items that the Group has designated into cash flow hedge relationships that is directly affected by the interest rate benchmark reform is £2,001 million for the Group and £nil for the Bank, all of which is in respect of US Dollar LIBOR (2020: £18,107 million for the Group and £11,221 million for the Bank, of which £15,120 million for the Group and £11,221 million for the Bank related to Sterling LIBOR). These are principally loans and advances to customers in Commercial Banking.

The interest rate benchmark reforms also affect assets designated in fair value hedges with a notional amount of £3,370 million for the Group and £3,370 million for the Bank all of which is in respect of US Dollar LIBOR (2020: £107,340 million for the Group and £16,430 million for the Bank, of which £103,438 million for the Group and £12,535 million for the Bank was in respect of Sterling LIBOR), and liabilities designated in fair value hedges with a notional amount of £9,094 million for the Group and £8,129 million for the Bank all of which is in respect of US Dollar LIBOR (2020: £19,567 million for the Group and £17,775 million for the Bank, of which £6,172 million for the Group and £5,455 million for the Bank was in respect of Sterling LIBOR, and £13,395 million for the Group and £12,320 million for the Bank was in respect of US Dollar LIBOR). These fair value hedges principally relate to mortgages in Retail and debt securities in issue (for the Bank, principally debt securities in issue).

At 31 December 2021, the notional amount of the hedging instruments in hedging relationships to which these amendments apply is £17,954 million for the Group and £15,462 million for the Bank, all of which relates to US Dollar LIBOR (2020: £439,139 million for the Group and £134,100 million for the Bank, of which £112,027 million for the Group and £21,226 million for the Bank related to Sterling LIBOR fair value hedges and £294,274 million for the Group and £93,353 million for the Bank related to Sterling LIBOR cash flow hedges).

Lloyds Bank plc
Notes to the accounts

Note 44: Financial risk management (continued)

(B) Foreign exchange risk

The corporate and retail businesses incur foreign exchange risk in the course of providing services to their customers. All non-structural foreign exchange exposures in the non-trading book are managed centrally within allocated exposure limits. Trading book exposures in the authorised trading centres are allocated exposure limits. The limits are monitored daily by the local centres and reported to the central market and liquidity risk function in London.

The Group manages foreign currency accounting exposure via cash flow hedge accounting, utilising currency swaps and forward foreign exchange trades.

Risk arises from the Group's investments in its overseas operations. The Group's structural foreign currency exposure is represented by the net asset value of the foreign currency equity and subordinated debt investments in its subsidiaries and branches. Gains or losses on structural foreign currency exposures are taken to reserves. The Group ceased all hedge accounting of the currency translation risk of the net investment in foreign operations in 2018.

The Group has overseas operations in Europe. Structural foreign currency exposures in respect of operations with a Euro functional currency are £115 million (2020: £113 million) for the Group and £nil (2020: £2 million) for the Bank.

Liquidity risk

Liquidity risk is defined as the risk that the Group has insufficient financial resources to meet its commitments as they fall due, or can only secure them at excessive cost. Liquidity risk is managed through a series of measures, tests and reports that are primarily based on contractual maturity. The Group carries out monthly stress testing of its liquidity position against a range of scenarios, including those prescribed by the PRA. The Group's liquidity risk appetite is also calibrated against a number of stressed liquidity metrics.

The tables below analyse financial instrument liabilities of the Group and the Bank on an undiscounted future cash flow basis according to contractual maturity, into relevant maturity groupings based on the remaining period at the balance sheet date; balances with no fixed maturity are included in the over 5 years category. Certain balances, included in the table below on the basis of their residual maturity, are repayable on demand upon payment of a penalty.

The Group	Up to 1 month	1-3 months	3-12 months	1-5 years	Over 5 years	Total

Capital risk

Capital is actively managed on an ongoing basis for both the Group and its regulated banking subsidiaries, and the associated capital policies and procedures are subject to regular review. The Group measures both its capital requirements and the amount of capital resources that it holds to meet those requirements through applying capital directives and regulations as implemented in the UK by the Prudential Regulation Authority (PRA) and supplemented through additional regulation under the PRA Rulebook and associated statements of policy, supervisory statements and other guidance. Regulatory capital ratios are considered a key part of the budgeting and planning processes and forecast ratios are reviewed by the Group and Ring-Fenced Banks Asset and Liability Committee. Target capital levels take account of current and future regulatory requirements, capacity for growth and to cover uncertainties. Details of the Group's capital resources are provided in the table marked audited on page 50.

Note 45: Cash flow statements

(A) Change in operating assets

	The Group			The Bank		
	2021 £m	2020 £m	2019 £m	2021 £m	2020 £m	2019 £m

¹ When considering the movement on each line of the balance sheet, the impact of foreign exchange rate movements is removed in order to show the underlying cash impact.

(D) Analysis of cash and cash equivalents as shown in the balance sheet

	The Group			The Bank		
	2021	2020	2019	2021	2020	2019
	£m	£m	£m	£m	£m	£m
Cash and balances at central banks	54,279	49,888	38,880	49,618	45,753	35,741
Less mandatory reserve deposits ¹	(4,777)	(4,392)	(3,177)	(963)	(954)	(764)
	49,502	45,496	35,703	48,655	44,799	34,977
Loans and advances to banks and reverse repurchase agreements	7,474	5,950	4,852	7,287	5,656	4,453
Less amounts with a maturity of three months or more	(3,786)	(2,480)	(1,941)	(3,712)	(2,387)	(1,648)
	3,688	3,470	2,911	3,575	3,269	2,805
Total cash and cash equivalents	53,190	48,966	38,614	52,230	48,068	37,782

¹ Mandatory reserve deposits are held with local central banks in accordance with statutory requirements; these deposits are not available to finance the Group's day-to-day operations.

Note 46: Future accounting developments

The IASB has issued a number of minor amendments to IFRSs effective 1 January 2022 and in later years (including IFRS 9 *Financial Instruments* and IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*). These amendments are not applicable for the year ended 31 December 2021 and have not been applied in preparing these financial statements. They are not expected to have a significant impact on the Group.

Note 47: Other information

Lloyds Bank plc is incorporated as a public limited company and registered in England with the registered number 2065. Lloyds Bank plc's registered office is 25 Gresham Street, London, EC2V 7HN, and its principal executive offices are located at 25 Gresham Street, London, EC2V 7HN.

Lloyds Bank plc and its subsidiaries form a leading UK-based financial services group, whose businesses provide a wide range of banking and financial services in the UK and in certain locations overseas.
